

t-distribution Probability

This is similar to the Normal distribution active table. **Tab** to move between the editable boxes, and press **Enter** or **Return** to register your new typing. The minimum and maximum numbers are ± 3.5 but the shape of the t distribution curve does not change appreciably with different values. The options for displaying the probabilities are $T < t$, $T > t$, $T < -t + T > t$, and $-t < T < t$.
