

BizWiz & M-B-A-nalyst Helpful Hint:

BizWiz and M-B-A-nalyst each incorporate a useful *Keep-On-Top* feature. When enabled, the calculator will always remain on top of all other windows. It won't be necessary to move other windows around in order to find the calculator on your desktop.

This feature can be very convenient when you are running an application which occupies a large portion of the screen such as a word processor or spreadsheet.

Keep-On-Top works even when the calculator is minimized. In this case, its icon will remain visible at all times and won't be obscured by other windows.

To enable the *Keep-On-Top* feature, select it from the **E**dit menu.
