

Palette for Control Panel
Version 1.0 10/13/92 by Mark Gamber
(c)1992 Babarsoft

To begin using this program, copy **PALDLG.CPL** and **PALDLG.HLP** to your Windows system directory, most commonly "**WINDOWS\SYSTEM**". Upon starting Control Panel, you should see a new icon consisting of what looks like a palette of colors. Double click the icon to begin. Online help is available by pressing the "Help" button

Notes:

This program is for VGA graphic adapters and compatible capable of at least 16 colors. It may not work on all systems and no guarantee is implied. The user shall hold the program and its author free of liability due to inability to use, misuse or hardware incompatibility arising from use of the program. If the user cannot abide by this, remove the software immediately and do not use. The software may be freely distributed.
