Special offers for up-graders.

Buy in the next 60 days and pay \$24.95 and you'll be saving a massive \$25.

Special offer for new customers.

Buy Publisher 4 today, pay \$49.95 and get 10,000 Photos Vol 1 **FREE** worth \$9.95.

Contact details and order forms can be found in the greenstreet program group under the Start Menu.

The program has been edited so that it downloads efficiently. In doing so we've had to remove some of the features that appear in the full version. So when you've been amazed by power and ease-of-use of the download version you get a whole load more in the full product!

Below is a list of great features and utilities, which you can look forward to receiving in the full version.

- **PowerText3D 2.0.** This great application allows you to create stunning two- and three-dimensional text effects to add some sparkle to your document.
- **Contact Organizer, Mail Merge AddressBook.** Store all of your work and home contact details and create mailing labels, envelopes etc. AddressBook will reformat your addresses to suit the country that you're sending them to.
- **Images and Clipart.** The full version of the program comes with 100s of royalty-free images and clipart for use in your documents.
- **Full spell checking and thesaurus capability.**
- **Full set of text import filters.**
- **Fonts.** Publisher 4 comes with dozens of fonts, all taken from our professionally designed collections.
- **Sample documents.** There are dozens of sample documents that, together with the Document Re-styler, allow you to create a whole host of documents on which to base your own designs.
- **Utility programs.** Publisher comes with some great utility programs like Font Manager, Snapshot, PhotoFX 1.11 and Keypad.

Publishing Studio Edition 4

The complete creative experience. greenstreet® Publishing Studio is a seamless combination of design and page layout applications, giving you everything you need to create a huge range of documents, effortlessly.

greenstreet® Publisher, greenstreet® Draw, greenstreet® PhotoFX and greenstreet® PowerText, combined, give you unbelievable software power so you spend less time swapping between applications and more time designing. A fuller description of the product can be found at www.gstsoft.com. It has to be seen to be believed!

Publisher 4.0 Known Problems

- Even though the text filters (apart from .TXT and .RTF) aren't available in this version the options still appear on the Import Text dialog. Attempting to import one of these file types will cause an error message to appear.
- Documents exported via Web Export will appear more faithfully if you ensure that the line spacing is set to 'tight'.
- We don't support MS Equation files as objects.
- It is not possible to export all of the characters used by to represent boolean operators by the spreadsheeting code e.g. the 'thumbs up/down' or the 'smiley/sad face'.
- If you attempt to browse a folder with more than 256 images in it the browser may display the wrong preview.
- If the document restyler is used to change document types, then the custom fields will not be updated.
- If a document is exported to web then the carriage returns will not export the same size as in the original document.
- Frames which repel text and are overlaid on a frame containing text will not be exported as they appear in the original document. The original document must be edited manually so that the text frame doesn't overlap frames on top.
- Pictures with fades applied will not always export to web correctly due to the limited transparency support of most browsers.
- Leaders may not export correctly (a leader is a row of full stops used in contents pages eg: 'Chapter 1.....3')
