

Filename: transfmr.avi
Source: German Photomorph Contest Entry
Approx Play Time: 11 seconds
Size of AVI file: 9,983,104 bytes
Resolution: 240x180

Comments:

A sophisticated photo editing software package was probably used to create the metalized versions of the two spaceships. Note that there appears to be a couple of transition images during the morph. When combined with other graphics utilities, *PhotoMorph* becomes a powerful tool in the animator's arsenal. See the ***Liquid Metal Morphing*** section of ***How Pro's Morph*** for more ideas on how to create these effects.

Unfortunately, this AVI file appears to be uncompressed and will play sluggishly from a CD-ROM drive. Try copying this file to your hard disk for better performance. To learn why this happens, turn to the ***Advanced Tips & Tricks*** section of ***How Pro's Morph***.
