Upgrading To SoundZ for Windows From DOS Versions 4.00 & Later:

To prevent loss of any data do the following:

1. Enter the SoundZ for DOS program, and go to the Default SetUp screen. Write down the data file name listed there.

2. Copy all files with SDZ and DBT extension from the DOS version to another disk/location and set aside.

2. Run SETUP.EXE from the disk containing SoundZ for Windows.

4. Start the program, once the program starts you will be presented with a typical Windows file box. This allows to create a SoundZ data file for use. You MUST create a new data file for SoundZ for Windows, you can not use the files created by the DOS version.

If the desired location for your data file is on a different drive, select the drive you want from the Drives box.

In the Directories box, double-click the directory you want. Or press the UP ARROW or DOWN ARROW key to select the directory, and then press ENTER. The current directory will initially be the same directory as SoundZ.

In the File Name box: Enter the name of the data file you want to create and hit the OK button. The program will create the file and then enter the menuing system.

5. Use the Import option from the Utilities menu, to bring in your old data files. The data file name will be the one you wrote down in Step #1. It will take approx. 30 seconds per 50 disks for the Import.

Upgrading To SoundZ for Windows From Unregistered/Previous Versions 2.00 & Later:

To prevent loss of any data do the following:

1. Use the BackUp command from the File menu to back up data files.

2. Run the SETUP.EXE from the floppy disk containing SoundZ for Windows.

3. During the installation of the the files, anytime you receive a query about overwriting the older files, allow the program to do this by answering "Y".

4. All old data files will be upgraded automatically, and you will be prompted for the registered user's name..

For DOS Versions Prior To 4.00 & After 3.00:

Use the same instructions as version 4.00, but insetad of using the Import option use the Upgrade option (Registered Version only).

For DOS Versions Prior To 3.00:

There is no internal way to upgrade the data files from these versions, the changes have been too dramatic. If you are a registered user, copy all files with the extension DAT and the COLOUR.SET file and send the disk to Unicorn Software along with $10.00 and we will upgrade the data files for you and send them back by return mail. (Registered Users Only).
