Proprietary Information

The following names are service marks of CompuServe Incorporated:

B Protocol
B+ Protocol
CompuServe's CB Simulator
CompuServe's Citizen Band Simulator
CompuServe Directory
CompuServe Mail
Executive News Service
WinCIM

The following names are registered marks of CompuServe Incorporated:

CompuServe
CompuServe Information Manager
Online Today

All other brand and product names are marks or registered marks of their respective companies.

WinCIM is the property of CompuServe Incorporated. A portion of WinCIM was developed by Intuitive Software Systems, Inc.

Help File Updates

Depending upon the particular version of WinCIM that you have, there might be a more recent or more extensive WinCIM help file available. You can obtain the latest WinCIM help file from the WinCIM Information Area.

1. Choose **Go** from the Services Menu.
2. Type WINCIM in the box beside **Service**.
3. Select **OK**. This takes you to a menu for the WinCIM Information Area.
4. Select the choice for downloading WinCIM files.

Software Updates and Announcements

The WinCIM Information Area tells you how to obtain the latest updates for WinCIM, WinCIM Help, and the CompuServe Directory. You can also read WinCIM product announcements.

1. Choose **Go** from the Services Menu.
2. Type WINCIM in the box beside **Service**.
3. Select **OK**.

The WinCIM Support Forum

The WinCIM Support Forum is a free forum on CompuServe where you find answers to your WinCIM questions. The WinCIM Support Forum is staffed by CompuServe Customer Service representatives.

1. Choose **Go** from the Services Menu.
2. Type WCIMSUPPORT in the box beside **Service**.
3. Select **OK**.

Help: Displays this help page.

You see this dialog after you do any of the following:

- Click on the **Create Folder** icon on the News Toolbox or choose **Create Folder** from the Stories menu.

- Select  at an Update Folder dialog.

You see this dialog after you do any of the following:

- Select  at a **Select Folder** dialog.
- Select  at a **Search for Stories** dialog.
- Select  on a Personal folder at a **Select Folder** dialog.

You see this dialog after you do any of the following:

- Choose **Set Function Keys** from the Special menu in CB
- Choose **Set Function Keys** from the Special menu in Terminal Emulation.
- Select  at the **General Preferences** dialog.

You see this dialog after you do any of the following:

- Click on the **Who's Here** icon on the **CB Toolbox** or choose **Who's Here** from the People menu in CB.

- Select  at the **Channel Selector** dialog.

You see this dialog after you do any of the following:

- Select  at a **Search for Files** dialog.
- Select  at a **Library Sections** dialog.

You see this dialog after you do any of the following:

- Select  from a **Message Search** dialog.
- Select  at a **Message Sections** dialog.

You see this dialog after you do any of the following:

- Click on the **Notices** icon on the **Forum Toolbox** or choose **Notices** from the Special menu in a forum.
- Choose **Descriptions** from the Messages menu in a forum.
- Choose **Descriptions** from the Library menu in a forum.
- Choose **Descriptions** from the Conference menu in a forum.

You see this dialog after you do any of the following:

- Select  at the **Get New Mail** dialog.
- Select  at the **In-Basket** dialog.

You get here by clicking on the **Address Book** icon or by choosing **Address Book** from any of these menus:

- Mail menu on the initial Information Manager desktop.
- Messages menu in a forum.
- Special menu in CB, Terminal Emulation, or ENS.

You get here by clicking on the **Filing Cabinet** icon or by choosing **Filing Cabinet** from any of these menus:

- Mail menu on the initial Information Manager desktop.
- Messages menu in a forum.
- Special menu in CB, Terminal Emulation, or ENS.

You get here by clicking on the **In-Basket** icon or by choosing **In-Basket** from any of these menus:

- Mail menu on the initial Information Manager desktop.
- Messages menu in a forum.
- Special menu in CB, Terminal Emulation, or ENS.

You get here by clicking on the **Out-Basket** icon or by choosing **Out-Basket** from any of these menus:

- Mail menu on the initial Information Manager desktop.
- Messages menu in a forum.
- Special menu in CB, Terminal Emulation, or ENS.

You see this dialog after you select  from any of the following dialogs:

- A **Story** dialog.
- A **Story** dialog in the Filing Cabinet.
- A **Forum Message** dialog.
- A Mail **Message** dialog in your CompuServe mailbox.

You see this dialog after you select  from any of the following dialogs:

- A **Forum Reply** dialog.
- A **Create Mail** dialog.
- A Mail **Message** dialog in your In Basket or Filing Cabinet.

You see this dialog after you do any of the following:

- Select  at the **Channel Selector** dialog.
- Select  at the **Conference Rooms** dialog.

You see this dialog after you do any of the following:

- Select  at the **Filing Cabinet** dialog.
- Select  at the **Paste From** dialog after selecting the **Filing Cabinet** option and highlighting a listed folder.

You see this dialog after you do any of the following:

- Select  at the **Address Book** dialog.
- Select  or  at a **Forum Message** dialog.

Accessing a Service

There are many ways to access services on CompuServe. These four buttons on the **Ribbon** enable you to quickly find or access the services you want.

Accessing a Service Topics

[Browsing Services](#)

[Finding Services](#)

[Going Directly to a Service](#)

[Grouping Your Favorite Services](#)

CompuServe Mail

CompuServe Mail enables you to communicate with other members, as well as with users of other services, such as MCI Mail, AT&T Mail, and Internet.

CompuServe Mail Topics

[Address Book](#)

[Addressing CompuServe Mail](#)

[Copying Text](#)

[Creating a Forum Message](#)

[Searching for CompuServe Members](#)

[Searching Your CompuServe Mail](#)

[Sending a Mail File Message](#)

[Sending and Receiving Mail Automatically](#)

CB Simulator

CompuServe's CB Simulator lets you communicate with people all over the world. Just like on a traditional citizen's band radio, you can monitor and tune to channels to converse with other CBers, but rather than speak into a microphone, you type at a keyboard. Your comments are visible to others on the channel; their comments are visible to you.

To access the CB Simulator, choose **CB Simulator** from the Services menu, and then select either **Access CB General Band** or **Access CB Adult Band**.

If you are new to CB and want online assistance, select **Access CB General Band**, and then tune to Channel 2.

[Squelching a Person](#)

[Tracking People](#)

members: CompuServe makes it easy for CBers to get to know each other. Many members volunteer a profile of their interests and hobbies for the CB community. You can monitor conversations and talk with CBers on open channels or converse in closed, private groups. You can track member activity too with a special Tracking window that lets you see who is coming and going in CB.

File New

The **New** command takes you to your Windows Notepad where you can create a text file.

File Open...

The **Open** command takes you to an **Open** dialog where you can identify a text file you wish to open or a GIF file you wish to view. The file is displayed at your Notepad.

File Save

The **Save** command saves information displayed in an Information Manager text box, such as a forum or CompuServe Mail message or news article, into a file on your computer's hard disk or a floppy disk using a **Save As** dialog.

File Save As...

The **Save As...** command saves information displayed in an Information Manager text box, such as a forum or CompuServe Mail message or news article, into a file on your computer's hard disk or a floppy disk using a **Save As** dialog.

File Print...

The **Print** command lets you print information displayed in an Information Manager text box, such as online news articles and file abstracts, forum and CompuServe Mail messages, and other types of online text documents.

File Print Settings...

The **Print Settings...** command takes you to a **Printer Setup** dialog where you can modify your printer settings.

File Leave

The **Leave** command exits an online area, such as a service or forum on CompuServe, without disconnecting you from CompuServe, returning you to the Information Manager's Initial desktop.

File Disconnect

The **Disconnect** command disconnects you from CompuServe, returning you to the Information Manager's Initial desktop.

File Exit

The **Exit** command disconnects you from CompuServe (if you are connected), and then exits the Information Manager.

Help Contents

The **Contents** command displays a list of help topics from which you can learn more about the Information Manager.

Help Search for Help on...

The **Search for Help on...** command lets you find information using the help system search feature. You provide a word for which you want help; the help system will display any matching help topics for you.

Help How to Use Help

The **How to Use Help** command displays information about how to use the help system.

Help CompuServe Directory

The **CompuServe Directory** command displays a list of CompuServe services categories from which you can learn about each service and forum on CompuServe.

Help About CIM...

The **About CIM...** command displays the Information Manager **About WinCIM** box, which contains the Version number of WinCIM you are using, the date and Port ID of your last access, and the amount of disk space available on your microcomputer.

Window Tile

The **Tile** command redisplay windows on your desktop in such a way that each window becomes the same size.

Window Cascade

The **Cascade** command arranges the windows on your desktop in a tiered or cascading fashion.

Window Arrange Icons

The **Arrange Icons** command rearranges the icons on your desktop into neat rows and columns.

Window Close All

The **Close All** command closes all windows on your desktop.

Edit Undo

The **Undo** command cancels your most recent editing action.

Edit Cut

The **Cut** command moves a block of selected text from a forum or CompuServe Mail message you are composing into the Clipboard, overwriting whatever is there.

Cut is useful when you want to move a portion of text from one place to another in your document, or from one document to another using the **Paste** command; and because the contents of **Cut** remain in the Clipboard even after you exit the Information Manager, you can use **Cut** to move text from one application to another.

Edit Copy

The **Copy** command copies a block of selected text from an Information Manager text box, such as a news article or weather report or message composition box into the Clipboard, overwriting whatever is there.

Copy is useful when you want to duplicate certain text in various parts of your document.

Edit Paste

The **Paste** command inserts Clipboard text into a forum or CompuServe Mail message you are composing at the cursor position.

Paste is usually used in conjunction with **Cut** and **Copy**, although it can also be used to insert text that was in the Clipboard before you started up WinCIM.

Edit Clear

The **Clear** command deletes selected text without writing it to the Clipboard.

The **Undo** command can retrieve cleared text if used immediately after **Clear**.

Edit Wordwrap

The **Wordwrap** command enables or disables whether the words you type in text windows will automatically wrap to the next line without having to issue a carriage return.

Edit Select All

The **Select All** command selects all of the text in the active text window for cutting or copying.

Edit Fixed Font

The **Fixed Font** command lets you control the appearance of type in your Information Manager windows.

Edit Paste From...

The **Paste From...** command takes you to a **Paste From...** dialog where you specify the location of text to be pasted into a forum or CompuServe Mail message. You can paste your text from a text file on a disk or from an entry in your Filing Cabinet, In-Basket, or Out-Basket.

Edit Copy To...

The **Copy To...** command takes you to a **Copy To...** dialog where you can copy your selected text to a forum or CompuServe Mail message.

Services Favorite Places...

The **Favorite Places...** command takes you to your Favorite Places area where you can access your most frequently used services and forums from a customized list in a **Favorite Places** dialog.

Services Find...

The **Find...** command takes you to a **Find** dialog, where you can search for services on CompuServe. You can go directly to any service you find. You can also add the services you find to your Favorite Places.

Find... will attempt to connect you to CompuServe, if you are not already connected, to conduct its search.

Services Go...

The **Go...** command takes you to a **Go...** dialog where you can access a service if you know the service name.

Services What's New...

The **What's New...** command lets you learn about new mall merchants and services, promotions, ways to increase the value of CompuServe, and other news of interest to the entire CompuServe community.

What's New... will connect you to CompuServe if you are not already connected.

Services Special Events...

The **Special Events...** command lets you keep abreast of upcoming happenings, such as contests, services enhancements, promotions, bargains, and shopping specials by taking you to a CompuServe menu of special events.

Special Events... will connect you to CompuServe if you are not already connected.

Services Executive News

The **Executive News...** command takes you to the Executive News Service where you can access a comprehensive collection of various news wires and clip news stories into personal electronic folders.

Services Quotes...

The **Quotes...** command takes you to a **Stock Quotes** dialog where you can obtain stock quotes from a personalized list of ticker symbols.

Services Portfolio...

The **Portfolio...** command takes you to a **Stock Portfolio** dialog where you can obtain a portfolio report from a personalized list of ticker symbols.

Services Weather...

The **Weather...** command takes you to a **Weather** dialog where you can obtain a weather forecast locally or for selected cities or weather reporting stations in the United States and around the world.

Services CB Simulator

The **CB Simulator** command takes you to the CB Simulator's introductory menu where you can learn about CB and access one of two communication bands of 36 channels each.

Services Browse...

The **Browse...** command takes you to a pictorial **Services** window where you can explore CompuServe's hierarchy of services and forums at your own pace.

Mail Get New Mail

The **Get New Mail** command takes you to a **Get New Mail** dialog where you can read and delete CompuServe Mail messages or transfer them to your In-Basket.

Get New Mail will attempt to connect you to CompuServe if you are not already connected.

Mail Create Mail...

The **Create Mail...** command lets you compose and address a CompuServe Mail message.

Create Mail... takes you to a **Recipient List** dialog where you can assign recipient and carbon copies information using your Address Book; from there you access a **Create Mail** dialog where you compose the text of your message.

Mail Send/Receive All...

The **Send/Receive All...** command takes you to a **Send and Receive All Mail** dialog where you can have the Information Manager send your outgoing Out-Basket messages, as well as retrieve your incoming CompuServe mailbox messages into your In-Basket, automatically.

Mail Search New Mail

The **Search New Mail...** command takes you to a **Search New Mail** dialog where you can search for particular messages in your CompuServe mailbox.

Mail Send File...

The **Send File...** command lets you send a text or binary file using CompuServe Mail to any CompuServe member.

Send File... takes you to a **Recipient List** dialog where you can assign recipient and carbon copies information using your Address Book; from there you access a **Send File Message** dialog where you provide summary information about the file you are sending.

In-Basket

The **In-Basket** command opens your In Basket where you can read, edit, delete, forward, and reply to messages at an **In Basket** dialog.

The **In-Basket** command appears on the Mail menu on the Initial Desktop, the Special menu in CB, ENS, and Terminal Emulation, and the Messages menu in a forum.

Out-Basket

The **Out Basket** command opens your Out Basket, where you can process your outgoing CompuServe Mail and forum messages at an **Out-Basket** dialog.

The **Out Basket** command appears on the Mail menu on the Initial Desktop, the Special menu in CB, ENS, and Terminal Emulation, and the Messages menu in a forum.

Filing Cabinet...

The **Filing Cabinet...** command opens your Filing Cabinet where you can access, create, or remove folders and files stored there at a **Filing Cabinet** dialog.

The **Filing Cabinet** command appears on the Mail menu on the Initial Desktop, the Special menu in CB, ENS, and Terminal Emulation, and the Messages menu in a forum.

Address Book

The **Address Book** command opens up your Address Book where you can access, modify, add, and remove entries at an **Address Book** dialog.

The **Address Book** command appears on the Mail menu on the Initial Desktop, the Special menu in CB, ENS, and Terminal Emulation, and the Messages menu in a forum.

Special Terminal Emulation...

The **Terminal Emulation...** command takes you to a **Terminal Emulation...** dialog where you can access CompuServe or another host-based computer system in Terminal Emulation, an environment in which your computer behaves as a mere terminal.

Rebuild Cabinet Indexes

The **Rebuild Cabinet Indexes** command updates the indexing system used by the Filing Cabinet. Normally, if you have shut down your microcomputer unexpectedly while connected to CompuServe, or if the Information Manager detects that the Filing Cabinet indexing scheme has been changed, the indexing system is updated automatically the next time you start up the Information Manager. **Rebuild Cabinet Indexes** allows you to initiate an update whenever you like.

Forum Database...

The **Forum Database...** command takes you to a **Forum Databases** dialog which lists the forums you access. If there is a forum listed that you no longer use regularly, or if you have reason to believe that information in the Information Manager's database about a forum is inaccurate, such as the name of message section or library section, you should delete the forum from the **Forum Databases** dialog. Doing so will clear up any inconsistencies that might have come about due to unanticipated forum updates.

Special Session Settings...

The **Session Settings...** command lets you modify your CompuServe connection information, such as your baud rate, network, and communication port at a **Setup Session Settings...** dialog.

Special Connection Info...

The **Connection Info...** command lets you review your recent connection information, such as your Port ID, baud rate, and the name of the session settings set used, at a **Connection** dialog.

Special Modem Settings...

The **Modem Settings...** command lets you modify your modem-related communications information at a **Modem Control Strings...** dialog.

Special Preferences...

The **Preferences** command displays a submenu of the various Information Manager **Preferences** commands, which enable you to set options and preferences for the various desktops and features in the Information Manager:

General lets you specify some general options for running the Information Manager, such as whether to display your Favorite Places each time you start up the Information Manager, at a **General Preferences...** dialog.

Mail lets you specify Mail-related preferences at a **Mail Preferences...** dialog.

Forum lets you specify forum-related preferences at a **Forum Preferences...** dialog.

Executive News lets you specify Executive News Service-related preferences at an **ENS Preferences...** dialog.

Conference/CB Simulator lets you specify CB-related preferences at a **CB Preferences...** dialog.

Terminal Emulation lets you specify Terminal Emulation related preferences at a **Terminal Emulation Preferences** dialog.

Ribbon lets you customize your Ribbon icons and functionality at a **Customize Ribbon** dialog.

Preferences General...

The **General...** command lets you specify some general options for running the Information Manager, such as whether to display your Favorite Places each time you start up the Information Manager, at a **General Preferences...** dialog.

Preferences Mail...

The **Mail...** command lets you specify Mail-related preferences at a **Mail Preferences...** dialog.

Preferences Forum...

The **Forum...** command lets you specify forum-related preferences at a **Forum Preferences...** dialog.

Preferences ENS...

The **ENS...** command lets you specify Executive News Service-related preferences at an **ENS Preferences...** dialog.

Preferences CB...

The **CB...** command lets you specify CB-related preferences at a **CB Preferences...** dialog.

Preferences Terminal...

The **Terminal...** command lets you specify Terminal Emulation related preferences at a **Terminal Emulation Preferences** dialog.

Preferences Ribbon...

The **Ribbon...** command lets you customize your Ribbon icons and functionality at a **Customize Ribbon** dialog.

Mail Member Directory

The **Member Directory** command takes you to a **Search Member Directory** dialog where you can find out information about other CompuServe members.

Messages Browse

The **Browse** command takes you to a **Message Sections** dialog where you can choose a forum section and learn and read the various section topics.

Messages Search

The **Search** command lets you find the messages you want by taking you to a **Message Search** dialog. You provide a topic keyword, User ID, or message number; the Information Manager looks for messages that match your information.

Messages Get Waiting

The **Get Waiting** command displays a list of unread messages addressed to you at a **Message Topics** dialog. If there are no messages waiting for you, this command is dimmed.

This command is dimmed if you are not a member of the forum.

Messages Retrieve Marked...

The **Retrieve Marked...** command lets you retrieve all the messages you marked during your forum session at a **Retrieve Marked Messages** dialog. This command is dimmed if you have not marked any messages during your forum session.

This command is dimmed if you are not a member of the forum.

Messages Set Date...

The **Set Date...** command lets you decide the oldest message to be included in your forum session. **Set Date** takes you to a **Set First Message Date...** dialog

Creating a Forum Message

The **Create Forum Message** and **Create Message** commands both do the same thing, taking you to a **Create Forum Message** dialog where you can compose a forum message.

Create Forum Message appears on the Mail menu on the Initial Desktop and allows you to create a forum message without being connected to CompuServe.

Create Message appears on the forum Messages menu, but it will be dimmed if you are not a member of the forum.

You must be a member of a forum before you can send, or post, forum messages in the forum.

Messages Notice

The **Notice** command displays any message board announcements from the Sysop of the forum.

Messages Descriptions

The **Descriptions** command displays a brief summary of message board functions.

Messages Freshen Messages

The **Freshen Messages** command shows any changes that have occurred on the message board since you entered the forum.

Library Browse

The **Browse** command shows you the forum library categories. **Browse** takes you to a **Library Sections** dialog where you can review summary descriptions of each file and retrieve one or more files.

This command is dimmed if you are not a member of the forum.

Library Search...

The **Search...** command lets you search for library files. **Search** takes you to a **Search for Files** dialog where you can search for files by file identification, contributor's User ID number, or topical keywords.

This command is dimmed if you are not a member of the forum.

Library Retrieve Marked...

The **Retrieve Marked...** command lets you retrieve any files you mark during your particular forum session. **Retrieve Marked...** takes you to a **Retrieve Marked Files** dialog. This command is dimmed if you have not marked any files during your forum session.

This command is dimmed if you are not a member of the forum.

Library Contribute...

The **Contribute...** command lets the Information Manager copy a file from your microcomputer to a forum library. **Contribute...** takes you to a **Contribute...** dialog.

This command is dimmed if you are not a member of the forum.

Library Notice

The **Notice** command lets you learn library announcements from the Sysop.

Library Descriptions

The **Descriptions** command lets you read descriptions of each library section in the forum.

Conference Enter Room

The **Enter Room** command takes you to a **Conference Rooms** dialog where you can enter a conference.

This command is dimmed if you are not a member of the forum.

Conference Who's Here...

The **Who's Here...** command lets you learn who is currently in the forum and gives you the opportunity to initiate a private conversation. **Who's Here...** takes you to a **Who's Here** dialog.

This command is dimmed if you are not a member of the forum.

Conference Set Nickname...

The **Set Nickname...** command lets you change your conference name by taking you to a **Change Nickname...** dialog.

This command is dimmed if you are not a member of the forum.

Conference Ignore...

The **Ignore...** command lets you block conversation for whatever reason from people you specify. **Ignore** takes you to an **Ignore...** dialog.

This command is dimmed if you are not a member of the forum.

Conference Invite...

The **Invite...** command lets you invite others to join a private group. **Invite...** takes you to an **Invite...** dialog.

This command is dimmed if you are not a member of the forum.

Conference Notice

The **Notice** command lets you learn of any conference announcements.

Conference Descriptions

The **Descriptions** command lets you read summaries of conference room functions.

This command is dimmed if you are not a member of the forum.

Forum Special Notices

The **Notices** command lets you learn forum-related announcements provided by the Sysop.

Forum Special Forum Options...

The **Forum Options...** command lets you change the way the forum interacts with you by taking you to a **Forum Options...** dialog.

This command is dimmed if you are not a member of the forum.

Forum Special Join Forum...

The **Join Forum...** command lets you become a member of the forum. **Join Forum...** takes you to a **Joining a Forum...** dialog, the same dialog you see when you first enter a forum as a non-forum member.

This command is dimmed if you are a member of the forum.

Forum Special Search Membership...

The **Search Membership...** command lets you learn information about your fellow forum members at a **Search for Membership...** dialog.

This command is dimmed if you are not a member of the forum.

Forum Special Change Member Entry...

The **Change Member Entry...** command lets you modify or add information about yourself to the forum member directory at a **Change Member Interests...** dialog..

This command is dimmed if you are not a member of the forum.

Forum Special Preferences

The **Preferences** command lets you customize various forum features.

Forum Special Toolbox

The **Toolbox** command displays the **Forum Toolbox**, a pictorial menu of some of the more frequently used forum commands.

Stories Select Folder...

The **Select Folder...** command lets you open an ENS Public or Personal folder to access stories. **Select Folder** takes you to a **Select Folder...** dialog.

Stories Retrieve Marked Stories...

The **Retrieve Marked Stories...** command lets you copy any of the stories you marked during your ENS session to your microcomputer. **Retrieve Marked Stories...** takes you to a **Retrieve Marked Stories** dialog.

Stories Notices

The **Notices** command lets you read announcements about any upcoming changes in ENS.

Stories Create Folder...

The **Create Folder...** command takes you to a **Create Folder...** dialog where you can set up a Personal Folder; ENS will clip news stories that match your search criteria and store them in the appropriate Personal Folder.

Stories Update Folder...

The **Update Folder...** command lets you modify Personal Folder preferences and instructions by taking you to an **Update Folder...** dialog.

Stories Delete Folder

The **Delete Folder...** command lets you get rid of a Personal Folder by taking you to a **Delete Folder** dialog.

ENS Special Toolbox

The **Toolbox** command displays the **ENS Toolbox**, a pictorial menu of some of the more frequently used ENS commands.

Channels

The **Channels** command lets you tune to and monitor a channel and learn information about who is on a particular channel. **Channels** takes you to a **Channel Selector** dialog.

People Who's Here...

The **Who's Here** command lets you learn who is on CB and gives you the opportunity to initiate a private conversation. **Who's Here...** takes you to a **Who's Here** dialog.

People Invite...

The **Invite...** command lets you invite others to join a private group. **Invite...** takes you to an **Invite...** dialog.

People Friends...

The **Friends...** command lets you consult and modify a customized list of your CB friends. **Friends...** takes you to a **Friends...** dialog.

People Squelch

The **Squelch...** command lets you block messages for whatever reason from people you specify. **Squelch** takes you to a **Squelch** dialog.

CB Special Change Handle...

The **Change Handle...** command lets you specify a new handle or nickname at a **Change Handle...** dialog.

CB Special Toolbox

The **Toolbox** command displays the **CB Toolbox**, a pictorial menu of some of the more frequently used CB commands.

CB Special Set Function Keys...

The **Set Function Keys** command lets you set up certain key combinations as a shorthand for typing text in CB. **Set Function Keys** takes you to a **Function Key Settings** dialog.

CB Special Bulletin

The **Bulletin** command lets you learn CB community news.

CB Special Record Channel

The **Record Channel** command lets you copy the current channel conversation to a file.

CB Special Record Group

The **Record Group** command lets you copy the current group conversation to a file..

Terminal Emulation Special View Buffer

The **View Buffer** command lets you review your recent online activities.

Terminal Emulation View Terminal

The **View Terminal** command exits the capture buffer and returns you to wherever you were before.

Terminal Emulation Record on Printer

The **Record on Printer** command toggles your CompuServe dialogue printing state.

The first time you choose **Record on Printer**, the Information Manager begins printing the subsequent dialog between you and CompuServe -- everything you type and everything CompuServe displays; then when you choose **Record on Printer** again, printing stops.

Terminal Emulation Special Record in File

The **Record in File** command toggles your terminal logging state.

The first time you choose **Record in File**, the Information Manager begins recording your subsequent terminal emulation activity -- everything you type and everything CompuServe displays -- in a special file on your microcomputer; then when you choose **Record in File** again, logging stops.

Terminal Emulation Special Set Function Keys...

The **Set Function Keys...** command takes you to a **Function Key Settings** dialog where you assign certain key combinations and special instructions to your function keys.

Terminal Emulation Special Clear Buffer

The **Clear Buffer** command empties the contents of your capture buffer.

Ribbon

The desktop ribbon is a pictorial menu of services and features that you might use frequently.

You can modify your Ribbon icons and their actions by choosing **Preferences** from the Initial Desktop, and then choosing **Ribbon** from the Preferences submenu.

In certain services, such as Travelshopper (CIM) and Weather, you see this smaller ribbon instead:

This **Modem** button appears on the Ribbon when you issue a command involving a transfer of data between your computer and CompuServe. The number above **Cancel** is the number of seconds WinCIM will wait before cancelling the command if no data is received in that time. You can also click on the **Modem** button to deliberately cancel the transfer.

Once you are connected to CompuServe, WinCIM keeps track of your connect time, displaying it on the Ribbon for the duration of your Information Manager session. If you disconnect from CompuServe without exiting WinCIM, and then reconnect to CompuServe, the counter will continue to accumulate connect time for you. WinCIM also displays the word **Basic** or **Extended** above the connect time to reflect which particular service you are using at the time.

This is the **Help** icon. It gives you interactive help as you use WinCIM. Clicking this icon is equivalent to pressing **F1**.

This is the **Favorite Places** icon. It represents the **Favorite Places** command on the Services menu. It takes you to your Favorite Places area where you can access services and forums from a customized list at a **Favorite Places** dialog.

This is the **Find** icon. It represents the **Find** command on the Services menu. It takes you to a **Find** dialog, where you can search for services on CompuServe. You can go directly to any service you find. You can also add the services you find to your Favorite Places.

This is the **Browse** icon. It represents the **Browse** command on the Services menu. It takes you to a pictorial Services window where you can explore CompuServe's hierarchy of services and forums at your own pace.

This is the **Go** icon. It represents the **Go** command on the Services menu. It takes you to a **Go** dialog from which you can access a service if you know the service name.

This is the **Quotes** icon. It represents the **Quotes** command on the Services menu. It takes you to a **Stock Quotes** dialog where you can obtain stock quotes from a personalized list of ticker symbols.

This is the **Weather** icon. It represents the **Weather** command on the Services menu. It takes you to a **Weather** dialog where you can obtain a weather forecast locally or for selected cities or weather reporting stations in the United States and around the world.

This is the **In-Basket** icon. It represents the **In-Basket** command on the Mail menu. It takes you to your In-Basket where you can process your incoming messages at an **In-Basket** dialog.

This is the **Out-Basket** icon. It represents the **Out-Basket** command on the Mail menu. It takes you to your Out-Basket where you can process your outgoing CompuServe Mail and forum messages at an **Out-Basket** dialog.

This is the **Filing Cabinet** icon. It represents the **Filing Cabinet** command on the Mail menu. It takes you to your Filing Cabinet where you can access, create, or remove folders and files from a **Filing Cabinet** dialog.

This is the **Address Book** icon. It represents the **Address Book** command on the Mail menu. It takes you to your Address Book where you can access, modify, add, and remove entries from an **Address Book** dialog.

This is the **Get New Mail** icon. It appears on the Ribbon only when you are connected to CompuServe and have Mail in your mailbox. It represents the **Get New Mail** command on the Mail menu. It takes you to your CompuServe mailbox where you can access your incoming Mail from a **Get New Mail** dialog.

This is the **ENS** icon. It represents the **Executive News** command on the Services menu. It takes you to the Executive News Service.

This is the **Exit** icon. It appears on the Ribbon only when you are connected to CompuServe. It represents the **Exit** command on the File menu. It disconnects you from CompuServe and exits WinCIM, returning you to your Windows desktop.

This is the **Disconnect** icon. It appears on the Ribbon only when you are connected to CompuServe. It represents the **Disconnect** command on the File menu. It disconnects you from CompuServe and returns you to WinCIM's Initial Desktop.

This is the **Help** icon. It gives you interactive help as you use WinCIM. Clicking this icon is equivalent to pressing **F1**.

This is the **Print** icon. It represents the **Print** command on the File menu. It prints whatever is in the current Information Manager text box, such as a flight schedule or weather report.

This is the **Save** icon. It represents the **Save** command on the File menu. It saves the contents of the current Information Manager text box into a file on your hard disk.

This is the **Leave** icon. It represents the **Leave** command on the File menu. It leaves or exits a service without disconnecting you from CompuServe, returning you to WinCIM's Initial Desktop.

This is the **Disconnect** icon. It represents the **Disconnect** command on the File menu. It disconnects you from CompuServe and returns you to WinCIM's Initial Desktop.

This is the **Exit** icon. It represents the **Exit** command on the File menu. It disconnects you from CompuServe and exits WinCIM, returning you to your Windows desktop.

Browsing Services

The **Services** window is a pictorial menu of the major service categories on CompuServe. Just click an icon to access a list of services in that category.

You get to the **Services** window by choosing **Browse** from the Services menu.

You see the **Services** window automatically when you start up WinCIM if the **Browse** option in the **General Preferences** dialog has been set.

[General Preferences](#)

[Grouping Your Favorite Services](#)

This is the **Browse** icon. You'll find it on the **Ribbon**.

Basic Services takes you to CompuServe's basic services, a basic group of the most popular CompuServe services, priced at a standard flat monthly rate. This means there are no connect time charges, no matter how much you use these services, although there are surcharges for connecting through some communications networks in some locations.

Computers gives you support for virtually any software or computer on the market. Support includes direct links to software and hardware companies, libraries of online information and forums of knowledgeable users willing to help you solve your problems. Twenty-four hours a day, you can log on and communicate with someone online or post messages which will be answered, typically within 24 hours.

Forums are the places where CompuServe members meet to exchange information, expound opinions and ideas, and participate in general conversation. There are hardware forums devoted to particular makes of computer equipment, software forums that offer support for popular programs, professional forums that cater to members of various professions, and more.

Communications contains information on products that enable you to communicate with other CompuServe members. You can use CompuServe Mail to send messages to specific people, forums to participate in discussions on specific topics, CB to type in real-time with other CompuServe members around the world, and the CompuServe Classifieds to post ads.

News contains a global news clipping service, business news, feature stories, sports scores and interviews, public and aviation weather, and even Hollywood gossip. This section also includes sports forums.

Investments provides you with an overview of the services which can assist you with your investments. Though tailored for the individual investor, CompuServe's financial services are also used by many Wall Street firms. You can obtain quotes on stock prices, find information about companies and buy and sell securities. CompuServe invites you to use the H&R Block ticker symbol to practice and see the type of information each product provides. Type HRB at most company or issue prompts and get live information without a surcharge.

Reference comprises an extensive reference library that enables you to gather vast amounts of current and historical information quickly and efficiently. The section includes large databases comprised of: demographic information; articles from periodicals; directories of products, manufacturers, and households; trademark and legal information; government proceedings, information, and statistics; consumer information; and newsletters.

Travel provides you with air, hotel, car, tour and cruise information. In addition, U.S. domestic and international information is available.

Shopping contains the CompuServe products that enable you to shop in the comfort of your own home. Depending on the merchant, you can order from online catalogs or have print catalogs sent to your home.

Games contains many different types of games. Some games are for one player against the computer. For others, like MegaWars I and III, you interact with other players, either as allies or enemies.

Lifestyles contains information on diverse interests and hobbies such as food, wines, genealogy, sailing, stamp collecting, pets, fitness and health.

Professional describes forums which enable professionals to exchange ideas and information with others in the same field. People interested in the law, medicine, and other professional fields will find a forum to suit their professional interests.

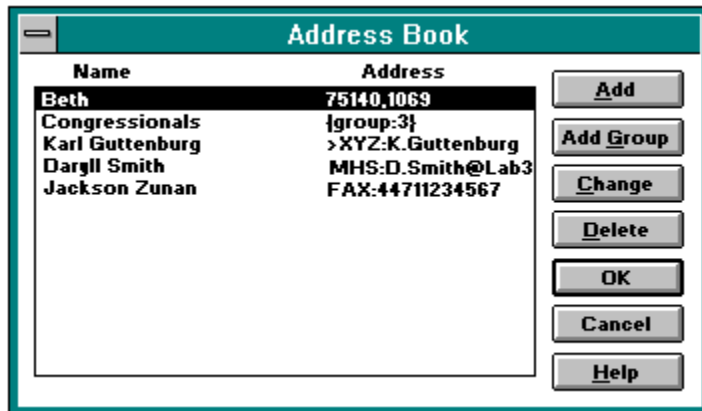

Member helps you find your way around the CompuServe Information Service. It provides information such as billing, logging on, ordering and operating rules.

Address Book

The **Address Book** dialog lists the names and addresses of your electronic correspondents.

There are many ways to get here.

Related Information

[Adding a Group to Your Address Book](#)

[CompuServe Mail](#)

[Electronic Address Formats](#)

This is your **Address Book** icon. You'll find it on the **Ribbon**.

Address Book entries are listed in alphabetical order by last name. You can make both individual and group entries. **Beth** is an individual entry. **Congressional** is a group entry comprised of three individual entries.

Add: Takes you to an **Add to Address Book** dialog where you can add an entry.

Add Group: Takes you to an **Add Group to Address Book** dialog where you provide a group name and identify group members.

Change: Displays the highlighted entry for you to review or modify. If the entry is an individual entry, you go to a **Change Entry in Address Book** dialog. If the entry is a group entry, you go to an **Add Group to Address Book** dialog. In this example, **Beth** is the entry that would be changed.

Delete: Removes the highlighted entry. In this example, the **Beth** entry would be removed.

OK: Records your changes and closes the dialog.

Cancel: Closes the dialog without recording any of your changes.

Help: Gives you context-sensitive help about this dialog.

CompuServe MHS Hub Service
Fax
Gram
Internet
MCI Mail
Postal
Private CompuServe Mail Systems
SprintMail
Telex
Western Union 400 (Easylink)

How to specify a CompuServe address from:

CompuServe MHS Hub Service
Private CompuServe Mail
Internet
MCI Mail
Telex
AT&T Mail 400
Western Union 400 (Easylink)
SprintMail

For more information about sending and receiving Mail, choose **Go...** from the Initial Desktop Services menu and go to ASCIIEMAIL; then type HELP and press return at any ensuing CompuServe Mail Main Menu screen to view a list of Mail help topics.

AT&T Mail 400

Example:

X400:(C=US;A=ATTMAIL;S=SCALI;G=AL;D=ID:ASCALI)

Western Union 400 (Easylink)

Example:

X400:(C=US;A=WESTERNUNION;S=SCALI;G=AL;D=ELN:ASCALI)

CompuServe Address

Example:

75140,1062

CompuServe MHS Hub Service

Example:

MHS:WILSON@MTAGROUP

Fax

To a North American destination:

FAX:19995551212

To a destination outside North America:

FAX:443312345

Gram

Example:

Internet

Example:

INTERNET;jdoe@abc.osu-cis.edu

MCI Mail

Example:

X400:(C=US;A=MCI;S=Smith;G=Jim;D=ID:123-4567)

Postal

Example:

Private CompuServe Mail Systems

Example:

ABC:ADDRESS

SprintMail

Example:

X400:(C=US;A=TELEMAIL;P=XYZGROUP;S=JONES;G=BOB)

Telex

Example:

TLX:9991234567ABCDEF

X400

Example:

X400:(C=US;A=ATTMAIL;S=SCALI;G=AL;D=ID:ASCALI)

AT&T Mail 400

1. Type **X400**
2. Type a colon
3. Type a left parenthesis
4. Type **C=** followed by the recipient's country code and a semicolon
5. Type **A=ATTMAIL** followed by a semicolon
6. Type **S=** followed by the recipient's family name or surname and a semicolon
7. Type **G=** followed by the recipient's given name and a semicolon
8. Type **D=ID** followed by a colon and the domain-defined attribute
9. Type a right parenthesis

Example:

X400:(C=US;A=ATTMAIL;S=SCALI;G=AL;D=ID:ASCALI)

For more information about AT&T Mail 400, choose **Go...** from the Initial Desktop Services menu and go to ASCIIMAIL; then type HELP and press return at any ensuing CompuServe Mail Main Menu screen to view a list of Mail help topics.

Western Union 400 (Easylink)

1. Type **X400**
2. Type a colon
3. Type a left parenthesis
4. Type **C=** followed by the country code and a semicolon
5. Type **A=WESTERNUNION** followed by a semicolon
6. Type **S=** followed by the family name or surname and a semicolon
7. Type **G=** followed by the given name and a semicolon
8. Type **D=ELN** followed by a colon and the domain-defined attribute
9. Type a right parenthesis

Example:

X400:(C=US;A=WESTERNUNION;S=SCALI;G=AL;D=ELN:ASCALI)

For more information about Western Union 400 (Easylink), choose **Go...** from the Initial Desktop Services menu and go to ASCIIMAIL; then type HELP and press return at any ensuing CompuServe Mail Main Menu screen to view a list of Mail help topics.

CompuServe Address

Use the CompuServe User ID number.

Example:

75140,1062

CompuServe MHS Hub Service

1. Type **MHS**
2. Type a colon
3. Type the recipient's user name
4. Type **@**
5. Type the recipient's workgroup name

Example:

MHS:WILSON@MTAGROUP

For more information about CompuServe MHS Hub Service, choose **Go...** from the Initial Desktop Services menu and go to ASCIIMAIL; then type HELP and press return at any ensuing CompuServe Mail Main Menu screen to view a list of Mail help topics.

Fax

To any North American destination:

1. Type **FAX**
2. Type a colon
3. Type **1**
4. Type the area code
5. Type the phone number of the fax machine

Example:

FAX:19995551212

To any destination outside North American:

1. Type **FAX**
2. Type a colon
3. Type the country code
4. Type the city code (optional) or area code
5. Type the phone number of the fax machine

Example:

FAX:443312345

For more information about Fax, choose **Go...** from the Initial Desktop Services menu and go to ASCIIMAIL; then type HELP and press return at any ensuing CompuServe Mail Main Menu screen to view a list of Mail help topics.

Gram

To learn how to send a Congressgram or other type of Gram:

1. Select  from your desktop ribbon.
2. Type **Grams**
3. Select .

WinCIM takes you to the Grams area on CompuServe.

For more information about Gram, choose **Go...** from the Initial Desktop Services menu and go to ASCIIMAIL; then type HELP and press return at any ensuing CompuServe Mail Main Menu screen to view a list of Mail help topics.

Internet

1. Type **INTERNET**
2. Type a colon
3. Type the recipient's valid user address
4. Type @
5. Type the domain address (including subdomains)

Example:

INTERNET:jdoe@abc.osu-cis.edu

For more information about Internet, choose **Go...** from the Initial Desktop Services menu and go to ASCIIMAIL; then type HELP and press return at any ensuing CompuServe Mail Main Menu screen to view a list of Mail help topics.

MCI Mail

1. Type **X400**
2. Type a colon
3. Type a left parenthesis
4. Type **C=** followed by the recipient's country code and a semicolon
5. Type **A=MCI** followed by a semicolon
6. Type **S=** followed by the recipient's family name or surname and a semicolon
7. Type **G=** followed by the recipient's given name and a semicolon
8. Type **D=ID** followed by a colon and the ID or name registered in the MCI Mail Directory (if there is a private domain, include P=domain)
9. Type a right parenthesis

Example:

X400:(C=US;A=MCI;S=Smith;G=Jim;D=ID:123-4567)

For more information about MCI Mail, choose **Go...** from the Initial Desktop Services menu and go to ASCIIMAIL; then type HELP and press return at any ensuing CompuServe Mail Main Menu screen to view a list of Mail help topics.

Postal

With CompuServe Postal Mail, you can send personalized, laser-printed letters to anyone with a mailing address, anywhere in the world. Letters are printed and sent from one of six Post Office sites in the United States.

For proper transmission, postal messages must meet the following guidelines: A maximum of 219 lines (or four pages) per letter (longer letters will be truncated); A maximum of 80 characters per line (longer lines will be truncated); Only ASCII text (all other characters will be removed).

Letters are laser printed on 8 1/2 by 11 inch white paper. Both the returnee's and recipient's addresses are automatically printed on the first page of the letter. Letters are placed in white envelopes with two windows -- one for the returnee's address and one for the recipient's address.

To send postal mail:

1. Select  from your desktop ribbon.
2. Type **ASCIIMAIL**
3. Select .

WinCIM takes you to the Postal area on CompuServe.

After composing a message, enter the word POSTAL at the **Send (\$) to (Name or User ID):** prompt. The service will prompt you for the recipient's name and address, one line at a time.

For more information about Postal, choose **Go...** from the Initial Desktop Services menu and go to ASCIIMAIL; then type HELP and press return at any ensuing CompuServe Mail Main Menu screen to view a list of Mail help topics.

Private CompuServe Mail Systems

1. Type the organization's private CompuServe code
2. Type a colon
3. Type the receiver's mailbox address

Example:

ABC:ADDRESS

For more information about private CompuServe Mail systems, choose **Go...** from the Initial Desktop Services menu and go to ASCIIMAIL; then type HELP and press return at any ensuing CompuServe Mail Main Menu screen to view a list of Mail help topics.

SprintMail

1. Type **X400**
2. Type a colon
3. Type a left parenthesis
4. Type **C=** followed by the country code and a semicolon
5. Type **A=TELEMAIL** followed by a semicolon
6. Type **P=** followed by the private domain and a semicolon
7. Type **S=** followed by the family name or surname and a semicolon
8. Type **G=** followed by the given name and a semicolon
9. Type a right parenthesis

Example:

X400:(C=US;A=TELEMAIL;P=XYZGROUP;S=JONES;G=BOB)

For more information about SprintMail, choose **Go...** from the Initial Desktop Services menu and go to ASCIIMAIL; then type HELP and press return at any ensuing CompuServe Mail Main Menu screen to view a list of Mail help topics.

Telex

1. Type **TLX**
2. Type a colon
3. If the message is being sent to a destination outside the United States, type the recipient's three-digit country code
4. Type the recipient's machine number
5. If you desire an answerback you may type it after the recipient's machine number.

Example:

TLX:9991234567ABCDEF

For more information about Telex, choose **Go...** from the Initial Desktop Services menu and go to ASCIIMAIL; then type HELP and press return at any ensuing CompuServe Mail Main Menu screen to view a list of Mail help topics.

X400

1. Type **X400**
2. Type a colon
3. Type a left parenthesis
4. Type **C=** followed by the country code and a semicolon
5. Type **A=** followed by the administrative domain and a semicolon
6. Type **P=** followed by the private domain and a semicolon
7. Type **S=** followed by the family name or surname and a semicolon
8. Type **G=** followed by the given name and a semicolon
9. Type **I=** followed by the middle initial and a semicolon
10. Type **D=ID:** followed by the domain defined attribute
11. Type a right parenthesis

Example:

X400:(C=US;A=ATTMAIL;S=SCALI;G=AL;D=ID:ASCALI)

For more information about X400, choose **Go...** from the Initial Desktop Services menu and go to ASCIIEMAIL; then type HELP and press return at any ensuing CompuServe Mail Main Menu screen to view a list of Mail help topics.

How to Specify a CompuServe Address from CompuServe MHS Hub Service

The MHS address for the CompuServe Mail Hub is: **MAIL@CSERVE**

Your extended address, which is either your User ID number, or your organization ID and your system-specific address (in the form **organization:address**).

How to Specify a CompuServe Address from Private CompuServe Mail

Your User ID number (must be enclosed in square brackets [])

How to Specify a CompuServe Address from Internet

CompuServe's domain: **COMPUSERVE.COM**

Your User ID number (with a period instead of a comma, and followed by @ or your system-specific address and your organization ID (in the form **address@organization** followed by a period)

How to Specify a CompuServe Address from MCI Mail

CompuServe's EMS: **COMPUSERVE**

Your User ID number, or your organization ID and your system specific address (in the form **organization:address**)

How to Specify a CompuServe Address from Telex

CompuServe's machine number: **3762848**

(From some locations, a country prefix may be required. For a complete list, access the DOSCIM forum service and retrieve the file TLXREC.HLP from the Support File Library (Library 2).

CompuServe's answerback (optional): **COMPUSERVE**

Your User ID number, or your organization ID and your system-specific address in the form **organization:address** (must appear on the first non-blank line of the message, preceded by **TO:**)

How to Specify a CompuServe Address from AT&T Mail 400, Easylink Western Union 400, or SprintMail

The country code: **US**

The administrative domain (ADMN): **COMPUSERVE**

The private mail domain (PRMD): **CSMAIL**

The domain-defined attribute (DDA) type: **ID**

The domain-defined attribute (DDA) value: your User ID number with a period instead of a comma, or your organization ID and your system-specific address in the form **organization:address**.

AT&T Mail has a special gateway name **MHS!CSMAIL**) that can be used to abbreviate your address information (example: **MHS!CSMAIL!76003,511**).

Providing Your Password

The **Password** dialog is where you type your CompuServe password. You won't see your password as you type it, only asterisks.

You see the **Password** dialog whenever WinCIM attempts to connect you to CompuServe if you do not have correct password information specified in your **Session Settings** dialog.

Related Information

Searching for CompuServe Members

The **Search Member Directory** dialog searches the CompuServe Member Directory for information about members.

You get here by choosing **Member Directory** from the Mail menu.

The image shows a dialog box titled "Search Member Directory". It contains several input fields for search criteria: "First Name:", "Last Name:", "City:", "State:", "Country:", and "Mailbox:". To the right of the "First Name" field is an "OK" button, and to the right of the "Last Name" field is a "Cancel" button. The dialog box has a standard window border with a title bar and a close button.

[Searching for Forum Members](#)

First Name: If you know the person's first name, type it here. Unless you are sure of the name, you might want to leave this blank, as the person might have used a nickname when registering.

Last Name: If you know the person's last name, type it here.

City: If you know the city the person is registered in, type it here.

State: If you know the state the person is registered in, type it here.

Country: If you know the country the person is registered in, type it here.

Mailbox Name: If you know the person's electronic mailing address, type it here.

OK: Begins your search.

Cancel: Closes the dialog.

Creating a Mail Message

The **Create Mail** dialog enables you to compose a message to be sent in CompuServe Mail.

You get here by choosing **Create Mail** from the Mail menu and then completing the ensuing **Recipient List** dialog.

The screenshot shows a window titled "Create Mail". At the top, the title bar says "Create Mail". Below the title bar, there are several fields and controls:

- Address:** A text field containing "TO: Jackson Hunan, 76846,731" and a small downward arrow icon. To the right of this field, it says "1 recipient".
- Subject:** An empty text field.
- Auto-file:** A checkbox that is currently unchecked.
- Formatting:** Two radio buttons. The first is labeled "Reformattable" and is selected (indicated by a filled circle). The second is labeled "Send as shown" and is unselected (indicated by an empty circle).
- Text Area:** A large, empty rectangular area for composing the message body.
- Buttons:** A row of five buttons at the bottom: "Out-Basket", "Send Now", "File It", "Cancel", and "Options...". There is also a small square icon to the right of the "Options..." button.

[CompuServe Mail](#)

[Electronic Address Formats](#)

[Filing Cabinet](#)

[Out-Basket](#)

Address: Takes you to a **Recipient List** dialog where you can assign recipient information.

Your recipient address information appears here after you select **OK** at your **Recipient List** dialog. TO: refers to the primary recipient, CC: refers to a carbon copy recipient, and BC: refers to a blind copy recipient. This cannot be blank.

Subject: Type a descriptive word or phrase for the message. **Subject** cannot be blank.

Options: Takes you to a **Message Options** dialog where you can assign some additional options to your message.

Type or paste the body of your message (up to 50,000 characters) here. If this is incomplete, you can store the message in your Out-Basket or Filing Cabinet, to be completed later.

Out-Basket: Copies the message to your Out-Basket and closes this dialog. Unless you specify information for **Address**, **Subject**, and the body of your message, **Out-Basket** is not a valid selection and will be dimmed.

Send Now: Transmits your message. WinCIM connects you to CompuServe if you are not already connected. Unless you specify information for **Address**, **Subject**, and the body of your message, **Send-Now** is not a valid selection and will be dimmed.

File It: Takes you to a **Filing Cabinet** dialog where you can copy the message to your Filing Cabinet. Unless you specify information in the box beside **Address** and **Subject**, **File It** is not a valid selection and will be dimmed.

Cancel: Closes this dialog without saving any information or mailing your message.

Reformat on send: Mark this if you want your message text to wrap to a 72 column width.

This gives you some information about **Options....** WinCIM will mark this if you have modified any of the default options in the **Message Options** dialog.

Mark **Auto-file** if you want WinCIM to automatically file a copy of your message in your Filing Cabinet when you send it. You can specify which Filing Cabinet folder to use at the **Mail Preferences** dialog.

Reformattable: Select this if you want your message text to wrap to a 72 column width.

Send as shown: Select this if you want to preserve the text format of your message when it is sent.

Message Options

The **Message Options** dialog gives you some processing options for your outgoing CompuServe Mail messages.

You get here by selecting **Options...** at a **Create Mail** dialog.

The screenshot shows a dialog box titled "Message Options" with a teal header bar. The dialog contains several controls:

- Importance:** A dropdown menu currently showing "Normal".
- Sensitivity:** A dropdown menu currently showing "Normal".
- Release Date:** An empty text input field.
- Expiration Date:** An empty text input field.
- Payment Method:** A group box containing three radio buttons:
 - Sender Pays
 - Split Charges
 - Receiver Pays
- Receipt:** An unchecked checkbox.
- Buttons:** Three buttons stacked vertically on the right: "OK", "Cancel", and "Help".

Related Information

[CompuServe Mail](#)

Receipt: Mark this to receive a confirmation message if a recipient reads your message.

Reply Requested: Mark this to request a reply when a recipient reads your message.
(Text and location vary from system to system.)

Importance: Select the importance level for your message. Some systems will deliver messages of high importance first.

Sensitivity: Select the sensitivity level for your message.

Release Date: Type the date on which you want CompuServe to send the message. Unless you specify a different date, the current date is the normal release date.

Expiration Date: If you like, type a date for the message to be removed from the recipient's mailbox.

OK: records your options and returns you to where you were before.

Cancel: Closes the dialog without recording your information.

Help: Displays this help page.

Sender Pays: Mark this if you want the sender to be responsible for any sending surcharges.

Split Charges: Mark this if you want to split the surcharge for sending and receiving messages.

Receiver Pays: Mark this if you want the receiver to be responsible for any sending surcharges.

Getting New Mail

The **Get New Mail** dialog lists your waiting Mail messages in your CompuServe mailbox.

You get here by choosing **Get New Mail** from the Mail menu or by clicking on the **Get New Mail** icon on the Ribbon.

Related Information

[CompuServe Mail](#)

[In-Basket](#)

This is the **Get New Mail** icon. You'll find it on the **Ribbon**.

These are your mailbox entries. **Subject** tells you what each message is about. **Name** tells you who sent you the message. **Size** tells you how large the message is.

Get: Displays the message associated with the highlighted entry. Takes you to a **Message** dialog. In this example, you would view the **Receipt of message** mailbox entry.

Get All: Moves all messages in your mailbox to your In-Basket. Closes the **Get New Mail** dialog.

Delete: Removes the highlighted entry from your mailbox. In this example, the **Receipt of message** mailbox entry would be removed.

Undelete: If you have removed one or more entries from your mailbox without closing the **Get New Mail** dialog, **Undelete** will cancel the action. (**Undelete** causes each previously deleted entry to reappear as an entry.)

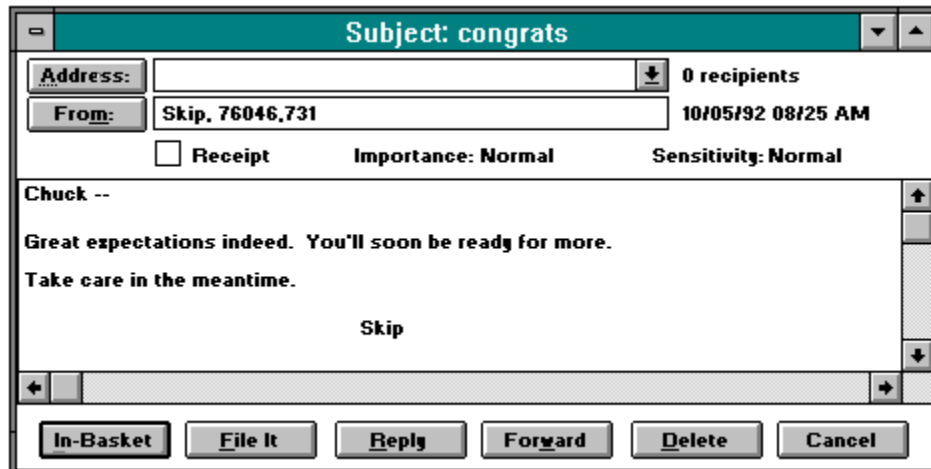

Close: Closes this dialog.

Depending on the type of Mail you have in your mailbox, WinCIM might display some message-related information here.

Reading and Processing a Mail Message

The **Message** dialog displays a CompuServe Mail message.

There are many ways to get here.

Related Information

Address: If the message has more than one recipient, **Address** takes you to an **Add to Address Book** dialog where you can add the recipient list to your Address Book.

If there are multiple recipients to the message, they will be listed here. Blind copy recipients will not be listed. If the message is addressed only to you, this box will be empty. In this example, you are the only recipient.

From: Takes you to an **Add to Address Book** dialog where you can save the sender's name and electronic mailing address in your Address Book.

This is the sender's name and electronic mailing address.

Receipt: If marked, the sender will receive a confirmation message stating that you have read the message.

Reply Requested: If marked, you will be prompted to reply to the message.

Priority: If marked, the message is a high-priority message and will precede non-priority messages in your CompuServe mailbox.

In-Basket: Puts a copy of the message into your In-Basket. Displays the **Get New Mail** dialog.

File It: Takes you to a **Filing Cabinet** dialog where you can copy the message to your Filing Cabinet.

Reply: Takes you to a **Create Mail** dialog where you can compose and send a return message..

Forward: Takes you to a **Create Mail** dialog where you can forward the message to one or more recipients. You can type a note to introduce the forwarded message.

Delete: Removes the message from your mailbox.

Cancel: Closes this dialog.

Addressing CompuServe Mail

The **Recipient List** dialog assigns recipient information to a CompuServe Mail message that you are creating.

You get here by choosing **Create Mail** or **Send File** from the Mail menu.

Recipient List

TO: **Name:** **Address:**

TO: Select this to identify a primary recipient. Every message must have at least one **TO** recipient, although a message may have multiple **TO** recipients.

CC: Select this to identify a carbon copy recipient. Every **CC** recipient will receive a copy of your message.

BC: Select this to identify a blind copy recipient. (**BC** recipients receive a copy of your message, but are not mentioned in any corresponding distribution list.)

Name: If the recipient is not already in your Address Book, type the recipient's name as you want it to appear on the message. Select **Add** to record **Name** and **Address** information under **Recipients**. If the recipient is already an entry in your Address Book, skip **Name** and **Address**, highlight the appropriate entry under **Address Book**, and select **Copy >>**.

Address: If the recipient is not already in your Address Book, type the recipient's electronic mailing address. Select **Add** to record **Name** and **Address** information under **Recipients**. If the recipient is already an entry in your Address Book, skip **Name** and **Address**, highlight the appropriate entry under **Address Book**, and select **Copy >>**.

Address Book: These are your Address Book entries. To use an entry as a message recipient, highlight the entry and select **Copy >>**.

Add: Records **Name** and **Address** information under **Recipients**.

Delete: Removes the highlighted entry under **Recipients**.

Copy >>: Adds the highlighted entry under **Address Book** to the list of entries under **Recipients**.

<< **Copy**: Adds the highlighted entry under **Recipients** to the list of entries under **Address Book**.

Recipients: These are your message recipients. If you want to add an entry to your Address Book, highlight the entry and select << **Copy**.

Show Recipients: Mark this to list the **TO** and **CC** recipients in your message. However, **BC** recipients will not be listed.

OK: Records your information and closes this dialog. Takes you to the appropriate dialog for composing a message.

Cancel: Closes the dialog without recording any changes.

Copy Original: If you are replying to a message and want the reply to be sent to each original message recipient, mark **Copy Original**. Unless you are replying to a message, **Copy Original** will be dimmed and will not be a valid selection.

Change: Moves the highlighted entry under **Recipients** to the **Name** and **Address** boxes where you can edit the information.

Sending a Mail File Message

The **Send File Message** dialog lets you send a text or binary file that is stored on disk as a CompuServe Mail message.

You get here by choosing **Send File** from the Mail menu and then completing the ensuing **Recipient List** dialog.

The screenshot shows a dialog box titled "Send File Message". It has a teal header bar with the title and window control buttons. The dialog contains the following elements:

- Address:** A text input field with a dropdown arrow on the right. To its right, it says "1 recipient".
- Subject:** A text input field with an "Options..." button to its right.
- File:** A text input field for the file name.
- Format:** Three radio buttons labeled "Binary" (selected), "Text", and "GIF".
- Additional:** A text input field for additional information.
- Buttons:** "Out-Basket", "Send Now", and "Cancel" buttons at the bottom.

[Forum Conferences](#)

These are the forum's conference rooms. On certain occasions, a conference room may be dimmed to show that it is unavailable. You can learn how many persons are in a conference room by highlighting it. In this example, there are 14 people in the **Public Discussion** conference room.

Enter: Takes you to a **Conversation** dialog where you can participate in a conference. In this example you would enter the **Public Discussion** conference room.

Listen: Takes you to a **Monitoring** dialog where you can listen in on a conference room without being able to make comments. In this example you would monitor the **Public Discussion** room.

Cancel: Closes this dialog.

Forum Toolbox

The **Forum Toolbox** is a pictorial menu of frequently used forum commands.

You can view the **Forum Toolbox** by choosing **Toolbox** from the Special menu in a forum.

If you want to see the **Forum Toolbox** automatically each time you access a forum, mark the **Show Toolbox** option in the [Forum Preferences](#) dialog.

Related Information

Related Information

[Browsing Library Files](#)

[Forums](#)

[Forum Libraries](#)

[Reading About a Library File](#)

[Searching for Library Files](#)

File Name: Takes you to a standard Windows **Open** dialog where you can open, or select, the file you want to contribute. If you prefer, you can bypass the **File Name** button and type file name and path information yourself.

Destination: If you want the file to have a different name in the forum, type it here. If you use the **File Name** button to identify your file, **Destination** will initially show the same name, but without drive and path information.

File type: Select the appropriate file type for your file.

Type the file name and path information. This information is filled in automatically for you if you use the **File Name** button.

Forum: Select the forum to which you wish to contribute the file. Only forums of which you are a member will be listed here. If you select a forum other than the current forum and then select **OK** to contribute your file, WinCIM will ask to take you into that forum before beginning the upload process.

Title: Type a word or phrase that describes your file. **Title** cannot be blank.

Keys: Assign one or more words to serve as keys, or keywords, to help people find your file when they conduct a file search. You must provide **Keys** information. Separate each keyword with a semicolon. For example, if your file is a simple spreadsheet program, some keys you might include would be: SPREADSHEET;BUDGET;ACCOUNTING;SOFTWARE.

Library Section: Select the appropriate library section for your file.

Description: Type a brief summary of the contents and purpose of your file. The summary you provide will be displayed to forum members when they browse your file. **Description** cannot be blank.

OK: Begins the upload process to CompuServe. If you chose a forum other than the current forum for **Forum**, WinCIM will ask to take you into that forum before beginning the upload process. **OK** will not be a valid selection and will be dimmed until all information for the dialog has been entered.

Cancel: Closes the dialog without saving the contents.

Creating a Forum Message

The **Create Forum Message** dialog enables you to compose a message that you can post in a forum message section.

You get here by clicking on the **Create Forum Message** icon on the **Forum Toolbox** or by choosing **Create Forum Message** from either the Messages menu in a forum or the Mail menu on the Initial Desktop. You also see this dialog when you compose a reply to a forum message.

A screenshot of the "Create Forum Message" dialog box. The title bar is teal and contains the text "Create Forum Message". The dialog has several input fields: "Subject:" with an empty text box, "Forum:" with a dropdown menu, "To:" with two empty text boxes, and "Section:" with a dropdown menu. Below these fields, it shows "From: George Smithe 72337.3473" followed by three checkboxes: "Auto-file", "Private", and "Via Mail". A large empty text area for the message body is in the center, with a vertical scrollbar on the right. At the bottom, there are five buttons: "Out Basket", "Send", "File It", "Delete", and "Cancel".

Related Information

[Pasting Text](#)

Subject: Type a word or phrase that describes your message.

If you are not using the **To** button, type the name of the person you are sending the message to. This information is filled in automatically for you if you use the **To** button.

If you are not using the **To** button, type the recipient's electronic mailing address. This information is filled in automatically for you if you use the **To** button.

Forum: Select the forum in which you want to post the message. Only forums of which you are a member will be listed here. If you select a forum other than the current forum and then select **Send** to send your file, WinCIM will ask to take you into that forum before sending your message.

Section: Select the message section in the forum in which you want your message to be posted.

Private: Mark this if you want your message to be visible only to the recipient. No one else in the forum will be able to read your message.

Via Mail: Mark this if you want to send your message via CompuServe Mail. The message will go directly to the recipient's private mailbox and will not be posted in the forum.

Type your message here. If it is going to be very long, you will probably have to break it into multiple messages.

Send: Sends your message, connecting you to CompuServe if you are not already connected. If you chose a forum other than the current forum for **Forum**, WinCIM will ask to take you into that forum before sending the message. **Send** will not be available to you and will be dimmed until all information for the dialog has been entered.

Out-Basket: Stores the message in your Out Basket and closes this dialog.

File It: Takes you to a **Store Message** dialog where you can store the message in your Filing Cabinet.

Delete: Erases the message, as well as any copies of the message stored in your Out-Basket or Filing Cabinet.

Cancel: Closes the dialog without recording the information. (The Information Manager prompts you to confirm your intention before actually closing the dialog.)

To: Takes you to a **Select Entry from Address Book** dialog where you can select an entry from your Address Book. The Information Manager automatically addresses your message with the entry you select. If you prefer, you can bypass this **To** button and type the name and electronic address yourself.

Auto-file: Mark this if you want WinCIM to automatically file a copy of your forum message in your Filing Cabinet. You can specify which Filing Cabinet folder to use at the **Forum** **Preferences** dialog.

Replying to a Message

The **Reply** dialog enables you to compose a reply to a forum message.

You get here by selecting **Reply** at a **Forum Message** dialog.

To: Takes you to an **Add to Address Book** dialog where you can add recipient information to your Address Book.

Send: Posts or mails your reply message and closes this dialog.

Out-Basket: Puts your reply into the Out-Basket where you can send it later. Closes this dialog.

File It: Takes you to a **Store Message** dialog where you can store the message in your Filing Cabinet.

Private: Mark this if you want your reply to be visible only to the recipient. No one else in the forum will be aware of your reply.

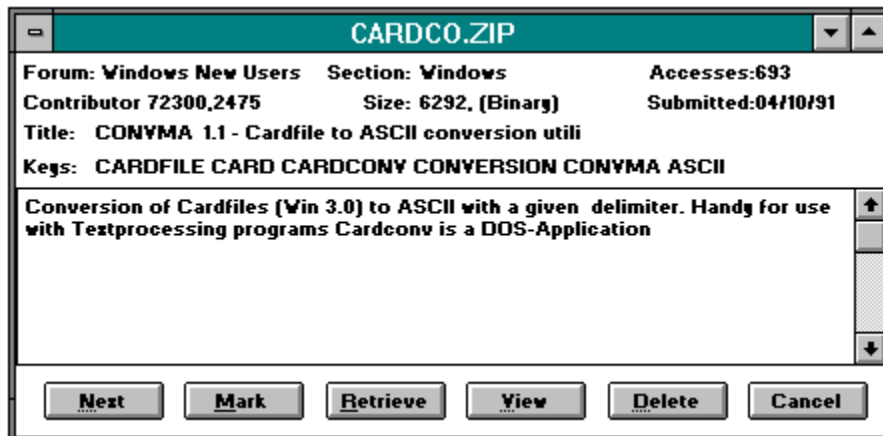

Via Mail: Mark this if you want to send your reply via CompuServe Mail. The message will go directly to the recipient's private mailbox and will not be posted in the forum.

Cancel: Closes the dialog without sending the message. (The Information Manager prompts you to confirm your intention before actually closing the dialog.)

Reading About a Library File

The **File Information** dialog gives you a brief description of a forum library file. You can mark or retrieve the file. You can also view the file if it is a GIF file.

You get here by selecting **Description** at a **File List** dialog.

Related Information

[Browsing Library Files](#)

[Forum Libraries](#)

This is a simple abstract that summarizes the content or purpose of the file. **Accesses** gives you an indication as to whether the file is popular, **Submitted** tells you whether the file is new or old, and **Keys** might give you some ideas about how to find similar files -- or even the same file if you happen to forget its name.

Next: Displays information about the next file listed at the **File List** dialog. In this example, you would view a description for the **Technical Information on the PC** file entry (see the **File List** dialog).

Retrieve: Downloads the file right now. Takes you to a standard Windows **Save As** dialog where you determine the path and filename for your disk.

View: Displays the file if it is a GIF or text file. If the file is a GIF file, **View** takes you to a **GIF Window**. If the file cannot be viewed, **View** will not be available and will be dimmed.

Mark: Identifies, or marks, the file for later retrieval. Takes you to a standard Windows **Save As** dialog where you determine the path and filename for your microcomputer.

Delete: Removes the file from the forum library. You can delete only files that you contribute.

Cancel: Closes the dialog.

Browsing Library Files

The **File List** dialog lists the files in a forum library section or the files in a forum that match your search criteria after you conduct a file search operation. You can then decide what to do with each file.

There are [many ways](#) to get here.

You can control whether certain information is displayed in the **File List** dialog, such as the file size, file name, or submission date, by setting the appropriate options in the [Forum Preferences](#) dialog.

Related Information

[Forum Libraries](#)

[Forum Preferences](#)

[Reading about a File](#)

Files are listed here along with some miscellaneous information about each file. The particular information listed is determined by which options are set in the **Forum Preferences** dialog.

Description: Takes you to a **File Information** dialog where you can learn more about the file. In this example, you would view a description for the **CardConv 1.1 Cardfile to ASCII** file entry.

Mark: Identifies, or marks, the highlighted file for later retrieval. If **Always Ask For File Name** has been marked in the **Forum Preferences** dialog, **Mark** takes you to a standard Windows **Save As** dialog where you assign the path and filename information for your disk; otherwise, you do not go to a standard Windows **Save As** dialog, and the name listed in the forum library is used in conjunction with the **Download Directory** specified at the **Forum Preferences** dialog. In this example, you would mark the **CardConv 1.1 Cardfile to ASCII** file entry.

Retrieve: Downloads the file right now. If **Always Ask For File Name** has been marked in the **Forum Preferences** dialog, **Retrieve** takes you to a standard Windows **Save As** dialog where you determine the path and filename for your microcomputer; otherwise, you do not go to a standard Windows **Save As** dialog, and the name listed in the forum library is used in conjunction with the **Download Directory** specified at the **Forum Preferences** dialog. In this example, you would retrieve the **CardConv 1.1 Cardfile to ASCII** file entry.

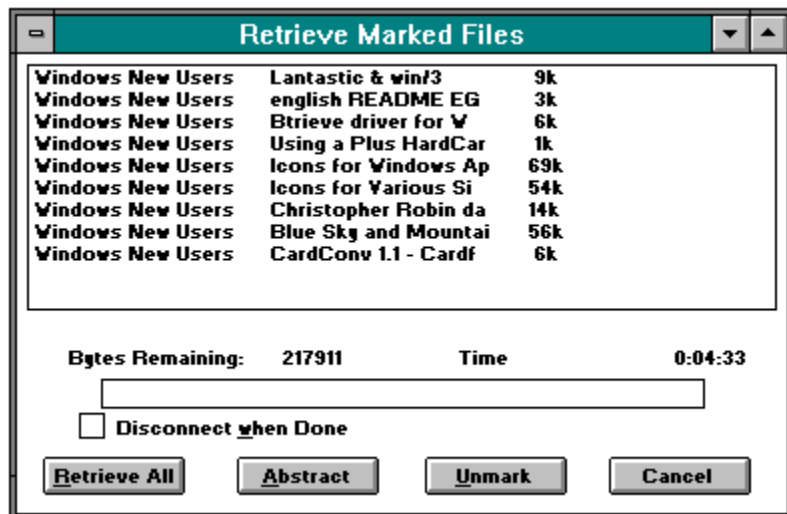

View: Displays the file if it is a GIF or text file. If the file is a GIF file, **View** takes you to a **GIF Window**. If the file cannot be viewed, **View** will not be available and will be dimmed.

Close: Closes the dialog.

Retrieving Your Marked Library Files

The **Retrieve Marked Files** dialog retrieves the files you marked during your forum session.

You get here by choosing **Retrieve Marked** from the Library menu in a forum.

Related Information

[Forums](#)

[Forum Libraries](#)

The files you marked for retrieval are listed here.

Bytes Remaining and **Time**: Shows your file retrieval progress.

Disconnect when Done: Mark this if you want WinCIM to automatically disconnect from CompuServe after downloading all marked files.

Retrieve All: Begins retrieval of all listed files.

Abstract: Displays a file abstract which summarizes the contents or purpose of the file.
Takes you to a **File Information** dialog.

Unmark: Removes the highlighted file from the list of files to be retrieved.

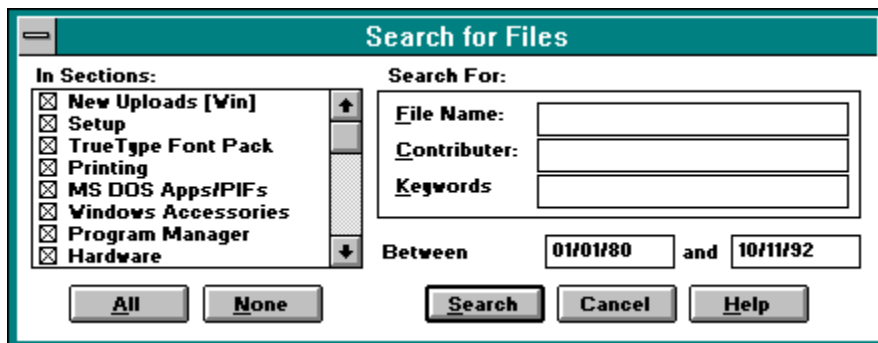

Cancel: Closes the dialog.

Searching for Library Files

The **Search for Files** dialog finds forum library files that match your search criteria.

You get here by clicking on the **Search** icon for libraries on the **Forum Toolbox** or by choosing **Search** from the Library menu in a forum.

You can control whether certain information is displayed as you browse and search for files in a forum library, such as the file size, file name, or submission date, by setting the appropriate options in the **Forum Preferences** dialog.

Related Information

[Browsing Library Files](#)

[Forum Libraries](#)

[Forum Preferences](#)

In Sections: These are the forum's library sections. Mark the sections you want to search. If you want to search all sections, select **All**. If you want to unmark all sections, select **None**.

File Name: If you know the name of the file you are looking for, type it here.

Contributer: If you know the User ID number of the person who contributed the file, type it here.

Keywords: If you can think of any words which might be associated with the file, type them here. For example, if you were looking for files associated with the CONVMA 1.1 Cardfile to ASCII Conversion Utility, you might find it by typing any of the following keywords: CARDFILE; CARD; CARDCONV; CONVERSION; CONVMA; ASCII. When searching for files by keywords, each word you specify must be part of the file's assigned keywords in order to find a match.

If the file you are looking for is older than this date, the search operation will not find it.

If the file you are looking for is newer than this date, the search operation will not find it.

All: Marks all library sections in the forum for searching.

None: Unmarks all library sections in the forum for searching.

Search: Begins the search. Takes you to a **File List** dialog where you can view a list of files that match your search criteria. If you select **Search** without specifying **File Name**, **Contributor**, and **Keywords** information, WinCIM displays a list of all files in the forum. **Search** will not be a valid selection and will be dimmed unless a library section under **In Sections** has been selected.

Cancel: Closes the dialog without conducting a search.

Browsing Library Sections

The **Library Sections** dialog lists the forum's library sections which you can browse.

You get to the **Library Sections** dialog by clicking on the **Browse** icon for Libraries on the **Forum Toolbox** or by choosing **Browse** from the Library menu in a forum.

In order to see library section numbers, the **Show Library Section Numbers** option in the **Forum Preferences** dialog must be set.

Changing Your Member Interests

The **Change Member Interests** dialog gives you the opportunity to modify or create your personal profile information for other forum members to read.

You get here by choosing **Change Member Entry** from the Special menu in a forum.

Related Information

[Discovering Member Interests](#)

[Forums](#)

[Forum Membership Interests](#)

[Learning About CompuServe Members](#)

Interests: Type any interests you want to share with other forum members. This is an excellent way to let others learn about you. You might have initially included this information when you became a member of the forum, at the **Joining a Forum** dialog. You must list at least one interest if you want your name to be available to members conducting a member search at a **Search for Member** dialog.

OK: Records your changes and closes the dialog.

Delete: Erases your **Interests** information and closes the dialog.

Cancel: Closes the dialog without recording any any changes.

Searching for Forum Members

The **Search for Member** dialog finds other forum members who meet your search criteria.

You get here by choosing **Search Membership** from the Special menu in a forum.

The image shows a dialog box titled "Search for Member". It has a teal header bar with a minus sign icon on the left. Below the header, there are three input fields: "User Name:", "User ID:", and "Interests:". At the bottom of the dialog, there are three buttons: "Search", "Cancel", and "Help".

Related Information

[Finding CompuServe Members](#)

[Forum Membership Interests](#)

[Searching for CompuServe Members](#)

User Name: If you are searching for a member by name, type the last name or full name of the member. For example, if you wanted to learn more about Jackson Hunan, you should type **Hunan** or **Jackson Hunan**, but not **J. Hunan** or **Hunan, Jackson**.

User ID: If you are searching for a member by User ID number, type the User ID number of the member.

Interests: If you are searching for a member by interests, type one or more interests. Each word you specify must exist in the person's interests summary. For example, if you type CATS, DOGS, ELEPHANTS, FISH, LIZARDS, INSECTS, you will find only members who have all six words mentioned in their interests summaries.

Search: Conducts the search. Takes you to a **Member Directory Search** dialog, which lists forum members who meet your search criteria. A member must have provided an interests summary in order to be included in the search. Thus, you might not find all members of a forum using the **Search for Member** dialog.

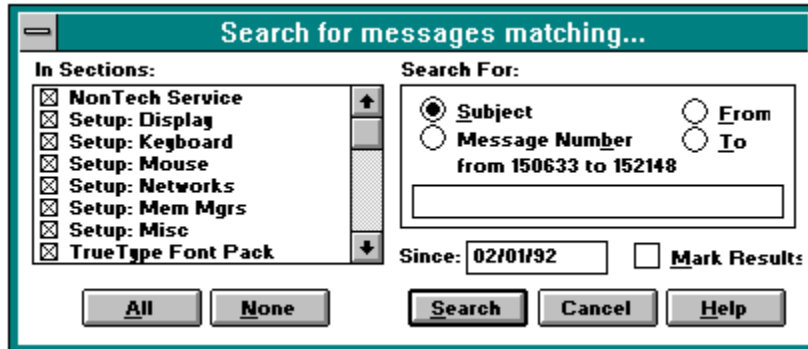

Cancel: Closes the dialog.

Searching for a Forum Message

The **Search for messages matching** dialog finds forum messages that match your search criteria.

You get here by clicking on the **Search** icon for messages on the **Forum Toolbox** or by choosing **Search** from the Messages menu in a forum.

Related Information

[Browsing Forum Messages and Topics](#)

[Forum Messages](#)

[Retrieving Your Marked Messages](#)

In Sections: These are the forum's message sections. Unless you are searching for a message by its message number, you must mark the sections you want to search. If you want to search all sections, select **All**. If you want to unmark all sections, select **None**.

All: Marks all sections. If you attempt to search for a message by its message number, **All** is not a valid selection and will be dimmed.

None: Unmarks all sections. If you attempt to search for a message by its message number, **None** is not a valid selection and will be dimmed.

Type your search criteria information, such as a message subject, message number, sender or recipient User ID number. In this example, since **Subject** has been selected, you would type a message subject. When searching for messages by subject, each word you specify must be part of the respective topic wording in order to find a match. If you are searching for a message by its message number, the number you type here must be a valid message number for the forum. In this example, the message number would have to be greater than **150633** and less than **152149** in order for the **Search** button to be a valid selection.

Since: Specify the date of the oldest message you want included in the search. In this example, all messages posted since February of 1992 will be searched. The date specified in the box beside **Since** is not used and is dimmed when you attempt to search for a message by its message number.

Mark Results: Mark this if you want the messages turned up to be automatically identified, or marked, for later retrieval.

Search: Begins the search. If you are searching by subject, author, or recipient, **Search** takes you to a **Message Topics** dialog where you view a list of messages that match your search criteria. If you are searching by message number, **Search** takes you to a **Forum Message** dialog.

Cancel: Closes the dialog.

Subject: Select this if you want to search for messages by their respective topic wording.

Message Number: Select this if you want to search for a message by its assigned message number..

From: Select this if you want to search for messages from a particular User ID number or member name.

To: Select this if you want to search for messages sent to a particular User ID number or member name.

Browsing Forum Message Sections

The **Message Sections** dialog lists the forum's message sections.

You get here by clicking on the **Browse** icon for messages on the **Forum Toolbox** or by choosing **Browse** from the Messages menu in a forum.

Title	Messages	Topics
<input type="checkbox"/> Program Manager	220	91
<input type="checkbox"/> Setup: Display	94	37
<input type="checkbox"/> Setup: Keyboard	6	3
<input type="checkbox"/> Setup: Mouse	73	19
<input type="checkbox"/> Setup: Networks	20	9
<input type="checkbox"/> Setup: Mem Mgrs	35	12
<input type="checkbox"/> Setup: Misc	163	67
<input type="checkbox"/> TrueType Font Pack	48	16
<input type="checkbox"/> Printing	376	117
<input type="checkbox"/> MS DOS Apps/PIFs	81	21
<input type="checkbox"/> Windows Accessories	131	49

Message section numbers will appear along with the section title if the **Show Message Section Numbers** option in the **Forum Preferences** dialog is set.

Related Information

[Browsing Forum Messages and Topics](#)

[Forum Messages](#)

[Retrieving Marked Messages](#)

[Searching for a Forum Message](#)

[Setting the Oldest Message Date](#)

These are all the message sections in the forum, along with the number of message topics and messages in each.

Select: Takes you to a **Message Topics** dialog that displays a list of message topics for the highlighted section. In this example, you would see the message topics for the **Program Manager** section entry.

Mark: Identifies, or marks, a highlighted section for later retrieval. In this example, the entire Program Manager section -- all 220 messages -- would be marked.

All: Marks all the message sections in the forum for later retrieval.

Close: Records your marking preferences and closes the dialog.

Discovering Message Relationships

The **Message Map** dialog shows you how a forum message is related to other messages in the same topic. Any message to which there are replies is called a 'parent'; other replies to the same message are called 'siblings'.

The connecting lines in the **Message Map** dialog show you how the messages in a topic are related to each other.

You get to the **Message Map** dialog by selecting  at a **Forum Message** or **Message Topics** dialog.

Related Information

[Browsing Forum Messages and Topics](#)

[Forum Messages](#)

Retrieving Your Marked Messages

The **Retrieve Marked Messages** dialog retrieves the messages that you marked in your forum session.

You get here by choosing **Retrieve Marked** from the Messages menu in a forum.

Related Information

[Forum Messages](#)

The message sections and message topics that you marked for retrieval are listed here. This example shows that four topics in the Windows 3.0 section of the WINNEW forum -- WININI HELP, Memory Page Fault Error, Zap Unwanted Files, and Won't Run in 386 mode -- have been marked for retrieval, as well as additional topics in the Windows Accessories section. If an entire message section has been marked for retrieval, you will see **{ all topics }** under **Topic**.

Disconnect When Done: Mark this if you want WinCIM to disconnect you from CompuServe after the final message has been retrieved.

Get All: Begins retrieval of all your marked messages into your Filing Cabinet. Unless an appropriate folder already exists, WinCIM creates a folder for the retrieved messages and names it after the forum. In this example, the messages will be retrieved to a Windows New Users (WINNEW) folder in your Filing Cabinet.

Unmark: Removes the highlighted message topic from the list of messages to be retrieved. If you unmark a topic by mistake that you still want, you can select the **Cancel** button, and then the **Retrieve Marked** command again.

OK: Records your changes and closes the dialog.

Cancel: Closes the dialog without recording any of your changes or retrieving any files.

Browsing Forum Messages and Topics

The **Message Topics** dialog lists all the topics in a forum message section.

There are many ways to get here.

Related Information

[Forums](#)

[Forum Messages](#)

[Message Map](#)

These are the message topics that make up the particular message section. In this example, the name of the message section is Program Manager. You can mark any message topic you wish to store in your Filing Cabinet.

Get: Takes you to a **Forum Message** dialog where you see the first message in the highlighted topic. In this example, you would view the first message in the **ProgMan & Win.Ini** topic entry.

Map: Enables you to learn the parent, child, and sibling relationships between messages in a topic. Takes you to a **Message Map** dialog.

Mark: Identifies the highlighted topic for later retrieval. In this example, the **ProgMan & Win.Ini** topic entry would be marked.

Close: Records your marking preferences and closes the dialog.

Joining a Forum

The **Joining a Forum** dialog tells you a little bit about the forum and gives you the opportunity to become a member. You must join a forum in order to post messages on the forum's message board, contribute and retrieve library files, and engage in forum conferences.

You see this dialog when you access a forum you aren't a member of, or when you select **Join Forum** from the Special menu in a forum.

Related Information

[Changing Your Member Interests](#)
[Forum Membership Interests](#)

This introductory text tells you something of the purpose and flavor of the forum, usually including the names and User ID numbers of the members in charge of the forum.

Name: Type your actual name rather than a nickname or handle. By default, the name that you specified in the box beside **Your Name** in your **Session Settings** dialog initially appears here. You cannot join a forum unless **Name** is filled in.

Interests: If you like, type any interests or objectives that you would like to share with other forum members. This is an excellent way to let others learn about you. You can leave this blank if you want and provide information later at a **Change Member Interests** dialog; but you must list at least one interest, either at a **Change Member Interests** dialog or at this **Joining a Forum** dialog, if you want your name to be available to members conducting a member search at a **Search for Member** dialog.

Join: Enrolls you as a member of the forum. You must have a name specified in the box beside **Name** before you can select this. Once you become a member, you receive full membership privileges, such as being able to post and reply to messages on the message board and contribute and retrieve files from the forum libraries.

Leave: Takes you back to where you were before you accessed the forum.

Visit: Allows you to explore the forum without becoming a member. As a visitor you can only view messages and review library files. You must become a member of the forum to post messages, contribute and retrieve library files, and participate in conferences.

Setting the Oldest Message Date

The **Set First Message Date** dialog determines how many messages you will be able to read in a forum. The date and time that you assign becomes the starting point for forum message browses and searches.

You get here by choosing **Set Date** from the Messages menu in a forum.

If you prefer, you can use a message number, rather than a date and time, as the starting point for forum message browses and searches, by assigning the message number at the **Forum Options** dialog.

Related Information

[Browsing Forum Message Sections](#)
[Browsing Forum Messages and Topics](#)
[Forum Messages](#)
[Searching for a Forum Message](#)

Date: Type the date you want to be the starting date for forum message browses and searches. Only messages posted after that date will be available for browsing and searching. By default, **Date** will be the date of the newest message read during your last visit to the forum. Thus, if you enter a forum several times a day, you will scan only the most recent messages when you browse or search messages unless you modify **Date** to be an older (earlier) date.

Time: Type the time you want to be the starting time for forum message browses and searches. Only messages posted after that time on the date specified in the box beside **Date** will be available for browsing and searching. By default, **Time** will be the time of the newest message read during your last visit to the forum.

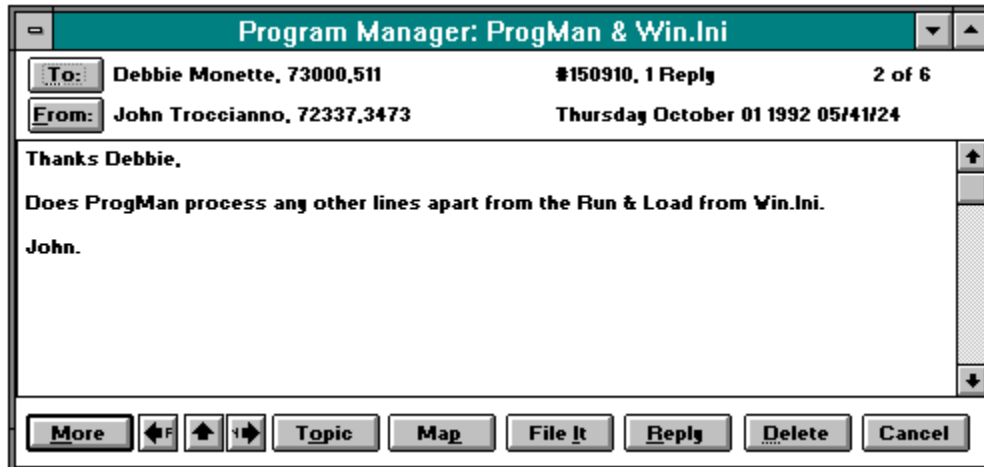

OK: Records your changes and closes the dialog.

Cancel: Closes the dialog without recording any changes.

Reading and Processing a Forum Message

The **Forum Message** dialog displays a forum message.

You get here by selecting at a **Message Topics** or **Message Map** dialog.

Related Information

[Address Book](#)

[Filing Cabinet](#)

[Forum Messages](#)

[Replying to a Message](#)

To: Takes you to an **Add to Address Book** dialog where you can add recipient information to your Address Book.

From: Takes you to an **Add to Address Book** dialog where you can add sender information to your Address Book.

Each message is assigned a unique message number. In this example, **150910** is the message number. This dialog tells you whether there are any replies to a message -- this example shows that there is one reply -- and whether the message is part of a topic -- this example shows that the message is the second of six. The **Program Manager: ProgMan and Win.Ini** caption for the dialog means that the message is part of the ProgMan and Win.Ini topic in the Program Manager section of the forum.

Topic: If there are other topics remaining to be browsed in the message section, **Topic** takes you to the first message in the next topic. If you are in the final topic for a message section, **Topic** is not a valid selection and is dimmed.

Map: Enables you to learn the parent, child, and sibling relationships between messages in a topic. Takes you to a **Message Map** dialog.

File It: Takes you to a **Filing Cabinet** dialog where you can store a copy of the message in your Filing Cabinet.

Reply: Takes you to a **Reply** dialog where you can compose and send a reply to the message author.

Delete: Removes the message from the forum message board. You can delete only messages that you compose.

Cancel: Closes the dialog.

More: If there is more of the message to be viewed than is showing, **More** displays the next page. If there is no more of the message to be viewed, but there is another message remaining to be read in the message topic, **More** displays that message. If there are no more messages in the topic, but there are additional topics, **More** displays the first message in the next topic; otherwise **More** is not a valid selection and is dimmed.

: Takes you to the previous message in the topic. If you are at the first message in the topic, this arrow is not a valid selection and is dimmed.

: Takes you to the parent of the message -- the message to which this message is a reply.

: Takes you to the next message in the topic. If you are at the final message in the topic, this arrow is not a valid selection and is dimmed.

Forum Options

The **Forum Options** dialog helps you customize your forum session. You can specify a different set of **Forum Options** for each forum you join.

You get here by choosing **Forum Options** from the Special menu in a forum.

The screenshot shows a dialog box titled "Forum Options" with a teal header. Inside the dialog, there is a text input field for "User Name" containing "Jack Doe". Below it, the text "Messages range from #150629 to #152144" is displayed. Underneath, there is a "Last Message" field with "150629" and an unchecked checkbox labeled "Permanent". At the bottom, there are three buttons: "Set", "Cancel", and "Help".

Related Information

[Forums](#)

[Forum Preferences](#)

[Joining a Forum](#)

[Setting the Oldest Message Date](#)

User Name: Enter your forum name here. It is best to use your actual name, rather than a nickname. **User Name** cannot be blank. By default, the name that initially appears here is the same one you specified when you joined the forum. When you create a forum message in a forum, the name specified in the box beside **User Name** is used as the sender name.

Last Message: Type the message number you wish to use as the starting message for message browses and searches for the remainder of your forum session. By default, **Last Message** will usually be the highest-numbered message you read during your last visit to the forum. If all the messages you read before are gone, **Last Message** will be one less than the number of the earliest remaining message. If you want to limit the number of messages available for browsing and searching even more, you can set the oldest message date for your forum session (see Related Information).

Permanent: Mark this if you want your option changes to be in effect each time you enter the forum.

Set: Records any changes and closes the dialog. You must have a name specified in the box beside **User Name** before you can select this.

Cancel: Closes the dialog without recording any changes.

Modem Control Settings

The **Modem Control Strings** dialog displays your current modem parameters so that you can review or modify them.

You get here by choosing **Modem Settings** from the Special menu on the Initial Desktop.

The screenshot shows the "Modem Control Strings" dialog box. It has a title bar with a minus sign and the text "Modem Control Strings". The dialog contains several fields for configuring modem parameters:

- Modem:** A dropdown menu showing "Current Settings".
- Initialize:** An empty text field with a dropdown arrow.
- Prefix:** A text field containing "AT".
- Suffix:** A text field containing "*M".
- Dial Tone:** A text field containing "DT".
- Dial Pulse:** A text field containing "DP".
- Reset:** A text field containing "Z".
- Hang Up:** A text field containing "Z".
- Escape:** A text field containing "...".
- Acknowledge:** A text field containing "OK".
- Connect:** A text field containing "CONNECT".
- Failure:** A text field containing "NO CARRIER".

At the bottom left, there is a checkbox labeled "Speaker Off" which is currently unchecked. At the bottom right, there are three buttons: "OK", "Cancel", and "Help".

Related Information

[Control Characters](#)

[Logon Parameters and Timeout Settings](#)

[Session Settings](#)

Modem: Highlight your modem type in the list provided. If your modem type is not in the list, highlight **Other**.

Initialize: Type your modem's initialization command string (up to 40 characters). If you highlight a modem in the list provided in the box beside **Modem**, WinCIM automatically fills in that modem's initialization command string.

Prefix: Make sure that this is the correct prefix string. Also known as the attention command.

Dial Tone: Make sure that this is the correct string to initiate tone dialing.

Reset: Make sure that this is the correct string to reset the modem.

Escape: Make sure that this is the correct string to issue an Escape command.

Connect: Make sure that this is the correct string or phrase to be displayed when connection is established.

Speaker Off: Mark this if you desire a silent operation (no dial tone, dialing, and connection sounds during logon) of a Hayes-compatible modem.

Suffix: Make sure that this is the correct string to terminate a command.

Dial Pulse: Make sure that this is the correct string to initiate pulse dialing.

Hang Up: Make sure that this is the correct string to free the telephone line.

Acknowledge: Make sure that this is the correct string or phrase to be displayed when connection is established.

Failure: Make sure that this is the correct string to or phrase to be displayed when there is no connection or the signal stops.

OK: Records any changes you make and closes this dialog.

Cancel: Closes the dialog without recording any of your changes.

Control Characters

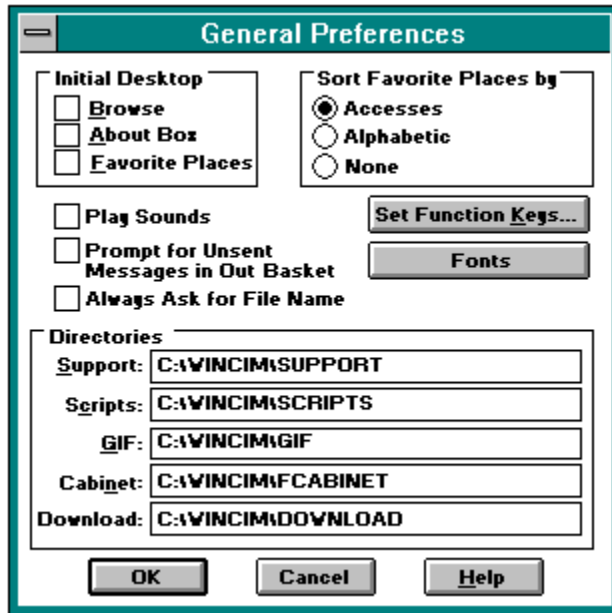

Some modems require control characters in their control strings. WinCIM's notation for a control character is a caret circumflex (^) followed by the control character letter.

For example, **^M** is the notation for Control-M, or carriage return.

General Preferences

The **General Preferences** dialog displays your current Information Manager Initial Desktop options and preferences so that you can review or modify them.

You get here by choosing **Preferences** from the Special menu on any Information Manager desktop, and then choosing **General** from the Preferences submenu.

About Box: Mark this if you want the **About Box** dialog to be displayed each time you start WinCIM.

Browse: Mark this if you want the Services window of CompuServe Services to be displayed each time you start WinCIM.

Favorite Places: Mark this if you want the **Favorite Places** dialog to be displayed each time you start WinCIM.

Prompt for Unsent Messages in Out Basket: Mark this if you want WinCIM to remind you to send any Mail in your Out-Basket before you exit, or to send any forum messages that are in your Out-Basket each time you leave a forum.

Set Function Keys: Takes you to a **Function Key Settings** dialog where you can assign a sequence of keystrokes to your function keys.

Support: Type the directory in which you want to store WinCIM's support files, such as where you want to store the Filing Cabinet and Address Book.

Scripts: Type the directory in which you want to store WinCIM's script files. WinCIM provides a number of these files which contain commands to automate routine functions such as connection and disconnection from CompuServe. You can learn more about scripts in the WinCIM Support Forum on CompuServe.

GIF: Type the directory in which you want to store any GIF files you download. GIF files are graphics files that you can view and find in some forums and services on CompuServe. For example, certain weather maps are GIF files.

OK: Records your changes and closes this dialog.

Cancel: Closes the dialog without making any of your changes.

Cabinet: Type the directory in which you want to store your Filing Cabinet files.

Fonts: Takes you to a **Fonts** dialog where you can modify the fonts WinCIM uses to display information on your monitor.

Accesses: Select this if you want the entries in your Favorite Places dialog to be listed according to their access frequency. In other words, the entry that you access most frequently will be listed first, and the entry that you access least frequently will be listed last.

Alphabetic: Select this if you want the entries in your **Favorite Places** dialog to be listed in alphabetical order.

None: Select this if you want your **Favorite Places** entries to be listed in the order in which you add them, rather than in alphabetical order or order of access frequency.

Play Sounds: Mark this if you want to have certain WinCIM events accompanied by sounds that you specify. You specify the sounds that you want in the Sounds module of your Windows Control Panel. Your Windows Control Panel will probably be in a folder called Main, although could be elsewhere if you have rearranged or reorganized your Windows desktop.

Always Ask for File Name: Mark this if you want WinCIM to always prompt you for a destination file name whenever you mark/retrieve a file. The alternative is the forum file name.

Download: Type the directory in which you want to store non-GIF files that you download.

Help: Displays this help page.

Changing Your Display Font

The **Fonts** dialog gives you some font-related options with respect to the way WinCIM displays text on your screen.

You get here by selecting  at the **General Preferences** dialog.

[CompuServe Mail](#)

[Filing Cabinet](#)

[In-Basket](#)

[Opening Your CompuServe Mailbox](#)

[Out-Basket](#)

[Preferences](#)

Delete Retrieved Mail: Mark this if you want WinCIM to automatically delete Mail messages from your online mailbox after you read them or retrieve them to your In-Basket.

File Outgoing Messages: Mark this if you want WinCIM to automatically save copies of all outgoing Mail messages to the specified Filing Cabinet folder. In this example, **Auto-Filed** is the name of the specified Filing Cabinet folder. However, you can specify any folder by typing its name in the box beside **Folder**.

Folder: Used in conjunction with **File Outgoing Messages**, you can specify a Filing Cabinet folder here to store your filed messages. If you modify the folder name, messages previously saved will remain in the old folder, while messages subsequently saved will go to the new folder.

OK: Records your changes and closes this dialog.

Cancel: Closes the dialog without recording any of your changes.

Help: Displays this help page.

Do not retrieve: If selected and you choose **Get New Mail** from the Mail menu, WinCIM will retrieve only messages for which there is no postage due. If there are messages in your mailbox for which there is postage due, WinCIM will not retrieve them.

Always retrieve: If selected and you choose **Get New Mail** from the Mail menu, WinCIM will retrieve all messages from your mailbox, including those for which there is postage due.

Delete without retrieving: If selected and you choose **Get New Mail** from the Mail menu, WinCIM will delete any messages for which there is postage due without retrieving or preserving them.

Changing Your Conference Nickname

The **Change Nickname** dialog shows your current conference nickname so that you can modify it.

You get to the **Change Nickname** dialog by choosing **Set Nickname** from the Conference menu in a forum.

Modify the information in the box beside **Nickname** to reflect the name by which you wish to be known. Then select **OK**. WinCIM will record your change immediately.

Your nickname may have a maximum of 19 characters, but may not contain asterisks (*), pound signs (#), or braces ({}). Your nickname may contain embedded spaces, but CompuServe removes leading or trailing spaces. For example, **Jackson_Hunan** and **Jackson Hunan** are both valid nicknames. A nickname cannot be obscene or offensive to the average person.

Cancel: Nulifies your change and closes this dialog.

Removing Forum Information

The **Forum Databases** dialog lists the forums you have accessed.

When you join a forum, WinCIM stores information about that forum in a database on your computer. Subsequently, WinCIM updates the information whenever you access the forum. This information includes message section names and library names and numbers. WinCIM uses it to get you into the forum faster and more efficiently.

If you suspect that the information (about a forum) in the database is wrong, you can delete it by highlighting it and selecting **Delete**.

[Terminal Emulation](#)

If you wish, type a label for the Alt key combination. Whenever the key combination is available to you in WinCIM, rather than the default **Alt+** wording that appears at the bottom of your screen, you will see the label you assigned.

Type the sequence of keystrokes you wish to automate (up to 80 characters). Type **^M** for a carriage return, and **^J** for a new line. For example, you could assign this to the Alt+4 Function key combination: **Morning, all! Anybody up for a chat? ^M^J** Once assigned, you could send that greeting each time you entered a channel in CB simply by pressing or clicking on Alt+4. Similarly, you could assign **EF OH ^M^J** to the Alt+5 key combination in order to automate requesting an extended weather forecast for Ohio in the Weather service.

OK: Records your settings and closes this dialog.

Help: Displays this help page.

Cancel: Closes the dialog without recording any of your changes.

Changing Your CB Handle

The **Change Handle** dialog displays your current CB handle so that you can modify it.

You get to the **Change Handle** dialog by clicking on the **Change Handle** icon on the **CB Toolbox** or by choosing **Change Handle** from the Special menu in CB.

Type your new handle and click **OK**. WinCIM will record your change immediately.

Your handle may have a maximum of 19 characters, but may not contain asterisks (*), pound signs (#), or braces ({}). Your handle may contain embedded spaces, but CompuServe removes leading or trailing spaces. For example, **Truckin_Hobo** and **The Truckin Hobo** are both valid handles. A handle cannot be obscene or offensive to the average person.

You will be prompted for a handle each time you access CB unless you specify one in the **CB Preferences** dialog or have a reserved handle.

This is the **Change Handle** icon. You'll find it on the **CB Toolbox**. It takes you to this dialog.

This is the **Change Handle** icon. You'll find it on the **CB Toolbox**. It takes you to this dialog.

Session Settings

The **Setup Session Settings** dialog shows your current connection information, such as your User ID number or baud rate, so that you can review or modify it.

You get here by choosing **Session Settings** from the Special menu on the Initial Desktop.

The screenshot shows a dialog box titled "Setup Session Settings" with a teal header. The dialog contains several fields and buttons:

- Session** section: "Current:" dropdown menu showing "CIS Connection", with "New" and "Delete" buttons to its right.
- Alternate:** dropdown menu showing "CompuServe".
- Name:** text field containing "Jack Doe".
- Connector:** dropdown menu showing "COM2".
- User ID:** text field containing "75140,1071".
- Baud Rate:** dropdown menu showing "9600".
- Password:** text field containing a series of asterisks.
- Network:** dropdown menu showing "CompuServe".
- Phone:** text field containing "8762116".
- Connection Type:** Radio buttons for "Tone" (selected), "Pulse", and "Direct".
- Retries:** text field containing "0".
- Buttons:** "OK", "More...", "Modem...", "LAN...", "Cancel", and "Help" are arranged vertically on the right side.

Related Information

[Settings](#)

Name: Type your real name as opposed to your handle or nickname.

Network: Highlight the network you want WinCIM to use to connect to CompuServe. If you select **Direct** under **Dial Type**, there is no need to specify a network.

Baud Rate: Highlight the baud rate you wish to use. Make sure your modem supports the baud rate you select.

Retries: Type the number of times your modem will attempt to redial if the first attempt to connect fails. A reasonable value is 10. If you select **Direct** under **Dial Type**, there is no need to specify retries.

Phone: Type the CompuServe local access telephone number to be used to connect to CompuServe.

Session: If you have multiple Session Settings sets and want to use a specific set, highlight the name of the set. To add a set to the **Session** list, type a name for the set in the box beside **Session**; then complete the dialog. When you press **OK**, WinCIM will record your information in the **Session** list.

User ID: Type your User ID number if you were already a member when you installed WinCIM. If you are a new member, use the User ID number you received during the signup process until you receive your permanent User ID number.

Password: Type your CompuServe password. This is optional. If you do not type a password in Session Settings, WinCIM will prompt you for it when you attempt to connect to CompuServe. You cannot see your password in Session Settings.

Secondary Network: Highlight the network you want WinCIM to use to connect to CompuServe if the **Primary Network** is not available. If you select **Direct** under **Dial Type**, there is no need to specify a network, and the list arrow for **Secondary Network** will be dimmed.

Baud Rate: Highlight the baud rate you wish to use in your **Secondary Connection**.
Make sure your modem supports the baud rate you select.

Retries: Type the number of times your modem will attempt to redial if the first attempt fails in your **Secondary Connection**. A reasonable value is 10. If you select **Direct** under **Dial Type**, there is no need to specify retries and **Retries** will be dimmed.

Phone: CompuServe local access telephone number to be used to connect to CompuServe.

Connector: Highlight the communications port on your computer to which your modem is attached. Most computers utilize COM1, although some laptops utilize COM2.

Tone: Select this if you want to use tone dialing. Tone dialing sounds like a touchtone telephone.

Pulse: Select this if you want to use pulse dialing. Pulse dialing sounds like a rotary telephone.

Direct: Select this only if your computer is hard-wired to another computer system which provides the connection for you.

OK: Saves your changes and closes this dialog.

Cancel: Closes the dialog without saving any of your changes.

More: Takes you to a dialog where you can specify the number of seconds WinCIM will wait for a response from CompuServe before cancelling a command, as well as additional logon information that might be necessary for your network.

Current: Select the session settings set to be used to connect to CompuServe.

New: Takes you to a **New Session Name** dialog where you specify a name for a new set of session settings. The new settings are those currently specified at the **Setup Session Settings** dialog. The new set is added to the collection of sets listed in the box beside **Current**.

Delete: Removes the highlighted session settings set from the collection listed in the box beside **Current**.

Alternate: Select the session settings set to be used if the set specified for **Current** is unable to connect you to CompuServe. Once you select an alternate session settings set, the set will remain linked to the set specified for **Current** until you select a different set. If you do not want to specify an alternate session settings set, select **[None]**.

Modem: Takes you to a **Modem Control Strings** dialog where you can review or modify modem specifications, or provide special initialization strings.

LAN: Takes you to a **LAN Session Settings** dialog where you specify the communications port through which your computer accesses the LAN or modem pool that connects to CompuServe for you. **LAN** will not be a valid selection unless you specify **INT14** in the box beside **Connector**.

Conference Preferences

The **Conference Preferences** dialog displays your current forum conferencing-related options and preferences so that you can review or modify them.

You get here by . from the **Forum Preferences** dialog.

The screenshot shows a dialog box titled "Conference Preferences" with a teal header. It contains several sections: "Nickname" with a text input field; "Track" with four checked checkboxes for "People Entering", "People Leaving", "Switching Locations", and "Changing Nicknames"; "Record" with two unchecked checkboxes for "Room" and "Group"; "Invitations" with two radio buttons, "Accept" (selected) and "Ignore"; and "Talks" with two radio buttons, "Accept" (selected) and "Ignore". At the bottom right are three buttons: "OK", "Cancel", and "Help".

Name: Select this if you want to see a list of names rather than User ID numbers.

User ID: Select this if you want to see a list of User ID numbers rather than names.

All: Select this if you want the list to include everyone in the forum.

Room: Select this if you want the list to include only those persons in a particular conference room. The conference room number is specified in the box to the right of **Room**. However, in this example, there is no number in the box because **All**, rather than **Room**, has been selected.

Type the conference room number in this box if you select **Room**.

Group: Select this if you are participating in a private group conversation and want the list to include only the group's members. If you are not in a private group, **Group** will be dimmed.

Only Friends: Mark this if you wish to restrict the list to only those people in your **Update Group** dialog Friends list.

Freeze: Stops WinCIM from updating the list. This is useful if conference activity is extremely high. If you select **Freeze**, the **Freeze** button will change to **Unfreeze**; then select **Unfreeze** for WinCIM to resume updating the list.

Cancel: Closes the dialog.

These are the names of the people in the forum. Highlight the name of any person you wish to talk with or learn more about.

Mark these checkboxes to identify who you want to invite to join a group.

Profile: Gives you personal information about the highlighted member. Takes you to a **Member Interests** dialog.

Talk: Takes you to a **Talk** dialog where you can converse with the highlighted member. In this example, you would converse with Joe Annt.

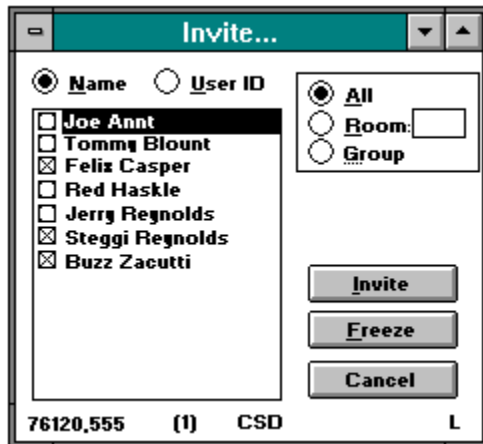

Miscellaneous information: Gives you some information about the highlighted user, such as the User ID number and job number, where the user is connecting to CompuServe from, and where the user happens to be (**L**, for example, means the user is in the lobby).

Inviting People to a Private Group

The **Invite** dialog shows you who else is in the forum so you can invite one or more members to participate in a private group conversation.

You get here by clicking on the **Invite** icon on the **Forum Toolbox** or by choosing **Invite** from the Conference menu in a forum.

If you want to be able to see group invitations sent by others to you, the **Accept** option for **Invitations** in the **Conference Preferences** dialog must be set.

These are the nicknames or handles of the people conversing. ***SYSTEM*** is not a person, but refers to a message displayed by CompuServe. Handles that begin and end with Asterisks (*) are Reserved Handles created by members of the CB Club for exclusive use. In this example, Timely is chatting with three other people on Channel 12 -- BankerB, Short, and Sli.

This is the current channel conversation. In this example, BankerB and Short appear to be engaged in a type of electronic Ping Pong match, with Sli and Timely as spectators.

This is your nickname or handle (**Timely**).

This is your comment box. Type what you want to say and then press a carriage return. In this example, you are typing a comment.

Reading a User Profile

The **User Profile** dialog displays information about a member.

You get to the **User Profile** dialog by selecting at the Who's Here dialog in CB.

Notices

This type of dialog typically lists the message and library sections in a forum.

There are **many ways** to get here.

Related Information

Forums

Logon Parameters and Timeout Settings

The **More Session Settings** dialog contains some additional connection settings for rare situations.

You get here by selecting at the Session Settings dialog.

Related Information

[Session Settings Settings](#)

Logon Parameters: These are special instructions appended to your User ID number. You should type only information when so directed by a CompuServe Customer Service representative.

HMI Timeout: Type the number of seconds you want WinCIM to wait for a response from CompuServe before cancelling the command. In this example, 30 seconds has been specified. If you frequently receive time-out messages, you might want to increase your current timeout value. The value you specify cannot be greater than 255.

OK: Records your changes and closes this dialog.

Cancel: Closes the dialog without recording any changes.

Filing a Message or a Reply

The **Filing Cabinet** dialog refiles a Mail message that is already stored in your Filing Cabinet. It also files copies of your replies to forum and Mail messages, as well as messages and ENS stories.

There are many ways to get here:

Related Information

[Filing Cabinet](#)

These are the folders in your Filing Cabinet. Highlight the one in which you want to file your message or story and select **Store**. If you want to create a new folder, select **New**.

Move: Mark this if you want to put your reply into your Filing Cabinet to deal with later. If **Move** is selected and you select **Store**, the dialog from which you requested the filing operation is automatically closed.

Copy: Mark this if you want to make a copy of your reply and store it in your Filing Cabinet. If **Copy** is selected and you select **Store**, WinCIM returns you to the dialog you were at before you requested the filing operation.

Store: Moves or copies your reply to the highlighted folder and closes this dialog. In this example, **Auto-Filed** is the folder that would be used.

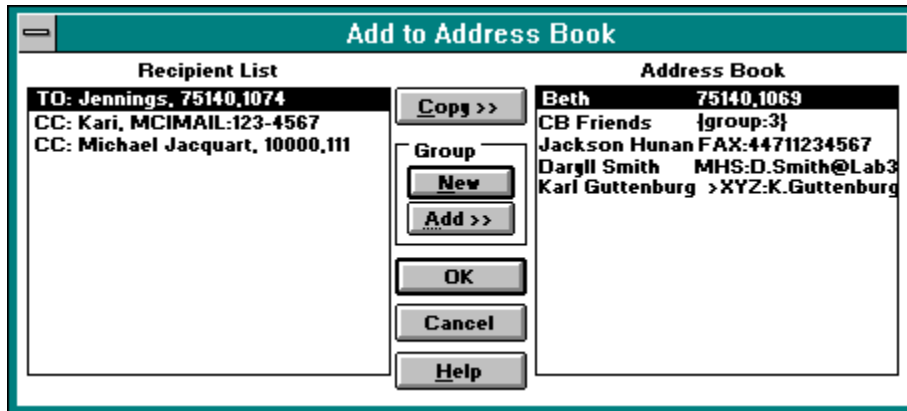

New: Takes you to an **Add New Folder** dialog where you can create a folder.

Cancel: Closes the dialog without filing your message or story.

Adding a Recipient List

The **Add to Address Book** dialog adds recipient list information from a CompuServe Mail message to your Address Book.

You get here by selecting **Address:** at a **Message** dialog if there is more than one recipient.

Related Information

[Terminal Emulation](#)

File: Takes you to a standard Windows **Open** dialog where you can identify and select the file you want to upload.

Type the name and path for the file on your microcomputer that you wish to upload to CompuServe. If you use the **File** button, this information is automatically filled in for you.

File Type: Select the type of file you are uploading, either **Binary**, **Text**, or **GIF**.

OK: Closes the dialog and begins the upload process.

Cancel: Closes the dialog.

Copying Text

The **Copy To** dialog copies text from a WinCIM text box, such as a weather report, to the body of a forum or CompuServe Mail message you are composing.

You get here by choosing **Copy To** from the Edit menu.

Text File: Mark this if you want to paste from a file on disk. When you select **OK**, WinCIM takes you to a standard Windows **Open** dialog where you can identify and select the file you want to paste.

Filing Cabinet: Mark this if you want to paste from your Filing Cabinet. Your Filing Cabinet folders are shown in the box below. Highlight the one you want and select **OK**. When you do so, WinCIM takes you to an **Opening a Folder** dialog where you can select the entry you want to paste.

In-Basket: Mark this if you want to paste from your In Basket. When you select **OK**, WinCIM takes you to an **In-Basket** dialog where you can identify and select the message you want to paste.

Out-Basket: Mark this if you want to paste from your Out Basket. When you select **OK**, WinCIM takes you to an **Out-Basket** dialog where you can identify and select the message you want to paste.

Your Filing Cabinet folders are always listed here. If you selected **Filing Cabinet**, highlight the folder you want and select **OK**. When you do so, WinCIM takes you to a **Folder** dialog where you can select the entry you want to paste.

OK: Takes you to the appropriate dialog where you can select what you want to paste.

Cancel: Closes this dialog.

Help Displays this help page.

Selecting Address Book Entries

The **Select Entries from Address Book** dialog lists your Address Book entries so that you can select one or more for an address group.

You get to the **Select Entries from Address Book** dialog by selecting **Add** at the **Add Group to Address Book** dialog.

Related Information

[Address Book](#)

Online Information

Sometimes WinCIM displays online text in a dialog like this one. Click **Proceed** to continue

Searching Your CompuServe Mail

The **Search New Mail** dialog finds Mail messages in your mailbox that meet your search criteria. You can search by sender, subject, sensitivity, priority, or date.

You get here by choosing **Search New Mail** from the Mail menu.

The image shows a screenshot of the "Search New Mail" dialog box. The dialog has a title bar with a minus sign on the left and the text "Search New Mail" in the center. Below the title bar, there are several input fields and buttons. On the left, there are labels for "From:", "Subject:", "Importance:", and "Dates from". The "From:" and "Subject:" labels are followed by empty text input boxes. The "Importance:" label is followed by a dropdown menu showing "All" and a downward arrow. The "Sensitivity:" label is followed by a dropdown menu showing "All" and a downward arrow. The "Dates from" label is followed by an empty text input box, the word "to", and another empty text input box. On the right side of the dialog, there are three buttons: "Search", "Cancel", and "Help".

Related Information

[Address Book](#)
[CompuServe Mail](#)

From: Takes you to a **Select Entry from Address Book** dialog where you can select the address you want to search for. Once you make your selection, WinCIM automatically fills in the electronic mailing address in the box at the right.

If you want to search for a particular electronic mailing address, type the address here. If you use **From** to select your search address, WinCIM automatically fills it in here.

Subject: If you want to search for messages by their subject wording, type a word or phrase that makes up the subject you want to search for. Every word you specify must be part of the actual message subject in order for WinCIM to find the message.

Normal: Select this if you want to search for only normal sensitivity messages.

Personal: Select this if you want to search for only personal sensitivity messages.

Sensitivity: Select the sensitivity level for the messages you want to search for: **Normal**, **Personal**, **Private**, **Confidential**, or **All**.

Importance: Select the importance level for the messages you want to search for: **Low**, **Normal**, **High**, or **All**.

If you want to restrict your search to a date frame, type the oldest date here.

If you want to restrict your search to a date frame, type the most recent date here.

Search: Conducts the search. WinCIM takes you to a Get New Mail dialog where you can view the messages that meet your search criteria. If you think WinCIM should have found a message when it did not, you might want to double check your search criteria.

Cancel: Closes the dialog without conducting a search.

Help: Displays this help page.

All: Select this if you want to search for all messages regardless of sensitivity.

Pasting from Your Out-Basket

The **Out-Basket** dialog lists the contents of your Out-Basket so that you can paste text into a text box that you are editing, such as the body of a CompuServe Mail message.

Select the entry you wish to paste. Then click **Select**.

Public Folder: ENS automatically puts news stories such as current news into **Public** folders that anyone can peruse or browse.

Personal Folder: ENS gives you the option of designing up to three **Personal** folders for specific news stories. You determine the story selection guidelines for each Personal folder; ENS then clips and saves only those stories that match the story selection guidelines.

retrieve: To download a story from a Personal Folder or Public Folder in ENS.

Forums

Forums are places where CompuServe members can meet others who share their special interests. Forum members can exchange information, expound opinions and ideas, and participate in general conversation. Every forum has a message board, data libraries, and conference rooms where special meetings and seminars take place.

To view a list of forums related to a topic that interests you, choose **Find...** from the Initial Desktop Services menu and search for the topic. To view a comprehensive list of all CompuServe forums, use **Find...** and search for FORUMS.

To view forum descriptions, consult the CompuServe Directory (choose **CompuServe Directory** from the Help menu).

Forum Topics

Forum Messages

Forum messages are wide-ranging correspondence to be read by all. You can browse the various forum Message Sections to explore and read the related Message Topics, or you can go straight to any messages addressed to you. As you browse the assorted forum Message Topics you can mark individual messages, whole Message Topics, or entire Message Sections that you wish to retrieve.

Messages are not kept forever in a forum. Some very busy forums keep messages for only a few days. An important message might be placed in one of the forum's libraries for longer availability.

duration of forum messages: Messages are not kept forever in a forum. Some very busy forums keep messages for only a few days. An important message might be placed in one of the forum's libraries for longer availability. You cannot delete a forum message unless you are the author (See the Reading and Processing Forum Messages topic below).

waiting messages: If there are any unread messages addressed to you when you enter a forum, you can go straight to them by choosing **Get Waiting** from the Forum Messages menu.

Forum Libraries

Forum libraries are for relatively permanent storage of text files, graphics files, and software.

Anyone can contribute files to a forum library. After careful review by the Sysop, the new file will be made available to all the forum members.

Files in a forum are organized into Library Sections. As you browse or search the various Library Sections and files you can mark the ones you wish to retrieve.

ticker symbol: A standardized symbol, usually alphabetic, that identifies a particular securities issue. Company names or CUSIP numbers are not interchangeable with tickers.

Executive News Service: A comprehensive collection of various news wires, reporting up-to-the-minute news, sports, and financial information. ENS includes a powerful story search feature, which intercepts stories about designated subjects and clips or keeps them for you in up to three personal electronic folders.

name: The name of the electronic mail recipient. You may also enter a nickname.

address: The electronic mailing address of the recipient. This is the same as the recipient's User ID number.

comments: Optional information you may include as you create or modify an electronic message.

group name: The name of the address group you want to create or modify.

address group: You can combine one or more of your Address Book entries into categories called address groups. Then you can cause a message to be sent to all members of an address group by simply addressing the message to that address group.

description: How you want your entry to appear in your Favorite Places; the particular wording you want to use to describe the service or forum.

service name: The same name you would use if you were to **Go** to the service.

message board: The place where forum messages are posted.

library: A forum's reference area; ideal for long-term storage of lengthy, structured documents or software programs contributed by forum members for forum members.

conference: A 'live' electronic conversation that you can participate in or monitor; includes casual chats, scheduled meetings, and guest lectures.

room: Where a conference takes place; each forum has several conference rooms.

sysop: System operator, a forum member who is in charge of the forum and can answer questions about the forum and resolve most problems you encounter.

message start date: The date of the oldest message in a forum that you want included in your messages set; controls the number of messages available to you.

section: An area of a message board in a forum; each forum has several sections; each section focuses on some more specific aspect of the forum's overall area of interest.

topic: A group of forum messages with a common subject and a common genealogy; a thread of connected messages. Also the subject of such a group or thread.

thread: A group of forum messages with a common subject and a common genealogy. Also called a topic.

mark: To select an item in a list for a later action. For example, while browsing in a forum library, you can mark files that interest you and retrieve them later. A marked item is usually denoted by a marked checkbox.

retrieve: To copy a file from a CompuServe forum library to disk storage on your microcomputer (download).

contribute: To copy a file from disk storage on your microcomputer to a CompuServe forum library (upload).

freshen: To update a forum's message board while in the forum; useful if you want to see newly posted messages since your entrance into the forum.

posting date: The date a forum message appears on the message board.

map: A list of names connected by lines diagramming the relationships among messages within the current forum message topic.

private message: A forum message that you send to another member via CompuServe Mail; the message does not appear on the forum's message board, but goes directly to the member's private CompuServe Mail area.

Filing Cabinet: Storage area that the Information Manager creates and maintains on your microcomputer. You use folders in your Filing Cabinet to store and organize messages and other documents while using the Information Manager.

CB Simulator: A kind of CB on CompuServe, but without radio waves. Just like on a traditional citizen's band radio, you monitor and tune to channels to converse with other CBers, but rather than speak into a microphone, you type at a keyboard. Your comments are visible to others on the channel; their comments are visible to you. Join in or just listen. Access one of 72 channels.

In-Basket: An area reserved by CompuServe in your computer's disk storage. You can store your incoming Mail messages in your In Basket until you decide what to do with them.

Address Book: Disk storage area where the Information Manager can keep names, addresses, and other important information about your regular CompuServe Mail correspondents.

file abstract: A summary of a file in a forum library containing information such as description and size.

view: To read a document or display a graphics file.

binary: Files stored in binary format, such as tokenized BASIC programs, machine language programs, and most microcomputers' BASIC data files.

text: The contents of a message or a readable file. All messages in the Information Manager are text.

browse: To explore the hierarchy of CompuServe services, peruse the hierarchy of messages and library files in a forum, or scan news stories in the Executive News Service.

forum: A CompuServe service for members sharing a special interest. More than 200 forums exist on CompuServe. Forums have message boards, data libraries, and conference rooms where special seminars and meetings take place.

message number: Each forum message has a unique number assigned to it which identifies it from all other messages.

private group: A group in a forum conference room or on a CB channel that consists only of those members who were invited to it.

Favorite Places: An Information Manager menu that you can customize to list the services you access frequently; you can add or delete services at will. When you select a service from your Favorite Places menu, you go directly to that service.

keyword: In forums, a word or phrase identifying the contents of a file. If you are searching a forum library, keywords govern the search. Keywords are also used when searching for new stories in the Executive News Service.

message: General term for electronic communications sent by one CompuServe member and received by another. Examples are CompuServe Mail messages, forum messages, and CB messages.

Out-Basket: An area reserved by CompuServe in your computer's disk storage. Store completed mail and forum messages here until you are ready to send them; save incomplete messages here until you finish them.

join: Although you can read forum messages and browse library files as a visitor without joining a forum, you must eventually join in order to enjoy full forum membership privileges, such as posting or replying to messages and contributing or retrieving library files.

tune: This means to select the CB channel you want to converse on. You can only converse on one channel at a time -- the one you're tuned to.

channel: This is where conversations take place in CB. Each channel is like a type of lounge or conference room. There are up to 72 channels for you to pick from.

bulletin: Late-breaking news concerning the CB service and community.

channel selector: The particular dialog from which you select a channel to tune to or monitor.

friends group: This is your record of names and CompuServe addresses of your CB and forum friends; this address group is automatically placed in your Address Book and is called CB/CO group.

handle: A nickname that identifies you on CB; you can change your handle anytime.

invite: To ask one or more people to join a private group conversation.

lobby: The initial entrance to CB or a forum. From here, you can tune to a channel or enter a room and join an existing conversation or start a new one.

monitor: To listen to the activities of a channel or conference room. This may be done while you are tuned to another channel or room.

profile: A file containing information on each CB member, usually including where people live, their handle, what type of computer they use, and general interests. You may choose whether you wish to establish a profile for yourself.

squelch: To block communication from another user; their messages no longer appear on your screen.

tracking window: A small window that reports the ongoing activity in CB, including who's coming and going, switching channels, and changing handles.

capture buffer: A feature in Terminal Emulation that automatically records the exchange of information between you and CompuServe.

About box: A dialog box that shows the software's version number and reports details of your last session with CompuServe.

basic services: CompuServe services that have unlimited free connect time for a flat monthly rate under the Standard Pricing Plan. (There are communications surcharges for some networks in some locations.)

baud rate: Signals transmitted per second over a communications link. In Session Settings, you can select any baud rate your modem supports.

billing time: Amount of time (up to the nearest minute) that you use an extended service. Billing time differs from connect time because it represents only the amount of time for which you are charged.

command: A choice on a pull-down menu or an instruction. The **Go** command is frequently used in the Information Manager. You can also enter commands when in Terminal Emulation.

command button: A rectangular button in a dialog box which implements the indicated action. Command buttons are often labeled Cancel and Select.

communications network: The combinations of lines, satellites, and machines that enables computers to exchange information.

communications surcharge: The charge levied by a communications network for carrying information between you and CompuServe. CompuServe members have to pay for connecting through some networks at some locations.

CompuServe Directory: A guide to forums and other services. The CompuServe Directory contains brief descriptions of services. Access the directory from the Help menu and search for services by description or name.

CompuServe Mail: Electronic mail system for CompuServe members. CompuServe Mail permits message exchange between CompuServe members and members of many other electronic mail services.

connect time: The amount of time you are connected to CompuServe. Connect time differs from billing time because it includes all the time you spend online. You can connect to CompuServe and use complimentary services like the Electronic Mall without accruing CompuServe charges.]

control key command: The combination of Control plus a letter key. These key combinations are used to control the flow of text in Terminal Emulation. Some examples are Control + C and Control + S.

default: Option that is set for you automatically. Defaults streamline your activities because the computer uses what is already selected. You can always change a default.

desktop: Onscreen area that organizes and arranges your Information Manager materials. Resources like the Ribbon, toolboxes, and menu display choices available to you. Forums, CB Simulator, Executive News Service, and Terminal Emulation have distinctive desktops with their own unique resources.

dialog box: Box in which you supply specific instructions for the Information Manager.

download: To copy a file from CompuServe to your computer's disk storage.

Executive Service Option: A special membership option that gives you exclusive access to a specialized group of CompuServe services like SUPERSITE, which are labeled (E). The Executive Service Option carries a \$10 monthly minimum.

extended services: Large and diverse group of CompuServe pay-as-you-go services. In service menus, + appears at the far right of any extended service. Some, but not all, extended services carry premium charges, and these are also indicated on the menu.

file transfer: The exchange of a file between a remote computer system and your own computer. You can upload to CompuServe or download from it.

GIF: Graphics Interchange Format. CompuServe's format for graphics files that can be exchanged between different types of computers.

icon: A graphical representation of a service or command.

log off: To disconnect from CompuServe.

log on: To connect to CompuServe.

Member Directory: A listing of names and User ID numbers of CompuServe members.

menu bar: Horizontal bar at the top of the screen identifying the major groups of functions offered by the Information Manager. The menu bar provides access to listed services and commands. The menu bar changes in forums and some services.

option button: Small, round button in a dialog box that allows you to designate specific preferences. Option buttons in a group are mutually exclusive.

password: Personalized secret 'word' required for access to your CompuServe account. You can change your password as often as you'd like. Never tell anyone your password.

premium charge: The surcharge for an especially valuable service provided by CompuServe. Premium charges may be based on usage time or number of transactions on a service. If premium charges apply, they are always indicated by (\$) on the list menu where you select a service.

prompt: Request for specific instruction or information in Terminal Emulation. A prompt often requires you to enter a response in order to continue.

protocol: Set of rules governing computer-to-computer communication.

retries: Number of times your modem will try to connect to CompuServe if your initial try isn't successful. You set retries in Session Settings.

retrieve: To move or copy a file or document from CompuServe to your own computer. You can retrieve new CompuServe Mail to your In-Basket and news stories or forum messages to your Filing Cabinet.

Ribbon: The row of icons that appear at the top of your screen. Each Ribbon icon represents a feature of the Information Manager.

scroll: To move horizontally or vertically through a menu, article, or other text document. If a long bar appears along the right side of what you're reading, that's a hint that you can scroll up and down using your mouse or direction keys. You can also scroll left and right to see all of a text document that is wider than your screen.

Services window: Graphical menu showing the major groups of online CompuServe services.

Session Settings: Information required to connect your computer to CompuServe. In Session Settings, you provide all the information that you want your computer to use automatically. Whatever you don't provide (for instance, your password), you will have to enter every time you log on.

Terminal Emulation: The mode in which your computer emulates a terminal. Many CompuServe services work in Terminal Emulation, where you navigate with textual commands instead of windows.

toolbox: A column of icons that provides quick and easy access to some of the most important features in the Executive News service, CB Simulator, and forums. Toolboxes differ from desktop to desktop.

User ID number: CompuServe account identification number. Your User ID number is your electronic mailing address and is listed beside your name in the Member Directory.

WinCIM: Acronym for the Windows version of the CompuServe Information Manager.

database: Online repository of information. You can access databases like IQuest in order to scan abstracts, read the full text of published materials, and download documents.

full text: Whole and uncut document. Several databases offer access to full-text articles which you can read or download.

full-text search: A database search that searches the entire text of an article to find a match to a keyword you specify.

keyword: A portion of a word, a whole word, or a phrase that guides your search through a database, forum library, and the Executive News Service. All available topics and files are selected based on the exact spelling of keywords, regardless of their case.

multiplayer games: Online games which can be played simultaneously by different people in different places.

text: The contents of a message, article, or other kind of document.

text file: A file consisting solely of ASCII characters (characters you can type at your keyboard).

upload: To copy a file from you computer's disk storage to CompuServe.

toggle: (noun) A function that can be turned on and off by using the same key or key combination or by choosing it from a menu. (verb) To switch a function on or off with the same key, key combination, or command.

function keys: Key combinations in Terminal Emulation and CB that have text or commands assigned to them

summary page: A brief recap of information necessary to play a game, including special equipment requirements, suggested age, number of players, and so on. The summary page also provides access to detailed instructions.

News Toolbox

The **News Toolbox** is a pictorial menu of frequently used News commands.

You can view the **News Toolbox** by choosing **Toolbox** from the Special menu on the News Desktop.

If you want to see the **News Toolbox** automatically each time you access the News Desktop, mark the **Show Toolbox** option in the **ENS Preferences** dialog.

Related Information

[ENS Preferences](#)

[Executive News Service](#)

This is your **Notices** icon. It gives you important news about the News Desktop, such as upcoming changes or service-related announcements. It will be dimmed if there are no announcements.

This is your **Select Folder** icon. It represents the **Select Folder** command on the Stories menu. It takes you to a **Select Folder** dialog where you can examine your Personal and Public News Folders to browse and search for stories.

This is your **Retrieve Marked Stories** icon. It represents the **Retrieve Marked Stories** command on the Stories menu. It takes you to a **Retrieve Marked Stories** dialog where you can download the stories you marked for retrieval.

This is your **Create Folder** icon. It represents the **Create Folder** command on the Stories menu. It takes you to a **Create Folder** dialog where you can design a Personal Folder to hold your clipped news stories.

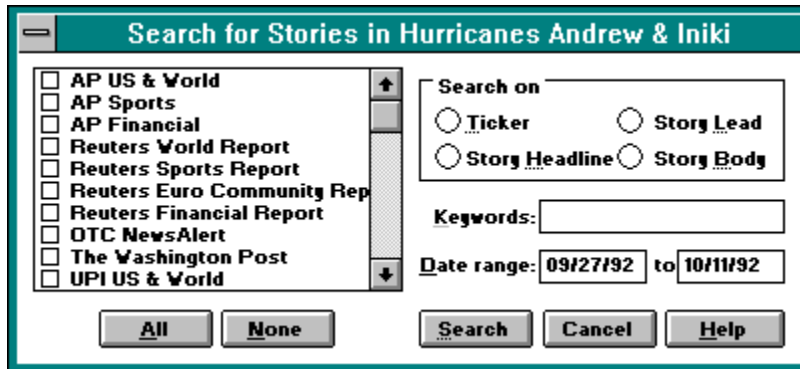

This is your **Update Folder** icon. It represents the **Update Folder** command on the Stories menu. It takes you to an **Update Folder** dialog where you can update or modify the story selection guidelines for a Personal Folder.

This is your **Delete Folder** icon. It represents the **Delete Folder** command on the Stories menu. It takes you to a **Delete Folder** dialog where you can dispose of a Personal Folder.

Searching for News Stories

The **Search for Stories** dialog displays the news sources and searching options that enable you to find specific news stories.

You get here by selecting at a **Select Folder** dialog.

Related Information

[Browsing News Stories](#)
[Executive News Service](#)
[Reading News Stories](#)

These are all the news sources available to you. Mark one or more news sources you want to search. If you want to mark all news sources, select **All**. You can select **None** to clear or unmark any marked news sources.

All: Marks all news sources.

None: Unmarks all news sources.

Ticker: Enables you to search for stories containing a specific ticker symbol when you are searching the **News by Company Ticker** Public Folder in ENS. You type the ticker symbols you want to search for in the box beside **Keywords**, with each ticker symbol separated by a semicolon (;).

Story Headline: Enables you to search story headlines for matching words or phrases that you type in the box beside **Keywords**. A story headline is a single-line description of a story.

Story Lead: Enables you to search the first sentence or few lines of a story for matching words or phrases that you type in the box beside **Keywords**.

Story Body: Enables you to search the entire story for matching words or phrases that you type in the box beside **Keywords**.

Keywords: Type what you want to look for. You can include a plus sign (+) to represent AND, a minus sign (-) to represent NOT, and a vertical bar symbol (|) to represent OR. For example, if you type **(HURRICANE + ANDREW) - (MACON|AUGUSTA|SAVANNAH)**, you will look for stories that contain both HURRICANE and ANDREW and ignore stories that contain MACON, AUGUSTA, or SAVANNAH, implying that you might be interested in stories about how Hurricane Andrew has influenced rural Georgia. Use parentheses () to assure that your search criteria is accurate.

Date range from: Type the date of the oldest story you are interested in looking at.

Date range to: Type the date of the most recent story you are interested in looking at.

Search: If you have chosen at least one news source and specified accurate information in the boxes beside **Search on, Keywords,** and **Date Range,** this searches for stories matching your search criteria. If the search is successful, you will go to a **List of Stories** dialog where where you can learn about individual stories.

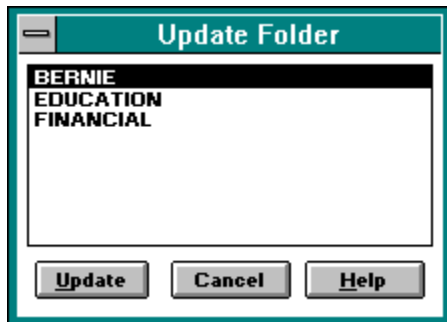

Cancel: Closes this dialog.

Updating a Personal Folder

The **Update Folder** dialog lists your Personal Folders. Select the one you want to modify.

You get here by clicking on the **Update Folder** icon on the [News Toolbox](#) or by choosing **Update Folder** from the Stories menu on the News Desktop.

Related Information

[Updating a Personal Folder](#)

Folder name: Type a one-word name for the folder. This cannot be blank.

These are all the news sources available to you in ENS. Mark one or more news sources you want ENS to search. If you want to mark all news sources, select **All**. You can select **None** to clear or unmark any marked news sources.

All: Marks all news sources.

None: Unmarks all news sources.

Story Retention: Type the number of days (up to 14) that you want ENS to hold your clipped stories. ENS will automatically delete any stories that have been held in the folder longer than the number of days specified in the box beside **Story Retention**. ENS initially assigns a value of 14 to **Story Retention**.

Expiration: Type the date (up to one year later) on which you want ENS to stop clipping stories for the folder. ENS initially assigns a value of one year to **Expiration**..

Search criteria: Type up to four separate keywords or keyword combinations. ENS will look for this information in each story released on the news sources you have marked. You can include a plus sign (+) to represent AND, a minus sign (-) to represent NOT, and a vertical bar symbol (|) to represent OR. For example, if you type **CAT + WILD** in one box, and **CAT - (KITTENS|KITTY)** in another, ENS will look for stories that contain both CAT and WILD and ignore stories that contain KITTEN or KITTY, implying that you are interested in stories about adult wild cats, such as mountain lions. Use parentheses () to prevent confusion.

OK: Records your information and closes the dialog. You must have proper information in the boxes beside **Folder name**, **Story Retention**, and **Expiration** in order for ENS to create your folder.

Cancel: Closes the dialog without recording any information.

Browsing News Stories

The **List of Stories** dialog displays story headlines. You can read (get) a complete story, preview only the opening lines of a story, and mark stories for retrieval to your Filing Cabinet.

[Session Settings](#)

Customizing the Ribbon

The **Customize Ribbon** dialog enables you to modify the icons and functionality associated with the Information Manager Ribbon.

You get here by choosing **Preferences** from the Special menu on the Initial Desktop, and then choosing **Ribbon** from the Preferences submenu.

Related Information

[Ribbon](#)

Each icon is associated with a particular position in the Ribbon. These icons reflect the current Ribbon's icon arrangement until you begin making changes. Thereafter, the icons you see here will reflect your ongoing modifications until you complete this dialog. When you click on **OK**, the icon arrangement that is displayed here will comprise the new Ribbon.

Set 1, Set 2, ... Set 10: Records any changes associated with the corresponding icon position in the Ribbon. When you select a **Set** button, the icon that is highlighted under **Icons** becomes (or remains) the icon for that Ribbon position, and the activity that is highlighted under **Activity** becomes (or remains) the activity.

Icons: Highlight the icon to be associated with the **Set** button in the Ribbon. If you want to use an icon other than one listed here, you can select **Browse** to open an icon file from disk.

Activity: Highlight the activity to be associated with the **Set** button in the Ribbon.

Browse: Takes you to a standard Windows **Open** dialog where you can select an icon file (.ICO or .DLL) from disk to be used in the Ribbon. Once you open the icon file, WinCIM displays it in the horizontal menu beneath **Icons**. If you want to use the icon, be sure to highlight it before selecting a **Set** button.

OK: Records your changes and closes the dialog.

Cancel: Closes the dialog without recording any of your changes.

Default: Restores the Ribbon to the way it was when you first installed WinCIM.

Resuming a File Retrieval Process

The **Retrieve Marked Files** dialog enables you to resume retrieving a file that was only partially retrieved due to cancellation or disconnection.

You get here if you retrieve a file that was only partially retrieved in your session.

- o To overwrite the partially downloaded file, select **Overwrite**.
- o To resume the download where the former download stopped, select **Resume**.
- o To rename the file to be downloaded to your computer, select **Rename**.

Requesting a Stock Portfolio Report

The **Stock Portfolio** dialog enables you to create and maintain a record of your stock purchases and produce a report analyzing their market performance.

You get here by selecting **Portfolio** from the Services menu.

The screenshot shows a dialog box titled "Stock Portfolio". It features a table with the following columns: Ticker, Cost, Units, Total Cost, and Date. Below the table are five buttons: Report, Delete, OK, Cancel, and Help. To the right of the table is a section titled "Add Portfolio Entry:" which contains four input fields: Ticker Symbol, Number of Units, Cost per unit, and Purchase Date. An "Add" button is located below these input fields.

Related Information

[Obtaining Stock Quotes](#)

Your ticker symbols are listed here along with the information you provide about each one.

Report: Takes you to a **Portfolio Report** dialog that displays the original and total market value, as well as total gain or loss for your list of tickers using the most up-to-date price data. Quotes are always at least 15 minutes late, in accordance with exchange regulations. You can print the report or save it to a disk file by choosing **Print** or **Save As** from the File menu.

Delete: Removes the highlighted ticker entry from the **Stock Portfolio** dialog.

OK: Records any changes and closes this dialog.

Cancel: Closes the dialog without recording any information.

Ticker Symbol: Type a ticker symbol. Do not type a CUSIP number.

Number of Units: Type the number of shares. For stock options such as HRB AH (a January \$40 call) be sure to give the number of shares covered by the option contracts, not the number of contracts, because WinCIM reports per-share data.

Cost per unit: Type the price you paid for each share. For stock options such as HRB AH (a January \$40 call) be sure to give the per-share price, not the per-contract price, because WinCIM reports per-share data.

Purchase Date: Type the date of purchase.

Add: Makes a ticker entry line using the information recorded in **Add Portfolio Entry**.

Selecting Folders

The **Select Folder** dialog lists your News Folders.

You get here by clicking on the **Select Folder** icon on the [News Toolbox](#) or by choosing **Select Folder** from the Stories menu.

The **Select Folder** dialog appears automatically when you access the News Desktop if the **Show Folders** option in the [ENS Preferences](#) dialog has been set.

Close: Closes the dialog.

Introduction

WinCIM Help gives you information as you need it. If you want help at a dialog or highlighted menu command, just press the **F1** key.

Reproduced Dialogs

Whenever you see a dialog box in WinCIM Help, you can usually click on parts of it for more help. You know when to click by watching your arrow pointer. As you drag it over the various parts of a reproduced dialog, the arrow changes to a hand to signify available help.

Please click on each of the buttons in this sample dialog.

Reproduced Icons

Sometimes in WinCIM Help, you can click on reproduced icons and learn information too:

This is how the WinCIM Help System displays help for the various components of a dialog, in a popup window. When you finish reading the information in the popup window, click again, and the popup window disappears.

You know when to click by watching your pointer. When it becomes a tiny hand you can click and expect to see a popup window. When you finish reading the information in the popup window, click again, and the popup window disappears.

Often within a popup window you see text that is green or underlined with a dotted or solid line. You can click on it and expect to view **a secondary popup window** or go to another help page. When you finish reading the information in the popup window, click again, and the popup window disappears.

Here is an example of a secondary popup window. When you finish reading the information in the popup window, click again, and the popup window disappears.

Dialogs within the WinCIM Help System are reproductions or fake dialogs. Clicking on a button only tells you what the button does. When you finish reading the information in the popup window, click again, and the popup window disappears.

Dialogs within the WinCIM Help System are reproductions or fake dialogs. Clicking on a button only tells you what the button does. When you finish reading the information in the popup window, click again, and the popup window disappears.

Preferences

You can customize your Information Manager desktops to get the look and feel you want by assigning preferences.

Preferences Topics

[CB Simulator](#)

[Conference Preferences](#)

[Executive News](#)

[Forums](#)

[General](#)

[Mail](#)

[Ribbon](#)

[Terminal Emulation](#)

For example, you might want to see the **Favorite Places** dialog each time you start up the Information Manager, you might want to be prompted for a handle each time you enter CB, and you might want the Information Manager to make a copy of every message you send in CompuServe Mail. These are all preferences that you can assign in the Information Manager.

Terminal Emulation

During normal operation, the Information Manager automatically switches to Terminal Emulation whenever you access a service that does not support the Information Manager's Windows interface; then when you leave a service in Terminal Emulation, you leave Terminal Emulation itself and return to the Windows interface of the Information Manager.

Terminal Emulation Topics

[Connecting Using Terminal Emulation](#)

[Making a Log File](#)

[Printing Your Screen Activity](#)

[Programming Function Keys](#)

[Terminal Emulation Desktop](#)

[Understanding Terminal Emulation](#)

[Using a Capture Buffer](#)

[Using Control Keys](#)

[Using Keyboard Commands](#)

Understanding Terminal Emulation

Terminal Emulation makes your computer behave like a terminal attached to a host computer. Because terminals are capable only of sending and receiving text and usually have little or no computing power of their own, a typical terminal displays scrolling text -- nothing else.

You can conduct a complete CompuServe session in Terminal Emulation, if you like. Terminal Emulation lets you access CompuServe or another host-based computer system without the Information Manager's Windows interface.

Although not every service on CompuServe supports the Information Manager's Windows interface, every service does have a Terminal Emulation version, including CompuServe Mail or a CompuServe forum.

Terminal Emulation Desktop

The Terminal Emulation desktop is different than the desktop you see when you first start up the Information Manager. You still see a **Ribbon** and a menu bar, but you also see information at the bottom of your screen.

Related Information

[Making a Log File](#)

[Printing Your Screen Activity](#)

[Programming Function Keys](#)

[Using a Capture Buffer](#)

File Capture: Shows your file logging status. **On** means you are logging your screen activity to a disk file on your microcomputer; **Off** means you are not.

Printer Capture: Shows your printing status. **On** means you are printing your screen activity; **Off** means you are not.

View Mode: Shows your Capture Buffer status. **Capture** means you are viewing the Capture Buffer; **Terminal** means you are not.

Alt+1, Alt+2, ... Alt+10: These are buttons of your Alt key combinations. If an Alt key combination has been defined at the Function Key Settings dialog, you can click the button here and the series of keystrokes associated with that Alt key combination will be entered automatically for you. If you have not defined an Alt key, the button will be dimmed.

The Ribbon icons in Terminal Emulation perform the same functions that they do in the Information Manager's Windows interface. However, if an icon takes you to a service that supports the Information Manager's windowed interface, you automatically leave Terminal Emulation before going to the service.

The menu bar in Terminal Emulation is the same as the one on the Information Manager's Initial Desktop, except for the Special menu, which has some Terminal Emulation-related commands.

When you are in a service that uses Terminal Emulation, CompuServe asks you for information or instruction by displaying a prompt, such as **Enter Choice!** at the bottom of a menu. You can select a menu choice in a Terminal Emulation service by double-clicking the line that begins with the choice number or by typing the number and pressing a carriage return. Double-clicking anywhere else is the same as pressing a carriage return without typing a number.

Programming Function Keys

In Terminal Emulation, you can assign a series of keystrokes to up to ten Alt key combinations. Whenever you press a defined Alt key combination in Terminal Emulation, or whenever you click a defined Alt key representation at the bottom of your **Terminal Emulation Desktop**, the keystrokes you assigned to that key are automatically entered for you.

For example, you might want to program an Alt key combination to automate requesting and viewing a stock market report in a financial service, an advisory or extended forecast in a weather service, or an article in a reference service.

To program an Alt key combination, choose **Set Function Keys** from the Special menu. When you do, the Information Manager takes you to a **Function Key Settings** dialog, where you can assign a series of keystrokes to up to ten Alt key combinations.

Using a Capture Buffer

Terminal Emulation has a Capture Buffer, which automatically saves text displayed on your screen. You can use it to keep an easily reviewable record of everything CompuServe sends to your screen and everything you enter.

Choose **View Buffer** from the Special menu to view and manipulate the contents of your Capture Buffer. While viewing your Capture Buffer, **Capture** will appear in the **View Mode** box at the bottom of your Terminal Emulation Desktop.

You can scroll through the contents of the Capture Buffer to review your recent activities. You can also choose the **Save** or **Save As** command from the File menu to copy the contents to a text file or a message, or the **Copy** command from the Edit menu to copy the contents to the Windows Notepad.

The **Terminal Preferences** command on the Special **Preferences** submenu lets you control the size of your Capture Buffer.

To leave your Capture Buffer and return to active terminal display, choose **View Terminal** from the Special menu. When you do so, **Terminal** will appear in the **View Mode** box at the bottom of your screen.

If you ever want to empty your Capture Buffer and start a fresh text capture, choose **Clear Buffer** from the Special menu.

Printing Your Screen Activity

You can print your screen activity in Terminal Emulation. Choose **Record on Printer** from the Special menu to print out information as it is being displayed on your screen, such as a report, an article, or whole activity sequence.

Record on Printer toggles your printer on and off. When your printer is on, you will see a check mark next to the command and, at the bottom of your Terminal Emulation Desktop, **On** appears in the **Printer Capture** box.

When you choose **Record on Printer** a second time, printing stops and the check mark next to the command is removed and **Off** appears in the **Printer Capture** box at the bottom of your screen.

Making a Log File

You can create a log file of your screen activity in Terminal Emulation. Choose **Record in File** from the Special menu to save a disk file record of information as it is being displayed on your screen, such as a report, an article, or whole activity sequence.

Record in File toggles recording on and off. When you turn recording on, a dialog appears, asking you to specify an output file, a check mark appears next to the command, and **On** appears in the **File Capture** box at the bottom of your Terminal Emulation Desktop.

When you choose **Record in File** a second time, logging stops and the check mark next to the command is removed and **Off** appears in the **File Capture** box at the bottom of your screen.

Using Keyboard Commands

CompuServe has a wide range of special commands to help you navigate the Information Service using Terminal Emulation. These commands can be entered whenever you see the exclamation point (!) prompt.

B (back) Takes you to the previous full screen of text in a multiple-screen menu or article

EXIT Takes you out of a service and sometimes places you in your Personal File Area

FIND Displays any service(s) related to the topic you entered after the word FIND

GO Takes you to the service whose Go word you enter after the word GO

M (menu) Takes you to the next higher level in the menu structure. If the Information Manager placed you in Terminal Emulation to access a service, M may take you back to the graphical interface

N (next) Takes you to the next choice on the same menu where you last made a selection

OFF Disconnects you from CompuServe but leaves you connected to the communications network

QUO Retrieves current quotes for the ticker symbols you enter

R (resend) Repeats the current display

S (scroll) Causes a long text article to scroll up the screen without pausing

T (top) Takes you to a menu of the main groups of service available on the CompuServe Information Service

WEA Shows you a weather report for your current location, or for the reporting station you specify

Usually these same commands are available at a prompt ending in a colon (:), but you must type a forward slash (/) in front of each command (/M or /T, for example).

Using Control Keys

While using a Terminal Emulation service, you can use special key combinations called control commands to control the operation of the CompuServe Information Service. You can access these commands by using the Control key on your keyboard.

Control+C Interrupts an operation. Pressing Control+C several times in a row may disconnect you.

Control+O Skips the remainder of the report or article currently being displayed. You can use this command to conclude a long display operation after seeing parts that interest you.

Control+S Immediately stops CompuServe from transmitting text to your screen

Control+Q Tells CompuServe to resume scrolling after it has been stopped by Control+S

Control+U Erases anything you have typed but not yet sent to CompuServe by pressing a carriage return. Use Control+U to start over when you notice a typographical error near the beginning of something you are typing.

Member Support

The Member Support area on CompuServe gives you helpful hints about using CompuServe, as well as information about billing, learning CompuServe access telephone numbers for when you travel, and much more.

You get to the Member Support area by clicking on the **Member** icon at the Services window.

For complete WinCIM support, go to the WinCIM Support Forum on CompuServe (**Go to** WINCIMSUP).

If there is no local Customer Service listing in your country, please try contacting the Customer Service office nearest you or calling CompuServe Customer Service in the United States for further assistance.

Troubleshooting Tips

Commonly Asked Questions

1. When I attempt to log on, the Information Manager keeps saying "Unable to establish protocol." What should I do?
2. Why won't the Information Manager hang up the line when I disconnect?
3. I want to log on through a data network that the Information Manager does not support. What should I do?
4. My modem won't connect using the Information Manager, but seems to work fine in Terminal Emulation. Why is this?
5. How can I change my password?
6. When I'm in PC Magnet and use the Go command, the Information Manager doesn't recognize ordinary services such as CB Simulator. Why?
7. I have two User ID numbers. How do I get the option of logging on with either of them?
8. Why does the Information Manager respond with an invalid address message when I try to send a fax? I know the fax address is correct.

Establishing Protocol

The Information Manager uses a special protocol to talk to CompuServe. After the Information Manager has sent your User ID number and password to CompuServe in order to log on, it will try to start using the special protocol. If it can't, you'll see "unable to establish protocol". Try the following to check for the most common causes of this error.

At your **Session Settings** dialog:

1. Check the User ID number and password. These cannot be your signup User ID number (beginning with 177) and your signup password. If you haven't signed up your account yet, this is the reason for the error. You should run the Signup program included with the Information Manager.
2. Check the primary connection phone number. You'll want to be sure this is CompuServe's current local access number. If you are not sure that this is the correct number, call CompuServe Customer Service to check.
3. Check the baud rate for the primary connection. It should be 300, 1200, 2400, or 9600 baud. Also check to be sure that your local access number supports the baud rate you are using.

If all of these are set correctly, the problem is probably static on the phone line interfering with your connection. You can call CompuServe Customer Service for tips on dealing with line noise or to double-check all of your settings.

Getting the Information Manager to Hang Up

Try changing the Hang Up string in your Modem Control Strings dialog from its default "Z" to "Z0".

Logging on through a Non-supported Network or Shared Modem

You should try connecting through Terminal Emulation.

1. Choose **Session Settings** from the Special menu.
2. Select **Direct** in the Dial Type box.
3. Select **OK**.
4. Choose **Terminal Emulation** from the Special menu.
5. Mark **Manual Connect** so that an **x** is displayed in the box.
6. Select **Connect**.
7. Type in the dial string for your modem, and go through the steps necessary to reach a CompuServe network prompt (Host Name:).
8. Press Control+C to return to the desktop interface.
9. Pick a menu item from the Information Manager desktop that initiates a connection (such as **Get New Mail**, **Quotes**, or one of the icons in the Services Window).

Modem Only Works in Terminal Emulation

The problem you are experiencing is due to the way your modem responds to the Reset command that the Information Manager executes when you click on the application icon. Try entering a new Acknowledge string at the **Modem Control Strings** dialog. Type a greater than sign (>) for the new Acknowledge string.

Changing Your Password

Changing your password involves two phases. First you must change it online, using the PASSWORD service (Go to PASSWORD). Then you must change it at your Session Settings dialog.

Navigating with Service Names

When you are in PC Magnet or ZiffNet/Mac, the **Go** command only transfers you within that particular part of CompuServe.

You must add a system name prefix to direct the Information Manager to the proper system. Use **CIS:** for CompuServe, **PCM:** for PC Magnet, and **ZNT:** for ZiffNet/Mac.

Thus, when you are in ZiffNet/Mac and wish to transfer to the CB Simulator with the **Go** command, type **CIS:CB**.

Using Multiple Sessions in the Information Manager

You can create separate sessions for each CompuServe account and choose whichever you want to start the Information Manager.

By renaming the first session and creating a second Information Manager session with your second User ID number and password, you can then choose which account to use by selecting the appropriate Information Manager session in your **Session Settings** dialog.

Sending a Fax

You might be trying to send a message in binary format. Fax servers cannot accept messages in binary format, so all fax messages must be in ASCII (text) format.

Messages typed into the Information Manager text editor or composed using **Create Mail** from the Mail menu are already in text format. If you use **Send File** from the Mail menu and import a text file, make sure text is selected.

Viewing a GIF Image

The **GIF Window** displays a GIF image.

You get here by selecting from certain dialogs, such as the **File List** dialog, the **File Information** dialog, and the **Get File** dialog.

Related Information

[More about GIF Images](#)

Save!: Takes you to a standard Windows **Save As** dialog so that you can save the GIF image to a file.

Copy!: Copies the selected portion of the image to the clipboard. (To select a portion of the image, hold down the mouse button and draw a box around what you want to copy. Then, after making your selection, click **Copy!**.)

Expand!: Enlarges the image to fill your screen. (To return to the original window from the full-screen display, press return or click your mouse button.)

More about GIF Images

GIF stands for Graphic Interchange Format, one of the formats the CompuServe Information Manager uses to display graphics online. (Other formats include RLE, which is **not** recognized by the Information Manager.)

GIF images will always display at the resolution of your monitor. Color GIF files contain black and white and gray scale information as well as color information. Therefore, if you retrieve a color GIF image on a computer with a monochrome monitor, it will appear as black and white. If you then view the same image on a color monitor, the GIF image will appear in color.

GIF files are currently used to display weather maps and stock charts, and have the potential for other uses in the future. There are also many forum libraries that contain a wide variety of GIF files contributed by CompuServe members. In particular, the Graphics Support Forum contains several GIF decoder programs that let you view GIF files offline.

One of the advantages of GIF is that it is a format that can be read by many different platforms. For example, an IBM user could exchange GIF files with a Macintosh user.
