### EASY DESK SOFTWARE Support and Fax# (516)587-9015 E-MAIL :EASYDESK@aol.com Version 1.01

To view this file, open it with Write.exe and maxiumize screen. [Enlarge to full screen by clicking on the middle box in the upper right corner.] To view the help file scroll down using the SCROLL BAR to the right of this screen. It is easier if you print this out. To print click on the the word FILE at the top of this screen in the left corner; then click on Print; then click OK.

Thank you for purchasing the **EASY DESK** software. There are many add ons that can be ordered. A inside view of each building with **hotspots** [hotspots are locations on the screen that activate an application]. Each building has at least one **hotspot** while the buildings' interior have several **hotspots**. The interiors are optional. The **dumpster** in the main screen has a utilities menu and the **Arcade** has a games menu, both of these are available on this version.

	OTHER EASY TO	USE SOFTWARE	
Phone book	The Livingroom	(for Easydesk)	
Font Toolbox	The Store	(for Easydesk)	
Win Safety	The Arcade	(for Easydesk)	
	The Bank	(for Easydesk)	
	The Kitchen	(for Easydesk)	

All of the software here is simple to use for the beginner and does alot more than other programs twice their size and more than double the price. Contact us for free demos.

## <u>HELP FILE</u>

CONTENTS: HELP INSTALLING GETTING STARTED WALK THROUGH LOCATIONS PROGRAMS LIST BOXES RESETTING LOCATIONS

### EDESK.INI KEY WORDS WORK GAMES

**HELP:**You can go back and forth from the main screen of *EASY DESK* to this help filebysimply clicking on the **minimize** button [The **minimize** button is the left mostbutton on the right topcorner of this page.] and the *EASY DESK* logo in thebottom left corner of the EASY DESK mainscreen, or click on the task bar atthe bottom of this screen if you have WINDOW95.

Read down the left hand column to find the subject you want to know about. Within the subject in [] you may find simple language to help you understand, if you are a novice.

### **INSTALLATION:** The subject of INSTALLING is not for the novice.

When installing this program the installer will place the INI file in the *Windows* main directory. To avoid problems running this program do not move the file to another directory. The program itself will be installed to C:\Edesk. It is better if you leave it here,but not mandatory. A **shortcut** should be added to your start up folder in your **start menu** if you have WINDOWS95, so that it comes on when you start your computer.

If you have WINDOWS 3.1 you can place the **shortcut** in your desktop directory of your Windows directory by clicking on the ICON in your Program Manager; or type a line in your *win.ini* under the **[window]** extension.

[WINDOWS] load= run=c:\edesk\edesk.exe device= If you have something already there then change it to example: [WINDOWS] load= run=c:\fmedia\fedia.exe c:\edesk\edesk.exe device= If something is typed to the *load* or *device* line do not remove it. Use a space and

add the path. Remember the *run* command comes after *load* and before **device**.

GETTINGClick on any building and a message board will appear, click the OK button andSTARTED:a list box will appear, go to the directory that has the EXE that you want toSee LOCATIONS and see LIST BOX.install.

After reading this file you can go to the **WALK THROUGH** to better understand. You can go there now and print this out, follow the **WALK THROUGH** with the help file for reference. These instructions will apply to most applications in your computer.

An EXE is the file extension, this is the file type that activates (called open or start) a program. You can use the **list box** to find any type of file by changing the request. Example, the **list box** will show <u>\*.exe</u> at the top left window. If you change it to <u>\*.\*</u>, you will be telling the **list box** to list all files of all extensions. If you change it to \*.txt it will list only the text files, and so on. To find the programs you want to access with the EASY DESK- see **PROGRAMS**.

WALK<br/>THROUGH:1 Go to the main screen of EASY DESK. If you are reading this file on screen<br/>click the minimize button.

2 If you have WINDOWS'95 click on the **START** button on your TASK BAR and then click on **PROGRAMS**. Now click on **WINDOWS EXPLORER**. If you have WINDOWS 3.1 go to your **FILE MANAGER**.

**3** In the left window of the EXPLORER / FILE MANAGER scroll down to the Windows folder/directory and click on the **+** sign.

<ul> <li>4 Scroll down to the Start Menu folder/ directory and click on the + sign.</li> <li>5 Click on the + sign next to Programs and scroll down to a folder/directory tha contains a program that you want to access through EASY DESK.</li> <li>6 Click on that folder and in the right hand window click once on the program.</li> </ul>	
6 Click on that folder and in the right hand window click once on the program	you
want to access. <b>7</b> Right click (use the right button of your mouse) on the highlighted program. A	
menu appears. 8 Click once on <b>Properties</b> and a window will appear.	
9 Click on the <b>Shortcut</b> tab and write down the path (the one that is highlighted	)
next to the word Target. Exit the Explorer by clicking the X in the top left	)
corner.	
<b>10</b> Click on a <b>location</b> that you want to access that program from. You can use	the
BANK to access your bank if you have PC Banking; or MSMONEY or any	
	d processer like
MSWORK in the <b>Stationary</b> store. Any program you like can be installed in ar	
	,
<b>11</b> A message window appears, click OK.	
12 A list box now appears. This is a good time to read the LIST BOX	
instructions.	
13 In the path box (where it displays the word Directory under the words File	
Name) you will see C:\ or C:\Windows or some other name. Click on the []	]
or drive that you want to get the path box to display. Example C:\.	-
14 Now click on the directory that you want . If you wrote down the path for	
Faxsworks it would look like this: C:\Faxsworks\Callcent.exe. Faxsworks is	the
directory you would want. Get the path box to display C:\Faxsworks.	
<b>15</b> Now click on the EXE in the <i>File Box</i> . Usually only one exe appears, in the	
example it would be Callcent.exe. Then click OK. That location is now setup	).
Click on that location and your program will start. You will also here sound	
when you start your programs.	
<b>LOCATIONS</b> : Locations are objects in the scenery that contain <b>hotspots</b> . <b>Hotspots</b> are areas screen that when you click on themsome action will take place.	of the
BANK- This is an object that is a <b>hotspot</b> ; the hotspot area is the main face of the	
building with the sign that says <b>BANK</b> . The side is not active.	
<b>INTERNET-</b> This is the area of the <b>BANK</b> building above the main face with the <i>globe</i> on it.	
The entire top area is the <b>hotspot</b> ; this is a good <b>location</b> for your <b>INTERNET</b> .	
<b>ARCADE-</b> This location has it's <b>hotspot</b> on the main face of the store front. The active	area is
	ws games that
came with Windows 3.1/ Windows 95.See Games.	- <b>J</b> -
STATIONARY- This store has it's hotspot is on the main face of the store front. The active	area is
to the top of the third floor.	
<b>PUDDLE-</b> The puddle in the foreground will access a simple word processer for you to	type
	ck on the word
HELP in the MENU BAR. This is located at the top of this screen. This HELP file is	s written in
WRITE.EXE which is what you will be accessing. The screen will look like this	on. Try
clicking on the VEIW word in the MENU BAR and make sure that all the items above	the word
OPTIONS have a check mark next to them, if not simply click on them one at a	time
	ly get sound
then look on your TASK BAR and you will see an ICON displaying the word DOC, then	click on that
ICON.	
DUMPSTER- Has it's hotspot, the entire dumpster. If you click on a spot above the dumpster	
you will activate a different <b>hotspot</b> . The Dumpster can also be set to access	your system
utilities. To do this read <b>RESETTING LOCATION</b> and <b>WORK</b> below.	
VACANCY- This hotspot is the side of the stationary store. The hotspot starts above the	
dumpster and at the corner of the stationary store to the apartment building	
<b>APARTMENT</b> - This building is also a <b>hotspot</b> . This is the building to the right of the	dumpster.
Only the face of the building with the door and mailbox contains the <b>hotspot</b>	

**DOCTOR**- This is the building with the sign **DOCTOR**, the **hotspot** on this building is the below the **NO PARKING** sign to the bottom of the stairs.

**EASY DESK**- This logo will activate this HELP file. Located at the bottom left hand corner of the **EASY DESK** screen.

area

**NO PARKING-** This sign will exit this program. The sign is located on street lamp in front of the **APARTMENT** building.

PROGAMS: There are several ways to find the programs you want to access with your EASY DESK. If you do not know how to use the list box read WALK THROUGH.

If you wish you may use the reset button (see **RESETTING LOCATIONS**) and type the path in exactly as you wrote it; besure you do not include spaces( the space bar). One wrong letter or :,or \, will result in the computer not being able to activate it. Example "C:\windows\ explorer.exe" Capitals or small letters do not matter except if the directions say so.

LIST BOX: The LIST BOX pops up when a location has no program installed to it. There are three windows to the list box. The 1st is the *Directory box* which is the large box on the right side. It should come up as such:

[..] this means one level up

- [A] this is your A drive
- [c] this is your c drive or main

[D] this is your D drive

You may have more drives than this. (If the **list box** is not showing the example than you are already at a drive(A:\ or C:\ etc). You will need to scroll all the way down to the bottom to pick a drive if you are not at the one you want. there.

You will notice that just above the top of this box is the *File Name* box that displays\*.EXE and to the right of this box is the words"File Name". Below this is the word "directory", we will call this the *Location box*. This line tells you what directory you are currently looking in. Below this is the *File box*. This box will show you all the EXE files in that directory. Now to get started. First click on the [..] in the *directory box*, highlight it and click ok. Keep doing this until you get

to just C:\ or what ever drive you want.

Now lets say that you want to OPEN (also known as accessing, running, or starting) WRITE the path (also called the Address) would look like this:

#### C:\WINDOWS\WRITE.EXE

IF you do not know the path of the program you want see **PROGRAMS** in this file.

Now to find it in the **LIST BOX**. First click on the drive that has the file: **C:**\ then click ok, then scroll down to the **WINDOWS** directory and click on it and then click ok. Now you will now see **c:\windows** in the *Location Box*. You will also notice that the *File box* has many files in it,most of the time there will be only one EXE to choose from. This is why you must Know the EXE or you must earn to use the system in the **WALK THROUGH.** Now scroll down to the W's and click on WRITE.EXE , now click ok; the **list box** disappears. You

have now install A program to your **EASY DESK**. This was only demonstration of how to use the **list box**. If you did this you should reset that location; because you already have WRITE.EXE preinstalled to **EASY DESK** at the**PUDDLE.** See **RESETTING LOCATIONS**.

 RESETTING
 If you want to reset any location click on the little BLACK SQUARE at the very LOCATIONS

 bottom of the street light, the one with the NO PARKING sign. Only the locations
 that are listed

 in the KEY WORDS section of this HELP file can be accessed
 from this hotspot; for others see

 EDESK.INI.
 If you know the path you may
 enter it or leave it blank and click cancel to clear it.

 Then you can use the list
 box to install a new program to that desired location. Also see GAMES

 and
 WORK, as well as KEY WORDS. Resetting help will bring up the message

 windows when EASY DESK is started.

EDESK.INI: The subject of INSTALLING is not for the novice

 This file should be installed as C:\WINDOWS\EDESK.INI. You can make some changes in here to access programs that are not resetable with the reset hotspot.

 Example to change a sound go to the area you want and change to turn the sound off just change B=Text.wav to
 B=text.wav to c:\sound\ts.wav

 B=. Your utilities and games can be changed this way also.
 B=. Your utilities and games can be changed

**KEY WORDS:** For **RESETTING LOCATIONS** the key words that you must type in to bring up that window path are APARTMENTS, HELP, VACANCY, DUMPSTER, BANK, ARCADE, STATIONARY, INTERNET, DOCTOR. To reset games the key words are: YOUR CHOICE, BLACK JACK, RODENT, MINE SWEEP, RATTLER, SOLITAIRE see TOYS. For resetting **WORK** the key word is **VIRUS** see **WORK**. WORK: To set the **dumpster** to access your system utilities type the word **WORK** in CAPITAL LETTERS ONLY instead of a path when you access the reset function. If any of your utilities are in the WINDOWS directory or subdirectory you need only enter the EXE name (example: winfile.exe) if you are changing any. The **VIRUS** button is not installed so if you have a Virus scanner you must install it. Also see **RESETTING LOCATIONS**. All of the other utilities have been preprogramed for you. If you can not access them see EDESK.INI.

 GAMES:
 To set the Arcade to play games type the word TOYS in CAPITAL LETTERS
 ONLY

 instead of a path when you access the reset function. If any of your
 games are in the WINDOWS directory or sub directory you need only enter the
 EXE

 (example: winfile.exe), also see RESETTING LOCATIONS.
 EXE
 EXE

Many of your games are located in this directory. Several of them have been preprogramed for you. If you can not access these games see **EDESK.INI.**
