TexCash5 Grid Chart

Date of Drawing	Past Texas Cash5 Winning Numbers

The past winning numbers Grid Chart allows you to scroll forward and backward
through the past winning numbers that are plotted in a grid.

In the example shown above, the numbers drawn on 01/27/97 were 05-33-24-15-16

"Analysis" which allows you to scroll through a list of past winning numbers (dates also shown) and high-lights the digits that match the digits in your test number.

You are given the option of entering a test number or typing a "W" to have the computer automatically use numbers from the past winning numbers list, starting with numbers from the latest drawing and then numbers from the drawing before that ect.
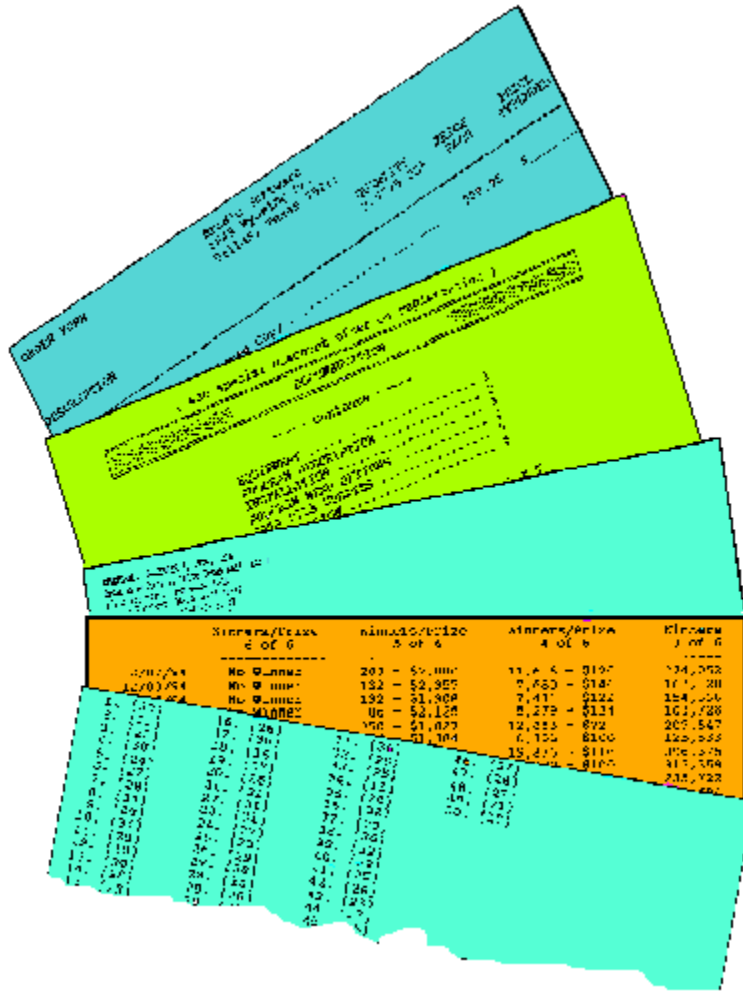

With this option, you can see a full text screen with the digits of a test

number high-lighted through out the past winning numbers list.

After each scroll through the data text file, an analysis of the test number is displayed showing how often digits in the test number matched digits in all past winning numbers.
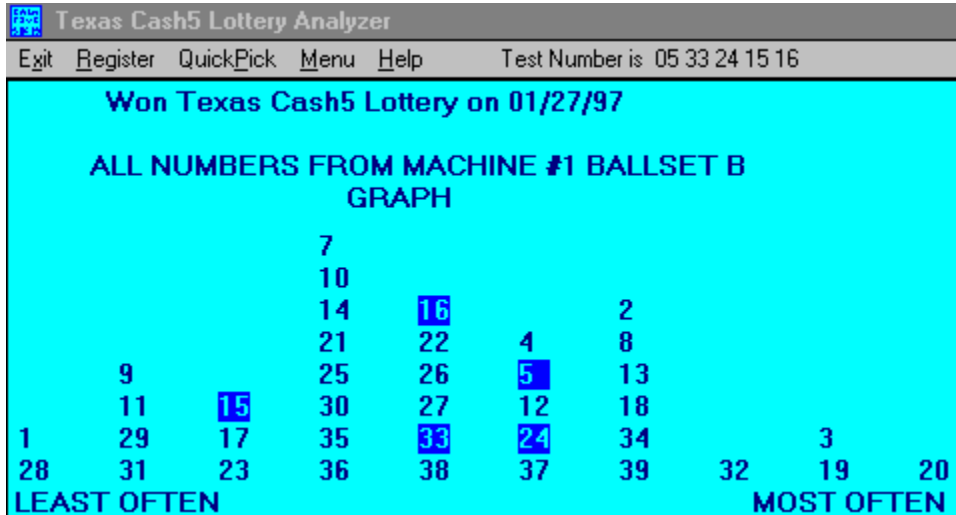

TexCash5 View Files

A TEXT SCREEN VIEWER with print option allows you to scroll through the documentation file and also view and print the data text files of past winning and test numbers. It also allows you to view and print the ORDER FORM to register the TEXCASH5 program and order data file updates.

TexCash5 Graph

Displays a Graph showing that winning numbers usually, but not always fall in the shape of a bell curve with the numbers that come up the least often on the left and the numbers that come up the most often on the right. The program will automatically high-light where past winning numbers fall in the bell curve or you can input your own test number, similar to the Analysis option. In the example above, the test number was 05-33-24-15-16.

You can have it test all balls or just first ball from selected machine, ball set ect. to see which ones came up the most or least number of times.

Test to see if machine or ball set effect how often a number comes up.

TexCash5 Quick Pick

The TexCash5 Logo screen doubles as a random lottery number generator that can be used as a Quick Pick. Pressing the space bar or clicking QuickPick on the menu bar, randomly changes the numbers shown on the Logo screen.

TexCash5 Over Due Numbers

The numbers along the left side of the bar chart show how many drawings it has been since numbers 1 to 39 (shown along the bottom of the chart), have

come up.

TexCash5 Registration

TexCash5 is copyrighted shareware which means "Try before you buy". You must register TexCash5 if you continue to use TexCash5 after the 30 day free trial period. It is a violation of the copyright to use a unregistered copy longer then 30 days.

TexCash5 Data File UpDates

Registered users can order a complete update of program and data files for only $10.00 plus shipping & handling. See <u>REGISTRATION</u>

Registered users also have the option of using a text editor to add numbers to the data files, provided that they use a text editor that does not change the ASCII (text) format.

The two data text files that TexCash5 uses, are CASH5.TXT and PRECASH5.TXT.
The text file CASH5.TXT contains all the past winning number results and PRECASH5.TXT contains all the pretest results (there are four test drawings before every Texas Lottery drawing).

Only <u>Graph</u> and <u>Chart</u> use data from both text files. <u>Grid Chart</u>, <u>Analysis</u> and <u>Over Due Numbers</u> use only the winning numbers list from "CASH5.TXT".

To manually add numbers to the data file "CASH5.TXT" using a text editor, do the following:
1. Load CASH5.TXT into a   text EDITOR as text only.
2. Make a backup copy (use File, Save As to save CASH5.TXT as CASH5.BAK) as text only.
3. Reload CASH5.TXT into the text editor as text only.
4. On about line 33, look for text simular to the following:

Cash 5 results history - As drawn

                                                            < -- Place your new date
and number here in text file.
01/27/97   05 33 24 15 16
01/24/97   24 27 01 14 20
01/23/97   03 18 19 36 22

Notice that the drawings are in decending order with the latest dates
toward the top.

To have Graph and Chart also use the winning numbers that you have
added, you must also update the PRECASH5.TXT file. To do so, you must
have the test drawing results simular to that shown below:

Machine 1: 55 times used, Machine 2: 55 times used, Machine 3: 44 Times
used

Ball set A: 29 times
Ball set B: 30 times
Ball set C: 25 times   < --- Look for simular data in the PRECASH5.TXT
data file.
Ball set D: 42 times
Ball set E: 28 times
Ball set F: 0 times
                                                            < --- Leave a
space and add pretest results above
MONDAY, JANUARY 27, 1997 #154   the latest test results shown in
PRECASH5.TXT
Drawing Machine 2, Cash 5 Ball Set: C
First Pre-test: 33-28-17-03-05
Second Pre-test: 22-03-01-29-17
Third Pre-test: 25-12-23-29-02
Fourth Pre-test: 38-05-30-19-27

Be sure to load PRECASH5.TXT as text only and make a text only
PRECASH5.BAK backup file before making any changes (just to be safe).

All this editing is already done for you when you REGISTER or if already
registered and order the latest data file updates.
