About Windows Restart 95...

Windows Restart 95
Version 4.00
Copyright © 1995 by Stratoware.

Programmed by: Jeffrey Carlyle
Concept by: Jeffrey Carlyle
Design by: Jeffrey Carlyle

Windows Restart was written at the Stratoware Code Yard located in Bowling Green, Kentucky USA. Any significantly advanced bug will become a feature. No llamas were harmed during the compiling of this application.

Windows Restart 95 is shareware. IF you use it regularly you are asked to register it. Registration is only US$10. To register send a check (payable to Jeffrey Carlyle) to the address below. If you can be contacted by Internet e-mail please include your Internet address also. The file **Windows Restart 95.DOC** contains more information on registration.

Shut Down Plus

ø   **Shut Down:** Closes all applications to a point where it is safe to turn your computers power off.
ø   **Reboot:** Closes all applications and then restarts the computer.
ø   **Log Off:** If you are logged onto a network, Windows Restart will log off the network.
ø   **Configuration:** Allows you to configure Windows Restart.
ø   **Exit:** Closes Windows Restart.

To perform an action, simply click on its button.

Configuration

This dialog configures options for Windows Restart. If the "Use task bar" check box is marked Windows Restart will create an icon in the Task Bar Notification area. When you double-click the icon the action selected in "Task Bar Action" will be performed. If the "Use hot key" check box is marked Windows Restart will register a hot key. The hot key can be selected in the list box. When the hot key is pressed the action selected from "Hot Key Options" will be performed.
