

Microsoft Windows NT Version 3.51 Hardware Compatibility List

The following computers and peripherals have been tested and have passed compatibility testing with Windows NT 3.51 as of September, 1995. Some computers may be sold with peripherals that are not yet supported by the Windows NT operating system, or that require a device driver supplied by the manufacturer. We have not tested every computer and/or device in all possible configurations. Please refer to the Release Notes for additional compatibility information when installing Windows NT 3.51.

Attached as an addendum is the May 1995 update of the Windows NT 3.1 x86 Architecture Uniprocessor Computers Hardware Compatibility List. All computer systems listed on the addendum are expected to run with Windows NT 3.51. If you encounter problems while running Windows NT 3.51, please file a bug report by filling out 'PROBREP.TXT' located in the \i386 directory on Windows NT 3.51 CD-ROM or floppy disk #2 of the Windows NT 3.51 installation disks and submit it as instructed in PROBREP.TXT.

Items listed with footnote number ¹ require one of the device drivers available in the \DRVLIB directory on the Windows NT 3.51 CD-ROM.

Items listed with footnote number ² are supported with device drivers available in the Windows NT Driver Library. Please see the section at the end of this document for information on accessing this library.

Updates to Windows NT 3.51 Hardware Compatibility List will appear on the World Wide Web at <http://www.microsoft.com/BackOffice/ntserver/hcl> and at ftp location <ftp://ftp.microsoft.com/bussys/winnt/winnt-docs/hcl/hcl351>. It can also be found in Library 1 of the WINNT (GO WINNT) forum or Library 17 of the MSWIN32 forum (GO MSWIN32) on CompuServe Information Services.
