

# TDBSortGrid Component

## Version Information

Date: 20 July 1996  
Current Version: 2.0

This document contains a list of the features added and bugs removed between consecutive versions of the TDBSortGrid component. Every version number is followed by the modifications made to the previous version.

### **Version 1.0**

- \* Original Version

### **Version 1.1**

- \* Removed bug causing physical sorts to fail with non-visible fields defined for the datasource

### **Version 1.2**

- \* Improved index maintenance on DBase tables
- \* Minor modifications made to the documentation

### **Version 1.3**

- \* Fixed major bug that generated the 'invalid index/tag name' exception whenever trying to sort an indexed Paradox table with 'CaseSensitive' set to 'True'.
- \* Fixed minor bug that caused the sort indicator to disappear on 'First' and 'Last' moves on the underlying dataset.
- \* Fixed inherited bug from TDBGrid which always painted the fixed area's in 'clBtnFace' regardless of the setting of the 'FixedColor' property.

### **Version 2.0**

- \* Developed 32-bit version for Delphi 2.0.
- \* Re-designed source code.
- \* Added warning columns with design-time warning editor.
- \* Added support for Paradox descending indexes.

- \* Fixed bug that caused exception with DBase string fields larger than 100 characters.
- \* Fixed bug that caused exception when fields have been defined for a TQuery which have their Visible property set to 'False'.
- \* Fixed bug that caused TQuery parameter information to be discarded
- \* Several minor bug fixes.
