Thank you for choosing Pixel 3D.

Windows 3.1 or 3.11 Users -

If you are using Pixel 3D under Windows 3.1 or 3.11, and you had installed Win32s, the Win32s directory located in the Pixel 3D directory can be deleted.

If you are experiencing an error called 'GROWSTUB' when you first run Pixel 3D, comment out the line that runs 'POINTER.EXE' in your WIN.INI file, found in your windows directory. (Note: you can comment out an item by putting a semi-colon in front of it on it's own line.)
