

Minimum System Requirement

DiskMan for Windows system requirement is Windows 3.0 or later.

Goals

The goal of *DiskMan for Windows* is to provide the most user friendly method to catalog floppy disks, Bernoullis, etc., and to print labels for these media. It then enables the user to produce reports in one of several formats and also to search for a specific file by file name or file comments.

Abilities

DiskMan for Windows Provides:

Multiple Document Interface, where each document represents a disk storage box.

One keystroke entering of disk into storage box data base.

Ability to search for a file through all open storage boxes.

Report of all files in storage box by name, extension, size, or date.

Professional quality labels.

Full font support for both labels and reports.

Optional graphics printing to label.

File comments compatible with NDOS and 4DOS.

Export data base to ascii text file.

Improvements over Version 1.3

Font Heights now supported

Micro adjust margins to better align labels

Support for multiple installed printers

Reports now sorted by:

Disk

Name

Extension

Size

Date

Output reports to ascii file

NDOS/4DOS file comments

File comments
