<b>Registered users get</b>	Current registered version

## Short description

Windows keyboard utility to control shift status, num lock, and scroll lock. Reverses Caps Lock and Ctrl for notebook computers.

## Description

A program to be invoked at Windows startup to customize keyboard behavior under Windows. WinKey can modify your keyboard's shift status to operate like a typewriter, disabling CAPS LOCK when you hit the SHIFT key, so that you do not type "nOW IS THE TIME..." when you intended to type "Now is the time".

10-key pad users may permanently lock NUM LOCK on or off to insure the desired results when these keys are typed.

SCROLL LOCK may also be permanently enabled or disabled. For notebook computer users who get confused by the location of the CTRL and CAPS LOCK keys, WinKey allows the functions of the two keys to be reversed.

## Conditions under which this software may be copied and distributed

Individual users may freely copy this disk and share it with friends and family.

Nonprofit groups (including user groups and BBS's) may distribute copies of this disk. A fee of no more than \$5 may be charged to cover disk copying costs. If the files on this disk have dates more than a year old, we request that you contact us for a free upgrade to the current version.

Disk distributors and dealers may sell copies of this shareware disk. If you contact us, you will receive a free copy of the latest version, and you will be placed on our mailing list to receive updates as they are released. Disk distributors may charge no more than \$10 per disk for copies of this software. If, as a distributor, you supply copies to other resellers, the end price to the user may not exceed \$10.

Anyone distributing copies of this software, whether for profit or as a nonprofit organization, must conform to the following:

The files on each disk may not be modified or adapted in any way. All of the files provided on the disk must be distributed together. Individual files or groups of files may not be sold separately. Additional files may be added, and this software may be combined on a disk with other programs.

This software may not be represented as anything other than shareware and the shareware concept must be explained in any ad or catalog that includes this software and on any packaging used to display the disk.

You must immediately stop selling/distributing copies of this disk upon notice from the author or DataGem Corp.
