## About the Shareware Edition

The **WinOnLine™ Review™ Shareware Edition** is published weekly by **Windows OnLine™**. It is dedicated to bringing you news and reviews on the latest files available to members of **Windows OnLine™ (BBS)** and the general community of bulletin board users. Print publications just can't match the *immediacy* of this electronic media. **Each and every week** we bring you the *newest shareware, freeware* programs and *features*, such as:

**Windows Shareware Briefs** - Quick and informative reviews of the **newest entries into the shareware and freeware market**. Are they good, bad or buggy? We'll give you useful details that will tell you if it's worth your download time!

**New Files** - Tasty extracts from the past week of **Windows** and **OS/2** files posted at **Windows OnLine™ (BBS)**. Now you will know about that **new graphics driver**, that **freeware update**, or discovered that neat **WAV** or new **FONT** file. All without sifting through files at several other on-line services, if they even have what you're looking for! For new DOS files, call **Windows OnLine™ (BBS)** to review our huge selection.

**Feature Reviews** - Hear about hands-on experiences with the inner workings of the some of the **newest shareware**, with full glorious and gory details of its ups and downs. Our experienced writers bring you perspective with their frank and honest reviews.

## The WinOnLine™ Review™ Shareware Edition *is published weekly courtesy of the* **Windows OnLine™**

We hope you find this weekly publication of great value and interest and become a regular reader. We'd appreciate your comments and suggestions. Leave a comment (C) on **Windows OnLine™ (BBS)** at **1-510-736-8343** or write to,

**Windows OnLine**

*Welcome* to the  
**WinOnLine™ Review™**  
**SHAREWARE EDITION**

## **Overwhelmed Week!!**

Holy shareware, Batman! This week was a tough one on Wolly. So much new Windows Shareware poured in to Windows OnLine that I didn't know what to clog up the hard drive with this week. And True Type Fonts. Yikes! We've got fonts coming out our ears, most of which are extremely difficult to comprehend (sounds like you, Wolly- Ed.).

I can only suggest that you scan the New Files listings to discover all the good stuff Wolly couldn't get to this week. It was a bonus week for we shareware fanatics. Otherwise, it was a quite week, or at least I thought it was. I don't think I looked up from my screen all week!

Now it's your turn!

*Enjoy!*

## ACCOUNT MANAGER

Time

*Time is money*, or so they say. If your occupation requires **keeping track of time spent on projects** or with clients, the Account Manager could be for you. Create databases and projects, then **punch in and out** to log the duration of your activity. In case you forget to log in or out, the program gives you the option to log in or out earlier or later. Reports are available in **detail or summary form** and are exported to an editor you specify, so your data can eventually end up nearly anywhere you need to place it. Logging in and out of projects is a breeze; just click your right mouse button on the minimized program icon for quick access to a list of projects to highlight and log on or off. The icon changes to indicate if you're on client time or your own time. Wolly is using **ACCTMN11.ZIP** (133K) to track time for this column's creation, so he can bring the boss up on violations of the California wage and hours laws. *Heh-Heh-Heh*. Maybe then I'll be able to afford the **\$24.95** registration from Winnovation when I get my settlement.

## BLINC

Link relationships with Blinc - Networking in the 90's

This is **not just another mailing list manager**. Blinc focuses attention on a feature many businesses miss when they assemble their contact listings: *relationships*. Good business people are wise to how important it is to know who's who and their relatives, their club or church memberships, business directorships, etc. Blinc gives you the ability to **enhance your database** with indicators for those special occupations, etc., you want to key in upon. **NETWORKING**: A yuppie concept from the 80's that is nonetheless quite a **valid technique for developing business**. I believe it used to be called "The Old Boys Club" before women's' liberation.

You will need to spend some time with the Blinc manual to understand all the capabilities

of this program. Primarily, it's a **database with specialized retrieval and output** in the forms of Address File Listings, Mailing Labels, Roledex Cards and Envelopes. It will accept input from other database formats such as ASCII comma delimited and fixed length, dBase, label text files, Paradox, and Word Perfect Mail Merge and Label Files. Export, a desirable option, is not supported, although the record definition is included in the manual. Blinc can also produce output accommodating mail presorting and bar coding to take advantage of postal discounts.

**Blinc is not as bulletproof** as you'd expect, bombing and dumping Wolly for a minor infraction. However, if your needs tend toward lists, and Blinc's capabilities intrigue you, take some time to understand and audition **BLINC204.ZIP** (119K). Registration starts at **\$35.00**, which includes a subscription to a publication.

## NOTEBOOK

My notepad overflowth

Are you tired of clicking on a text file and getting the message: *BIGFILE.TXT is too large for Notepad. Use another editor to edit the file.* Wolly is. **NoteBook is a great substitute for Windows NotePad** with several features that add to its superiority over its junior. Wolly doesn't like to be nagged, especially by software that is sitting in another window, open but not in use. NoteBook will nag you for its \$10.00 fee, but you may want to register **NOTEBK1F.ZIP** (71K) to avoid being annoyed.

## TRUE TYPE FONTS

Foreign Lingo Week

Снкпддпс Ифьпс

Cyril Gothic

**RUSTTF.ZIP (370K)\***

Снкпддпс Ифьпс

Cyrillic Basic

**RUSTTF.ZIP (370K)\***

*Jikharev*

**RUSTTF.ZIP (370K)\***

**Kudriashov**

(includes normal, italic, bold, bold italic)

**RUSTTF.ZIP (370K)\***

**Lazurski**

(includes bold and bold italic)

**RUSTTF.ZIP (370K)\***

PALATINO SMALL CAPS

**PALATSC.ZIP (46K)**

Square Serif

**TTSS.ZIP (27K)**

شذھظ سقش

Pars Ziba

**PARSZIBA.ZIP (24K)**

RUSTTF.ZIP (370K)\* includes nine fonts labeled as Russian-Cyrillic. Pars Ziba is the first Persian True Type font Wolly has ever seen (as if Wolly would know Persian if he saw it).

## ICO SHOW

Get your ticket to the Ico Capades

If you're an icon fan who likes to crowd his desktop with the most colorful 32x32 pixel combinations, check out this one. With Ico Show you can **manage more icons than you'll ever need**, up to 16,384 icons in more than 100 windows, including within icon files or libraries (Exe/Dll/Nil/Icl). Each window can contain a directory of icons. Icon management is the name of the game, selecting and/or excluding icons for/from processing (copy, move, write to a library) in one or all windows using wild cards, or select and process them one at a time. Print them if you want, even in full color (if you don't have a color printer, get out your Crayolas! Ico Show supports drag and drop to Program Manager and NDW 2.0. **ICOS115.ZIP** (106K) can be registered for **\$35.00**.

## GLVIDEO

You may want to watch this instead of the turkey you just rented

Not only is this an **excellent and thorough database** for your **video collection**, but one of the sexier interfaces Wolly has seen lately. This is a heavy duty database application with many capabilities, including **QBE** (query by example). Make up your own categories and sort by any criteria. Many fields are available, including Category, Title, Media Type, Date, Rating, Time, Index Number, Director, Producer, Music, Star, Co-Star, and more. Browse controls are reminiscent of a VCR. No point in telling you any more about this one. If you're a collector, check out **GLVIDEO.ZIP** (368K) and consider registering it for a mere **\$19.00**.

## AREA CODE

One ringy-dingy, Two ringy-dingies

Save that run to the phone book for an area code. Scan on a listing of states, receive a listing of major cities in your chosen state if multiple area codes are involved, and have the three digit code delivered promptly for your use. Area Code is very simple and includes instructions to add new area codes to the database as Ma Bell (wasn't she killed by the FTC??) adds to the list. Author Marc Brockman requests donations for AREACODE.ZIP (97K) and will send you country code and more in return.

## WINIMAGES: MORPH

NOT Worf's long-lost brother

This is another of those "This is really cool" programs. Take Wolly's word for it and grab this one. "Morph" is shorthand for **metamorphosis**, or changing from one form to another. The program will take two of your DIB, GIF, IFF, PCX and other file formats and **create a "filmstrip"** which will cause the first image to gradually change into the second. Yeah. And it works. Sample files are included so you can see the effect and get the idea of how it could work for you. This week's toy is **MRPHWIN.ZIP** (380K), a limited version of the full product. No price is disclosed. Wolly usually doesn't review limited demos, if fact usually complains about them, but this one was fun to play with. I may have even violated the prime directive. Could it be - - - *commercial*!?!?

## RES GAUGE

Runnin' on Empty??

Another in the parade of **resource monitors** comes a freeware program from author Richard Franklin Albury. ReGauge will keep an i(con) on your System heap, GDI heap, or User heap, informing you of percentage available with a pie chart and rate. A 36x36 pixel "icon" is the preferred display, but a larger view is also available from **RSGAGE20.ZIP** (14K)

## TIME-IT

Waiting for a purpose

Time-it provides **three separate timers** which can be set to count down from up to 99 minutes and 99 seconds. Start and stop the countdown, change the display color and density. If you have a Soundblaster or compatible card, a WAV file will play at 00:00. If you don't, tough. You better just keep an eye on it to watch it run down. **TI102.ZIP** (46K) seems too limited and overpriced at **\$15.00**. Wolly will watch his watch and wallet, thank you.

Wolly doesn't have anything on his mind this week. Disappointed???

Fonter 6.0

FontNamer

FontMe!

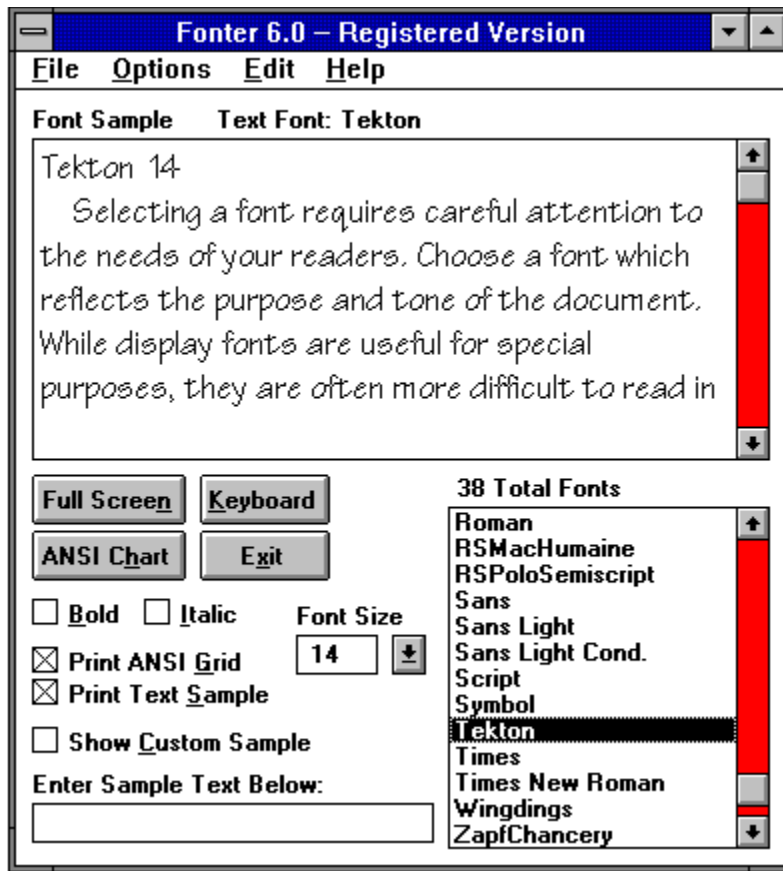

## Font-For-All

When I got my first computer and printer I was delighted to have what I thought was a good selection of fonts. The printer was an Epson MX-80 and I had four variations of the same dot matrix font. A few years ago I upgraded to a PC and got my first laser printer. The printer had 35 built-in fonts. I was beside myself with glee. I figured I couldn't possibly use all those fonts in a lifetime. Well here it is a few years later, and at last count I think the number of fonts I now have just passed 450. These are built-in fonts, PostScript fonts, and TrueType fonts. My only problem now is keeping track of these fonts. I suspect anyone with a newer printer also has this same problem. For this reason I decided to look into a few font management utilities.

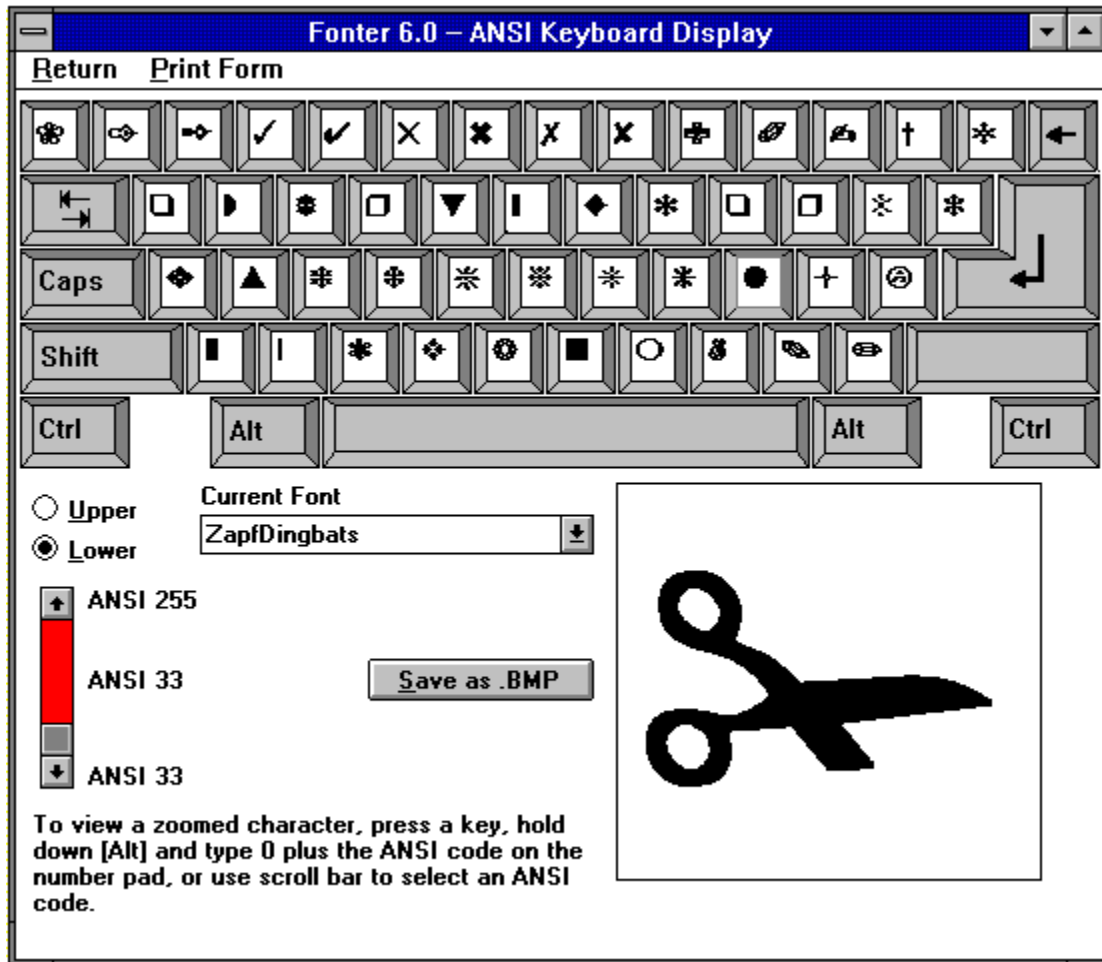

Font management utilities are almost as numerous as the fonts that are available. While looking through a somewhat impressive array of different programs I've found what I think are three gems. Not to say there might not be more that I'd add to my list later. But, for now these three utilities, Fonter 6.0, FontNamer, and FontMe 1.2 have found a home on my system.

### **Fonter 6.0**

*Fonter 6.0* is the newest version of one of the better font utilities. This program offers a variety of features for both PostScript and TrueType fonts. Many similar font utility programs show font samples as a single line of characters alphabetically arranged. *Fonter* however, shows the text sample as a paragraph. This allows you to evaluate the text in the way it will actually appear in your documents. There is also an option that allows you to specify a custom text sample. Thus permitting the text you actually need to be displayed. Both standard and extended character sets can be viewed in a variety of formats.

The keyboard option is a unique addition to the program. This screen shows a representation of a keyboard with samples of where each key is located. I doubt many people need to use this option for standard character sets. But for dingbats, wingdings, or any number of special character fonts this feature can be a real boost. No more looking for the character listing sheet. Simply look at the keyboard to find how to type those special characters. The keyboard window also has a **Save as .BMP** that allows a character to be saved as a bitmap graphic. So, the next time you need one of the wingdings or dingbats for a special project, you can simply copy it to a .BMP file and use it wherever needed.

The program also permits samples to be printed in a variety of forms. This allows you to have a printed record of either specific selected fonts, or all the fonts on your system. The printed copy is prepared in a variety of different font sizes, and in each of the standard four variations, *normal*, **boldface**, *italic*, or **bold-italic**. In addition, the complete listing of alphabetical, numerical, punctuation and extended ANSI characters are also printed. An optional ANSI grid of the complete character set may also be printed to serve as a tabular reference.

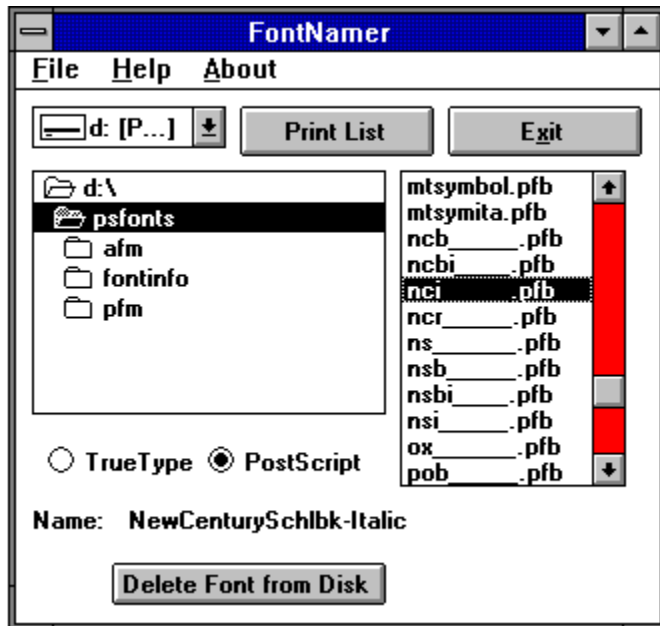

*Fonter 6.0* is an excellent font utility to help you keep track of all those fonts on your system. This version is a worthy successor to the earlier editions and should be part of your system. Members of Windows OnLine can find *Fonter 6.0* as FNTR60.ZIP in Directory #50 - (WINDOWS-Font Programs And Utilities).

**Fonter 6.0** (Registration fee: \$20.00)

OsoSoft  
1472 Sixth Street  
Los Osos, CA 93402

**FontNamer 1.0**

One more unique font utility for the author of Fonter 6.0 is *FontNamer*. This program is a utility that has become almost indispensable on my system. Though limited in its scope, the *FontNamer* program does its job very well. The main intent of the program is to help sort and identify the fonts on your system. If you've ever looked at the names of your fonts you've undoubtedly wondered what fonts with names like BDBI\_\_\_\_.FOT or AGW\_\_\_\_.PFB meant. Well, FontNamer is designed to identify these fonts by their real names.

By highlighting the BDBI\_\_\_\_.FOT font, you instantly see that this font is a Bodoni Bold Italic TrueType font. Likewise, switch the directory button to PostScript fonts and highlight the font name AGW\_\_\_\_.PFB and the *FontNamer* tells you instantly that this is an AvantGarde-Book PostScript font. Although some font names are less cryptic, for those that you cannot readily identify, this program will save you a considerable amount of head scratching. Should you find a font you really don't need on your system, the program also offers you the option of deleting the font from your disk. Also, if you need a printed list of the list of fonts and their real names, this option is only a mouse click away.

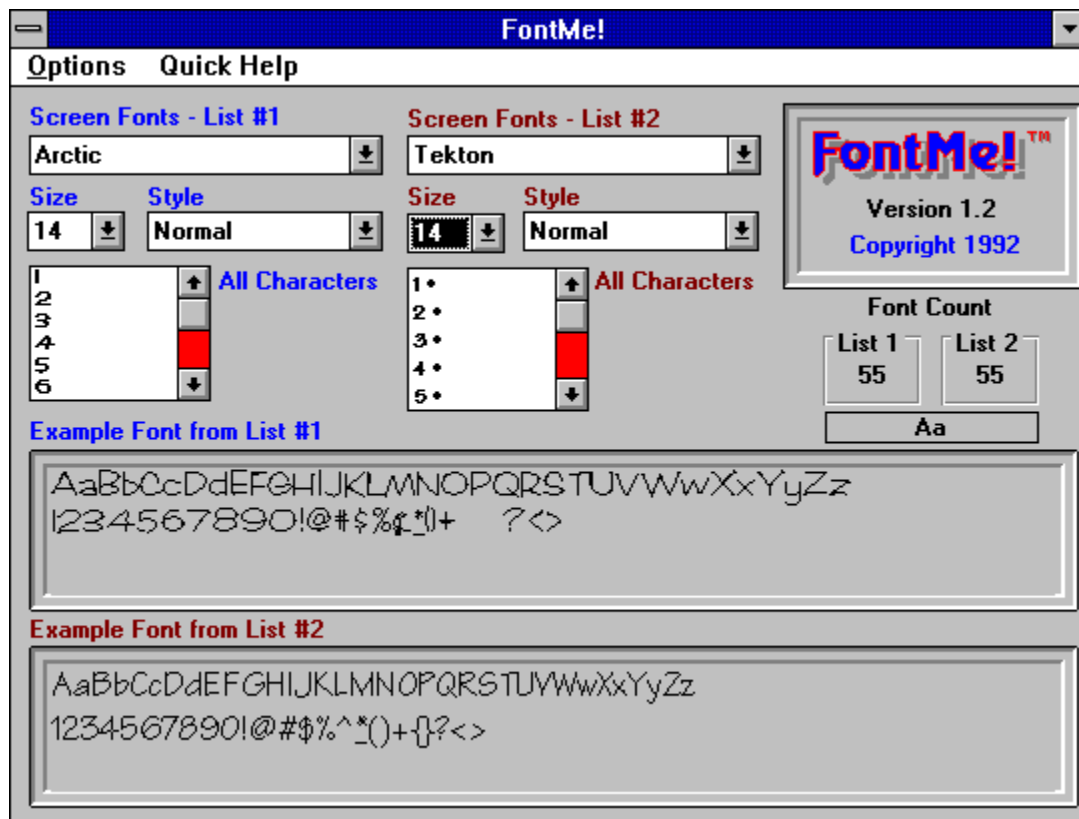

*FontNamer* is a very useful font utility to help you make sense of your font directories. This program is also freeware, so the price is well within everyone's budget. Members of Windows OnLine can find *FontNamer* as FNTNAME.ZIP in Directory #50 - (WINDOWS-Font Programs And Utilities).

**FontNamer 1.0** (Registration fee: FREE)

OsoSoft  
1472 Sixth Street  
Los Osos, CA 93402

**FontMe 1.2**

Have you ever had to decide which of two different fonts to use for a job? I think we all have. So, you look at the first font, then the next font, then back to the first font, and back to the second, and so on. With the large number of fonts available today making this selection can be troublesome. It's bad enough when selecting between two completely different fonts, but when deciding on two similar fonts, the problem is worse. Well, with *FontMe 1.2*, the decision may not be any easier but at least you'll be better equipped to make your comparison.

The *FontMe* program is a font comparison and printing utility. Not only can you view two different samples on the screen at one time, you can also print out a comparison on paper. When viewing the screen, should you want to view a character in more detail, simply click the character in the numbered list and an enlarged view appears beside the list window. To compare two characters directly, you can either repeat these steps for both fonts, or simply click the bar to the right with the upper and lower case letter to see a direct view of the selected characters side-by-side in both fonts. *FontMe* will show all standard and extended character sets and may even be used to call up the windows character map.

Though viewing the fonts on screen may be the fastest way to compare the fonts, the best way is with a printed sheet. The printout shows both type styles as complete groups like many other programs, but it also shows direct comparisons of individual letters as well. This is a comprehensive comparison that will allow you to see exactly what you need to know. With *FontMe*, the days of redoing complete documents, just because another font might look better are over. Now you can make your comparisons and selections directly, without going back-and-forth between the font samples.

*FontMe* has made the font selection process a bit simpler for me. The program has definitely earned a place in my fonts directory. Members of Windows OnLine can find *FontMe* as FONTME.ZIP in Directory #50 - (WINDOWS-Font Programs And Utilities).

## The Latest Windows Files

*The following file listings became available on Windows OnLine two weeks prior to the issue date, and may not yet be available on some bulletin board systems. Many more files were added to our library during that time, but only files of recent date are listed here. Members of Windows OnLine can download WOLRECNT.ZIP or use our mail door to obtain a complete listing.*

### WINDOWS - NEW UPLOADS from April 11 through April 17, 1993

(older files omitted)

(File Name - Byte Size - BBS Date - File Description) (Comments in **RED**)

0393HW.ZIP 30979 04-13-93 Supported Hardware List for March Beta of Win NT. (Last Revised: 03/17/93)

ACCTMN11.ZIP 132550 04-12-93 Account Manager 1.1 - a **time usage tracking program** for Windows 3.1. Great!!! 6 files - New:04-10-1993 Old:04-10-1993

ANSIPL10.ZIP 24582 04-11-93 Ansiplus v1.0: **MS-Windows help file** that allows you to view and **use the new ANSI Plus character set** w/your favorite WinApps; mapping for character slots 130-159 in TrueType, PostScript, and Corel Corporation's WFN font format are provided; **custom buttons launch a # of WinApps** & copy text to the clipboard; 03/11/93; Steve Shubitz.

### **Notice:**

*Windows OnLine (BBS) makes every effort to identify and to post only shareware, freeware, demos, working models and drivers (software files and programs) for it's membership which are intended for free public distribution. Due to the lack of documentation and other descriptive files contained within certain archives, it can be quite difficult to identify and remove improper and otherwise copyrighted files and programs from our file listings.*

*It is the policy of Windows OnLine (BBS) not to allow such improper and illegal files and programs on the BBS, at any time. Our Readers and Members are asked to cooperate with us in our efforts to identify such improper files and to assist WOL in its efforts to remove ANY inadvertent inappropriate file postings.*

***Thank You.***

*The following file listings became available on Windows OnLine two weeks prior to the issue date, and may not yet be available on some bulletin board systems. Many more files were added to our library during that time, but only files of recent date are listed here. Members of Windows OnLine can download WOLRECNT.ZIP or use our mail door to obtain a complete listing.*

<b>2,919,330,626</b>			

*This listing is as of March 1993 and is presented as an example of the tremendous number of WOL directories and files available to members. Remember, these are clean file listings, purged of useless duplicates or obsolete files. Windows OnLine™ works hard to gather the best and latest for its members!*

**Windows OnLine™ brings**  
**THE BEST AND LATEST FILES**

**NO JUNK** - we obtain the files ourselves, screen them thoroughly and edit their descriptions

**THE LATEST FILES and MORE FILES** - we get them EVERY DAY!

**MINIMAL DUPES** - we clear off the old when we bring on the new

**EVIDENCE:** Scan the **NEW FILES LISTINGS** in this issue. This is just our Windows and OS/2 files. Twice as many DOS files come in each week in addition to the quality and quantity you see here.

**NOW, LOOK AT THE SIZE AND NUMBERS OF FILES in our listings:**

# GIVE US A CALL

BBS (510) 736-8343 Voice (510) 736-4376

and consider a **Membership in Windows OnLine™** to get

**ACCESS TO ALL CONFERENCES** for the term of your membership

**A MEMBERS-ONLY VOICE SUPPORT LINE** to get a quick start

**FULL QMAIL ACCESS** - quickly, efficiently handle your messages

**HAVE A FILE FEEDING FRENZY** with no need to upload

**DAILY TIME UP TO EIGHT HOURS**; our plans are structured for your convenience and benefit; daily time allowances are not lost

**ACCESS TO THE PRIVATE MEMBERS CONFERENCE**

Call and select "**MEMBER**" for descriptions of all our plans, including the **GOLD PLAN** which includes 365 days, or 36,000 minutes (600 hours), whichever comes first, and 650 megs of files.
