

Popular Mechanics  
Car Guide  
version 2.1

## INSTALLATION

The setup program will create a BTW directory where it will install files needed to run this program. To install the application, you'll need about 6 MB of free space on your hard drive.

### Windows(r) 3.1 Installation

- ò Insert disk into CD-ROM drive.
- ò From the Program Manager's FILE menu, choose RUN.
- ò Type d:\setup. (Substitute your CD-ROM drive letter if it is other than "d.")
- ò Click on the Car Guide icon located in the Books That Work program group in your Program Manager.

### Windows(r) 95 Installation

- ò Insert disk into CD-ROM drive and wait for the dialog box to appear.
- ò Click the button labeled "Install" and follow the instructions

You must have Video for Windows(r) 1.1e

If you are running Windows 3.1 and do not already have Microsoft Video for Windows installed, the installer will ask if you want to install it. If you do not have Video for Windows 1.1e, some videos may not play properly. If you have problems with running videos, try installing Windows 1.1e manually, as follows:

- ò Choose Run from the Program Manager File menu.
- ò Type d:\winvideo\setup (Substitute your CD-ROM drive letter if it is other than "d.")

### Uninstalling the Car Guide

If you are running Windows 3.1, you will find an uninstall program in your Books That Work program group. Run this to remove the Car Guide files from your system.

If you are running Windows 95, go to the Control Panel and open the Add/Remove Software item. Select the Popular Mechanics Car Guide entry to remove the Car Guide files from your system.

### System Requirements:

- ò 386 or higher IBM(r) PC or compatible
- ò 4 MB RAM minimum
- ò Microsoft Windows 3.1 or Windows 95
- ò VGA graphics (256 colors or higher)
- ò Double-Speed CD-ROM drive
- ò Hard disk drive with 6 MB free space
- ò Sound card recommended.

## TECHNICAL NOTES

### 1. Palette Shifts

Some monitors running in 256 color mode will display a "palette shift" when you play a video. A shifted palette will temporarily display colors incorrectly (e.g. Brown for Blue, Yellow for Red, etc.) If your monitor exhibits this behavior and your display becomes "stuck" with a shifted palette, closing the affected window and reopening it should restore the display to the proper palette.

### 2. Recommended Video Display Settings

We recommend you run Car Guide in any of the following settings: 256 color or greater, using Small System Fonts (see Windows Setup Help for more information.)

## TECHNICAL SUPPORT

For technical support with this software, please call 415-843-4440, or you can contact Books That Work via e-mail.

For CompuServe users, our e-mail address is INTERNET:support@btw.com  
For Internet users our e-mail address is support@btw.com
