

Audioshop Interface

with

Music Madness II CD-ROM

Awesome Audio Interface...

The files on this CD-ROM will work great with Opcodes Audioshop interface. In fact, we were so impressed with this new tool that we have built directories in the Tool folder for Audioshop users. This software allows you to play the music and effects as if you were using a CD Player and to edit them as well. A sample picture of the player and editor interface is shown below for your approval. Registered Music Madness users can order this great tool at the reduced price of \$69.00 direct from AMUG. Send \$69.00 to AMUG, 4131 N. 24th Street A-120, Phoenix, AZ 85016 (602) 553-8966. Reserve your copy today!
