

Greg's Exporter

Purpose

The purpose of this Add-in is to take the return set from a saved select query and save it as a Access Table or a 'real' text delimited file.

Install

- 1-Copy the GREGS.MDA file to your access directory
- 2-Start Access
- 3-Open a database
- 4-Under file, select Add-ins, then Add-in Manager
- 5-Choose Greg's Exporter and click install
- 6-Access will prompt you to close Access and reopen for change to take place

Use

With a database open go to Add-in selection under the file menu. Choose Greg's Exporter. A box will appear and display all saved queries in that database.

Rights

Please feel free to use and distribute this Addin. If your intent is to use this addin or a portion of this addin for profit. Please request permission.
