Golden RETRIEVER for Windows
  Retail Price: $99
  Contact: Brenda Jaeck
  Phone: 714-851-2283   Fax: 714-851-2283

A Windows filing cabinet, allows documents to be stored in drawers and folders and creates 256-character filenames.

Golden RETRIEVER for Windows organizes any file, not by directory but by project or subject into on-screen file drawers and folders -- just like the manual filing system you already know how to use.   Golden RETRIEVER allows you to use filenames up to 256 characters long, filenames that make sense, instead of cryptic eight-character DOS filenames.   Golden RETRIEVER easily finds the file you want, then automatically launches the corresponding program with just the click of a mouse.   Installs automatically to your custom Windows desktop recognizing all Windows and DOS programs.   Golden RETRIEVER   -- the Windows user's best friend and loyal companion.

LanFax Redirector

Retail Price:
Contact: Steve McBride
Phone: 415-694-7000   Fax: 415-694-7070

Fax Server Software.

LanFax Redirector is state-of-the-art LAN based fax server software for corporate use.   The LFR architecture is based on the client-server model and takes full advantage of 32-bit processing provided via NT.   LFR architecture overcomes many of the problems inherent in conventional 'store and forward' fax servers that bog down the file server and overload the network.   LFR optimizes packet size and bypasses the file server via peer-to-peer connectivity, thereby reducing network traffic. End User Benefits: - real time status and control of fax   - shared corporate SQL-style   phone book that resides on the fax server.   - DID, DTMF, departmental, and MAPI inbound routing   - WYSYWIF and WYPIWYF   - create customer fax solutions using LanFax DDE LAN Administrator Benefits: - Remote, real-time access to the fax server status without having to walk to the fax server.   - Ability to remotely reconfigure the fax server on-the-fly   - minimal network traffic   - Centralized audit trail

Allen-Bradley

1201 South Second Street

Control View for Windows

 Retail Price: 995.00-7,795.00
 Contact: Local Distributor
 Phone: 414-382-200   Fax: 414-382-3232

Control view for Windows from Allen-Bradley: Advanced software from the automation company you trust.

Control view for Windows is a results-oriented industrial automation software package utilizing an open platform that permits connectivity by using leading, industry-proven technology.   It is a fast, scaleable and easy-to-use software that allows you to animate graphics, trend, alarm,   log data, detect events, derived tags, and much more. Control View utilizes all the Windows technology-DDE, OLE 2.0, ODBC Software developed by the control experts who know industrial automation better than anyone in the world, Allen-Bradley a Rockwell International Company.

Alpha Pacific
PO BOX 1882
San Luis Obispo, CA   93406

ImageRider
    Retail Price: 125.00
    Contact: Ty Griffin
    Phone: 805-543-3282   Fax: 805-543-3302

A multi purpose image editor, viewer and tool: designed for the needs of application developers and builders, to be integrated with other programs and.or processes.

ImageRider is simultaneously a stand alone imaging program and a developer's tool.   For users, it provides scanner control, extensive viewing and editing capabilities (rotate, scale 3-999, convert between formats, crop, zoom, etc.). and filing/savings of images.   As a tool or building block, it integrates easily into other applications that require image processing.   The program supports all standard image file formats, b&w/grayscale/color, and can be run in various modes to restrict or enable capabilities.   ImageRider is an excellent tool for developers and software integrators who need imaging capabilities for their applications, but do not wish to develop their own imaging programs.

Altamira Software Corp.

Composer

Retail Price: $795.00
Contact: Customer Service
Phone: 415-332-5801   Fax: 415-332-5804

Object oriented image composition & manipulation.

Altamira Composer is the revolutionary new image composition and manipulation application that brings the flexibility of object-based drawing to image editing.   Unlike other imaging applications, with Altamira Composer, images are never \"pasted down.   \"   You have total freedom to change, move, or edit the images in your composition at any time.   Altamira Composer turns an image into an image object.   Instead of time-consuming selecting and masking, image objects are automatically created when you bring elements into your composition. These objects \"float\" transparently in a dynamic alpha stack.   They can be painted, trimmed, scaled, rotated, given transparency, moved up or down in the stack or otherwise manipulated without any image degradation.   Altamira Composer also includes hundreds of innovative new anti-aliased tools and effects.

Attachmate Corporation
3738 N. Fraser Way
Unit 101
Burnaby , British Columbia   V5J 5G1

EXTRA! for Windows NT
Retail Price: $425.00
Contact: Carlo Rossetti
Phone: 800-663-8702 or 604-431-0727   Fax: 604-431-0818

EXTRA! for Windows NT (ver. 1.0)

EXTRA! for Windows NT is powerful 3270 connectivity software that provides a set of 3270 options and takes full advantage of Windows NT.   EXTRA!'s Universal Connectivity allows you to choose coax, LAN (NetBIOS, 802. 2, TN3270), gateway (Attachmate, IBM, Novell, Microsoft), and modem via SDLC or ADLC.   Supports industry standard file transfer protocols such as IBM Send/Receive (IND$FILE) and DISOSS PS/CICS, up to 26 host sessions, pull-down menus, dialog boxes, multiple windows, LU1 or LU3 printer emulation, and light pen or mouse pen support.   In addition, it provides a wealth of automation options including macros, host-aware DDE, and multi-tasking HLLAPI.

AudioFile, Inc.
Four Militia Drive
Lexington, MA   02173
USA

TalkWorks
    Retail Price: $40.00
    Contact: Tom Erickson
    Phone: 617-863-0890   Fax: 617-863-0956

TalkWorks is an integrated voice messaging system with audio compression designed to ease E-mail, voice mail and fax communications using the personal computer.

TalkWorks(TM) is designed to ease business communications by enabling users to benefit from the natural ease and convenience of voice in their personal computer applications.   Employing sophisticated techniques that are scaleable to a wide variety of host computers or digital signal processors (DSPs), TalkWorks is the first truly practical solution for business audio.   There are four products within the TalkWorks family: AudioRecorder(TM), an OLE server for recording, playback, embedding and file format conversion of digital audio; AudioEditor(TM), a full-function audio waveform editor; AudioMixer(TM), an application for controlling audio sources; and the TalkWorks answering machine, a telephone answering machine with support for audio compression.

Custom Control Construction KIt (CCCK)

Retail Price: $495.00
Contact: Mathew Kuruvilla
Phone: (314) 458-4961   Fax: (314) 458-4961

Interactive tools for constructing OLE custom controls.

CCCK is a toolkit for interactively constructing graphical OLE Custom Controls.   CCCK provides the easiest route to the creation of exciting custom controls utilizing OLE Automation.   Includes a structured three dimensional graphical editor and other interactive tools for building custom controls in C++ Graphics created using graphical editor are converted into custom controls with user specified dispatch interfaces.   Development of custom controls is speeded up through a code generation tool which generates code compatible with Microsoft Foundation Classes and Visual C++.   Several examples of novel custom controls such as a 3D fly over control are included.   Controls constructed can be invoked from OLE automation clients and can be made part of client programs.   Requires Microsoft Visual C++ version 1.5 or later.

USA

Draw++

Retail Price: $460.00
Contact: Mathew Kuruvilla
Phone: (314) 458-4961   Fax: (314) 458-4961

Class library for adding for structured two and three dimensional graphics to Visual C++

Draw++ is a C++ class library for creating structured graphics interfaces to your programs.   Draw++ builds on Microsoft foundation Classes and Visual C++ to provide you with state-of -the -art graphical tools under Windows, Windows NT and future systems supported by Visual C++.   Draw++ is a robust implementation of structured graphics as found in the well-known InterViews library for X windows.   Use Draw++ to port graphical interfaces for high end graphical client-server applications from X windows to Windows NT and Windows.Draw++ includes a rich collection of two and three dimensional shapes, rubberband classes for interactively creating and manipulating shapes and classes for creating macro operations.   Shapes created under Draw++ can be exchanged with X windows and other systems using Postscript file format.   Sources code is included for drawing editor utilizing the Draw++ library and is a full OLE 2 server.   Objects can be included in drawings from external applications supporting OLE 2.   OLE support compatible with current version of Visual C++ support is included as part of the Draw++ library.

Bits & Pixels

2235 Oak Crest Manor Lane

ObjectMedia

Retail Price: $395.00
Contact: Mathew Kuruvilla
Phone: (314) 458-4961   Fax: (314) 458-4961

Multimedia authoring C++ class livrary utilizing OLE 2   objects.

ObjectMedia is a development system for creating multimedia products.   ObjectMedia exploits the power of OLE 2 for creating multimedia.   ObjectMedia includes interactive editors for creating multimedia graphics and OLE 2 objects.   A novel method for creating animations using C++ objects is also included, along with a time oriented graphical editor.   ObjectMedia also includes an extensive C++ class library which allows you to seamlessly merge OLE 2 objects and multimedia objects with graphical and animation objects   Hypermedial effects are also easy to achieve through the ability to create a variety of interactors which go beyond the normal button-based interfaces.Unlike other multimedia authoring systems, the products you build using ObjectMedia are your own programs, with no royalties or runtime requirements.   The ObjectMedia library is built on top of Microsoft Foundation Classes using Visual C++ which ensures portability of your products to a number of platforms supporting the foundation classed, including Windows and Windows NT   ObjectMedia requires Microsoft Visual C++ version 1.5 or later.

Blue Sky Software Corp.

WindowsMAKER Professional 5.0

　　Retail Price: $1096.00
　　Contact: Inside Sales
　　Phone: 800-677-4WIN　　　　　　　　　　Fax: 619-459-6366

Using OLE 2.0 automation, WindowsMAKER(TM) Professional 5.0 -- the industry's most powerful Prototyper and C/C++ Code Generator for Windows, Win32s and Windows NT -- offers an extendible plug-in architecture.

If you're serious about C/C++ Windows development, WindowsMAKER(TM) Professional 5.0 is the most powerful Prototyper and C/C++ Code Generator for Windows, Win32s and Windows NT.   OLE 2.0 automation enables WindowsMAKER to provide an extendible plug-in architecture.   This award-winning product offers much more functionality and ease-of-use than any other tool.   Easily create full-featured Windows Applications: MDI, Toolbars, Status bars, Templates, On-line Help, Graphical 3D buttons, Edit During Preview and much more.   TrueCode(TM) technology ensures that user code is preserved during code regeneration.   Uses \"switch-it\" knowledge bases for generating code for specific platforms, allowing migration between languages, C++ libraries and platforms (ANSI C, MFC, OWL, etc.).

Brio Technology, Inc.
444 Castro St.
Suite 700
Mountain View, CA   94041
USA

DataEdit
Retail Price: $999.00
Contact: K. Edholm
Phone: 415-961-4110   Fax: 415-961-4572

DataEdit is a new tool for the rapid development of cross-platform Windows and Macintosh database applications.

DataEdit is a new desktop development system that enables extremely rapid construction of forms-based client-server applications for SQL databases.   DataEdit allows users to update relational databases from a graphical forms environment.   DataEdit includes a data entry screen painting program with a built-in SQL generator and a centralized database model.   It provides multi-user access to relational databases, and requires no user knowledge of SQL.   DataEdit provides built-in, automatic version control and a centralized data dictionary.   DataEdit supports a variety of database connection software, including Data Access Language (Apple), ODBC, SQL*Net (Oracle), OpenClient (Sybase) and connects loading databases such as AS/400, Informix, Ingres, ORACLE, Sybase, SQL Server and Rdb.   Now with OLE 2.0 support, DataEdit developers will be able to incorporate OLE 2.0 objects and extend their applications effortlessly.

Brio Technology, Inc.
444 Castro St.
Suite 700
Mountain View, CA   94041
USA

DataPivot
Retail Price: $99.00
Contact: K. Edholm
Phone: 415-961-4110   Fax: 415-961-4572

DataPivot is the ad-hoc analysis and crosstab reporting tool that lets anyone construct crosstab reports on data from any source.

DataPivot is the only dynamic analysis and reporting tool that lets you view data from different perspectives quickly and easily.   Its interactive data \"frame\" allows you to interchange rows and columns, define groups, totals and sub-totals, and build reusable templates that reveal the structure and meaning of your data.   DataPivot supports System 7.0 IAC and DDE and accepts data from virtually any source, including spreadsheets, query tools, and text documents.   Now with OLE support, DataPivot analysis can be embedded in other applications and dynamically restructured in place.

Brio Technology, Inc.
444 Castro St.
Suite 700
Mountain View, CA   94041
USA

DataPrism
 Retail Price: $399.00
 Contact: K. Edholm
 Phone: 415-961-4110   Fax: 415-961-4572

DataPrism is the cross-platform database query tool that allows anyone to copy data from remote databases into spreadsheets, word processors, and charting applications without programming.

DataPrism is the premier ad hoc query tool for Macintosh and Windows.   DataPrism is completely cross-platform. Queries created by any Windows version of DataPrism can be opened and run on a Macintosh and vice versa. DataPrism's unique visual data model allows analysts to build queries without relying on database experts. DataPrism previews database tables, lists, valid constraint choices, and joins tables automatically to make querying completely painless.   DataPrism is a read-only query tool that enhances database server security because it prohibits data updates.   DataPrism supports all relational databases, including AS/400, DB2, Informix, Ingres, Oracle, Rdb, and Sybase using connection software products such as DAL, EDA/Link, Micro Decisionware Gateway, ODBC, Open Client, Q+E Lib, SequeLink and SQL*Net.   Now with OLE 2.0 support, a DataPrism query can be a data source object embedded in any OLE container.

Buzzwords International, Inc.

7636 County Rd 621

FileMaker Pro 2.1
   Retail Price: $399.00
   Contact: Claris Customer Assistance
   Phone: 408-727-8227   Fax: 408-987-7460

With unsurpassed flexibility and usable power, FileMaker Pro lets users themselves develop and manage anything from lists to automated, multi-user database applications.

FileMaker Pro 2.1 is the database offering power without programming.   It provides individuals and workgroups with the perfect balance of functionality and accessibility through it's easy-to-use graphical data-entry tools, unmatched report generation facilities, point-and-click scripting and unique cross-platform workgroup capabilities.By hiding the database complexity behind a superior graphical user interface, FileMaker Pro allows even new users to easily access information, automate customized tasks and operate in multi-user environments. Enabled with Microsoft's OLE 2.0 capabilities, FileMaker Pro acts as an OLE 2.0 client, allowing users to embed and link a variety of objects and applications directly into their database.   For example, an employee database kept in File Maker Pro could use OLE 2.0 to include a Microsoft Word for Windows document that links the contents of the employee's latest review directly to a field in the database.

CMD WinRAID

    Retail Price: 49.95
    Contact: Robert Leondis
    Phone: 714-454-0800   Fax: 714-455-1656

CMD WinRAID provides IDE RAID 1 (disk mirroring) capabilties and in-depth statistics of disk performance and activities with OLE 2.0 support.

Integrated with CMD high performance IDE chip (PCI-0640x) and fast disk driver, CMD WinRAID offers RAID 1 solution and management.   Through disk mirroring function, data can be written into two separate identical disks to achieve data redundancy.   Thus, if one drive fails,   the other drive can provide an exact copy of the lost data. CMD WinRAID provides a user friendly interface to configure IDE RAID sets and a monitor facility to record real time IDE disk read/write activities.

Extension of our existing desktop products (which will act as servers) for end user access to corporate data from a hand held device.   Insulates users from SQL operations.   Includes Query Bar, set of icons arranged across top of screen that automatically select, sort, group and calculate data.   Allows user to access relational databases without detailed knowledge of SQL, database structure or network navigation.   Enables users to access data by clicking on topics listed in menus. All network navigation and database access is handled by the program enabling the user to perform SQL query options such as sorting, grouping, calculating minimum, average and maximum values, totals, subtotals, and counting occurrences of specific values.   The program allows users to define their calculated columns and perform calculations on existing query columns.   Does not require the user to join SQL queries or build queries from the ground up.   Supports Oracles's Oracle 6.0, Interbase's Interbase 3.0 and Cognos' Starbase.

Object Broker
Retail Price: $125.00 - $500.00
Contact: Al Cooley
Phone: 800-DIGITAL   Fax: 603-881-0120

Distributed multiplatform solutions can be developed using the OLE interface in Object Broker to access and interact with remote applications.

Object Broker is a layered software product that reduces the cost of developing client/server solutions by providing the ability to locate, invoke and interoperate with remote applications across different operating systems. Developers are shielded from the details of lower level and platform specific APIs, just as clients and servers are isolated from network or code changes.   Interfaces to common desktop tools like x.deskstop; Visual Basic, DDE and OLE further reduce development time.   OLE developers can extend the capabilities of OLE across a distributed multi-platform environment (Windows, NT, Mac, VMS and common UNIX variants).   Complies with the CORBA standard.

SQLWindows lets teams of programmers collaborate to develop applications for all SQL databases.

SQLWindows is an award-winning graphical 4GL that allows teams of   programmers to collaborate in developing object-oriented client-server database applications that access a variety of back-end database servers including Gupta SQLBase Server, Microsoft SQL Server, Informix, DB2 and   DB2/2, Oracle, AS/400, HP ALLBASE/SQL, NetWare SQL, and Ingres.   SQLWindows also includes its own single-user SQL database to enable you   to develop and test your applications on a stand-alone workstation, laptop, or pentop.   With its unique TeamWindows collaborative-programming environment and application repository, SQLWindows programmers can share and reuse code, specialize in programming tasks, and collaborate to complete applications more quickly and reliably than possible before.   And   project managers can coordinate work, monitor progress, and spot trouble before it happens. What's more, SQLWindows supports full object orientation, comprehensive report writing, and complete Windows NT citizenship.   SQLWindows consists of a set of integrated, object-oriented tools and services for developing, debugging, and deploying client-server   applications.   The tools and services include: - Application Designer Visual Programming Environment   - Application Outliner   - SQLWindows Application Language   - Class Libraries   - ReportWindows Industrial-Strength Report Writer   - Debugger and Compiler   - TeamWindows Collaborative Programming Tools   - TeamWindows Repository   - Operating System and Network Services Library   - Single-User, Multi-Tasking Full-Function SQL Database Engine

I-Bridge For Excel

Retail Price: $295.00
Contact: Abraham Hirsch
Phone: 800-457-4555   Fax: 617-661-8625

I-Bridge EXCEL to UNIX relational database middleware.

I-Bridge turns Excel into the ultimate client for   Oracle and Sybase servers.   Excel users have control over the display formatting while the database administrator can maintain   control over the database.   I-Bridge permits background operation, so that users can continue   to work while data is gathered in the background.   There is no 64K limit on the amount of data that can be returned to Excel.   Multiple simultaneous requests can be made to different databases   allowing parallelism and improving performance. I-Bridge   automatically converts data into Excel's table format   significantly enhancing performance.   Report production can be   automated for periodic reports.   I-Bridge is perfect wherever people need to use data from   database reports in spreadsheets.   Or when dynamic needs require   frequent new database applications, especially data entry and   report writing.   It eliminates re-entry of the data.   Users can   make full use of Excel to analyze the data, graph the data, and   special features such as outlining to summarize it.   For data   entry, users can utilize the automatic form capability of Excel   or the Dialog Editor.

Interleaf RDM
    Retail Price: $40,000.00
    Contact: Interleaf Direct
    Phone: 800-955-LEAF   Fax: 617-290-4943

RDM is an enterprise-wide object management solution which provides integrated services for library management, workflow management, configuration management, and document assembly management.

OBJECT LIBRARY: RDM enables you to build an on-line library, comprised of an extensive library card catalog maintained in an Oracle database, coupled with secure directories for object storage.   Authorized users can search, browse, and access objects through simple check-in/check-out requests.   WORKFLOW: RDM facilitates workflow by letting you define release cycles according to the needs of your organization.   Objects are automatically routed through specified production steps and distribution channels.   CONFIGURATION MANAGEMENT: RDM lets you create relationships between objects stored in the RDM library.   This enables you to manage and control product or project information, or to define the set of objects that make up a larger unit of documentation.   RDM objects can be stored once, but used in many relationships with other entities managed by RDM.

Phone: 617-647-7700   Fax: 617-647-4121

JetForm Fill allows you to fill in forms created in JetForm Design and send them via Microsoft Mail or Lotus cc:Mail.

Jetform Filler(TM) allows users to send and receive complex forms and the data they contain seamlessly with cc:Mail, Microsoft Mail, or Windows for Workgroups.   Forms are designed using JefForm Design, allowing you to duplicate exactly you current pre-printed paper forms.   Fields on the form may be set up for intelligent data entry; dBase and Paradox lookups, complex data validation rules, common answer response files, context sensitive field specific help, check boxes, radio buttons, and calculated fields.   During the fill-in process, forms can be signed electronically.   A form may have multiple signature fields and each signature field can lock specific fields on the form.   For additional security, the entire data file may be encrypted.   Once the form is filled out the user can easily create a circulation list to route the form and save the list for future use.   The routing can contain rules based information so that the routing can change based on events or values in the form.   Throughout the route, the user can track his/her messages so the location of the form is always known.   Anyone on the route can return the form to the sender with accompanying comments or questions.   JetForm Filler works in the Windows, DOS, and MAC environments and supports OLE 2.0 allowing users to embed images and other objects within their forms.

Keyfile Corp.

USA

Keyfile

Retail Price: Starting at $595.00
Contact: Melinda Meyer
Phone: 603-883-3800   Fax: 603-889-9259

Keyfile is a groupware application for imaging, document management and workflow which allows groups to easily file, retrieve, share, distribute and automate every office document over a wide variety of LANs.

Keyfile, the industry leader with over one-third of the desktop imaging market, provides a complete environment for PC-based integrated document management of both text and image files, including ad hoc distribution, markup and retrieval, commenting, security, workflow and document- and image-enablement.   Through extensive integration tools such as DDE, OLE and the Keyfile Developers Kit, Keyfile can provide robust document-enablement capabilities to existing legacy and line-of-business applications, databases and e-mail systems.   The Keyfile family, including Doceo, Keyfile's newest product, spans single user systems to multi-server environments, and supports Novell Netware, Banyan Vines, DEC Pathworks, TCP/P-based networks and more.

MultiMedia Works Developers Toolkit
 Retail Price: $499.00
 Contact: Bill Muscato
 Phone: 716-248-9720   Fax: 716-248-9185

MultiMedia Works Developers Toolkit provides DLL calls to integrate video, sound, animation, graphics and images into new and existing applications.

MultiMedia Works Developers Toolkit simplifies creation of applications that integrate video, sound, animation, graphics and images by providing Dynamic Link Library (DLL) function calls.   With the toolkit, multimedia is added to applications created with popular development environments like Visual Basic, Object Vision, Realizer, C++ and C.   The Toolkit enables any OLE-compatible application to play digital multimedia files in over 40 formats, size and place multimedia Windows and drag-and-drop objects from one application to another.   An optional drivers kit expands video device capabilities to control consumer camcorders, VCRs and laserdisc players.

Media Verse

Retail Price: $495.95
Contact: Chris Van Hanersveld
Phone: 619-591-9606   Fax: 619-591-9607

MediaVerse, the universal hypermedia authoring tool, enables user interface building, linking, auto-linking, media management and analysis, for creating hypermedia presentations.

MediaVerse supports a visual construction approach to create true object oriented interactive applications.   Design interfaces by creating layouts and defining   groups of objects that should appear simultaneously.   Drag and place objects to achieve the desired look and feel.   Layouts provide the ability to place objects in the foreground or background, color key bitmap objects so that they appear   to have a transparent background, and create buttons to link the user to other presentation elements.   MediaVerse provides seamless integration of the edit and presentation modes (just a keystroke to change), as well as one-keystroke access to toggle between Windowed and full screen view.

IMAGE Assist

Retail Price: $995.00
Contact: Lisa McLain
Phone: 408-252-6266   Fax: 408-252-6267

High speed imaging software for outputting bitmap graphics files to digital film recorders.

IMAGE Assist (IA) is high speed Windows-based imaging software for outputting bitmap graphics files to digital film recorders.   IA outputs many popular bitmap formats (TGA, TIF, GIF...) to 35mm and larger format films on AGFA and MGI film recorders.   IA is efficient at imaging both large and small files and provides the imaging flexibility required by service bureaus and photographic labs.   Using OLE Automation and/or IA's built-in macro language, additional formats may be added and the software can be customized for the special requirement of various industries, such as medical, cinematic and scientific.

Capsule(R) Version 1.0 for Windows
Retail Price: Call.
Contact: Lynn Renshaw
Phone: 800-3460-3824   Fax: 415-961-0596

A visual application building tool which enables custom compound applications to be constructed utilizing standard Windows products.

Enables Windows users to quickly build custom compound applications by interconnecting and configuring Windows products.   Using the familiar Windows drag-and-drop interface, a user can select and connect Windows products   and build an easy-to-understand diagram which controls their execution and the transfer of information between them.   Capsule(R) for Windows fully exploits OLE 2.0 to enable the integration of disparate products from multiple vendors, while also providing mechanisms to interface to pre-OLE 2.0 products.   With Capsule(R) for Windows, application developers can quickly construct custom compound applications which are easily understood and, with authorization, modifiable by others.

METZ Phones

 Retail Price: $89.00
 Contact: Richard Noffsinger
 Phone: 206-641-4525   Fax: 206-644-6026

A powerful address and telephone manager for Windows desktops that uses OLE 2.0 to make addressing letters and mailing labels easy.

A powerful address and telephone manager for Windows desktops.   Designed for use on a stand-alone system or on the network where you can share the data.   Using OLE 2.0, makes addressing and tracking letters easy.   Phones will automatically lock records when another user on the network is updating a contact.   Printing address labels, envelopes, and name tags is simple.   Store multiple addresses for each contact.   Each record can store (practically speaking) an unlimited number of phone numbers, or E-mail addresses.   Update sequential information about a contact in one note section, and use another note section for undefined data.

LANlord 2.0
Retail Price: $2,495; 100-user and 250-user licenses available.
Contact: Muki Murthy
Phone: 914-377-2704   Fax: 914-968-7100

LANlord is an integrated desktop management system that enables network managers to centrally monitor, control, and configure remote PC hardware and software in real-time.

LANlord is an integrated desktop management software system for real-time, centralized management of PCs on LANs.   It enables managers to pro-actively monitor network and PC activity and statistics, as well as manage PC resources across multiple local and remote locations.   It combines the multiple applications required to manage networked DOS and Windows clients, and provide user support, into a single interface.   Applications include: automatic inventory, remote management and control, network and PC monitoring, software metering, virus detection and repair, and reporting and data export.   LANlord will support IBM LAN Server, Microsoft LAN Manager, Novell NetWare and any network operating system providing a NetBIOS interface.   In addition, LANlord will support IBM's LAN NetView platform.

Microsoft Visual Basic programming system for Windows

Retail Price: Standard Edition $199, Professional Edition $495
Contact: Inside Sales
Phone: 800-426-9400   Fax:

This award-winning product now includes comprehensive data access and opens up the exciting
new extensibility capabilities of OLE Automation.

Nothing helps you solve problems faster than the Microsoft Visual Basic programming system for Windows.
Whether your challenges involve application automation, workgroup data flow, client-server development, or
executive information systems, you'll find the versatile language, access to data and extensibility you need to build
custom solutions quickly.   With OLE 2.0 Automation, applications programs such as word processors or
spreadsheets can now expose their functionality as a collection of objects, so you can now use these pre-built
components in building your own applications.   Data-aware controls such as text box, checkbox, and picture help
you access data easily without writing any code, and the Microsoft Access 1.1 database engine is included as well. A
complete Report Writer allows you to embed pre-defined reports in your applications, and a Custom Setup Toolkit
with Wizards makes application distribution a snap. Visual Basic includes a sophisticated development environment
complete with editor, toolbar, and full-featured debugging tools.

Microsoft Word 6.0 for Windows

    Retail Price: $495.00
    Contact: Inside Sales
    Phone: 800-426-9400   Fax:

Microsoft Word is the most popular word processor for Microsoft Windows.

What most people want from a word processor is an easier way to do their day-to-day work.   Maybe that's why more people choose Microsoft Word than any other word processor for Microsoft Windows.   As a member of the Microsoft Office family of programs, Word features IntelliSense technology -- built-in intelligence that senses what you want to do and produces the desired result, making routine tasks automatic and complex jobs easier.   Word offers IntelliSense innovations such as AutoCorrect and AutoText, which automatically fix typos and expand your own abbreviations into full text for you.   Routine tasks also go fast with tools such as customizable tool-bars, a new vertical ruler, and multilevel Undo.   Word simplifies complex tasks with new AutoFormat, so you preview and apply even advanced formats with a click.   You also get wizards that build entire page layouts for you, improved Mail Merge, powerful tools for creating forms, and even special tools that simplify switching from WordPerfect.   Finally, all programs in the Microsoft Office family work alike and work together, so it's simple to do more with all your information.   Try Word and see for yourself.   And make every day easy.

Visual C++ version 1.5

Retail Price: $599.00
Contact: Inside Sales
Phone: 800-426-9400   Fax:

Microsoft Visual C++ development system offers a reusable high level class library with source code, a visual environment, integrated debugging, \"wizards\" and C and C++ compilers.

Microsoft Visual C++ is the fastest, easiest way to create OLE 2.0 objects and containers in C++.   Using Microsoft Foundation Class Library 2.5 and \"wizard\" technology, an OLE 2.0 object and/or container that fully supports linking, embedding, visual editing, OLE automation and drag and drop can be created in minutes.   And of course the application source code .RC files are available for customization.   Visual C++ is a highly integrated visual development system providing an efficient development cycle and high performance executables.

Microtest Inc.
4747 North 22nd Street
Phoenix, AZ   85016
USA

Discport
Retail Price: please call
Contact: inside sales
Phone: 602-952-6569   Fax: 602-952-6530

Discport is a \" play and play \" CD-ROM networking solution.

Networking CD-ROMs is now easy, convenient and cost-effective with Discport from Microtest.   Just attach Discport and access your CD-ROMs.   Discport plugs directly into any network connection, giving NetWare users access to CD-ROMs right from their desktop, just like they access a hard drive on the fileserver.   Discport comes complete with Discview, a Windows-based software application that provides users with a simple-to-use interface. Up to seven CD-ROM drives can be attached to one Discport, and multiple Discports can be attached to the LAN. Discport Ethernet lists for $795.00 and Discport Token Ring lists for $995.00.

MicroDAX 3000 Version 2.0
   Retail Price: 2,125.00
   Contact: Wayne Crawley
   Phone: 201-825-4000   Fax: 201-377-5752

MicroDAX 3000 is an electronic microfilm image processing system used to convert microfilm documents to electronic images for fax, printing and electronic mail disrtobution.

MicroDAX 3000 software runs one standard 468 PC equipped with Minolta's MS1000 microfilm scanner to convert microfilm documents to TIFF images for the electronic PC desktop.

Molecular Machines

800 Fifth ave. #267
Seattle, WA   98104
USA

InGenius

Retail Price: 995.95
Contact: Inside sales
Phone: 800-294-1024   Fax:

Molecular Machines' InGenius brings genetics to the desktop.

Scientists,   physicians, genealogists, plant breeders and animal breeders build pedigrees, calculate relationships and determine genetics calculations.   Complex pedigrees are automatically arranged to reveal patterns of inheritance. Clicking on a pedigree icon selects individuals for detailed editing and sophisticated genetic calculations, including Beyesian risk analysis.   InGenius brings genetics to the desktop.InGenius operates stand-alone or as a database client.   Information can be shared via ODBC.   InGenius pedigrees can be embedded in reports, spreadsheets and other documents via OLE 2.0.

Resolution Resolver

    Retail Price: Call.
    Contact: Ken Johnson
    Phone: 216-523-5039   Fax: 216-523-2081

Database object broker: provides access to database object data and procedures from any OLE compliant application.

Resolver enables objects, which represent entities in a database, to be linked into OLE compliant applications allowing access to information and execution of procedures related to the objects.   For example, in a manufacturing setting, a Resolver object representing a piece of equipment could be linked into a CAD file or Word Processing document.   This would allow a user to access maintenance records, documentation and drawings, operating data, etc., by selecting the object in the drawing or document.   See Resolution Viewer product write-up.

Morrison Knudsen Corp.

MediaShop

Retail Price: $695.00
Contact: Deirdre Chang
Phone: (415) 541-9333   Fax: (415) 541-0555

MediaShop provides an open ultimedia production, integration, and authoring environment for developers who want to create interactive applications on windows.

The first in a new generation of multimedia production, integration, and authoring packages, Mediashop offers developers a complete set of tools as well as links to Visual Basic, the most popular Windows programming language, for advanced interactivity and media control.Motion Studio includes: Paint, designed especially for animations, provides 24-bit color, onion skinning, and anti-aliasing: Sound recording and editing: Motion Editor for cell and path-based animation: Point-and-click authoring to create simple interactivity and transitions to animations.Interactive Video and Picture Tools let developers create invisible \" hot spots \" that trigger specified events in still images and digitized video, such as Video for Windows.   Interactive Video lets developers specify the location of hot spots frame by frame.SoundText Linking lets authors link sound to text to reinforce visual learning with interactive audio feedback.   Limited hypertext capabilities include turning words into interactive buttons.Multimedia Visual Basic (VBX) custom controls allow tight two-way linking between the authoring environment and MediaShop's production tools.

SmartForlders

Retail Price: $149; $495 for 5 users; $795.00 for 10 users
Contact: Robert Thomson
Phone: 313-650-8716   Fax: 313-650-8960

Distributed object-oriented information manager supports information modeling and process automation using the fundamental concepts of Folders, Objects and Events.

SmartFolders bring the benefits of object-orientation and distributed computing into the realms of personal information management and group collaboration.   Using the fundamental concepts of Folder, Objects and Events, SmartFolders provide an innovative way to compose, organize and distribute collections of Objects (data) and Events (behavior) on those objects.   Folders can be organized in tree hierarchies that organize information by topic or classify information by \"type\" using inheritance.   Objects can be placed on Electronic forms or optionally a Page.   Events can be designed to perform rote tasks, either in the local user context or the context of another users \"published\" folders.

ImageWare Utilities

    Retail Price: please call
    Contact: John Meindl
    Phone: (301) 897-1400   Fax: (301) 897-1415

ImageWare Utilities is a utility product to clean-up, process, and enhance images.

ImageWare Utilities is an advanced image utility product.   ImageWare Utilities can be used as an image viewer, image enhancer, and a utility for adding imaging functionality to any OLE 2 aware application.   ImageWare Utilities cleans up poor quality color and black and white images in preparation for display, fax, print, and ORC functions.   Black and white images can be refined by removing unwanted lines, speckles, and \" noise\" from messy originals.   Inverse and shaded text can be converted to black on white; skewed pages can be aligned, and margins justified.   ImageWare Utilities also supports conversion of file and binary formats for additional product flexibility.

The Outcome Advisor (R)
    Retail Price: $995.00
    Contact: Al Fitz
    Phone: 513-244-6666   Fax: 513-244-6669

Unique system that allows you to structure research problems and apply statistical pattern recognition for decision making and outcome analysis.

Designed for those that have found neural net and rule based systems too limited for more complex applications. The Outcome Advisor (R) offers the following features: Processing of numerical and non-numerical data; up to 100 variables of 20,000 data points each; Learns from experimental measurements, published case studies, or any other source of reliable information; Ranks outcome probabilities of a single variable, or any combination of variables, when presented with a condition of your design; Any variable can be used to define an outcome; Computes ranked categories, a priori probabilities and likelihoods; Option to enter data directly or import files from spreadsheet or database; Organizes your subsystems into libraries for easy retrieval.

PC Quote

401 S. LaSalle Street
Chicago, IL   60605
USA

Real-time data server

Retail Price: Included with standard service.
Contact: Lou Morgan
Phone: 312-906-3801   Fax: 312-427-8607

Provides real-time financial data to container applications with a service provider object utilizing the uniform data transfer of OLE 2.0.

The service provider object provides real-time prices on over 200,000 financial instruments including stocks, options and futures.   A container application such as Excel 5.0 for Windows will be continuously updated in real-time.   Very high data transfer rates are expected.   The object will provide the interface between   the PC Quote 112K HyperFeed digital data feed and any Windows NT-based container apps.   The financial extensions to WOSA will be supported when available.

Thoughts for Windows
    Retail Price: $98.00
    Contact: Rick O'Brien
    Phone: 404-343-8201   Fax: 404-442-3156

Thoughts for Windows is a \"Voice Orgranizer\" program designed to work with the PCvoice Assist and Windows compatible sound cards.

Thoughts for Windows is two programs in one.   It is a sophisticated digital voice editing/conversion utility for use with digital voice recordings.   The Voice Editor includes familiar cut, copy and paste commands.   The Format Converter converts data to and from most standard PCM and ADPCM data formats.   Thoughts is also a Voice Organizer whose \"Thought Manager\" organizes digital recordings into \"Thought Groups\".   Thought Groups are user-defined sub-directories that allow the user to collect and organize thoughts together with related recordings. Thoughts is also an OLE server that creates digital voice objects which can be embedded into OLE client applications.

PowerBuilder is a uniquely powerful, easy-to-use, object oriented development environment for building industrial strength.
client/server applications for the Windows NT and Windows 3.x platforms.

PowerBuilder is a uniquely powerful, easy-to-use environment for building   industrial strength client/server applications for the Windows NT and Windows 3.x platforms.   It combines the most powerful aspects of traditional MIS tools and the best features of the PC-based world with a truly practical approach to object-oriented development.PowerBuilder's features include:·_Object Easy - Practical object orientation for application development·_SQL Smart - Tight integration to underlying database system·_Windows Rich - Extensive support for the Windows 3.1/3.0 environment·_MIS Friendly - More robust functionalityPowerBuilder is designed for corporate and government MIS software development projects.   It integrates a series of powerful technologies into a single, easy-to-learn and use development platform.   It provides an intuitive, highly graphical approach to programming that permits developers to create sophisticated applications with little programming knowledge.   PowerBuilder incorporates the characteristics of traditional mainframe development methods into a client/server architecture, in which graphic client applications integrate fully with high-performance, relational database servers in a transaction-processing environment.   Powersoft Corporation has initiated the Client/Server Open Development Environment(CODE) program.   CODE was established as a means to ensure vendor interoperability through adherence

SourceCraft
      Retail Price: $3,995 (USD)
      Contact: John Pyne
      Phone: 617-221-5665   Fax:

A powerful and easy to use fully-integrated object-oriented object-oriented application generator that is extendible and scalable, and which can can be tailored to rapidly prototype and create commercial quality applications serving specific company needs

SourceCraft (TM) is a full-featured integrated visual object-oriented application generator which provides an effective balance between power and simplicity.   It increases your productivity by eliminating tedious, cryptic development tasks associated with programming, supporting easy and rapid prototyping, interactive testing, and generation of final applications in C++ code.   Everything necessary for deploying applications is contained in one integrated environment.   SourceCraft (TM) is uniquely extendible, allowing full integration of libraries, components and interfaces which allow company, application or vertical market specific visual development at a higher and easier level.   Scaleable SourceCraft (TM) allows the addition of components by experienced developers, while configurable to allow less experienced developers to be productive quickly.

Symantec's Enterprise Developer-building client/server applications that support your dynamic business environment.

The only client/server application development environment architected from a database perspective, Symantec's Enterprise Developer actively utilizes a centralized business model in every stage of the application maintenance. Business rules are created and stored once in a central location and automatically enforced in applications and on database servers.   Its SCALE transaction processor automates and optimizes the complexity of client/server transaction processing.   Using a Programming by Exception model, Enterprise Developer lets you design complex applications in minutes.   Extend or override the default processing with your own custom logic, or use the open architecture to access external objects and programs.   Enterprise Developer also includes a report writer, business graphics and XDB-SQL local database engine.

SIGLAB

Retail Price: $199.00
Contact: Monica Murphy
Phone: 800-741-7440   Fax: 904-373-5182

SIGLAB is a comprehensive engineering environment for digital signal processing (DSP) research, design, and simulation.

SIGLAB is a design and simulation environment for solving DSP problems.   Generate test signals and system responses and display them in 2-D, 3-D and polar formats.   Simulate real-world conditions with noise and fixed-point analyses.   Over 140 math and system operations used in DSP are built-in SIGLAB functions.   Even create original algorithms and DSP operations which can be quickly synthesized, tested, saved, and reused.   With SIGLAB, you can be sure your design performs to your expectations before you implement it, saving you both time and money.

Object-Fax

Retail Price: $900.00
Contact: Magnus Bergsson
Phone: 212-714-1584   Fax: 212-714-1691

Object-Fax is a premium fax solution for all Windows and DOS-based LANs with outstanding ease of use, integration options and reliability.

Object-Fax is a network fax server for all Windows- and DOS-based networks that enables users to receive and send faxes from their workstations.   The product is a software-only solution that supports any CAS fax card or GammaLink card.   Users can send faxes from within any Windows or DOS application.   Object-Fax supports DDE, OLE 2.0, MAPI, VIM and offers a file API to fax-enable Windows or DOS programs.   Object-Fax utilizes OLE 2.0 to bring unparalleled ease of use to fax transmissions: just drag the document you want to send from its application and drop it onto the Object-Fax icon to send it.

    Contact: Anne Moriarty
    Phone: 310-649-5800   Fax: 310-649-6200

TeamTalk is a conferencing system that organizes information within public and private topics for discussions and decision making.

TeamTalk is a conferencing system that facilitates communication among group members.   It is a forum for discussions and decision making.   TeamTalk organizes information and documents by topic in a hierarchical structure.   Any member can easily create a new public or private topic and build the member list.   TeamTalk includes OLE 2.0 support, so members can include documents, spreadsheets, graphics, and audio and video files.   It includes a powerful search facility and printing of comments.   TeamTalk will run on any network that supports file sharing.   Because files and individual preferences are stored on the network, TeamTalk consumes no space on the individual workstations.

    Retail Price: $599.00
    Contact: Inside Sales
    Phone: 800-265-4555 or 519-886-3700   Fax: 519-747-4971

WATCOM C/C++32 is a professional 32-bit C and C++ compiler and tools package for application development with extended DOS,   Windows NT, Win32s, 32-bit Windows 3.x, OS/2 2.x, Novell NLMs and AutoCAD ADS/ADI.

WATCOM C/C++32 is a professional, high performance 32-bit C and C++ compiler and tools package for extended DOS, Windows NT, Win32s, 32-bit Windows 3.x, OS/2 2.x, Novell NLM and AutoCAD ADS/ADI.   The C++ compiler provides comprehensive support for the AT&T version 3.0 language including templates, plus exception handling.   New superscalar optimization strategy uses \"riscification\" and instruction scheduling to deliver improved performance on 486 and Pentium processors.   The compiler can create a single, high-performance executable that runs on 386, 486 and Pentium processors.   In a single package, C/C++32 supports a wide range of 32-bit Intel x86 host and target platforms allowing professional developers to leverage the cross development capabilities of today's operating environments including OS/2 2.x and Windows NT.   The toolset including optimizing C and C++ compilers, debugger, profiler, royalty free DOS extender with 32 MG VMM support, licensed components of the Microsoft Windows 3.1 SDK, OS/2 2.1 Toolkit and NetWare 4.0 SDK and much more.
