

## Crystal Reports Technical Document

**Subject:** User Defined Size in Print Setup  
**Date:** August 19, 1993  
**Versions:** all

**Situation:**

Some printers will allow the user to select **User Defined Size** when in Print Setup.

**Solution:**

The page size that will appear on the CRW screen is dependent on the settings in Control Panel - Printers.

Select your particular printer and Setup.

For Paper Size: specify User Defined Size

A dialog box will appear where you can specify the size and units you require.

When you return to CRW, run Select Printer again to see the updated size.
