

Size of display image

To the left of the scroll bar at the bottom of the document window is the [Document pop-up menu](#) for controlling the size of the displayed page and how the vertical [scroll bar](#) works. You can choose any of three viewing modes:

- [Document](#): scroll from one page to the next, through the entire document.
- [Single Page](#): scroll from top to bottom of the current page only. Use the [Page pop-up menu](#) or its arrows to change pages.
- [Thumbnail](#): scroll through the entire document; the image is reduced to 33%. More than one page is displayed at a time.
- See also [Magnifying glass](#), [Page to display](#), and [Selecting text](#).
