

Fuse should load all .tzx files without errors, but there seem to be some files that do not work, a list of the files that are known not to work at the moment are:

Athena - 48k.tzx

Athena - 128k.tzx

Freddy Hardest - Part 1.tzx

Freddy Hardest - Part 2.tzx

Freddy Hardest - Part 1 (Spanish).tzx

Freddy Hardest - Part 2 (Spanish).tzx

Match Day 2.tzx

Basil the Great Mouse Detective

Mask(?)

At least Athena - 48k.tzx is known to be a faulty tzx dump.

The +3 disk emulation used by Fuse does not support many protection schemes that were commonly used (e.g. Speedlock). Disks that have been found not to work so far are:

Batman - The Movie.dsk

Daley Thompson's Olympic Challenge.dsk

Buggy Boy.dsk

Batman The Caped Crusader.dsk

The New Zealand Story - Side A.dsk

The New Zealand Story - Side B.dsk

Robocop.dsk

HATE.dsk

Dan Dare III - The Escape.dsk

Please let me know of any more disks or tape files that refuse to load and we will try to make them work in a future release. In the mean time it may be worth trying to find a .z80 file of the program to use at the World of Spectrum site.
