

FAQ's for SD2.5

1. When installing SD2.5 over SD1 or an older version SGE, the old programming software will unistall automatically, during this a pop up box will appear asking if the user want to unregister saihook.dll, choose the YES option, the instalation will then continue.
2. During the installation of the programming software on Win 98, 98se and ME the program will ask for the user to place there Windows 9x CD in there CD Rom drive to install the file kbdhid.vxd, the Windows CD is not required and the file can be found in the c:\wnidows\system directory, so just browse to this location when asked.
