### **Exporting Encapsulated PostScript (.eps) files in PagePlus 4.01**

---

Please read the following information if you intend to use the PagePlus 4.0 **Export as Picture** feature to create Encapsulated PostScript (.eps) files.

PagePlus 4.01 requires the **Apple LaserWriter** printer driver to be installed in order to create .eps files, If you do not have this printer installed on your system then you should install it as follows: You will require your Windows 95 CD-ROM to do this.

- Select **Add Printer** in **Control Panel/Printers**.
- When asked to select the Manufacturer, choose **Apple** and the select **Apple LaserWriter** as the printer model. Select the default name: **Apple LaserWriter** when prompted.
- When asked what Port to use with this printer, select **LPT1: Printer Port**.

Once the printer has been installed, it's properties need to be altered, you should do this as follows:

- Open **Control Panel/Printers** and click with the right mouse button on the **Apple LaserWriter** printer.

- Select **Properties** from the pop-up menu, then click on the **Paper** tab. If you selected **U.S based** install when installing PagePlus 4.0 then ensure that the size is set to **Letter**, if you selected **European** based install then ensure that the size is set to **A4**.
- Click on the **Unprintable Area...** button and set all the values to **0**.
- Select the **PostScript** tab and set the **PostScript output format** to **Encapsulated PostScript (EPS)**.
- Close **Control Panel**, and restart PagePlus.
