

Using the PagePlus 4.0 Online Documentation

Welcome to the Serif PagePlus 4.0 online documentation, an electronic version of the PagePlus 4.0 documentation.

The online documentation uses **Adobe Acrobat™ Reader** to navigate the chapters of each manual and allows you to easily move from one section of a manual to another.

Using Adobe Acrobat™ Reader

In the online documentation startup screen, click on the name of the manual that you wish to read, the title page for that manual will be loaded into **Acrobat Reader**. In the title page for each manual, simply clicking on the name of the chapter that you wish to view will load the relevant chapter into **Acrobat Reader**. In the Table of Contents documents, clicking on the chapter titles will also move you to correct chapter.

To move between pages within a chapter, or to return to pages or chapters that you have viewed previously, use the navigation buttons:

There are several views, available in **Acrobat Reader**, to change between views, use the View menu **Acrobat Reader**, or the zoom icons (to the left of the navigation buttons). The **fit page** view will allow you to see the entire page on screen at one time.

For further information on using **Adobe Acrobat Reader**, please refer to the **Acrobat Reader**, Online Help system, which can be accessed from the Help menu in **Acrobat Reader**.

If you wish to print a particular chapter, select **File/Print** in **Acrobat Reader**

To return to the Online documentation startup screen, please click the return button below:
