

DLFONTS.PRN -- demonstration of currently available laser fonts
The heading lines are printed with the current default Font [1234567880]
The lines printed below show how your laser printer responds to the
standard DMPLAS translation of pitch control commands:

Pica => Courier 10cpi 12pts, Condensed => 16cpi 8pts

Elite => Courier 12cpi 10pts, Condensed => 16/8 compressed to 20cpi

Micron => Courier 16cpi 8pts expanded to 15 cpi

If the response is not to your liking you may want to DOWNLOAD the
soft font listed on the unattractive line -- see instructions in FONT.DOC.
