

## **Windows Utility Pak 3.0**

The Windows Utility Pak contains the following programs that make working with Windows 3.0 easier and more productive.

### **Project Manager**

The Project Manager enables you to build and maintain project files that tie a program and its document or data file together. Project files are easily created with the Windows Notepad.

When you start Windows you can have Project Manager load and run the programs you use most often with documents or data files attached. You are then ready to work without having to start a single program from within Windows.

### **FontView**

FontView allows you see at a glance what screen and printer fonts are currently available. You can quickly change a font's attribute to bold italic for example to examine its appearance before changing your document text. All fonts are displayed in true WYSIWYG (What You See Is What You Get) format.

### **DOS Free Memory**

This will allow you to check the amount of free memory available for running a Non Windows program. Written in assembler to be compatible with Windows 3.0 it offers a SAFE way to check for free memory. Remember NEVER run the DOS chkdisk program from Windows!

### **Memory Monitor**

Memory Monitor displays available free memory for your Windows Applications. It offers three different options. 1.) A bar graph displaying memory available in 25% increments. 2.) In a Window displaying total free memory, the largest block of contiguous free memory, and the current Windows operating mode. 3.) You also have the option of displaying both of the above at the same time.

### **Cut-It-Out**

Cut-it-Out is a special utility that allows you to mark and cut to the clipboard any portion of a Windows screen. This is an extremely useful tool for cutting graphics or text from one application to another,

The icons pictured above were marked with **Cut-it-Out** and then inserted into this document.

### **Save-It**

Save-It allows you to view and save as a Windows Bitmap anything that has been marked with Cut-It-Out. In addition, Save-It allows you to create a variety of special effects.

You can order the Windows Utility Pak 3.0 for \$29.95 by using the register.frm supplied with Monitor Saver 2.0.
