

Dear ~Title[0,2]~. ~LNAME[0,9]~:

This is a sample form letter for ~FNAME~. Note that the Title is only two characters and the LNAME is only 10 characters. Here is an untrimmed field, useful when a specific is expected #~LNAME[0]# notice I forgot the ending delimiter; Blackmail processed it o.k. Here is the same field trimmed #~LNAME[0,0]# or #~LNAME~#. You need to be careful with specifying subfields since Blackmail is very picky about these: e.g., ~LNAME[1 ,2]~ is no good because of the space, but ~LNAME[1,2] is just fine. Also, notice in this WP 5.0 file the delimiter BMAIL at the top, this is necessary to get WP 5.0 to work, since it has a lot of preceding information that cannot be repeated. It supports date fields ~DATE~, and numeric fields ~NUMBER~, and even memo fields: ~MEMO~.
