## About the Shareware Edition

The **WinOnLine™ Review™ Shareware Edition** is published weekly by **Windows OnLine™**. It is dedicated to bringing you news and reviews on the latest files available to members of **Windows OnLine™ (BBS)** and the general community of bulletin board users. Print publications just can't match the *immediacy* of this electronic media. **Each and every week** we bring you the *newest shareware and freeware* programs, and features, such as:

**Windows Shareware Briefs** - Quick and informative reviews of the **newest entries into the shareware and freeware market**. Are they good, bad or buggy? We'll give you useful details that will tell you if it's worth your download time!

**New Files** - Tasty extracts from the past week of files posted at **Windows OnLine™ (BBS)**. Now you will know about that **new graphics driver**, that **freeware update**, or discovered that neat **WAV** or new **FONT** file. All without sifting through files at several other on-line services, if they even have what you're looking for!

**Feature Reviews** - Hear about hands-on experiences with the inner workings of the some of the **newest shareware**, with full glorious and gory details of its ups and downs. Our experienced writers bring you perspective with their frank and honest reviews.

## The WinOnLine™ Review™ Shareware Edition *is shareware itself*

This useful and fascinating electronic magazine deserves your readership and shareware subscription. We hope you find this weekly publication of great value and interest and become a regular reader. If you do, please **register your readership** for a nominal fee. Those who register get a very special **BONUS**:

**A FREE SAMPLER MEMBERSHIP** to **Windows OnLine™ (BBS)**. See the registration options section for details.

We welcome you to the **WinOnLine™ Review™ Shareware Edition**. Your interest is

valued and we'd appreciate your comments and suggestions. Leave a comment (C) on **Windows OnLine™ (BBS)** at 1-510-736-8343 or write to,

## Welcome to the WinOnLine™ Review™ SHAREWARE EDITION

I'm fed up with The Boss! All I do around here is work-work-work and now I'm in the Wolly-house with him this week. He wants to make my pet thesaurus live out in the back yard. One lousy accident --- it left a dirty word on the rug and Frank stepped in it! Big deal. He says that extinct prehistoric animals don't belong in the house. Totally unreasonable!

Another week of hard work at **Windows OnLine™ (BBS)**! We're still moving files around and I'm really beat. The good news is that WOL members have 150 directories of well organized files to simplify their searches. The bad news is that my chiropractor won't take *WollyCharge*.

### U.S. Robotics 14.4 modems - as little as \$194.95

You thought I was kidding last week. The fax modems are already on back-order, but you can still get one of the best modems around at a new price point. See the section on modems for ordering information.

### Taking a DETOUR . . .

To clear up the confusion left last week, writer **Ed Hoffman** uploaded DETOUR.ZIP for Wolly to check out. It's an older (1991) freeware program for Windows that gives you choices where to detour your DOC and BMP files look for an association. I had complained in Issue #1 about DOC files that are actually TXT files in my Windows shareware programs, which makes me frown. If that makes you frown, too, download Detour and take a left at the next DOC.

### This Week in WOLRS

We have another great issue for you this week. Hope you enjoy it. If you haven't already made the call, please take a gander at the TEN TOP REASONS to register your readership of the **WinOnLine™ Review™ Shareware Edition**.

**Enjoy!**

## WIN SHRED

Shred your Windows trash can!

Seems like everybody who got a copy of Visual Basic created a trash can to drag and drop files for deletion. Some were simple, some had cute artwork, some were freeware and others demanded a \$20+ tribute. Here's a new twist to the type that can amuse you and **abuse your files as you deep six them.**

Win Shred can be a small, animated graphic or an icon sized **shredder** to which you drag your files to be deleted. If you have any sort of sound driver installed, a **wonderful WAV** of a shredder doing its dirty deed accompanies the action. Colonel Oliver North would love this one! Author Michael Haschka asks just **\$5.00** for **WSHD10.ZIP** (28K).

## FONT LINE

Bring a new slant to your writing

Font Line is a real neat **freeware** text tool that could come in handy for desktop publishing projects, headlines, posters and similar projects. It offers the ability to **rotate the text** and **adjust the size and spacing** of your font. It's simple to use: just enter your text, choose your font, style and size, then enter degree of angle, text width and spacing. Finally, click to copy your view to the clipboard. Now you can play with your text without buying Corel Draw. Our thanks to author Gordon D. Griffiths for **FNTLIN10.ZIP** (11K).

## DANCING BEAR

Screen Saver

This 83K SCR file is **freeware** written to be integrated into your standard **Windows 3.1** screen

saver system. The bear and his dancing action definitely have a **high CQ** (cute quotient) for those so inclined, and the animation is smooth. However, the artwork was not done well, with the bear's various body parts metamorphosing like each one was on a separate Weight Watchers program. Author Bob Feller deserves encouragement for his effort; he requests no remuneration for **DANCBEAR.ZIP** (19K). I hope he'll try again with some new artwork.

## WIN JPEG

*Fine adjustment for your graphics*

WinJPEG is a fine shareware **image viewer with image processing and conversion capabilities**. It will display JPEG, TARGA, GIF (GIF 87a) and BMP images. Then, go ahead and finesse that graphic by **adjusting color balance, hue, saturation, and brightness**, as well as enhancing the **contrast**. When you're happy with the result, export the image to JPEG, TARGA, GIF (GIF 87a), Windows BMP, or OS/2 BMP(8-bit or 24-bit). Additional features include the abilities of **image rotation, vertical/horizontal flip, and image resizing**. Unlike some similar programs, WinJPEG is easy to use and as a result, fun to play with.

Two versions of WinJPEG are available: one suitable only for a 386+, and the 286 version; of which the 286 is the **WINJPG.ZIP** (149K) shareware version. When you register, you get the latest 286 and 386 versions of WinJPEG, a manual, and a collection of JPEG images. Not a bad deal, and a nice program for **\$15 + \$3** shipping.

## MIND

*Play with my mind, but leave my mouse alone!*

Mind is a Windows version of the old **Master Mind** game. A series of colored pegs are hidden from your view. You try and guess their identity and position through feedback clues following your guesses. *At least this is what I expected it would be*. Mind disabled my mouse and messed up my keyboard every time I tried to run it. On a second, completely different machine it made the mouse pointer invisible. Wolly was not amused. Perhaps you'll have better luck with **MIND101.ZIP** (22K). I saw the board but never got to play.

## WIN STORM

*Well, blow me down!*

Win Storm is pretty sharp and pretty to watch. Probably wasn't too much fun to be in the midst of the original event, however. It's a **hurricane tracking program** with a database of ten famous storms you can recreate on screen. Various options track the progress of each storm and give some technical weather stuff for the budding meteorologists in the crowd. Data may be added to the database to **track a storm in progress**. Registration of **WINSTORM.ZIP** (123K) for **\$20.00** brings a disk with additional storms for whatever educational purposes or sadistic pleasures you desire.

## TRUE TYPE FONTS

This weeks entries, including retreads

The following True Type fonts appeared on WOL this week. File names of a couple are a bit cryptic; perhaps you already have them under another name:

*Manuscript*

MANUSCRL.ZIP (50K)

CARTO.ZIP (30K Carta Map Symbols)

*Marriage*

MARIA.ZIP (53K)

*Ariston*

ARISFON.ZIP (50K)

## OUIJA FOR WINDOWS

News from beyond for the 800x600x256 and above

Ouija is the mystic board of letters to **communicate with the "other side."** I remember Grandma's old board, where two or more individuals would make minimal contact with a planchette (sliding piece) which was supposedly influenced "from beyond" to bring a message to the living. Now, you too can shatter another time honored tradition and contact that long-dead relation, electronically, with Ouija for Windows. Think of it as a spiritual cellular phone.

This version **requires a minimum 800x600 resolution at 256 colors**, so you better have some video moxie --- it apparently takes more than just one kind of power to contact the dead. **OUIJAWIN.ZIP** (233K) displays a detailed board and scroll image on which the letters and resulting message are displayed. Perhaps the author may have a dead friend contact you if you don't ante up the **\$5.00** registration. My only concern --- will somebody who died over twenty years ago know how to handle a mouse?

## DISK FACTORY

De-sweating the Sweatshop

Disk duplication is one of the more mundane tasks known to exist. The Disk Factory eases one problem that Windows 3.1 allegedly addresses (not!). Multi-tasking. It uses what it calls **Coactive Technology** to allow your copy and verification operations to go on in the background while not seizing control of all your CPU's attention. As I performed certain tasks in another window I could hear Disk Factory cease writing or reading, allowing me use of the machine without interruption. If your attention is required, an unobtrusive traveling box appears to alert you.

The system is well designed, attractive, and very simple to use. Several options are available, as well as other functions such as **disk compares and background formatting**. Image copying to your hard drive also simplifies multiple duplication. **DISKFAC.ZIP** (90K) provides a disk in return for your \$29.95 registration.

*Wolly's Winner of the Week*

## FONT MONSTER Version 2.0

More Monstrously Munificent than Version 1

**So much more has been added** to the original Font Monster to perhaps justify a new name to differentiate it from Version 1.0. Functions within the program add a **whole new dimension of usefulness**.

Font Monster Version 2.0 addresses one of the problems with mega-collections of fonts. It has capabilities to **install and deinstall defined groups of fonts**, so you need not lug around all that font overhead every time you run Windows. A second bonus feature is the ability to **view fonts prior to installing them**. There are a lot of garbage or duplicate fonts floating around, and Font Monster allows their preview, avoiding the necessity of deinstalling or bumping into a font

that already exists in your collection.

The interface is a series of buttons, my only minor criticism of the program. It's not particularly friendly, but the on-line help file certainly is thorough enough to get you through all the functions. Registration for **FMONSTER.ZIP** (112K) is still only a crisp \$20 bill to the author in Taiwan.

## ONE ARC

Convert archive types with drag & drop convenience

OneArc is a **freeware** utility that converts an archive from one type to another. The compression utilities (pkzip, arj, zoo, etc.) are required; OneArc does not provide any actual compression/decompression but simply executes the appropriate native utility. TOOLHELP.DLL is also needed to run One Arc, and should already be in your Windows subdirectory. The **drag and drop feature** can be used with OneArc. Simply set up the conversion options, select the archives to be converted (in the File Manager), and drag them over to OneArc. It will immediately start processing them. Download **ONARC102.ZIP** (147K) for an audition if you need one-stop unarchiving.

## WIN PROOF

Proof your grammar

Win Proof is a **stand-alone grammar checker**. It will interactively check a document for violations of many of the rules about which your English teacher might hound you. Once you direct Win Proof to the file you want examined, it scans each sentence and points out problems in syntax and construction. Two pages of check-offs to include/exclude for checking are provided. Wolly didn't bother try it on his writing 'cause he knows his English are perfect.

This is a very impressive program. While not as quick as internal grammar checkers provided with programs such as Ami Pro or WinWord, it certainly does a nice job of cleaning up your verbiage. It did very well on a WRI file, picking up errors in sentence construction and many more obscure errors which might escape the careful proofreader. However, you'll still have to find an external spellchecker if you want perfection. **WINPROOF.ZIP** (366K) is yours for a \$45.00 registration fee.

## *Wolly's Shareware Frowns:*

Wolly really gets bugged when some yahoo uploads a file and the description is  
**TTARCH.ZIP 52905 03-19-93\* TRUE-TYPE FONT**  
or a similar intelligent description. Great. *WHICH True Type font?* How about a name and some  
sort of description? I also really like  
**TROBOX12.ZIP 157422 03-18-93\* Try this!!! Really neat game**  
for a detailed explanation of what I'm spending my 157K bytes of download time and phone  
charges for.

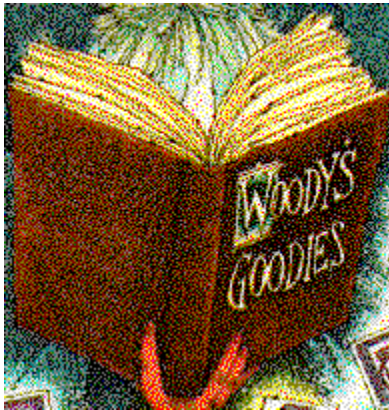

Please take the time to think of and then type out a brief but helpful and intelligent  
description of your uploads. Would you want to take a chance on a download of the two files  
above? ALSO, please make sure the file name is the same as what you originally downloaded so  
to eliminate dupes. Thanks!

## **Hacker's Guide™ to Word for Windows™**

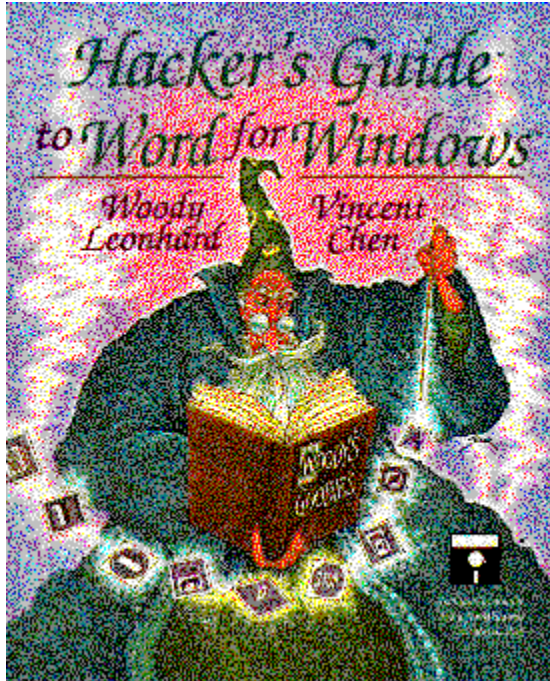

Several months ago, as I was making my first tentative steps toward converting my word processing to Word for Windows, I stumbled on to a unique shareware program called W.O.P.R. (that's pronounced *Whopper*, that's right, just like the burger) written by Woody Leonhard. After loading and exploring the program I found it contained a bunch of useful utilities and several improvements over the basic Word for Windows functions. I was impressed.

Then, a few weeks back, I found that Mr. Leonhard's creativity had surfaced again. This time he has collaborated with Vincent Chen to produce the *Hacker's Guide™ To Word For Windows™*. As you might guess, I got a copy of the book, and once again, I'm impressed. While the book may never compete on the New York Times' Best Seller List, it is definitely a volume I'll read often and keep right beside my computer.

So many other computer books available today are merely rewrites of the program manual, or worse yet, rewrites of each other. This text, however, breaks new ground and actually covers little of the existing material covered in other books. Rather, Leonhard and Chen explore and define areas of Word for Windows that really matter to a user. Instead of spending countless pages on unnecessarily teaching the reader about the delights of Windows, this text gets right to work by discussing the important aspects of Word for Windows. Not only do they tell you what Word for Windows can do, they explain how **YOU** can do it. If this text isn't

required reading at Microsoft right now, it sure should be.

The **Hacker's Guide** is divided into five general sections: Concepts, Cabbages, and Kings, A Tinker's Tasket of Tips, Word Basic Overview, Word Basic Reference, and Fields, Bookmarks, INI. Each of these sections takes you through the maze of commands, processes, and procedures that surround all Word for Windows activities. As you read through the various sections, the authors act as your tour guide to Word for Windows. They point out all the interesting and intriguing parts of the program and even show you where the skeletons are buried. Ever mindful that, though they have been this way many times, you may be on your first trip. The tone of the text is upbeat and occasionally even irreverent but thoroughly enjoyable.

The heart of the book is the *Word Basic Overview* Section. This section is composed of over 500 pages which list and completely explain the Word Basic commands. But this section is not limited to simply listing the commands and definitions. Instead, the authors show you how each of these commands functions, what to look for, and more importantly, what to look out for when using each. This overview is sprinkled with suggestions, comments, and complaints all directed at having you learn and understand how Word Basic operates. Even the nasty little, and not so little, bugs and problems inherent in Word for Windows are pointed out so you can avoid them.

Many times, when reading similar types of books, I'm often somewhat intimidated or overwhelmed by my lack of understanding of what is being explained. But, with this text, I had the distinct feeling I was right there with the authors as they wrote the text. They show you the problems and frustrations they encountered when the macros and routines failed to work as intended. They also show how each problem was solved. The reader is part of the process not just an observer. By these examples the text encourages the reader to try out some of the routines and inspires confidence that you, too, can do much more in Word for Windows.

Included with the text is a 5.25" high-density disk full of shareware. The program W.O.P.R. , mentioned earlier, as well as Fileware, Hacker's Library, and several other unique and essential Word for Windows programs are included. If there is a single book that rates the title of *indispensable*, the ***Hacker's Guide™ To Word For Windows™*** is definitely that book. Without a doubt, the investment you make in this book will be returned a hundred fold in the time you'll save and frustration you'll avoid when working with Word for Windows. Members of Windows OnLine can find ***W.O.P.R.*** as WOPRA.ZIP and WOPRB.ZIP in Directory #18 - (Editors-Word Processing) and ***Fileware*** as FW21.ZIP in Directory #150 - (Windows-New Uploads) .

## Fine Print

Please read these details of what you get for Registering your Readership to the WinOnLine Review, Shareware Edition. We want to be completely clear on your rights to read the magazine and the details of the bonus Sampler Membership to Windows OnLine™ (BBS):

+ Your Registration entitles you to read up to 52 issues, (past and future), of the WinOnLine Review Shareware Edition. The publisher reserves the right to change publication schedules and/or modify the magazine without notice.

+ The magazine will be available for download from Windows OnLine™ (BBS) from a free file area; it may also be available from a local BBS or other service to which you are a member. Your shareware registration **does not include delivery of the magazine in the form of any media**, nor does it assure its continuing availability from any source other than Windows OnLine™ (BBS).

+ Your Bonus Sampler Membership to Windows OnLine™ is for a term of fifteen days or 500 minutes of on-line time, whichever comes first. You are entitled, during that period, to download up to five (5) megabytes of files. Files which are designated as "free", such as filelists, WinOnLine™ Review™ publications, certain utilities, etc., do not count towards your five megabyte allowance.

**If you register on-line**, the fifteen day period of your Sampler Membership begins immediately.

**If you register by mail**, please allow up to ten days for processing (foreign members allow for mail delays). Your Sampler Membership time will begin the first time you successfully log-on with your specified name and password.

## About Memberships

### Windows OnLine™ Interactive Database Services

*What does Windows OnLine™ offer it's membership?*

#### 1. FILES!

We have been told that we have one of the most extensive Windows file databases anywhere in the world. Because we are so discriminating, we supply you with some of the best and latest DOS, OS/2 files!

You won't find a lot of "junk" files on WOL. As our regular members know, we pride ourselves on having better file descriptions and, once our files are out of the recent uploads directory, unlike other bbs's, all of OUR file dates are CORRECT!

We have many features at WOL to make your Windows, DOS, OS/2 and other file collecting both fast and easy. We remove dupes and older files as fast as we can find them.

**WE** supply almost all files you see here. Therefore, you can be sure that you will see many new files every day, that is our pledge to our membership.

Is there more? ... you bet! But, We'll let you discover some of our innovations for yourself.

#### 2. Network (Message) System

Receive support from within our own local message conferences, or access the world! Windows OnLine is your doorway to four international mail networks:

**ILINK - RIME - SMARTNET - INTELEC**

Explore over 650 separate Conferences that contain over 200,000 current messages on topics you're interested in .We have Windows Local, Windows Tips, and hundreds of internationally echoed conferences like Windows, Multitasking, DOS Tips, Languages, Tech Support, Microsoft Support and much more.

#### 3. Doors

These external programs allow you to save your extra time for your next visit. Mail doors help manage your off-line mail and capture the our New Files listings, all automatically. We even have a Voting Door so you can express your views on the burning issues of the day, for fun and information.

#### 4. WinOnLine™ REVIEW™ Magazines:

Read our NEW WinOnLine™ Review™ Shareware Edition

We offer TWO Windows Magazines. Past issues of the WOL NEWS, WOL *Weekly* and the WinOnLine™ REVIEW™ and NOW the Weekly Shareware Edition. All issues are downloadable from directory #100, and are FREE to Members.

#### 5. Bulletins

We use bulletins to keep you informed of important information and discuss subjects that you want to know more about. They are posted as a valuable reference.

## **Details**

All memberships with file privileges have their time given in eight hour blocks. That is, with each call you will start with 480 minutes. Time is given this way until you run out of minutes. We feel that this will be a great benefit to all callers who wish to call WOL once in awhile and download like crazy, such as on weekends. This eliminates any real need for saving your excess time. Your account is only charged for what you use.

Membership fees are non-refundable - memberships can not be upgraded or downgraded. You may purchase and use more than one membership at a time. Your

Membership expires when any one of your limits are reached. You can renew your membership at any time and your new membership will start when your old membership expires.

Windows OnLine™ reserves the right to deny membership or give a prorated refund to any existing member, at its option, for any reason.

## **PURCHASE YOUR MEMBERSHIP NOW!**

CALL **Windows OnLine™** (1-510-736-8343). Enter our "Member" Services, from our

main menu, at any time, to become an INSTANT MEMBER. Use your VISA, MasterCard or American Express card to become a Member right now use the command "MEMBER" from our main menu.

Member Services will also allow you to order a membership and mail a check.

Payments should be mailed to:
