PART EXECUTION

EXAMINATION

Prior to beginning installation of vinyl siding products, examine substrate conditions. Verify governing dimensions and acceptability of substrate. Do not proceed with installation until unsatisfactory conditions have been corrected.

INSTALLATION

Install vinyl siding products in strict accordance with manufacturer's instructions.

Install Symmetry siding using pre-manufactured clip system approved by siding manufacturer.

Attach products securely to substrate for weathertight installation, with all joints true and plumb.

ADJUSTING AND CLEANING

Clean any dirt from surface of installed products, using mild soap and water.

Upon completion of installation, remove from project site excess materials and debris caused by vinyl siding installation.
