 Junk

Junk helps manage junk mail and to limit the junk mail that appears in your **Inbox**.   When you click **Junk**, the selected mail message is sent to the **Junk Mail** folder and the sender's name is added to your list of **Blocked Senders**.   Future mailings from names on the **Blocked Senders** list are automatically diverted to the **Junk Mail** folder.   Select **Edit Blocked Senders** on the MailBox menu to edit the names on this list.
