

## Custom Phone Numbers

The **Custom** button is an advanced feature intended for experienced users. If you have been given a **Custom** access phone number by an EarthLink representative, enter the city, area code, and phone number, then click **OK** to add this number to the phone list.

NOTE: Please be aware that EarthLink is not responsible for any long distance charges that you incur at any time, and we cannot guarantee that any phone number is a local one for you. We do our best to ensure that there are local access numbers in your area, but you should contact your phone company to verify that the number you use will be a local, free phone call.
