Eudora Pro™   Product Description – Consumer

The world's most powerful e-mail software

E-mail is the number one use of the Internet, and Eudora Pro software is the number one Internet e-mail program. Eudora Pro software is simple enough for first-timers, reliable enough for businesses, and powerful enough for the most savvy users.

Designed to the same specifications as the Internet itself, Eudora Pro e-mail is always delivered correctly and attached files (which can be spreadsheets, sound bites, video clips, or other data files) reach their destinations intact.

Advanced e-mail management tools

Eudora Pro software is today's only e-mail management tool that actually helps you be more productive and save time-whether you receive five or 500 messages a day.

As you receive new messages, Eudora Pro software can automatically transfer them into the mailboxes, folders, and sub-folders where they belong. Easily automate responses to your most common requests and automatically forward your mail without lifting a finger. And let Eudora Pro software help you stay on top of things by warning you or other applications with sounds and alerts when an important message arrives.

The number one Internet e-mail

More than 18 million people worldwide use Eudora software. Good advice spreads fast on the Internet, maybe that's why it's grown so quickly from the pioneer to the leader in Internet e-mail. And with its continuous innovations, Eudora Pro software will remain a leader into the future.

EUDORA PRO MAIL FEATURES

Enhanced Mail Management
- **Mail management filters** help you save time and stay organized. Filters automatically identify and file your mail. Eudora pro software sorts messages into mailboxes, automatically forwards e-mail to other locations or persons, sends automated replies, alerts you when important messages arrive, and more.
- **Multiple e-mail accounts** feature allows you to send and receive mail from different Internet e-mail accounts, so you can perform all of your correspondence at once (Windows clients only).
- **Dockable mailbox window** lets you display mailboxes and folders for easy access and management (Macintosh, Windows 95 and NT clients only).
- **Multiple Signatures** let you personalize messages automatically.
- **Customizable Address Book** stores information such as e-mail and street addresses, and phone and fax numbers. Address e-mail at the touch of a button.
- **Enhanced Find** searches for text within messages or their summaries to locate the messages you need in seconds.
- **Automatic sorting** lets you automatically sort incoming and outgoing messages using several criteria.

- **Customizable   user   interface** lets you adjust the toolbar to match the way you work. The intuitive design helps novices get started fast. Add, delete, and move around toolbar buttons (Macintosh, Windows 95 and NT clients only).
- **Drag   and   Drop   Capabilities** allow you to easily manipulate mailboxes, messages, attachments, and text.
- **Stationery   for   automatic   responses** lets you create templates for outgoing messages and use them in automatic responses.

Designed   for   the   Internet
- **Multiple   format   attachments**. Eudora's native Internet standards design lets you exchange secure, hassle-free messages and attachments. Attach multiple documents, including graphics, sound bites, video clips, spreadsheets, or any data file.
- **Hot   links   to   the   Internet** can be included in your messages. Double click on embedded addresses that transfer you automatically to the Internet, let you download data, create new e-mail messages, or access other Internet resources including web pages.
- **Easier   Mail   Server   Interaction** simplifies control of mail transfers and storage. Limit the size of messages to be automatically downloaded and specify the amount of time you want deleted messages to remain on the server.
- **Mobile   connectivity** lets you send and receive e-mail from hotels, airports, or wherever life takes you using regular phone lines (dial up, SLIP, or PPP connections).
- **Take   advantage   of   low   phone   rates** with time-delayed messaging options.
- **Read   and   compose   mail   off-line** and save on Internet access fees.

Multiple   Formatting   Tools
- **Stylized   text   capabilities** let you format your messages with bold or colored fonts, or cut-and-paste formatted text right from your word processor. Use various fonts, colors, sizes, and more (Macintosh, Windows 95 and NT clients only)
- **Built-in   spelling   checker** helps you make a good impression.

Prepared   for   growth
- **Plug-ins** let you add even more features as they become available from third-party vendors. The new Extended Messaging Services Applications Programming Interface (EMSAPI) allows other applications to plug into Eudora Pro software, so you will be able to use e-mail to do things you had never imagined before, such as foreign language translation, data security services and more.

Technical   Help   and   Information
- **Free   phone   support** for 90 days after your first call provides live technical help.
- **On-line   Help   and   acclaimed   user's   manual** give you immediate answers.
