I Make Poole, Inc. proudly presents...

=MooDoo=

Script Manager Pro

Version 4.9

For mIRC 4.72

Files

The zipfile MNGRP49.ZIP should contain the following files:

```
manager.ini       pkunzip.exe         manager.doc
mirc.ini          dos.exe
database.ini      script.moo
database.doo      titlebar.moo
mirc.doo          help.txt
```

=MooDoo= Script Manager

=MooDoo= Script Manager is an mIRC 4.72 script. The script enables you to easily keep track of all your other mIRC scripts. If you are a script fanatic, you may find that Script Manager helps out a lot. You will no longer need to change INIs every time. You will also be able to get rid of separate mIRC executables. =MooDoo= Script Manager has been fully re-designed to have a more comfortable and efficient interface.

Updates

=MooDoo= Script Manager Pro 4.9

The production of this version of =MooDoo= Script Manager has taken very much effort, time, and revision.

The following is the list of things new or improved in this version.

- Re-designed all alias structure to be more efficient.
- Changed About.
- Added Thanks To.
- Added credits on quit and about.
- Re-designed popups.
- Added help file.
- Added User Information set/insert/auto-insert.
- Added the Seamless fetch.
- Revised script database to be compatible with seamless fetch.
- Added Stats.
- Adapted Function Keys to seamless fetch.

Installation

There are several installation options:

(A) Unzip the whole contents of mngr39.zip into your mirc directory, overwriting any files. Then run mIRC.

(B) Create a separate directory or subdirectory. Copy mirc32.exe into this directory. Unzip mngr39.zip into it. Then run mIRC. (**Recommended**)

PLEASE READ HELP.TXT FOR COMMANDS AND HELP!

Information and Disclaimer

=MooDoo= Script Manager **Pro** 4.9 written and beta-tested by **Poole** (Jake Brukhman).

Please send comments, questions, and bugs to **brukh3@superlink.net**. I will be happy to advise you on any trouble you have.

IF YOU HAVE ANY GREAT SCRIPT IDEAS, PLEASE E-MAIL.

Notes

=MooDoo= Script Manager Pro 4.9, released 1/16/97, fully innovated to fit mIRC 4.72 technology.

OK. So I promised version 4.3, and it never came. How so typical of me: I constantly change my mind. The moral is that you never listen to what is written here.

In some coming versions, I might do something with '=MooDoo= Plug-ins' and DDE with Netscape/Word or something. Haven't thought of it yet.

Again, in the near future, I might extend =MooDoo= Script Manager to be a Windows program. I do not know when this will be, or if it will ever happen.

I WOULD LIKE TO HEAR SOME OF YOUR OUTPUT!

Please visit the =MooDoo= Homepage for most up-to-date information.
