Plug InZ© version 0.6 Blast! This version I worked on hard, if you had version 0.5, you will notice a very big change! Well, the changes I made were slighty different and now they work! You dont have to hassle with all the directorys anymore either! I orgranized this a lot, took out some junk, and somehow kind of re did version 0.5, but I call this 0.6. Please notice these scripts are not the same! I would feel very bad if you said that because I worked as hard as I could on these to make them the best for us all. I would like to thank some people as well for the help and support I needed.

I would first of all thanks Rexsley from DALnet on #helpcastle. And thanks to Betterhalf, Sculpty, Deckyon, KCJ, and SunnyCruz! They are mostly found on DALnet in #helpcastle. I thank them so much because I've known them for about a year some of them and they were such a help and they tought me everything I needed to know.

For further mIRC help, commands, downloads, or files Please go to http://www.mirc.co.uk on your Internet web browser.

commands for Plug InZ v0.6 Blast
/kw Cool text
/rw Cool text #2
/rb Cool text #3
/clone detects clones

There are a lot more but they are obviosly easy to use from popups. If you have any Comments, Questions, Suggestions, or Concerns Please immedietly email me at JB12@hotmail.com
