Tìkí $ü®p®ï$ë v2.7

Ok here I go.
Unzip it in to Dir c:\Tiki
Click on File in Program Manager. Click on new. Click on new item.
Put in the command line the location of your MIRC.exe File.like this c:\tiki\mirc.exe.
Then Put this after it c:\tiki\mirc.ini. so in the command line it reads this all together:
c:\tiki\mirc.exe c:\tiki\mirc.ini
OR...
Load the Aliases and Push F2.
That Should Be It.
You Might have to change some things in the events. but i am tryin to fix it!

You might have to change the path in the main window popups files under group
Tìkí $ü®p®ï$ë to the path of your write or notepad!
