Hi,

This is Jack and I've got another great batch of CDROM's for you. The CICA for Windows disc now speaks six languages (pg 4). We've got a goofy new animation disc by "Dr. Chip" (pg 19). Walnut Creek CDROM is now the publisher of Slackware Linux (pg 29). There's much more! As almost everyone is happy with their CDROM's from us it's easy for me to ***unconditionally*** guarantee them.

-jack

Remember, the Best of Walnut Creek CDROM, the 'Sampler', is **free** if you mention it in your order!

Authors Wanted!

Looking for a publisher for your CDROM title? If you'd like to work with us send me email at discdev@cdrom.com.

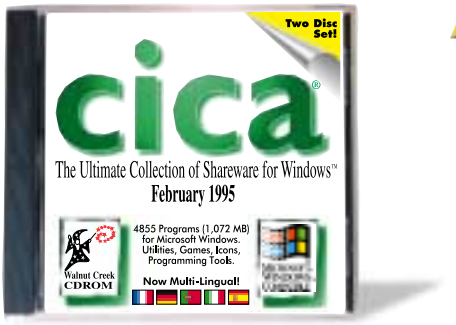
CICA® for Windows™



"A real winner...top-of-the-line shareware struts its stuff in an impressive display of elegance and sophistication."
– David A. Wade, ***CD-ROM Today***

CICA for Windows contains a copy of the Center for Innovative Computer Applications (i.e. CICA). CICA is the Internet's largest MS Windows ftp site, with 1072 MB of MS Windows programs. CICA for Windows' friendly shell makes accessing these files easy.

With the CICA disc you get hundreds of utilities, including shells, disk utilities, mouse and keyboard utilities, screen savers, backup/restore programs, performance monitors, diagnostics and data conversion programs.

The CICA disc contains drivers for a large variety of printers and video monitors. You also receive demos for many commercial programs.

TWO DISC SET

There's plenty of fun stuff on the CICA disc. You'll find 200 games like: asteroids, checkers, chess, word and card games. Liven up your writing with Postscript, ATM, and TrueType fonts. CICA includes thousands of icons and dozens of bitmaps to personalize your desktop.

When programming, you'll find the programming tools on the CICA disc vital. There are programming tools for C, C++, Toolbook, Turbo Pascal, and Visual Basic. Many programs include their source code.

CICA is now Multilingual! In addition to English you'll find descriptions and guidance in five other languages: French, Portugese, Spanish, Italian, and German.

Shareware progress is rapid so we update this disc **quarterly.** You can be sure to receive the freshest quality shareware with our **subscription** plan. Start your subscription today!

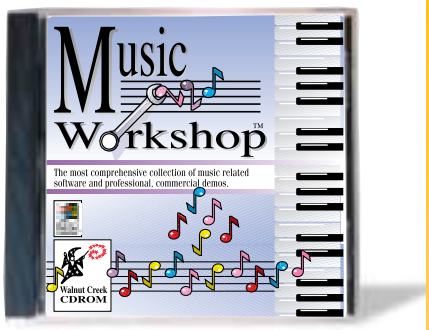
Music Workshop™



Love Music? Then you'll love Music Workshop. If you're a beginner, Music Workshop will help bring music to your computer. If you are a professional, you'll feel equally at home because a fellow musician produced this disc.

With 450 ready-to-run megabytes of music related programs and professional demos, Music Workshop is an incredible music resource for everyone. The disc features a custom interactive interface that's a delight to use. Simply point and click to enjoy the programs.

Music Workshop includes:

- Demos - A comprehensive collection of professional commercial demos from the world's leading music and MIDI software publishers
- Players - Players to play WAV, MID, and MOD files. Dozens of players to turn your CDROM drive into a music CD player
- MIDI Applications - Heaps of useful MIDI applications including: sequencers, mappers, MIDI setup utilities, and keyboard librarians
- Miscellaneous - Various music files including teaching tools for children, label makers for your tape and CDROM collections, chord databases for guitarists, and more
- Utilities - Programs to add music to your desktop, musical clocks, editors, and more
- Converters - Programs to convert between WAV, VOC, MOD, etc

Music Workshop's easy-to-use interface is a simple matter of point and click to run the programs you want.

- Drivers - Drivers for many popular sound cards
- WAV's - Hundreds of WAV files to spruce up your environment
- MIDI's - Tons of MIDI files to study or listen to

QRZ! Ham Radio

"I'm impressed with how fast look-ups are ... and since you can run the call look-ups from the CDROM, it won't take up any hard disk space."

- Bill Blinn, N8POV, *CCRA* ***Radiogram***, March 1994.

The QRZ! Ham Radio CDROM, volume four, contains the most up-to-date US FCC amateur radio license data with over 643,000 names, addresses and callsigns.

"Much effort and thought has gone into the excellent menu-driven interface"

– Que's 1995 CD-ROM Buying Guide

New in this edition are over 115,000 international callsigns from the UK, Italy and Canada. With over 750,000 callsigns, easy-to-use MS Windows, DOS and OS/2 search programs, and a huge collection of amateur radio software, it's no wonder that QRZ! is the most popular ham radio CDROM sold today.

You can search and display by callsign, name, city, street address, or zip code. You may then save the results to a file or generate ready-to-print mailing labels.

QRZ! Volume four also includes powerful new QRZ-II MS Windows compatible search and retrieval software. The new search software has many new features and enhancements over previous editions.

You also get:

- Hundreds of PC compatible amateur radio programs
- Radio Mods (in hypertext MS Windows Help format)
- TCP/IP software, Packet Radio BBSs, satellite tracking programs
- Morse Code training software
- Contest logging software
- USENET Ham Radio News archives
- SoundBlaster Compatible WAV files for TNC Testing
- New Windows Visual Basic and C++ compatible DLL library.

2000 True Type Fonts

This CDROM gives you 2000 True Type Fonts and **5000 clip art images** in PCX format. Along with the fonts and clipart, you get a collection of font manipulation shareware and graphics utilities. Includes a book with each font pictured.

To find a font by name, you may search an index on the CDROM. The program that allows online searching will also copy the fonts to your hard disk, if you wish. You'll see each font on the CDROM printed in the book, so you'll know exactly how the fonts will look in your document. The book also has a section that explains how to use and install your new fonts in MS Windows.

Along with all the fonts, you also get 5000 Black and White PCX clip art images. A handy viewer makes it easy to find the image you want!

Welcome to Africa

"A lively journey through African life."
–Steve Greenlee,
Computer Game Review

Welcome to Africa invites you to discover the Africa I know and cherish. With the help of over 450 original pictures, it introduces you to all aspects of life on the continent: from history to economics, cities to farms, beautiful wildlife and vanishing lifestyles.

I developed this presentation at Stanford to teach a course on economic development in Africa. To help you find your way around, I have organized the pictures by theme. You may wish to follow each theme, clicking along at your own pace. Alternatively, you may cut across themes and look for a specific topic or place from a list of 200 keywords. Welcome to Africa includes a sophisticated role-playing game. You will become Yamoussou Ouedraogo. Yamoussou is an African who lives on a farm in one of the thousands of villages scattered across the continent. You have a family to take care of. Success is judged by your ability to help your children and friends.

–Marcel Fafchamps, Assistant Professor, Stanford University

Sentimental Wings

This exciting MS Windows compatible disc looks at the aircraft that helped set the pace of the future. It contains a text and image viewer with dramatic, full color 24-bit digital images, aircraft performance data, and hefty amounts of historical fact.

You'll see such classics as: the P-51 Mustang, P-40 Warhawk, the F-1xx series (including the F-100, the F-101, and the F-102), plus the once-secret SR-71 Blackbird, U-2 Spyplanes, B-52's, the B-58 Hustler, and many others.

All 250 images come in GIF, TIFF, JPEG and BMP formats for multi-system compatibility. MSDOS image viewers are also included. These photos are not royalty-free.

The Beer Homebrewing Guide

The Beer Homebrewing Guide is a complete reference and tutorial on brewing beer at home. Whether your favorite is a golden lager, an oatmeal stout, or a hefe-weizen, the Beer Homebrewing Guide will show you how to brew it, step-by-step from start to finish.

We include instructions on how to select the right ingredients and tools, as well as the proper techniques and recipes to produce fine quality beers.

You get a collection of beer recipes in an indexed, hypertext format –giving you instant point and click reference to your favorite style.

An archive of the Internet beer discussion news groups gives you access to the experiences of hundreds of amateur brewers. Whether you're an experienced home brewer or just starting, you'll love this CDROM.

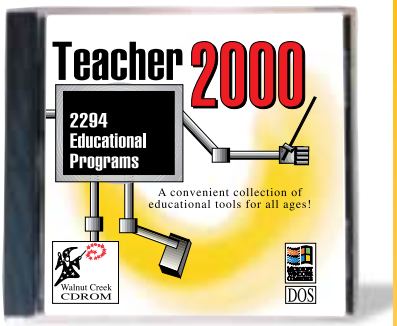
Teacher 2000



The Teacher 2000 CDROM is crammed full of educational programs. Everyone from toddlers to teachers will love the 2,294 educational applications on this disc.

Includes:

- For toddlers: alphabet and talking tutors, plus fun programs to familiarize your younger children with using a computer
- For kids: computer and typing tutorials, word processors, introductions to programming, drawing programs; tutors for math, reading, and spelling
- For college-bound students: study aids, grade point average calculators, SAT study-help programs, and advice on selecting a college
- For teachers: programs to create, print, and administer quizzes; programs to keep track of student names, grades, and test scores
- For sports fans and atheletes: programs on football, baseball, basketball, bowling, racing, fishing, and golf; software to log workouts
- For science students: programs on astronomy, biology, chemistry, engineering, electronics, physics, math, and more
- For religious study: programs for bible study and torah study

Rounding off this collection are hundreds of other programs on geography, history, culture, health, nature, and music. Plus there are nine foreign language tutors, electronic texts of novels and poetry, and programs to improve your writing skills.

There's something here for everyone!

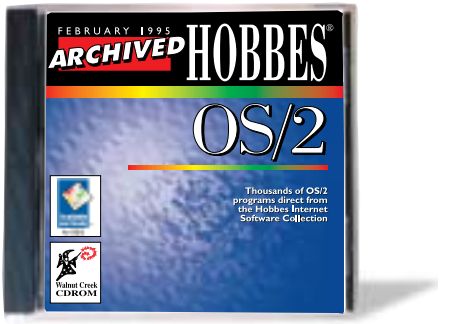
Hobbes® OS/2 Archived

"John C. Dvorak's Favorite Discs: The best of the best ... This company has a crop of neat CD-ROMs – this is but one. I have found lots of nifty utilities, fonts, and other goodies."

–John Dvorak, ***PC Computing.***

"For the low price of admission, you can save money if you copy a few of these file from the CDROM rather than paying to download them from a commercial on-line service, or making long-distance calls to OS/2-specific bulletin boards."

***–OS/2 Magazine**, October, 1994.*



The Hobbes OS/2 Archived CDROM brings the Internet's largest collection of OS/2 material within your grasp. We constantly update Hobbes (ftp-os2.cdrom.com) so you get the freshest in OS/2 shareware and freeware.

This Disc Contains:

- Product updates and patches for OS/2 3.0 Warp
- Commercial demos including SimCity for OS/2
- Games (Chess, Minesweeper, poker, Wizards of War, etc.)
- Graphics programs (3D chart and plotting software, paint programs)
- System utilities, 5000+ icons
- Internet connectivity aids
- GNU and Unix utilities, including: GCC 2.6.1, EMACS 19.27, and the EMX 09a C compiler.
- Sound, video, printer and adaptor drivers
- The latest Novell Netware OS/2 client
- IBM's latest Corrective Service Diskettes for TCP/IP and OS/2
- Editors, spell checkers, TeX & fonts

Everything you need to customize your OS/2 workstation!

"OS/2's main weakness (lack of device drivers) is cured with the purchase of this CD-ROM."

–Que's 1995 CD-ROM Buyer's Guide

Need to know more about OS/2? Look no further. You get OS/2 programming, system, supported hardware, and user Frequently Asked Questions lists as well as IBM's Red Books. Find out what other OS/2 users

Simtel® MSDOS

TWO DISC SET

"If you have ever found yourself digging through BBS file bases for the perfect utility to suit your current problem, this disc is for you."
- QUE's 1995 CDROM Buyer's Guide.

With the Simtel MSDOS two disc CDROM set, you will always find what you need. Use our friendly shell program for easy access to 10,000 files. You'll find what you need in seconds.

"Stuffed full of utilities and applications, it'll take you hours just to browse through the index of this compendium."
– David A. Wade, ***CD-ROM Today****, January 1995*

This disc contains utilities, communication programs (including TPC/IP, UUCP, and Zmodem), along with several full featured comm packages, documentation, programs for the handicapped, database software, a large assortment of ham radio programs, animation software, BBS programs, books, library programs, etc. There is so much software on this disc, you'll spend hours browsing, finding hundreds of useful programs.

This disc continues the Internet tradition of source code distribution. Many programs include source code so you can learn from the masters. You will also find a wealth of programming tools for many languages, including C++ (there's a great 32-bit C++ compiler), Assembly, APL, ADA, Clipper, COBOL, DBase, Forth, Fortran, Lotus 1-2-3, Pascal, and Basic. The best tools are often free, like the popular EMACS programmer's editor.

Simtel has grown and now fills **two CDROM's**. The single copy price is now $34.95, but the subscription price is still the same at $19.95. Now you save even more by subscribing!

Garbo MSDOS/Mac

This CDROM contains the Macintosh archives from the nic.funet.fi Internet ftp site and the PC archives from the garbo.uswasa.fi ftp site. Included are 135 megabytes in 1989 files for Macintosh computers and 337 megabytes in 3598 files for PC's.

Items for the Macintosh include:

- AfterDark modules such as Neko and Satori
- Games, including Klondike, Billiards, and NetHack
- Programming tools such as GNU GCC
- Disk utilities, inits, printer drivers
- Much more!

Items for PC's include:

- Disk maintenance utilities
- Games and educational programs
- SoundBlaster utilities
- Much more!

This CDROM is a dual format disc. Mac users see a desktop and long Mac names. DOS users see short ISO 9660 file names for the Mac files.

"It's a dual format disc that, like many of the WC titles, is BBS ready."
– David A. Wade, ***CD-ROM Today***, January 1995.

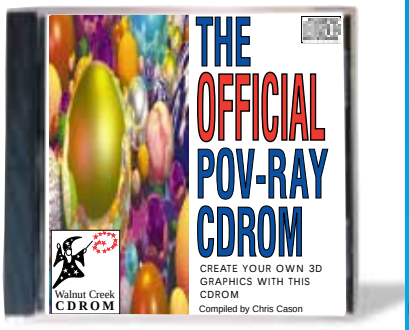
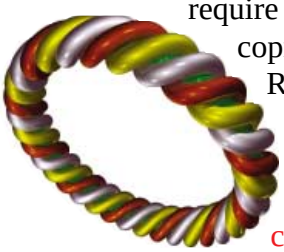
The Official POV-Ray CDROM



The Official POV-Ray CDROM is a compilation of images, scene source, program source, utilities and tips on POV-Ray and 3D graphics from around the world.

Unlike some other ray trace compilations, this one is aimed fairly and squarely at those who want to create their OWN images. It contains the source for version 2.2 of the copyrighted freeware ray tracer 'Persistence Of Vision' (POV-Ray) as well as binaries for DOS, Macintosh, OS/2, Amiga, FreeBSD, Linux, and several other platforms.



The disk is in ISO-9660 ***and*** Macintosh format. PC users require at least a 386 coprocessor with 4MB RAM.

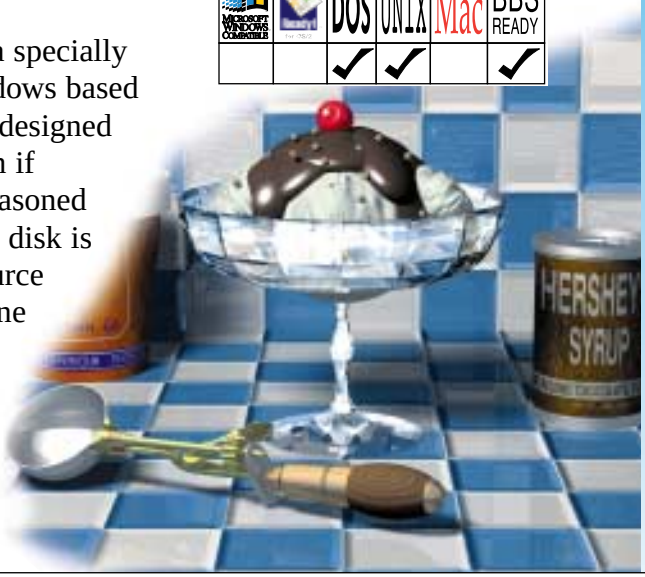
Includes full-color 40 x 40 cm poster / cheat-sheet

The Official POV-RAY CDROM.....$ 39.95

POV-Ray Poster...$10.00

Microsoft Windows Compatible	Windows 95	DOS	UNIX	Mac	BBS Ready
		✓	✓		✓

The disk contains a specially produced MS Windows based interactive tutorial designed for beginners. Even if you're already a seasoned POV-Ray user, this disk is a 'must have' resource of high-quality scene source files (some of them never before released), utilities, modellers and graphics source code.



Travel Adventure

This disc contains a first-rate collection of travel photos of the United States, Ireland, Austria, Germany, and the Caribbean Islands. Included are:

- Stunning mountains
- Gorgeous beaches and coves
- A dazzling array of cities

These images are great to view and are an invaluable resource for desktop publishers. **All images are royalty-free**, so you can reprint them without additional charge. The images come in a variety of sizes and formats (1024x768 24-bit TIF, 1024x768 8-bit GIF, 640x480 8-bit GIF). This disc includes an easy-to-use viewer and a 16 page booklet of the photos.

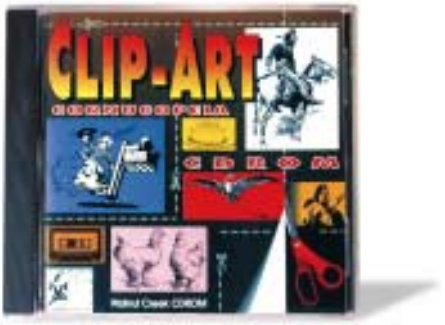
Clip Art Cornucopia



The Clip Art Cornucopia CDROM contains 5050 Black and White clip art images, totaling 408 MB of files. Subjects portrayed range from cartoon animals and Wild West caricatures to space craft and school scenes. These clip art images are perfect for any desktop publishing project you can think of!

You get the all the clip art images on this disc in both PCX (PC Paintbrush) and WPG (Word Perfect Graphics) formats for maximum portability.

Clip Art Cornucopia contains images in 95 different groups, including:

- Animals: insects, horses, dogs, cats, bears, and dinosaurs
- Nature items: flowers, the sun, the moon, and rain
- Literary images from Shakespeare, myths, and fairy tales
- Cultural images of Japan, Native Americans, Polynesia, and Persia
- Holiday images for Christmas, Thanksgiving, and Valentine's Day
- Miscellaneous items: musical instruments, clothing, inventions, shells, furniture, and computers

We have thoroughly indexed this disc and included an easy-to-use file browser. It is simple to locate, view, and copy the images by filename or subject.

TEX

TWO DISC SET

TeX is a professional typesetting system created by Professor Donald Knuth of Stanford University. These CDROMs contain everything that you will need to install and use TeX and LaTeX.

TeX has grown in popularity due to its unique abilities. TeX handles Japanese, Chinese, Cyrillic, and Arabic text. TeX also has strong mathematical and technical document support.

Knuth designed TeX with system and device independence in mind. You can output to everything from 9-pin dot matrix printers to laser printers through 1200 dpi typesetters! You also can preview your documents on your MS Windows or X Window graphics display.

You get code (1000 MB) to compile and install TeX for Unix, DOS, Macintosh, Windows NT, OS/2, etc. You get ready-to-run packages for DOS and Mac. This disc also includes fonts packages: Metafont, foreign language support, documentation, etc.

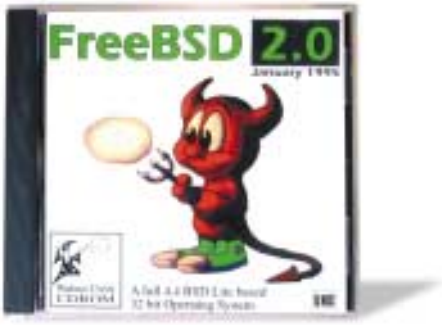
UNIX

FreeBSD® 2.0



"At win.net we are a subscription uucp service. We have around 3000 uucp feeds of mail and newsgroups hanging off of a P90/FreeBSD box. FreeBSD handles the heavy load quite well and its nothing short of amazing. Salutations to the FreeBSD team."
– Mark Hittinger, ***bugs@win.net***

This disc contains the complete FreeBSD 2.0 operating system, a full BSD 4.4 Lite based 32-bit based operating system. This product includes software developed by the University of California, Berkeley and its contributors. FreeBSD has a simple CDROM installation. You can switch systems easily with a simple to set up Multi-OS boot system.

FreeBSD comes with XFree86 3.1 (X11R6) with support for VGA/SVGA, TSENG ET3000/ET4000, S3 801/805/928/864/964, P9000 series, AGX, ATI Ultra/Ultra Pro, W32 and IBM 8514 accelerated graphics cards. Also ready-to-run X11 utilities and libraries such as XView, XV, Tcl/Tk, JPEG, etc.

FreeBSD comes with full USENET News and mail (nntp, trn, elm, mh) software. You get Berkeley-style (TCP/IP) networking (ftp, telnet, rlogin). Industry standard NFS and SIS services plus SLIP/PPP support make connecting to the Internet a breeze! You'll also get extra Internet services like archie, gopher, chimera fsp, and WAIS.

FreeBSD includes a complete development environment with GNU C and C++ compilers (v.2.6.2), GDB, GNU EMACS 19.27, f2c (fortran to C), source debuggers, profilers, etc. You get TeX 3.14, ghostscript, FlexFax, afm fonts, shells, etc. The bash, csh, and tcsh shells give you a rich choice of operating environments.

FreeBSD 2.0 incorporates a number of advanced 4.4 features (portals, 'union' filesystems, etc.) plus dynamically loadable filesystems, compressed binaries, diskless (network) booting, a kernel management interface, dynamic device configuration, early SCO® binary compatibility, along with version 1.X compatability. **Everything** comes with source code. FreeBSD has ISO 9660 and Rock Ridge CDROM support. The disc is in Rock Ridge format.

HARDWARE REQUIREMENTS:
Standard ISA, EISA, VL, or PCI bus based PC (386sx to Pentium class), 4 MB ram (8MB recommended). You need a minimum of 60MB of hard disk space. All standard SCSI disk, tape and CDROM peripherals, IDE or ESDI drives, or CDROM on Mitsumi CDROM interface cards are supported. **Supported hard disk controllers:** any IDE/ESDI, Adaptec 154x series ISA SCSI controller, Adaptec 174x series EISA SCSI, Adaptec 2742, 2842, 2942 SCSI, Buslogic 445x, 545x, 747x, 742a and 946c controllers, UltraStore 14F, 24F and 34F, NCR 53C810 PCI SCSI, ProAudio Spectrum SCSI (CDROM only), Future Domain 950 SCSI (CDROM only). **Supported networking:** SMC Elite 16/Elite Ultra WD8013 ethernet, most WD8003E, WD8003EBT, WD8003S, WD8003SBT, and WD8013EBT clones. Isolan AT 4141-0 (16-bit), Isolink 4110 (8-bit), Novell NE1000, NE2000, NEC 2100, 3Com 3C503 Etherlink II, 3Com 3C579, DEC DC21040 (or compatible) PCI. Support for generic 2 and 4 port serial/parallel cards, all SCSI tape drives on a supported controller, Wangtec/Archive QIC drives on QIC-02 and QIC controllers, floppy-tape drives on standard floppy controller.

Slackware® Linux

TWO DISC SET

UNIX

Slackware Linux is the perfect choice for a low-cost, high performance 32-bit multiuser operating system for Intel 386 and better. Linux, developed by Linus Torvalds and hundreds of volunteer programmers on the Internet, is a clone of the Unix® operating system. It turns your machine into a multitasking workstation with a full range of software development, text editing, and image processing tools. You even get the popular "DOOM™" arcade game from id software. What's more, you'll be able to connect your machine to the Internet and use electronic mail or news (with a supported ethernet card, or with SLIP/PPP using a standard modem).

The package includes everything you need to install and run Slackware Linux on two CDROMs. You get complete source code and compilers. The first CDROM contains the Linux system and source code, and the second contains archives from popular Linux ftp sites around the Internet, such as sunsite.unc.edu, and tsx-11.mit.edu. Linux is a free software product, meaning that you can freely distribute copies of it. You can make installable Slackware floppy disk sets that you can share with your friends with our easy instructions.

Slackware Linux requires 4 megabytes of memory (8 is recommended), and at least 12 megabytes of hard disk space is needed to run in CDROM dependent mode. You can install Slackware using Linux's own high-speed Linux file system, or using a \LINUX directory on any standard (non-Stacker/DoubleSpace) MS-DOS partition. For better performance, you may install Linux to the hard drive so you don't need the CD after installation. Depending on what you install, this can use anywhere from 40 to 250 MB. A typical installation with C and C++ development tools, networking with electronic mail and news, the XFree86 X Window System (version 3.1), and several applications will require around 40 megabytes.

Slackware Linux is compatible with most standard PC hardware, including PCI/ Pentium motherboards and SCSI controllers except a few Diamond and Matrox video boards (and you can still get normal SVGA resolutions out of them, just not truecolor) and some undocumented clone SCSI cards. It supports most CDROM drives, sound cards, ethernet cards, and mice. [If it doesn't work for you, return it for a unconditional refund.]

Walnut Creek has hosted the Slackware Linux project on the Internet since 1993. Since then, Linux has grown to become one of the most powerful operating systems available. Get the most out of your computer! Join the thousands of other users around the world who have found a better way to compute and get your copy of Slackware Linux today.

Plug-and-Play Linux

Tired of DOS and MS Windows? Try the Plug-and-Play Linux CDROM, a genuine UNIX-like 32-bit operating system with source code. You'll get the 1.1 kernel, XFree86 2.1, Xlib/Xt X Window, Tcl/Tk scripting language, Xview 3.2 OpenLook™, InterViews 3.1 C++, and Perl 4.036.

Among the programs you get is Andrew System version 6.2, including the ez editor for creation and reading of advanced multimedia documents. You also get the elvis vi clone editor and GNU and Lucid EMACS.

This CDROM also contains hundreds of other programs including emulators, development tools, programming languages, database, communications, publishing, games, multimedia viewers, and MPEG video and sound.

Linux needs at least 4 MB RAM and 10 to 1000 MB hard disk space. A installation booklet and script makes this operating system easy to install!

We completed this version in the Fall of 1994. Experience an advanced, professional operating system on your PC, order Plug-and-Play Linux Today.

CALL NOW! 1-800-786-9907

Phone: +1-510-674-0783 • Fax: +1-510-674-0821 • Email: orders@cdrom.com • WWW: http://WWW.cdrom.com/

What's the difference between FreeBSD, Plug-and-Play Linux, and Slackware Linux?

With the **Plug-and-Play Linux** CDROM from Yggdrasil you can run most of the Linux operating system right off the CD. This is useful for people short of disk space, or who wish to try Linux for the first time without making a big hardware commitment. You can easily move Linux features off the CD and onto your hard disk as you decide to use them more frequently. The 32 page installation booklet included with the Plug-and-Play CD and the user-friendly installation tools make it a good choice for the Linux beginner.

Slackware Linux is also easy to install. You get a full release of Linux in the form of Slackware 2.2, the Internet's most popular Linux distribution. This version also runs from the CDROM without copying all the files.

With Slackware Linux, you also get the contents of the tsx-11.mit.edu and sunsite.unc.edu archives - the Internet's largest ftp sites for Linux tools and add-ons. You'll own a vast repository of useful Linux add-ons.

FreeBSD is an entirely different variant of UNIX for the PC. FreeBSD is based on the long-term research efforts of the Computer Science Research Group (CSRG) at U.C. Berkeley. The CSRG has been releasing operating systems technology in the form of their "BSD" releases over the last 10 years. Commercial operating systems from Digital Equipment Corporation (DEC) and SUN Microsystems had their genesis in BSD and users of such environments will find FreeBSD familiar. FreeBSD tries to model itself more after "commercial" operating systems where a central group of people releases updates in a highly structured manner. FreeBSD may thus be more attractive to the more conservative or corporate user.

Because many parts of FreeBSD have been refined over the last 10 years (such as the networking code), it's fair to say that it's more stable for applications such as Internet firewalls, routers, ftp servers and the like. Walnut Creek CDROM relies exclusively on FreeBSD. On the other hand, it's probably harder than either Linux distribution to install.

All three products offer basic SLIP, PPP and TCP/IP support, development tools and compilers, the X Window System, and all are unbeatable values. Never has the PC user had such a rich selection of high quality operating systems available as free software.

Whichever one you pick, you'll be highly pleased!

4.4BSD Lite

4.4BSD-Lite is source code ONLY. If you love to read good code and tinker with your system, this is the disc for you.

This CDROM contains software developed by the University of California, Berkeley, and its contributors. This CDROM includes source code and manual pages for the C library, about 95% of the utilities distributed in 4.4BSD, and all but a few files from the kernel. The system is almost entirely ANSI C, IEEE POSIX 1003.1, and 1003.2 standards compliant.

The 4.4BSD-Lite distribution adds support for several new architectures including: SPARC stations 1 and 2, MIPS based DEC station 3100, 5000, and Sony NEWS, 68000 based HP 9000/300 and Omron Luna, and 386 based PC's.

*Note: It is **not** possible to compile or run 4.4BSD-Lite without a pre-existing system that is already installed and running. 4.4BSD-Lite does not contain program binaries for any architecture.*

We finished this disc in **July, 1994.**

X11R6

This CDROM contains the OFFICIAL X Consortium release of the X Window System, X11R6.

This disc was compiled for SunOS 4.1.3, and Solaris 2.3. All binaries are runnable directly from the CDROM, so there is no need to commit disk space to X11R6. This disc also contains utilities to allow you to compile the source tree directly from the CDROM, saving an additional 285 megabytes of file system space.

X11R6 will work on most UNIX systems that support bitmapped displays including:

A/UX 3.0.1, AIX 3.2.5, BSD/386, HP-UX 9.1, IRIX 5.2, Mach 2.5 V. 2.00.1, NT 3.1, NCR Sys Vr4, OSF/1 1.x, UNICOS 8.0, Unix System V/386 r4.2v1, System V/860 r 4.0v3, Ultrix-32 4.3. This disc contains all the X11R6 distribution and the contributed X11 software. You can even keep an earlier release of X11 on your system. X11R6 installs to /usr/X11R6, so it will not conflict with your previous X11 installations.

X11R5/GNU

This disc has the source for the X11R5 Window System, the X11 contributed software, and the entire Free Software Foundation GNU source code. Along with the source code, you get SPARC binaries and libraries for the GNU programs and the X11R5 server clients.

If you have a SPARC Station or compatible, you can run X11R5 and the GNU programs without compiling. For other systems, you can compile these programs and run them on almost any UNIX workstation.

X11R5/GNU.....$ 39.95

GNU

The GNU software archives from prep.ai.mit.edu contain 250 software packages for your UNIX computer. You get 250 MB of source code, and you also get **precompiled** binaries for both SunOS 4.1.3 and Solaris 2.3. You can use most of the software straight off the disk and save yourself both **disk space** and **compiling time**.

The GNU utilities pride themselves on portability. You will meet them wherever you go. Once you know these tools, you will be comfortable in almost any UNIX environment.

The industry standard EMACS text editor (v. 19.25) will increase your programming speed with its awareness of programming languages. As a C developer, you'll use the GCC C and C++ compiler (v. 2.5.8), the C++ library (v. 2.5.3), the debugging tool GDB (v. 4.12) and many other tools.

You'll also get Perl4.036 (fast becoming the industry standard scripting language), Smalltalk (v. 1.1.1) and more. For fun, try GNU chess (v. 4.0.pl70), GNU go, and GNU Shogi (v. 1.1p02).

Everything comes with source and documentation. You even get patches for the larger packages that you can apply to an existing setup to bring it up to the current release. No need to lose all the customization you have made! With this disk, you can bring any barebones system up to a professional working environment in no time.

Sprite

Sprite is only for fearless operating system adventurers! The Sprite project at the University of California, Berkeley, Computer Science Department researched distributed operating systems.

This disc contains Sun SPARC executables, full source code (GNU and X11) and all research papers. The Sprite CDROM contains about 39,000 files in 530 MB.

The disc is ISO 9660 with Rock Ridge extensions.

Nebula for NeXTStep

The second edition of this popular NeXTStep for Intel CDROM. This edition will give you all the best public domain and shareware applications for your NeXTStep Intel computer.

- Applications in categories such as utilities, games, communications, audio, graphics, mail, and clocks
- Most of the applications come with complete source code making the Nebula an invaluable reference for programmers
- Over 100 NeXTStep ready fonts
- Includes all the files at the NeXT answers ftp site

Each directory on the disc contains an index listing filename, version, author, and a short description of each file. A central index is included which can be used with Digital Librarian to quickly locate the file you're looking for. NeXTStep 3.1 or above for Intel processors is required to use this disc.

Nova for NeXT

Nova is for NeXTStep 3.1 or higher on NeXT (Motorola) hardware. This edition gives you more applications, more source code, more information, and more fun without using a single meg of hard disk space!

We filled the Nova disc with applications such as utilities, communications, graphics, and 32 MB of NeXTStep games. You also get 119 fonts, sounds, graphics, and many text files. Each directory contains an index file which lists the filename and a short description of each file. All applications were compiled using NeXTStep 3.1 using NeXT (Motorola) only binaries. The Nova CDROM is in ISO 9660 format with Rock Ridge extensions.

Source Code

This disc gives you an enormous source code collection to reference. You get high quality code from the USENET source archives, the Simtel Unix-C Archive, and MSDOS source. This is 600 MB of source in 15,000 files. An index file in each subdirectory briefly describes each file, making it easy to locate files by name or subject.

The USENET archives contain 390 MB, nearly 11,000 files. Included are the alt.sources archive and the comp.sources archives for Amiga, Apple2, Atari-ST, games, Mac reviewed, Sun, and Unix. Most of the code is in C.

The Simtel Unix-C Archive contains 130 MB of C source code in 1050 files. Most of these files are complete working programs. The DOS directory contains 73 MB, 1900 compressed (mostly zipped) source code packages. The MSDOS sources are mostly C, but also contain Turbo Pascal, BASIC, Assembly, etc.

This disc is a perfect addition to any programmer's library. Order your Source Code CDROM today.

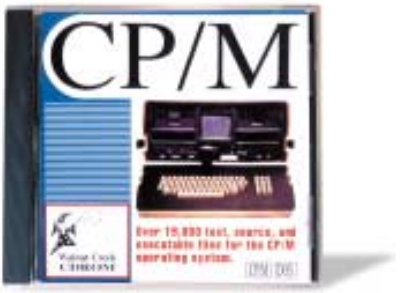
CP/M



This disc contains 18,000 files with executable programs, source code, and documentation for the CP/M operating system. Included are the Simtel 20 pub/cpm archives, the contents of major CP/M BBS's, and the collections of CP/M community leaders.

- Assemblers, compilers, code libraries, and programming tools
- Editors, word processors, and other application software
- System and application utilites, archive and compression tools
- Telecommunication software for users and BBS operators

You'll also get CP/M emulators and tools for DOS, OS/2 and Unix.

Tcl/Tk

Tcl/Tk is becoming an extremely popular way to develop large applications rapidly. Tcl (Tool Command Language) is a general purpose, extensible, scripting language supplied as a C library. Tk is a toolkit specifically designed to develop X Window applications. This CDROM contains over 100 megabytes of Tcl/Tk code, along with executables that are ready-to-run.

On the Tcl/Tk CDROM, you get a complete copy of the main Tcl Internet archive sites at sprite.berkeley.edu and harbor.ecn.purdue.edu. The sources are easy to install directly from the disc to any Unix system.

You get Tcl ports to MSDOS, MS Windows and Macintosh. 40 megabytes of archives of the USENET news group comp.lang.tcl, along with other Tcl documentation, round out your Tcl education. The Tcl/Tk disc is an invaluable resource for any forward-thinking programmer.

Tcl/Tk.....$ 39.95

C Users' Group Library

This CDROM gives you the entire **C Users' Group** Library, a collection of more than four hundred MB of user-supported C source code. You get function libraries, text editors, compilers, comm support, text formatters, interpreters, BBS's, co-routines, games, tutorials, math linkers, cross compilers, and more.

Most of the source code is for DOS. Several recent volumes are for Unix and some earlier volumes contain CP/M code. This CDROM also contains all the source code listings originally published in ***The C Users' Journal***.

The CUG CDROM contains volumes 100 to 411. Reusing source code is the key to productivity. This disc provides you with thousands of files that you can read, analyze, and incorporate into your own programs. The CUG library is an essential addition to your programming toolkit.

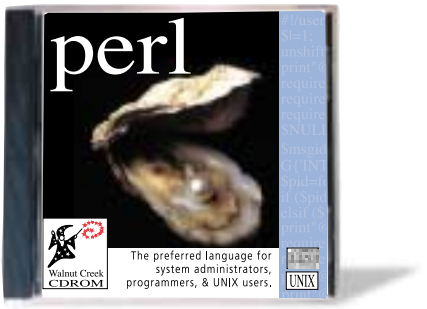
Perl



Perl is an interpreted language optimized for scanning text files, extracting information, and printing reports based on the extracted information. It's also an excellent language for many system management tasks.

With this CDROM, you get mirrors of over a dozen Perl archives, including those at the University of Florida and Texas Metronet. The material is as up-to-date as possible, uncompressed and reorganized to make finding files easy.

You'll get the sources to the latest versions of both Perl4 (4.036) and Perl5 (5.000). You'll also get source or binary versions for Amiga, Atari, A/UX, LynxOS, Mac, MPE, DOS, MVS, NetWare, Windows NT, OS/2, VMS, and XENIX. Perl compiles on over 40 platforms!

There are hundreds of Perl programs in the scripts directory, including system administration utilities, mail handling, Usenet news, Internet browsing, file handling, text processing, new libraries and modules.

Extensions include connections to Tk, Motif, and many databases, including Oracle (6 & 7), Sybase 4, Ingres, Informix, Interbase, Unify 5.0, and Postgres, as well as B-trees and C-trees (all for Perl4). You get 7000 files.

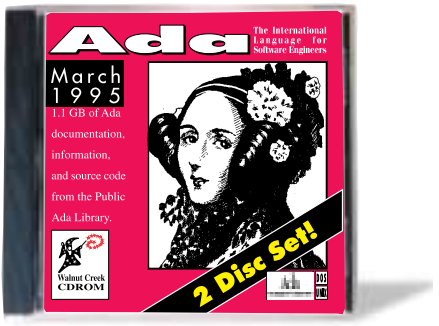
Ada



With 1200 MB of compilers, documentation, information, and source code, this disc is a valuable resource for any serious Ada programmer. You get:

- GWU Ada/Ed Ada83 Compiler with source code
- GNAT 2.00. GNAT is the GNU NYU Ada95 Translator created by the Free Software Foundation GNAT project. You get ports of GNAT to Solaris, SunOS, Linux, HP, OS/2, and DOS
- Ada83 and Ada95 Information, Rationale, and Reference Manuals, including a hypertext version of the Ada83 LRM and interactive online versions of the Ada83 and the new Version 6.00 Ada95 Reference Manual.

You shouldn't be without this library.

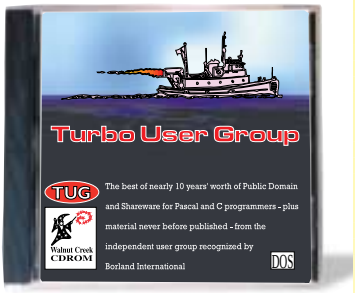
Tug



Borland International® recognized the **Turbo User Group** (**TUG**) as the official support organization for Turbo languages. The TUG library staff compiled and verified the files on the TUG CDROM. You'll get TUG's entire collection of newsletters, source code and utilities for Borland's Turbo series of compilers, including C, C++, and Pascal.

This disc is mostly source code: 285 files related to Ada programming, 1816 C and C++ programming files, 2293 files about Pascal, and 2160 files of programming routines for various languages. You'll get 6890 files ready to run and view.

You get all the source code from issues of ***PC Techniques*** magazine. TUG carefully selected MSDOS and MS Windows shareware. Let TUG help you program better!
March 1995.
