

SUPREME COURT OF THE UNITED STATES

No. 91-2012

JACKIE HOLDER, ETC., ET AL., PETITIONERS v.
E. K. HALL, SR., ET AL.

ON WRIT OF CERTIORARI TO THE UNITED STATES COURT OF
APPEALS FOR THE ELEVENTH CIRCUIT
[June 30, 1994]

JUSTICE THOMAS, with whom JUSTICE SCALIA joins, concurring in the judgment.

We are asked in this case to determine whether the size of a local governing body is subject to challenge under §2 of the Voting Rights Act as a “dilutive” practice. While I agree with JUSTICES KENNEDY and O’CONNOR that the size of a governing body cannot be attacked under §2, I do not share their reasons for reaching that conclusion. JUSTICE KENNEDY persuasively demonstrates that there is no principled method for determining a benchmark against which the size of a governing body might be compared to determine whether it dilutes a group’s voting power. Both he and JUSTICE O’CONNOR rely on that consideration to conclude that size cannot be challenged under §2 of the Act. See *ante*, at 5–7, 10 (opinion of KENNEDY, J.); *ante*, at 4–7 (O’CONNOR, J., concurring in part and concurring in judgment).

While the practical concerns JUSTICES KENNEDY and O’CONNOR point out can inform a proper construction of the Act, I would explicitly anchor analysis in this case in the statutory text. Only a “voting qualification or prerequisite to voting or standard, practice, or procedure” can be challenged under §2. I would hold that the size of a governing body is not a “standard, practice, or procedure” within the terms of the Act. In my view, however, the only principle limiting the scope of the terms “standard, practice, or procedure” that can be derived from the text of the Act would exclude, not only the challenge to size advanced

today, but also challenges to allegedly dilutive election methods that we have considered within the scope of the Act in the past.

HOLDER v. HALL

I believe that a systematic reassessment of our interpretation of §2 is required in this case. The broad reach we have given the section might suggest that the size of a governing body, like an election method that has the potential for diluting the vote of a minority group, should come within the terms of the Act. But the gloss we have placed on the words “standard, practice, or procedure” in cases alleging dilution is at odds with the terms of the statute and has proved utterly unworkable in practice. A review of the current state of our cases shows that by construing the Act to cover potentially dilutive electoral mechanisms, we have immersed the federal courts in a hopeless project of weighing questions of political theory—questions judges must confront to establish a benchmark concept of an “undiluted” vote. Worse, in pursuing the ideal measure of voting strength, we have devised a remedial mechanism that encourages federal courts to segregate voters into racially designated districts to ensure minority electoral success. In doing so, we have collaborated in what may aptly be termed the racial “balkaniz[ation]” of the Nation. *Shaw v. Reno*, 509 U. S. ___, ___ (1993) (slip op., at 26).

I can no longer adhere to a reading of the Act that does not comport with the terms of the statute and that has produced such a disastrous misadventure in judicial policymaking. I would hold that the size of a government body is not a “standard, practice, or procedure” because, properly understood, those terms reach only state enactments that limit citizens' access to the ballot.

If one surveys the history of the Voting Rights Act, 42 U. S. C. §1973 *et seq.*, one can only be struck by the sea change that has occurred in the application and enforcement of the Act since it was passed in 1965. The statute was originally perceived as a

HOLDER v. HALL

remedial provision directed specifically at eradicating discriminatory practices that restricted blacks' ability to register and vote in the segregated South. Now, the Act has grown into something entirely different. In construing the Act to cover claims of vote dilution, we have converted the Act into a device for regulating, rationing, and apportioning political power among racial and ethnic groups. In the process, we have read the Act essentially as a grant of authority to the federal judiciary to develop theories on basic principles of representative government, for it is only a resort to political theory that can enable a court to determine which electoral systems provide the "fairest" levels of representation or the most "effective" or "undiluted" votes to minorities.

Before I turn to an analysis of the text of §2 to explain why, in my view, the terms of the statute do not authorize the project the we have undertaken in the name of the Act, I intend first simply to describe the development of the basic contours of vote dilution actions under the Voting Rights Act.¹ An examination of the current state of our decisions should make obvious a simple fact that for far too long has gone unmentioned: vote dilution cases have required the federal courts to make decisions based on highly political judgments—judgments that courts are inherently ill-equipped to make. A clear

¹Of course, many of the basic principles I will discuss are equally applicable to constitutional vote dilution cases. Indeed, prior to the amendment of the Voting Rights Act in 1982, dilution claims typically were brought under the Equal Protection Clause. See, e. g., *White v. Regester*, 412 U. S. 755 (1973); *Whitcomb v. Chavis*, 403 U. S. 124 (1971); *Burns v. Richardson*, 384 U. S. 73 (1966). The early development of our voting rights jurisprudence in those cases provided the basis for our analysis of vote dilution under the amended §2 in *Thornburg v. Gingles*, 478 U. S. 30 (1986).

HOLDER v. HALL

understanding of the destructive assumptions that have developed to guide vote dilution decisions and the role we have given the federal courts in redrawing the political landscape of the Nation should make clear the pressing need for us to reassess our interpretation of the Act.

As it was enforced in the years immediately following its enactment, the Voting Rights Act of 1965, Pub. L. 89-110, 79 Stat. 437, was perceived primarily as legislation directed at eliminating literacy tests and similar devices that had been used to prevent black voter registration in the segregated South. See A. Thernstrom, *Whose Votes Count? Affirmative Action and Minority Voting Rights* 17-27 (1987) (hereinafter Thernstrom). See also Guinier, *The Representation of Minority Interests: The Question of Single-Member Districts*, 14 *Cardozo L. Rev.* 1135, 1151 (1993) (referring to actions securing access to the ballot as the “first generation” of Voting Rights Act claims).² This focus in enforcement flowed, no doubt, from the emphasis on access to the ballot apparent in the central provision of the Act, §4, which used a mathematical formula based on voter registration and turnout in 1964 to define certain “covered” jurisdictions in which the use of literacy tests was immediately suspended. Pub. L. 89-110, §4, 79 Stat. 438. Section 6 of the Act reflected the same concern for registration as it provided that federal examiners could be dispatched to covered jurisdictions whenever the Attorney General deemed

²Cf. also L. Guinier, *Tyranny of the Majority* 49, n. 58 (1994) (hereinafter Guinier) (“The first generation of voting litigation, and the 1965 statute which represented the congressional response, were concerned with the complete and total exclusion of blacks from the electoral process”).

HOLDER v. HALL

it necessary to supervise the registration of black voters. §1973d. And to prevent evasion of the requirements of §4, §5 required that covered jurisdictions obtain “preclearance” from the Department of Justice before altering any “voting qualification or prerequisite to voting, or standard, practice, or procedure with respect to voting.” §1973c.

The Act was immediately and notably successful in removing barriers to registration and ensuring access to the ballot. For example, in Mississippi, black registration levels skyrocketed from 6.7% to 59.8% in a mere two years; in Alabama the increase was from 19.3% to 51.6% in the same time period. See Thernstrom 18. By the end of 1967, black voter registration had reached at least 50% in every covered State. See B. Grofman, L. Handley, & R. Niemi, *Minority Representation and the Quest for Voting Equality* 22 (1992).

The Court's decision in *Allen v. State Bd. of Elections*, 393 U. S. 544 (1969), however, marked a fundamental shift in the focal point of the Act. In an opinion dealing with four companion cases, the *Allen* Court determined that the Act should be given “the broadest possible scope.” *Id.*, at 567. Thus, in *Fairley v. Patterson*, the Court decided that a covered jurisdiction's switch from a districting system to an at-large system for election of county supervisors was a “standard, practice, or procedure with respect to voting,” subject to preclearance under §5. *Id.*, at 569. Stating that the Act “was aimed at the subtle, as well as the obvious, state regulations which have the effect of denying citizens their right to vote because of their race,” *id.*, at 565, the Court reasoned that §5's preclearance provisions should apply, not only to changes in electoral laws that pertain to registration and access to the ballot, but to provisions that might “dilute” the force of minority votes that were duly cast and counted. See *id.*, at 569. The decision in

HOLDER v. HALL

Allen thus ensured that the terms “standard, practice, or procedure” would extend to encompass a wide array of electoral practices or voting systems that might be challenged for reducing the potential impact of minority votes.

As a consequence, *Allen* also ensured that courts would be required to confront a number of complex and essentially political questions in assessing claims of vote dilution under the Voting Rights Act. The central difficulty in any vote dilution case, of course, is determining a point of comparison against which dilution can be measured. As Justice Frankfurter observed several years before *Allen*, “[t]alk of ‘debasement’ or ‘dilution’ is circular talk. One cannot speak of ‘debasement’ or ‘dilution’ of the value of a vote until there is first defined a standard of reference as to what a vote should be worth.” *Baker v. Carr*, 369 U. S. 186, 300 (1962) (Frankfurter, J., dissenting). See also *Thornburg v. Gingles*, 478 U. S. 30, 88 (1986) (O’CONNOR, J., concurring in judgment) (“[I]n order to decide whether an electoral system has made it harder for minority voters to elect the candidates they prefer, a court must have an idea in mind of how hard it ‘should’ be for minority voters to elect their preferred candidates under an acceptable system”). But in setting the benchmark of what “undiluted” or fully “effective” voting strength should be, a court must necessarily make some judgments based purely on an assessment of principles of political theory. As Justice Harlan pointed out in his dissent in *Allen*, the Voting Rights Act supplies no rule for a court to rely upon in deciding, for example, whether a multimember at-large system of election is to be preferred to a single-member district system; that is, whether one provides a more “effective” vote than another. “Under one system, Negroes have *some* influence in the election of *all* officers; under the other, minority groups have *more* influence in the selection of *fewer*

HOLDER v. HALL

officers.” *Allen, supra*, at 586 (opinion concurring in part and dissenting in part). The choice is inherently a political one, and depends upon the selection of a theory for defining the fully “effective” vote—at bottom, a theory for defining effective participation in representative government. In short, what a court is actually asked to do in a vote dilution case is “to choose among competing bases of representation—ultimately, really, among competing theories of political philosophy.” *Baker, supra*, at 300 (Frankfurter, J., dissenting).

Perhaps the most prominent feature of the philosophy that has emerged in vote dilution decisions since *Allen* has been the Court's preference for single-member districting schemes, both as a benchmark for measuring undiluted minority voting strength and as a remedial mechanism for guaranteeing minorities undiluted voting power. See, e. g., *Grove v. Emison*, 507 U. S. ___, ___ (1993) (slip op., at 14); *Gingles, supra*, at 50, n. 17 (declaring that the “single-member district is generally the appropriate standard against which to measure minority group potential to elect”); *Mobile v. Bolden*, 446 U. S. 55, 66, n. 12 (1980) (plurality opinion) (noting that single-member districts should be preferred in court-ordered remedial schemes); *Connor v. Finch*, 431 U. S. 407, 415 (1977) (same). Indeed, commentators surveying the history of voting rights litigation have concluded that it has been the objective of voting rights plaintiffs to use the Act to attack multimember districting schemes and to replace them with single-member districting systems drawn with majority-minority districts to ensure minority control of seats. See Guinier, 14 *Cardozo L. Rev.*, at 1151; Guinier 49-54; Thernstrom 193.

It should be apparent, however, that there is no principle inherent in our constitutional system, or even in the history of the Nation's electoral practices, that makes single-member districts the “proper”

HOLDER v. HALL

mechanism for electing representatives to governmental bodies or for giving “undiluted” effect to the votes of a numerical minority. On the contrary, from the earliest days of the Republic, multimember districts were a common feature of our political systems. The Framers left unanswered in the Constitution the question whether congressional delegations from the several States should be elected on a general ticket from each State as a whole or under a districting scheme and left that matter to be resolved by the States or by Congress. See U. S. Const., Art. I, §4, cl. 1. It was not until 1842 that Congress determined that Representatives should be elected from single-member districts in the States. See Act of June 25, 1842, ch. 47, 5 Stat. 491.³ Single-member districting was no more the rule in the States themselves, for the Constitutions of most of the 13 original States provided that representatives in the state legislatures were to be elected from multimember districts.⁴ Today, although they have come under increasing attack under the Voting Rights Act, multimember district systems continue to be a feature on the American political landscape, especially in municipal governments. See *The Municipal Yearbook* 14 (table) (1988) (over 60% of American cities use at-large election systems for their governing bodies).

The obvious advantage the Court has perceived in

³At that time, seven States elected their congressional delegations on a statewide ticket. See *Wesberry v. Sanders*, 376 U. S. 1, 8, n. 11 (1964).

⁴See, e. g., Ga. Const., Art. IV (1777); Mass. Const., Part II, ch. I, §II, Arts. I, II (1780); N. H. Const., Part II (1784); N. J. Const., Art. III (1776); N. Y. Const., Art. IV (1777); S. C. Const., Art. XIII (1778). See also Klain, *A New Look at the Constituencies: The Need for a Recount and a Reappraisal*, 49 Am. Pol. Sci. Rev. 1105, 1112-1113 (1955).

HOLDER v. HALL

single-member districts, of course, is their tendency to enhance the ability of any numerical minority in the electorate to gain control of seats in a representative body. See *Gingles*, 478 U. S., at 50-51. But in choosing single-member districting as a benchmark electoral plan on that basis the Court has made a political decision and, indeed, a decision that itself depends on a prior political choice made in answer to Justice Harlan's question in *Allen*. Justice Harlan asked whether a group's votes should be considered to be more "effective" when they provide *influence* over a greater number of seats, or *control* over a lesser number of seats. See 393 U. S., at 586. In answering that query, the Court has determined that the purpose of the vote—or of the fully "effective" vote—is controlling seats. In other words, in an effort to develop standards for assessing claims of dilution, the Court has adopted the view that members of any numerically significant minority are denied a fully effective use of the franchise unless they are able to control seats in an elected body.⁵ Under this theory, votes that do not control a representative are essentially wasted; those who cast them go unrepresented and are just as surely disenfranchised as if they had been barred from

⁵See, e. g., *Gingles*, 478 U. S., at 88 (1986) (O'CONNOR, J., concurring in judgment) (noting that the Court has determined that "minority voting strength is to be assessed solely in terms of the minority group's ability to elect candidates it prefers") (emphasis omitted). See also Abrams, "Raising Politics Up": Minority Political Participation and Section 2 of the Voting Rights Act, 63 N. Y. U. L. Rev. 449, 456, n. 43, 468-471 (1988) (criticizing the Court's "electoral focus" as a narrow conception of "political opportunity"); Guinier 49 (arguing that since *Gingles*, courts "have measured black political representation and participation solely by reference to the number and consistent election of black candidates").

HOLDER v. HALL

registering. Cf. *id.*, at 569 (equating denial of the ability to elect candidates with denial of the vote). Such conclusions, of course, depend upon a certain theory of the “effective” vote, a theory that is not inherent in the concept of representative democracy itself.⁶

In fact, it should be clear that the assumptions that have guided the Court reflect only one possible understanding of effective exercise of the franchise, an understanding based on the view that voters are “represented” only when they choose a delegate who will mirror their views in the legislative halls. See generally H. Pitkin, *The Concept of Representation* 60-91 (1967).⁷ But it is certainly possible to construct

⁶Undoubtedly, one factor that has prompted our focus on control of seats has been a desire, when confronted with an abstract question of political theory concerning the measure of effective participation in government, to seize upon an objective standard for deciding cases, however much it may oversimplify the issues before us. If using control of seats as our standard does not reflect a very nuanced theory of political participation, it at least has the superficial advantage of appealing to the “most easily measured indicia of political power.” *Davis v. Bandemer*, 478 U. S. 109, 157 (1986) (O’CONNOR, J., concurring in judgment).

⁷Indeed, the assumptions underpinning the Court’s conclusions largely parallel principles that John Stuart Mill advanced in proposing a system of proportional representation as an electoral reform in Great Britain. See J. S. Mill, *Considerations on Representative Government* (1861). In Mill’s view, a just system of representative government required an electoral system that ensured “a minority of the electors would always have a minority of the representatives.” *Id.*, at 133. To Mill, a system that allowed a portion of the population that constituted a majority in each district to control the election of all representatives and to defeat the minority’s

HOLDER v. HALL

a theory of effective political participation that would accord greater importance to voters' ability to influence, rather than control, elections. And especially in a two-party system such as ours, the influence of a potential "swing" group of voters composing 10%-20% of the electorate in a given district can be considerable.⁸ Even such a focus on practical influence, however, is not a necessary component of the definition of the "effective" vote. Some conceptions of representative government may primarily emphasize the formal value of the vote as a mechanism for participation in the electoral process, whether it results in control of a seat or not. Cf. *id.*, at 14-59.⁹ Under such a theory, minorities unable to control elected posts would not be considered essentially without a vote; rather, a vote duly cast and counted would be deemed just as "effective" as

choice of candidates was unjust because it operated to produce a "complete disfranchisement of minorities." *Id.*, at 132.

⁸We ourselves have tacitly acknowledged that our current view of what constitutes an effective vote may be subject to reevaluation, or at least that it may not provide an exclusive definition of effective voting power, as we repeatedly have reserved the question whether a vote dilution claim may be brought for failure to create minority "influence" districts. See, e. g., *Voinovich v. Quilter*, 507 U. S. ___, ___ (1993) (slip op., at 6) (citing cases). Cf. also *Bandemer, supra*, at 132 (noting that "the power to influence the political process is not limited to winning elections"); *Gingles, supra*, at 99 (O'CONNOR, J., concurring in judgment) (suggesting that the Court should not focus solely on a minority group's ability to elect representatives in assessing the effectiveness of the group's votes).

⁹Cf. also Levinson, *Gerrymandering and the Brooding Omnipresence of Proportional Representation*, 33 UCLA L. Rev. 257, 260-261 (1985).

HOLDER v. HALL

any other. If a minority group is unable to control seats, that result may plausibly be attributed to the inescapable fact that, in a majoritarian system, numerical minorities lose elections.¹⁰

In short, there are undoubtedly an infinite number of theories of effective suffrage, representation, and the proper apportionment of political power in a representative democracy that could be drawn upon to answer the questions posed in *Allen*. See generally Pitkin, *supra*. I do not pretend to have provided the most sophisticated account of the various possibilities; but such matters of political theory are beyond the ordinary sphere of federal judges. And that is precisely the point. The matters the Court has set out to resolve in vote dilution cases are questions of political philosophy, not questions of law.¹¹ As such, they are not readily subjected to any

¹⁰There are traces of this view in our cases as well. See *Whitcomb*, 403 U. S., at 153, 155; *id.*, at 160 (“The short of it is that we are unprepared to hold that district-based elections decided by plurality vote are unconstitutional in either single- or multi-member districts simply because the supporters of losing candidates have no legislative seats assigned to them”). See also *League of United Latin American Citizens v. Midland Independent School Dist.*, 812 F. 2d 1494, 1507 (Higginbotham, J., dissenting) (“I had supposed that the essence of our republican arrangement is that *voting* minorities lose”), vacated on rehearing, 829 F. 2d 546 (CA5 1987) (*en banc*) (*per curiam*).

¹¹The point is perhaps so widely accepted at this date that it needs little further demonstration. See, e. g., L. Tribe, *American Constitutional Law* §13-7, p. 1076, n. 7 (2d ed. 1988) (stating that “no strategy [in vote dilution cases] can avoid the necessity for at least some hard substantive decisions of political theory by the federal judiciary”); Howard & Howard, *The Dilemma of the Voting Rights Act—Recognizing the Emerging Political Equality Norm*, 83

HOLDER v. HALL

judicially manageable standards that can guide courts in attempting to select between competing theories.

But the political choices the Court has had to make do not end with the determination that the primary purpose of the “effective” vote is controlling seats or with the selection of single-member districting as the mechanism for providing that control. In one sense, these were not even the most critical decisions to be made in devising standards for assessing claims of dilution, for in itself, the selection of single-member districting as a benchmark election plan will tell a judge little about the number of minority districts to create. Single-member districting tells a court “how” members of a minority are to control seats, but not “how many” seats they should be allowed to control.

But “how many” is the critical issue. Once one accepts the proposition that the effectiveness of votes is measured in terms of the control of seats, the core of any vote dilution claim is an assertion that the group in question is unable to control the “proper” number of seats—that is, the number of seats that the minority's percentage of the population would enable it to control in the benchmark “fair” system. The claim is inherently based on ratios between the numbers of the minority in the population and the numbers of seats controlled. As JUSTICE O'CONNOR has noted, “any theory of vote dilution must necessarily rely to some extent on a measure of minority voting strength that makes some reference to the proportion between the minority group and the electorate at large.” *Gingles*, 478 U. S., at 84 (opinion concurring in judgment). As a result, only a mathematical

Colum. L. Rev. 1615, 1633, 1635 (1983) (hereinafter Howard & Howard) (arguing that the Court has developed a “substantive theory of representative government” and a theory of “allocating political power” in vote dilution cases).

HOLDER v. HALL

calculation can answer the fundamental question posed by a claim of vote dilution. And once again, in selecting the proportion that will be used to define the undiluted strength of a minority—the ratio that will provide the principle for decision in a vote dilution case—a court must make a political choice.

The ratio for which this Court has opted, and thus the mathematical principle driving the results in our cases, is undoubtedly direct proportionality. Indeed, four Members of the Court candidly recognized in *Gingles* that the Court had adopted a rule of roughly proportional representation, at least to the extent proportionality was possible given the geographic dispersion of minority populations. See *id.*, at 85, 91, 98–99 (O'CONNOR, J., concurring in judgment). While in itself that choice may strike us intuitively as the fairest or most just rule to apply, opting for proportionality is still a political choice, not a result required by any principle of law.

The dabbling in political theory that dilution cases have prompted, however, is hardly the worst aspect of our vote dilution jurisprudence. Far more pernicious has been the Court's willingness to accept the one underlying premise that must inform every minority vote dilution claim: the assumption that the group asserting dilution is not merely a racial or ethnic group, but a group having distinct political interests as well. Of necessity, in resolving vote dilution actions we have given credence to the view that race defines political interest. We have acted on the implicit assumption that members of racial and ethnic groups must all think alike on important matters of public policy and must have their own “minority preferred” representatives holding seats in elected bodies if they are to be considered represented at all.

It is true that in *Gingles* we stated that whether a

HOLDER v. HALL

racial group is “politically cohesive” may not be assumed, but rather must be proved in each case. See 478 U. S., at 51, 56. See also *Growe*, 507 U. S., at ___ (slip op., at 14-15). But the standards we have employed for determining political cohesion have proved so insubstantial that this “precondition” does not present much of a barrier to the assertion of vote dilution claims on behalf of any racial group.¹² Moreover, it provides no test—indeed, it is not designed to provide a test—of whether race itself determines a distinctive political community of interest. According to the rule adopted in *Gingles*, plaintiffs must show simply that members of a racial group tend to prefer the same candidates. See 478 U. S., at 61-67 (opinion of Brennan, J.). There is no set standard defining how strong the correlation must be, and an inquiry into the cause for the correlation (to determine, for example, whether it might be the product of similar socioeconomic interests rather than some other factor related to race) is unnecessary. *Ibid.* See also *id.*, at 100 (O’CONNOR, J., concurring in judgment).¹³ Thus, whenever similarities in political

¹²Cf. *Citizens for a Better Gretna v. Gretna*, 834 F. 2d 496, 501-502 (CA5 1987) (emphasizing that political cohesion under *Gingles* can be shown where a “significant number” of minority voters prefer the same candidate, and suggesting that data showing that anywhere from 49% to 67% of the members of a minority group preferred the same candidate established cohesion), cert. denied, 492 U. S. 905 (1989).

¹³JUSTICE O’CONNOR agreed with Justice Brennan in *Gingles* that, insofar as determining political cohesion was concerned, the cause for a correlation between race and candidate preference was irrelevant. She maintained, however, that evidence of the cause of the correlation would still be relevant to the overall vote dilution inquiry and particularly to the question whether a white majority will usually vote to defeat the minority’s preferred

HOLDER v. HALL

preferences along racial lines exist, we proclaim that the cause of the correlation is irrelevant, but we effectively rely on the fact of the correlation to assume that racial groups have unique political interests.

As a result, *Gingles*' requirement of proof of political cohesiveness, as practically applied, has proved little different from a working assumption that racial groups can be conceived of largely as political interest groups. And operating under that assumption, we have assigned federal courts the task of ensuring that minorities are assured their "just" share of seats in elected bodies throughout the Nation.

To achieve that result through the currently fashionable mechanism of drawing majority-minority single-member districts, we have embarked upon what has been aptly characterized as a process of "creating racially `safe boroughs.'" *United States v. Dallas County Comm'n*, 850 F. 2d 1433, 1444 (CA11 1988) (Hill, J., concurring specially), cert. denied, 490 U. S. 1030 (1989). We have involved the federal courts, and indeed the Nation, in the enterprise of systematically dividing the country into electoral districts along racial lines—an enterprise of segregating the races into political homelands that

candidate. See 478 U. S., at 100 (opinion concurring in judgment). The splintering of opinions in *Gingles* on this point has produced, at best, "uncertainty," *Overton v. Austin*, 871 F. 2d 529, 538 (CA5 1989), and has allowed bivariate regression analysis—that is, an analysis that measures merely the correlation between race and candidate preference and that does not directly control for other factors—to become the norm for determining cohesion in vote dilution cases. See *id.*, at 539. But cf. *League of United Latin American Citizens v. Clements*, 999 F. 2d 831, 850-851 (CA5 1993), cert. denied, 510 U. S. ___ (1994).

HOLDER v. HALL

amounts, in truth, to nothing short of a system of “political apartheid.” *Shaw*, 509 U. S., at ___ (slip op., at 16). See also *id.*, at ___ (slip op., at 26) (noting that racial gerrymandering “may balkanize us into competing racial factions”). Blacks are drawn into “black districts” and given “black representatives”; Hispanics are drawn into Hispanic districts and given “Hispanic representatives”; and so on. Worse still, it is not only the courts that have taken up this project. In response to judicial decisions and the promptings of the Justice Department, the States themselves, in an attempt to avoid costly and disruptive Voting Rights Act litigation, have begun to gerrymander electoral districts according to race. That practice now promises to embroil the courts in a lengthy process of attempting to undo, or at least to minimize, the damage wrought by the system we created. See, e. g., *Shaw, supra*; *Hays v. Louisiana*, 839 F. Supp. 1188 (WD La. 1993), appeal pending, No. 93-1539.

The assumptions upon which our vote dilution decisions have been based should be repugnant to any nation that strives for the ideal of a color-blind Constitution. “The principle of equality is at war with the notion that District A must be represented by a Negro, as it is with the notion that District B must be represented by a Caucasian, District C by a Jew, District D by a Catholic, and so on.” *Wright v. Rockefeller*, 376 U. S. 52, 66 (1964) (Douglas, J., dissenting). Despite Justice Douglas' warning sounded 30 years ago, our voting rights decisions are rapidly progressing towards a system that is indistinguishable in principle from a scheme under which members of different racial groups are divided into separate electoral registers and allocated a proportion of political power on the basis of race. Cf. *id.*, at 63-66. Under our jurisprudence, rather than requiring registration on racial rolls and dividing power purely on a population basis, we have simply

HOLDER v. HALL

resorted to the somewhat less precise expedient of drawing geographic district lines to capture minority populations and to ensure the existence of the “appropriate” number of “safe minority seats.”

That distinction in the practical implementation of the concept, of course, is immaterial.¹⁴ The basic premises underlying our system of safe minority districts and those behind the racial register are the same: that members of the racial group must think alike and that their interests are so distinct that the group must be provided a separate body of representatives in the legislature to voice its unique point of view. Such a “system, by whatever name it is called, is a divisive force in a community, emphasizing differences between candidates and voters that are irrelevant.” *Id.*, at 66. Justice Douglas correctly predicted the results of state sponsorship of such a theory of representation: “When racial or religious lines are drawn by the State, . . . antagonisms that relate to race or to religion rather than to political issues are generated; communities seek not the best representative but the best racial or religious partisan.” *Id.*, at 67. In short, few devices could be better designed to exacerbate racial tensions than the consciously segregated districting system currently being constructed in the name of the Voting Rights Act.

As a practical political matter, our drive to segregate political districts by race can only serve to deepen racial divisions by destroying any need for voters or candidates to build bridges between racial

¹⁴Cf. Lijphart, Proportionality by Non-PR Methods: Ethnic Representation in Belgium, Cyprus, Lebanon, New Zealand, West Germany, and Zimbabwe, in *Electoral Laws and Their Political Consequences* 113, 116 (B. Grofman & A. Lijphart eds. 1986) (describing methods other than separate electoral registers to allocate political power on the basis of ethnicity or race).

HOLDER v. HALL

groups or to form voting coalitions. “Black-preferred” candidates are assured election in “safe black districts”; white-preferred candidates are assured election in “safe white districts.” Neither group needs to draw on support from the other's constituency to win on election day. As one judge described the current trend of voting rights cases: “We are bent upon polarizing political subdivisions by race. The arrangement we construct makes it unnecessary, and probably unwise, for an elected official from a white majority district to be responsive at all to the wishes of black citizens; similarly, it is politically unwise for a black official from a black majority district to be responsive at all to white citizens.” *Dallas County Comm'n*, 850 F.2d, at 1444 (Hill, J., concurring specially).

As this description suggests, the system we have instituted affirmatively encourages a racially based understanding of the representative function. The clear premise of the system is that geographic districts are merely a device to be manipulated to establish “black representatives” whose real constituencies are defined, not in terms of the voters who populate their districts, but in terms of race. The “black representative's” function, in other words, is to represent the “black interest.” Cf. *Shaw, supra*, at ___ (slip op., at 18) (recognizing that systems that “classify and separate voters by race” threaten “to undermine our system of representative democracy by signaling to elected officials that they represent a particular racial group rather than their constituency as a whole”).

Perhaps not surprisingly, the United States has now adopted precisely this theory of racial group representation, as the arguments advanced in another case decided today, *Johnson v. De Grandy*, - post, should show. The case involved a claim that an apportionment plan for the Florida Legislature should have provided another Hispanic district in Dade

HOLDER v. HALL

County. Florida responded to the claim of vote dilution by arguing that the plan already provided Dade County Hispanics with seats in proportion to their numbers. According to the Solicitor General, this claim of proportionality should have been evaluated, not merely on the basis of the population in the Dade County area where the racial gerrymandering was alleged to have occurred, but on a statewide basis. It did not matter, in the Solicitor General's view, that Hispanic populations elsewhere in the State could not meet the *Gingles* geographic compactness test, see 478 U. S., at 50, and thus could not possibly have controlled districts of their own. After all, the Solicitor General reasoned, the Hispanic legislators elected from Hispanic districts in Dade County would represent, not just the interests of the Dade County Hispanics, but the interests of all the Hispanics in the State. Brief for United States in *Johnson v. De Grandy*, O. T. 1993, No. 92-519, p. 20. As the argument shows, at least some careful observers have recognized the racial gerrymandering in our vote dilution cases for what it is: a slightly less precise mechanism than the racial register for allocating representation on the basis of race.

While the results we have already achieved under the Voting Rights Act might seem bad enough, we should recognize that our approach to splintering the electorate into racially designated single-member districts does not by any means mark a limit on the authority federal judges may wield to rework electoral systems under our Voting Rights Act jurisprudence. On the contrary, in relying on single-member districting schemes as a touchstone, our cases so far have been somewhat arbitrarily limited to addressing the interests of minority voters who are sufficiently geographically compact to form a majority in a single-member district. See *Gingles, supra*, at 49-50. There

HOLDER v. HALL

is no reason *a priori*, however, that our focus should be so constrained. The decision to rely on single-member geographic districts as a mechanism for conducting elections is merely a political choice—and one that we might reconsider in the future. Indeed, it is a choice that has undoubtedly been influenced by the adversary process: in the cases that have come before us, plaintiffs have focused largely upon attacking multimember districts and have offered single-member schemes as the benchmark of an “undiluted” alternative.

But as the destructive effects of our current penchant for majority-minority districts become more apparent, cf. *Shaw, supra*, courts will undoubtedly be called upon to reconsider adherence to geographic districting as a method for ensuring minority voting power. Already, some advocates have criticized the current strategy of creating majority-minority districts and have urged the adoption of other voting mechanisms—for example, cumulative voting¹⁵ or a system using transferable votes¹⁶—that can produce

¹⁵Under a cumulative voting scheme, a system commonly used in corporations to protect the interests of minority shareholders, see R. Clark, *Corporate Law* §9.1.3, pp. 361–366 (1986), each voter has as many votes as there are posts to be filled, and the voter may cast as many of his votes as he wishes for a single candidate. The system thus allows a numerical minority to concentrate its voting power behind a given candidate without requiring that the minority voters themselves be concentrated into a single district. For a complete description of the mechanics of cumulative voting, see Zimmerman, *The Federal Voting Rights Act and Alternative Election Systems*, 19 Wm. & Mary L. Rev. 621, 654–657 (1978).

¹⁶A system utilizing transferable votes is designed to ensure proportional representation with “mathematical exactness.” *Id.*, at 640. Under such a system, each voter rank orders his choices of candidates. To win, a candidate

HOLDER v. HALL

proportional results without requiring division of the electorate into racially segregated districts. Cf., e. g., Guinier 14-15, 94-101; Howard & Howard 1660; Karlan, Maps and Misreadings: The Role of Geographic Compactness in Racial Vote Dilution Litigation, 24 Harv. Civ. Rights-Civ. Lib. L. Rev. 173, 174-175, 231-236 (1989) (hereinafter Karlan); Taebel, Engstrom, & Cole, Alternative Electoral Systems As Remedies for Minority Vote Dilution, 11 Hamline J. of Public Law & Policy 19 (1990); Note, Reconciling the Right to Vote with the Voting Rights Act, 92 Colum. L. Rev. 1810, 1857-1865 (1992).

Such changes may seem radical departures from the electoral systems with which we are most familiar. Indeed, they may be unwanted by the people in the several States who purposely have adopted districting systems in their electoral laws. But nothing in our present understanding of the Voting Rights Act places a principled limit on the authority of federal courts that would prevent them from instituting a system of cumulative voting as a remedy under §2, or even from establishing a more elaborate mechanism for securing proportional representation based on transferable votes.¹⁷ As

must receive a fixed quota of votes, which may be set by any of several methods. Ballots listing a given candidate as the voter's first choice are counted for that candidate until the candidate has secured the quota of votes necessary for election. Remaining first-choice ballots for that candidate are then transferred to another candidate, usually the one listed as the second choice on the ballot. See *id.*, at 640-642. Like cumulative voting, the system allows a minority group to concentrate its voting power without requiring districting, and it has the additional advantage of ensuring that "surplus" votes are transferred to support the election of the minority voters' next preference.

¹⁷Such methods of voting cannot be rejected out-of-hand

HOLDER v. HALL

some Members of the Court have already recognized, geographic districting is not a requirement inherent in our political system. See, e. g., *Davis v. Bandemer*, 478 U. S. 109, 159 (1986) (O'CONNOR, J., concurring in judgment) (“Districting itself represents a middle ground between winner-take-all statewide elections and proportional representation for political parties”); *id.*, at 160 (noting that our current practice of accepting district-based elections as a given is simply a “political judgment”). Rather, districting is merely another political choice made by the citizenry in the drafting of their state constitutions. Like other political choices concerning electoral systems and models of representation, it too is presumably subject to a judicial override if it comes into conflict with the theories of representation and effective voting that we may develop under the Voting Rights Act.

Indeed, the unvarnished truth is that all that is required for districting to fall out of favor is for Members of this Court to further develop their political thinking. We should not be surprised if voting rights advocates encourage us to “revive our political imagination,” Guinier, 14 *Cardozo L. Rev.*, at 1137, and to consider “innovative and nontraditional

as bizarre concoctions of Voting Rights Act plaintiffs. The system of transferable votes was a widely celebrated, although unsuccessful, proposal for English parliamentary reform in the last century. See generally T. Hare, *Election of Representatives* (4th ed. 1873); J.S. Mill, *Considerations on Representative Government* (1861). And while it is an oddity in American political history, cumulative voting in an at-large system has been employed in some American jurisdictions. See Weaver, *Semi-Proportional and Proportional Representation Systems in the United States*, in *Choosing an Electoral System* 191, 198 (A. Lijphart & B. Grofman eds. 1984); Hyneman & Morgan, *Cumulative Voting in Illinois*, 32 *Ill. L. Rev.* 12 (1937). See also *Ill. Const.*, Art. IV, §§7, 8 (1870).

HOLDER v. HALL

remedies” for vote dilution, Karlan 221, for under our Voting Rights Act jurisprudence, it is only the limits on our “political imagination” that place restraints on the standards we may select for defining undiluted voting systems. Once we candidly recognize that geographic districting and other aspects of electoral systems that we have so far placed beyond question are merely political choices, those practices, too, may fall under suspicion of having a dilutive effect on minority voting strength. And when the time comes to put the question to the test, it may be difficult indeed for a Court that, under *Gingles*, has been bent on creating roughly proportional representation for geographically compact minorities to find a principled reason for holding that a geographically dispersed minority cannot challenge districting itself as a dilutive electoral practice. In principle, cumulative voting and other non-district-based methods of effecting proportional representation are simply more efficient and straightforward mechanisms for achieving what has already become our tacit objective: roughly proportional allocation of political power according to race.

At least one court, in fact, has already abandoned districting and has opted instead for cumulative voting on a county-wide basis as a remedy for a Voting Rights Act violation. The District Court for the District of Maryland recently reasoned that, compared to a system that divides voters into districts according to race, “[c]umulative voting is less likely to increase polarization between different interests,” and that it “will allow the voters, by the way they exercise their votes, to ‘district’ themselves,” thereby avoiding government involvement in a process of segregating the electorate. *Cane v. Worcester County*, 847 F. Supp. 369, 373 (Md. 1994). Cf. Guinier, 14 *Cardozo L. Rev.*, at 1135-1136 (proposing a similar analysis of the benefits of cumulative voting); Karlan 236 (same). If such a system can be

HOLDER v. HALL

ordered on a county-wide basis, we should recognize that there is no limiting principle under the Act that would prevent federal courts from requiring it for elections to state legislatures as well.

Such is the current state of our understanding of the Voting Rights Act. That our reading of the Act has assigned the federal judiciary the task of making the decisions I have described above should suggest to the Members of this Court that something in our jurisprudence has gone awry.¹⁸ We would be mighty Platonic guardians indeed if Congress had granted us the authority to determine the best form of local government for every county, city, village, and town in America. But under our constitutional system, this Court is not a centralized politburo appointed for life to dictate to the provinces the “correct” theories of democratic representation, the “best” electoral systems for securing truly “representative” government, the “fairest” proportions of minority political influence, or, as respondents would have us hold today, the “proper” sizes for local governing bodies. We should be cautious in interpreting any Act of Congress to grant us power to make such determinations.

JUSTICE BLACKMUN suggests that, if we were to interpret the Act to allow challenges to the size of governmental bodies under §2, the Court's power to

¹⁸JUSTICE STEVENS suggests that the discussion above outlines policy arguments best addressed to Congress. See *post*, at 1. In one sense, that is precisely my point. The *issues* I have discussed above involve policy decisions that are matters best left to Congress. Our interpretation of the Voting Rights Act, however, has required federal courts to take over the policymaking role in the area of voting rights and has forced judges to make decisions on matters beyond the normal sphere of judicial competence.

HOLDER v. HALL

determine the structure that local governing bodies must take would be bounded by the constraints that local customs provide in the form of benchmarks. *Post*, at 7. But as JUSTICE O'CONNOR rightly points out, such benchmarks are themselves arbitrarily selected and would provide no assured limits on judicial power. *Ante*, at 4-6. In my view, the local standards to which JUSTICE BLACKMUN points today are little different from the various standards to which the Court has resorted in the past as touchstones of undiluted voting systems. The appeal to such standards, which are necessarily arbitrarily chosen, should not serve to obscure the assumption in the Court's vote dilution jurisprudence of a sweeping authority to select the electoral systems to be used by every governing body in each of the 50 States, and to do so based upon little more than the passing preference of five Members of this Court for one political theory over another.

A full understanding of the authority that our current interpretation of the Voting Rights Act assigns to the federal courts, and of the destructive effects that our exercise of that authority is presently having upon our body politic, compels a single conclusion: a systematic reexamination of our interpretation of the Act is required.

Section 2(a) of the Voting Rights Act provides that “[n]o voting qualification or prerequisite to voting or standard, practice, or procedure shall be imposed or applied by any State or political subdivision in a manner which results in a denial or abridgement of the right of any citizen of the United States to vote” on account of race, color, or membership in one of the language minority groups defined in the Act. 42 U. S. C. §1973. Respondents contend that the terms “standard, practice, or procedure” should extend to cover the size of a governmental body. An

HOLDER v. HALL

examination of the text of §2 makes it clear, however, that the terms of the Act do not reach that far; indeed, the terms of the Act do not allow many of the challenges to electoral mechanisms that we have permitted in the past. Properly understood, the terms “standard, practice, or procedure” in §2(a) refer only to practices that affect minority citizens' access to the ballot. Districting systems and electoral mechanisms that may affect the “weight” given to a ballot duly cast and counted are simply beyond the purview of the Act.

In determining the scope of §2(a), as when interpreting any statute, we should begin with the statutory language. See *Connecticut Nat. Bank v. Germain*, 503 U. S. ___, ___ (1992) (slip op., at 5). Under the plain terms of the Act, §2(a) covers only a defined category of state actions. Only “voting qualification[s],” “prerequisite[s] to voting,” or “standard[s], practice[s], or procedure[s]” are subject to challenge under the Act. The first two items in this list clearly refer to conditions or tests applied to regulate citizens' access to the ballot. They would cover, for example, any form of test or requirement imposed as a condition on registration or on the process of voting on election day.

Taken in isolation, the last grouping of terms—“standard, practice, or procedure”—may seem somewhat less precise. If we give the words their ordinary meanings, however—for they have no technical significance and are not defined in the Act—they would not normally be understood to include the size of a local governing body. Common sense indicates that the size of a governing body and other aspects of government structure do not comfortably fit within the terms “standard, practice, or procedure.” Moreover, we need not simply treat the terms in isolation; indeed, it would be a mistake to do

HOLDER v. HALL

so. Cf. *United Savings Assn. of Texas v. Timbers of Inwood Forest Associates, Ltd.*, 484 U. S. 365, 371 (1988). Reading the words in context strongly suggests that §2(a) must be understood as referring to any standard, practice, or procedure *with respect to voting*. And thus understood, the terms of the section would not extend to the size of a governmental body; we would not usually describe the size or form of a governing authority as a “practice” or “procedure” concerning voting.

But under our precedents, we have already stretched the terms “standard, practice, or procedure” beyond the limits of ordinary meaning. We have concluded, for example, that the choice of a certain set of district lines is a “procedure,” or perhaps a “practice,” concerning voting subject to challenge under the Act, see *Grove*, 507 U. S., at ___ (slip op., at 14), even though the drawing of a given set of district lines has nothing to do with the basic process of allowing a citizen to vote—that is, the process of registering, casting a ballot, and having it counted. Similarly, we have determined that the use of multimember districts, rather than single-member districts, can be challenged under the Act. See *Gingles*, 478 U. S., at 46-51. Undoubtedly, one of the critical reasons we have read §2 to reach such districting decisions is that the choice of one districting system over another can affect a minority group's power to control seats in the elected body. See *ibid.* In that respect, however, the districting practices we have treated as subject to challenge under the Act are essentially similar to choices concerning the size of a governing authority. Just as drawing district lines one way rather than another, or using one type of districting system rather than another, can affect the ability of a minority group to control seats, so can restricting the number of seats that are available. And if *how* districts are drawn is a “practice” concerning voting, why not conclude that

HOLDER v. HALL

how many districts are drawn is a “practice” as well?

To be sure, a distinction can be made between the size of a local governing body and a districting mechanism. After all, we would ordinarily think that the size of a government has greater independent significance for the functioning of the governmental body than the choice of districting systems apportioning representation. Interfering with the form of government, therefore, might appear to involve a greater intrusion on state sovereignty. But such distinctions between the size of a governing body and other potential “voting practices” do not, at bottom, depend upon how closely each is related to “voting,” and thus they are not rooted in any way in the text of §2(a). On the contrary, while it may seem obvious that the size of a government is not within the reach of the Act, if we look to the text of the statute for the limiting principle that confines the terms “standard, practice or procedure” and excludes government size from their reach, we must conclude that the only line drawn in §2 excludes many “practices” that we have already decided are subject to challenge under the Act.

If we return to the Act to reexamine the terms setting out the actions regulated by §2, a careful reading of the statutory text will reveal a good deal more about the limitations on the scope of the section than suggested above. The terms “standard, practice, or procedure” appear to have been included in §2 as a sort of catch-all provision. They seem phrased with an eye to eliminating the possibility of evasion.¹⁹ Nevertheless, they are catch-all terms that

¹⁹Cf. *South Carolina v. Katzenbach*, 383 U. S. 301, 335 (1966) (noting that “Congress knew that some of the States . . . had resorted to the extraordinary stratagem of contriving new rules of various kinds for the sole purpose of perpetuating voting discrimination in the face of adverse federal court decrees” and that “Congress had

HOLDER v. HALL

round out a list, and a sensible and long-established maxim of construction limits the way we should understand such general words appended to an enumeration of more specific items. The principle of *ejusdem generis* suggests that such general terms should be understood to refer to items belonging to the same class that is defined by the more specific terms in the list. See, e. g., *Cleveland v. United States*, 329 U. S. 14, 18 (1946).

Here, the specific items described in §2(a) (“voting qualification[s]” and “prerequisite[s] to voting”) indicate that Congress was concerned in this section with any procedure, however it might be denominated, that regulates citizens' access to the ballot—that is, any procedure that might erect a barrier to prevent the potential voter from casting his vote. In describing the laws that would be subject to §2, Congress focused attention upon provisions regulating the interaction between the individual voter and the voting process—on hurdles the citizen might have to cross in the form of “prerequisites” or “qualifications.” The general terms in the section are most naturally understood, therefore, to refer to any methods for conducting a part of the voting process that might similarly be used to interfere with a citizen's ability to cast his vote, and they are undoubtedly intended to ensure that the entire voting process—a process that begins with registration and includes the casting of a ballot and having the ballot counted—is covered by the Act. Cf. *infra*, at 30. Simply by including general terms in §2(a) to ensure the efficacy of the restriction imposed, Congress should not be understood to have expanded the scope of the restriction beyond the logical limits implied in the specific terms of the statute. Cf. *Cleveland, supra*, at 18 (“Under the *ejusdem generis*

reason to suppose that these States might try similar maneuvers in the future”).

HOLDER v. HALL

rule of construction the general words are confined to the class and may not be used to enlarge it”).

Moreover, it is not only in the terms describing the practices regulated under the Act that §2(a) focuses on the individual voter. The section also speaks only in the singular of the right of “any citizen” to vote. Giving the terms “standard, practice, or procedure” an expansive interpretation to reach potentially dilutive practices, however, would distort that focus on the individual, for a vote dilution claim necessarily depends on the assertion of a group right. Cf. *Bandemer*, 478 U. S., at 150–151 (O’CONNOR, J., concurring in judgment). At the heart of the claim is the contention that the members of a group collectively have been unable to exert the influence that their numbers suggest they might under an alternative system. Such a group right, however, finds no grounding in the terms of §2(a).

Of course, the scope of the right that *is* protected under the Act can provide further guidance concerning the meaning of the terms “standard, practice, or procedure.” Under the terms of the Act, only a “standard, practice, or procedure” that may result in the “denial or abridgement of the right . . . to vote” is within the reach of §2(a). But nothing in the language used in §2(a) to describe the protection provided by the Act suggests that in protecting the “right to vote,” the section was meant to incorporate a concept of voting that encompasses a concern for the “weight” or “influence” of votes. On the contrary, the definition of the terms “vote” and “voting” in §14(c)(1) of Act focuses precisely on access to the ballot. Thus, §14(c)(1) provides that the terms “vote” and “voting” shall encompass any measures necessary to ensure “registration” and any “other action required by law prerequisite to voting, casting a ballot, and having such ballot counted properly and included in the appropriate totals of votes cast.” 42 U. S. C. §1973l(c)(1).

HOLDER v. HALL

It is true that §14(c)(1) also states that the term “voting” “include[s] all action necessary to make a vote *effective*,” *ibid.* (emphasis added), and the Court has seized on this language as an indication that Congress intended the Act to reach claims of vote dilution. See *Allen*, 393 U. S., at 566. But if the word “effective” is not plucked out of context, the rest of §14(c)(1) makes clear that the actions Congress deemed necessary to make a vote “effective” were precisely the actions listed above: registering, satisfying other voting prerequisites, casting a ballot, and having it included in the final tally of votes cast. These actions are described in the section only as examples of the steps necessary to make a vote effective. See 42 U. S. C. §1973(c)(1). And while the list of such actions is not exclusive, the nature of all the examples that are provided demonstrates that as far as the Act is concerned, an “effective” vote is merely one that has been cast and fairly counted. See *id.*, at 590, n. 7 (Harlan, J., concurring in part and dissenting in part).

Reading the Act's prohibition of practices that may result in a “denial or abridgement of the right . . . to vote” as protecting only access to the ballot also yields an interpretation that is consistent with the Court's construction of virtually identical language in the Fifteenth Amendment. The use of language taken from the Amendment suggests that the section was intended to protect a “right to vote” with the same scope as the right secured by the Amendment itself; certainly, no reason appears from the text of the Act for giving the language a broader construction in the statute than we have given it in the Constitution. The Court has never decided, however, whether the Fifteenth Amendment should be understood to protect against vote “dilution.” See *Voinovich v. Quilter*, 507 U. S. ___, ___ (1993) (slip op., at 11). See also *Beer v. United States*, 425 U. S. 130, 142, n. 14 (1976) (noting that there is no decision of this Court

HOLDER v. HALL

holding a legislative apportionment plan violative of the Fifteenth Amendment).²⁰

While the terms of §2(a) thus indicate that the section focuses only on securing access to the ballot, it might be argued that reenactment of §2 in 1982 should be understood as an endorsement of the interpretation contained in cases such as *Allen* that the terms “standard, practice, or procedure” were meant to reach potentially dilutive practices. See *Lorillard v. Pons*, 434 U. S. 575, 580-581 (1978). It is true that we generally will assume that reenactment of specific statutory language is intended to include a “settled judicial interpretation” of that language. *Pierce v. Underwood*, 487 U. S. 552, 567 (1988). And

²⁰Indeed, in *Mobile v. Bolden*, 446 U. S. 55 (1980), a plurality of the Court concluded that the Fifteenth Amendment did not address concerns of dilution at all. See *id.*, at 65. Cf. *id.*, at 84, n. 3 (STEVENS, J., concurring in judgment) (noting that the plurality had concluded that the Fifteenth Amendment “applies only to practices that directly affect access to the ballot and hence is totally inapplicable to the case at bar”).

Contrary to JUSTICE STEVENS' suggestions, *post*, at 2, 6, *Gomillion v. Lightfoot*, 364 U. S. 339 (1960), does not indicate that the Fifteenth Amendment, in protecting the right to vote, incorporates a concern for anything beyond securing access to the ballot. The *Gomillion* plaintiffs' claims centered precisely on access: their complaint was not that the weight of their votes had been diminished in some way, but that the boundaries of a city had been drawn to prevent blacks from voting in municipal elections altogether. *Id.*, at 341. *Gomillion* thus “maintains the distinction between an attempt to exclude Negroes totally from the relevant constituency, and a statute that permits Negroes to vote but which uses the gerrymander to contain the impact of Negro suffrage.” *Allen v. State Bd. of Elections*, 393 U. S. 544, 589 (1969) (Harlan, J., concurring in part and dissenting in part).

HOLDER v. HALL

while §2 was amended in 1982, the amended section did retain the same language that had appeared in the original Act regulating “standard[s], practice[s], or procedure[s].”²¹ But it was hardly well settled in 1982 that *Allen's* broad reading of the terms “standard, practice, or procedure” in §5 would set the scope of §2 as a provision reaching claims of vote dilution.

On the contrary, in 1980 in *Mobile v. Bolden*, 446 U. S. 55, a plurality of the Court construed §2 in a manner flatly inconsistent with the understanding that those terms were meant to reach dilutive practices. Emphasizing that the section tracked the language of the Fifteenth Amendment by prohibiting the use of practices that might “deny or abridge the right . . . to vote,” the *Bolden* plurality determined that §2 was “intended to have an effect no different from that of the Fifteenth Amendment itself.” *Id.*, at 61. In the plurality's view, however, the Fifteenth Amendment did not extend to reach dilution claims; its protections were satisfied as long as members of racial minorities could “register and vote without hindrance.” *Id.*, at 65. *Bolden* remained the last word from this Court interpreting §2 at the time the section was amended in 1982. Cf. *Rogers v. Lodge*, 458 U. S. 613, 619, n. 6 (1982). Thus, the reenactment in the amended section of the same language covering any “standard, practice, or procedure” and the retention of virtually identical language protecting against the “denial or abridgement of the right . . . to vote” can hardly be understood as an endorsement of a broad reading of the section as a provision reaching claims of vote

²¹The original §2 provided that no “standard, practice, or procedure” should be imposed or applied “to deny or abridge the right . . . to vote.” Pub. L. 89-110, §2, 79 Stat. 437.

dilution.²²

Finally, as our cases have shown, reading §2(a) to reach beyond laws that regulate in some way citizens' access to the ballot turns the section into a command for courts to evaluate abstract principles of political theory in order to develop rules for deciding which votes are “diluted” and which are not. See generally *supra*, at 5-13. Common sense would suggest that we should not lightly interpret the Act to require courts to address such matters so far outside the normal bounds of judicial competence, and the mere use of three more general terms at the end of the list of regulated practices in §2(a) cannot properly be understood to incorporate such an expansive command into the Act.

Properly understood, therefore, §2(a) is a provision designed to protect access to the ballot, and in

²²If anything, applying the *Lorillard* principle of construction might suggest that, by reenacting virtually the same language derived from the Fifteenth Amendment to define the basic interest protected by the Act, Congress intended to preserve the limitation that the *Bolden* plurality found implicit in that language. It is clear from the terms of the amendments passed in 1982 that where Congress sought to alter the understanding of the Act announced in *Bolden*, it did so explicitly in the text of the statute. As I explain more fully, *infra*, at 35, the 1982 amendments modified §2 to eliminate the requirement under *Bolden* that §2 plaintiffs, like plaintiffs under the Fifteenth Amendment, show that a challenged practice was adopted with a discriminatory *intent*, see 446 U. S., at 62-63, and replaced that test with specific language in §2(b) setting a standard based simply on discriminatory *results*. See Pub. L. 97-205, §3, 96 Stat. 134. Had Congress intended to alter the understanding that §2 protects a concept of the “right to vote” that does not extend to prohibit vote dilution, it likely would have addressed that aspect of *Bolden* explicitly as well.

HOLDER v. HALL

regulating “standard[s], practice[s], and procedure[s],” it reaches only “those state laws that [relate to] either voter qualifications or the manner in which elections are conducted.” *Allen*, 393 U. S., at 591 (Harlan, J., concurring in part and dissenting in part). The section thus covers all manner of registration requirements, the practices surrounding registration (including the selection of times and places where registration takes place and the selection of registrars), the locations of polling places, the times polls are open, the use of paper ballots as opposed to voting machines, and other similar aspects of the voting process that might be manipulated to deny any citizen the right to cast a ballot and have it properly counted. The section does not cover, however, the choice of a multimember over a single-member districting system or the selection of one set of districting lines over another, or any other such electoral mechanism or method of election that might reduce the weight or influence a ballot may have in controlling the outcome of an election.

Of course, this interpretation of the terms “standard, practice, or procedure” effectively means that §2(a) does not provide for any claims of what we have called vote “dilution.” But that is precisely the result suggested by the text of the statute. Section 2(a) nowhere uses the term “vote dilution” or suggests that its goal is to ensure that votes are given their proper “weight.” And an examination of §2(b) does not suggest any different result. It is true that in construing §2 to reach vote dilution claims in *Thornburg v. Gingles*, 478 U. S. 30 (1986), the Court relied largely on the gloss on §2(b) supplied in the legislative history of the 1982 amendments to the Act. See *id.*, at 43-46. But the text of §2(b) supplies a weak foundation indeed for reading the Act to reach such claims.

As the Court concluded in *Gingles*, the 1982

HOLDER v. HALL

amendments incorporated into the Act, and specifically into §2(b), a “results” test for measuring violations of §2(a). That test was intended to replace, for §2 purposes, the “intent” test the Court had announced in *Bolden* for voting rights claims under §2 of the Voting Rights Act and under the Fourteenth and Fifteenth Amendments. Section 2(a) thus prohibits certain state actions that may “resul[t] in a denial or abridgement” of the right to vote, and §2(b) incorporates virtually the exact language of the “results test” employed by the Court in *White v. Regester*, 412 U. S. 755 (1973), and applied in constitutional voting rights cases before our decision in *Bolden*. The section directs courts to consider whether “based on the totality of circumstances,” a state practice results in members of a minority group “hav[ing] less opportunity than other members of the electorate to participate in the political process and to elect representatives of their choice.” 42 U. S. C. §1973(b). Cf. *White*, *supra*, at 766; *Whitcomb v. Chavis*, 403 U. S. 124, 149 (1971).

But the mere adoption of a “results” test, rather than an “intent” test, says nothing about the *type* of state laws that may be challenged using that test. On the contrary, the type of state law that may be challenged under §2 is addressed explicitly in §2(a). As we noted in *Chisom v. Roemer*, 501 U. S. 380 (1991), §§2(a) and 2(b) address distinct issues. While §2(a) defines and explicitly limits the type of voting practice that may be challenged under the Act, §2(b) provides only “the test for determining the legality of such a practice.” *Id.*, at 391. Thus, as an initial matter, there is no reason to think that §2(b) could serve to expand the scope of the prohibition in §2(a), which as I described above, does not extend by its terms to electoral mechanisms that might have a dilutive effect on group voting power.

Even putting that concern aside for the moment, it should be apparent that the incorporation of a results

HOLDER v. HALL

test into the amended section does not necessarily suggest that Congress intended to allow claims of vote dilution under §2. A results test is useful to plaintiffs whether they are challenging laws that restrict access to the ballot or laws that accomplish some diminution in the “proper weight” of a group's vote. Nothing about the test itself suggests that it is inherently tied to vote dilution claims. A law, for example, limiting the times and places at which registration can occur might be adopted with the purpose of limiting black voter registration, but it could be extremely difficult to prove the discriminatory intent behind such a facially neutral law. The results test would allow plaintiffs to mount a successful challenge to the law under §2 without such proof.

Moreover, nothing in the language §2(b) uses to describe the results test particularly indicates that the test was intended to be used under the Act for assessing claims of dilution. Section 2(b) directs courts to consider whether, under the “totality of circumstances,” members of a minority group “have less opportunity than other members of the electorate to participate in the political process and to elect representatives of their choice.” 42 U. S. C. §1973(b). The most natural reading of that language would suggest that citizens have an equal “*opportunity*” to participate in the electoral process and an equal “*opportunity*” to elect representatives when they have been given the same free and open access to the ballot as other citizens and their votes have been properly counted. The section speaks in terms of an opportunity—a chance—to participate and to elect, not an assured ability to attain any particular result. And since the ballot provides the formal mechanism for obtaining access to the political process and for electing representatives, it would seem that one who has had the same chance as others to register and to cast his ballot has had an

HOLDER v. HALL

equal opportunity to participate and to elect, whether or not any of the candidates he chooses is ultimately successful.

To be sure, the test in §2(b) could be read to apply to claims of vote dilution as well. But to conclude, for example, that a multimember districting system had denied a group of voters an equal opportunity to participate in the political process and to elect representatives, a court would have to embark on the extended project in political theory that I described above in Part I of this opinion. In other words, a court would have to develop some theory of the benchmark undiluted voting system that provides minorities with the “fairest” or most “equitable” share of political influence. Undoubtedly, a dizzying array of concepts of political equality might be described to aid in that task, and each could be used to attribute different values to different systems of election. See, e. g., Still, *Political Equality and Election Systems*, 91 *Ethics* 375 (1981).²³ But the statutory command to determine whether members of a minority have had an equal “opportunity . . . to participate in the political process and to elect representatives” provides no guidance concerning which one of the possible standards setting undiluted voting strength should be chosen over the others. And it would be contrary to common sense to read §2(b)'s reference to equal opportunity as a charter for federal courts to embark on the ambitious project of developing a theory of political equality to be imposed on the

²³See also Banzhaf, *Multi-Member Electoral Districts—Do They Violate the “One Man, One Vote” Principle*, 75 *Yale L. J.* 1309 (1966) (suggesting that how close different districting systems come to providing persons equal political “power” can be measured by comparing the statistical probability under each system that a person's vote will determine the election result). Cf. *Whitcomb*, 403 U. S., at 145, n. 23.

Nation.²⁴

It is true that one factor courts may consider under the results test might fit more comfortably with an interpretation of the Act that reaches vote dilution claims. Section 2(b) provides that “one circumstance” that may be considered in assessing the results test is the “extent to which members of a protected class have been elected to office.” 42 U. S. C. §1973(b). Obviously, electoral outcomes would be relevant to claims of vote dilution (assuming, of course, that control of seats has been selected as the measure of effective voting). But in some circumstances, results in recent elections might also be relevant for demonstrating that a particular

²⁴In addition, in one respect there is a significant tension between the terms of the results test and an interpretation of the Act that reaches vote dilution claims. Section 2(b) provides that a violation may be established where it is shown that members of a minority have less opportunity than other members of the electorate “to participate in the political process *and* to elect representatives of their choice.” 42 U. S. C. §1973(b) (emphasis added). We have held that any challenged “standard, practice, or procedure” must have *both* of these effects to violate the test outlined in §2(b). See *Chisom v. Roemer*, 501 U. S. 380, 397 (1991). It is not clear, however, that a potentially dilutive districting method can satisfy both prongs of the test. The primary effect of the choice of one districting system over another will be the direct and mathematically quantifiable impact that the system will have on a minority group's ability to control a given number of seats. But even if one assumes that a districting system may therefore be said to impair a group's “opportunity” to “elect representatives of its choice,” it is difficult to see how a districting system could be said to impair a group's opportunity to “participate in the political process,” at least if participation is understood to have any meaning distinct from controlling seats.

HOLDER v. HALL

practice concerning registration or polling has served to suppress minority voting. Better factors to consider would be figures for voter registration or turnout at the last election, broken down according to race. But where such data is not readily available, election results may certainly be “one circumstance” to consider in determining whether a challenged practice has resulted in denying a minority group access to the political process. The Act merely directs courts not to ignore such evidence of electoral outcomes altogether.

Moreover, the language providing that electoral outcomes may be considered as “one circumstance” in the results test is explicitly qualified by the provision in §2(b) that most directly speaks to the question whether §2 was meant to reach claims of vote dilution—and which suggests that dilution claims are not covered by the section. The last clause in the subsection states in unmistakable terms that “nothing in this section establishes a right to have members of a protected class elected in numbers equal to their proportion in the population.” 42 U. S. C. §1973(b). As four Members of the Court observed in *Gingles*, there is “an inherent tension” between this disclaimer of proportional representation and an interpretation of §2 that encompasses vote dilution claims. 478 U. S., at 84 (O’CONNOR, J., concurring in judgment). As I explained above, dilution claims, by their very nature, depend upon a mathematical principle. The heart of the claim is an assertion that the plaintiff group does not hold the “proper” number of seats. As a result, the principle for deciding the case must be supplied by an arithmetic ratio. Either the group has attained the “proper” number of seats under the current election system, or it has not.

By declaring that the section provides no right to proportional representation, §2(b) necessarily commands that the existence or absence of

HOLDER v. HALL

proportional electoral results should not become the deciding factor in assessing §2 claims. But in doing so, §2(b) removes from consideration the most logical ratio for assessing a claim of vote dilution. To resolve a dilution claim under §2, therefore, a court either must arbitrarily select a different ratio to represent the “undiluted” norm, a ratio that would have less intuitive appeal than direct proportionality, or it must effectively apply a proportionality test in direct contravention of the text of the Act²⁵—hence the “inherent tension” between the text of the Act and vote dilution claims. Given that §2 nowhere speaks in terms of “dilution,” an explicit disclaimer removing from the field of play the most natural deciding principle in dilution cases is surely a strong signal that such claims do not fall within the ambit of the Act.²⁶

²⁵As I discuss more fully below, our cases have pursued the latter option. See *infra*, at 49-56.

²⁶In *Johnson v. De Grandy*, *post*, the Court suggests that §2(b) disclaims only a guarantee of success for *minority candidates* and thus that it has nothing to say concerning remedial schemes designed to provide a minority group proportional control over seats. See *post*, at 16, n. 11. See also *post*, at 2 (KENNEDY, J., concurring in part and concurring in judgment). Minority control, of course, may or may not result in the election of minority candidates. The Court's reading of the disclaimer, in my view, distorts the obvious import of the provision. The clause rejecting a group's right to elect its own members in proportion to their numbers must be understood as a disclaimer of a minority group's right to proportional political power. Otherwise, in practical terms, the clause would be reduced to a nullity.

It should be clear that a system that gives a minority group proportional control effectively provides the “right” to elect a proportionate number of minority candidates that the Act disclaims. Whether that right is utilized by

HOLDER v. HALL

It is true that the terms “standard, practice, or procedure” in §5 of the Act have been construed to reach districting systems and other potentially dilutive electoral mechanisms, see, e. g., *Allen*, 393 U. S., at 569, and Congress has reenacted §5 subsequent to our decisions adopting that expansive interpretation. See, e. g., *United States v. Board of Comm'rs of Sheffield*, 435 U. S. 110, 134-135 (1978); *Georgia v. United States*, 411 U. S. 526, 533 (1973).

minority voters to elect minority candidates is a matter of the voters' choice. The *De Grandy* Court's position seems to be that the proviso is directed, not at a system intended to guarantee the *ability* to elect minority candidates in proportion to the minority's numbers, but only at a system that will *invariably guarantee* the election of a proportionate number of minority candidates. Only one system would fit that description: a system based on a racial register in which a quota of seats are set aside for members of a minority group. I think it would be preposterous to suggest that the disclaimer in §2(b) was intended solely to prohibit the use of such a system. Such a device has never, to my knowledge, been proposed in any voting rights case. Moreover, to the extent that the decisions in *White* and *Whitcomb* can inform our understanding of §2(b), they suggest that in expressing a concern that “proportionality” not be used as the measure of a voting rights violation, Congress was concerned with proportional electoral power, not merely proportional election of minority candidates. See, e. g., *Whitcomb*, 403 U. S., at 153 (rejecting the “failure of [the minority group] to *have legislative seats* in proportion to its population” as a sufficient basis for a claim) (emphasis added). The proviso has been understood in the past simply as a disclaimer of a right to proportional representation, see, e. g., *Gingles*, 478 U. S., at 84-86, 94 (O'CONNOR, J., concurring in judgment), and I think that understanding is correct.

HOLDER v. HALL

Nevertheless, the text of the section suggests precisely the same focus on measures that relate to access to the ballot that appears in §2. Section 5 requires covered jurisdictions to obtain preclearance for a change in “any voting qualification or prerequisite to voting, or standard, practice, or procedure with respect to voting.” 42 U. S. C. §1973c. As in §2, the specific terms in the list of regulated state actions describe only laws that would limit access to the ballot. Moreover, §5 makes the focus on the individual voter and access to the voting booth even more apparent as the section goes on to state that “no person shall be denied the right to vote *for failure to comply* with such qualification, prerequisite, standard, practice, or procedure.” 42 U. S. C. §1973c (emphasis added). This command makes it explicit that in regulating standards, practices, or procedures with respect to voting, “Congress was clearly concerned with changes in procedure with which voters could *comply*.” *Allen*, 393 U. S., at 587 (Harlan, J., concurring in part and dissenting in part). But it should be obvious that a districting system, or any other potentially dilutive mechanism for that matter, is not something with which a voter can comply. As is the case with §2, §5's description of the terms “standard, practice, or procedure” thus suggests a focus on rules that regulate the individual voter's ability to register and cast a ballot, not a more abstract concern with the effect that various electoral systems might have on the “weight” of the votes cast by a group that constitutes a numerical minority in the electorate.

In my view, the tension between the terms of the Act and the construction we have placed on §5 at the very least suggests that our interpretation of §5 should not be adopted wholesale to supply the meaning of the terms “standard, practice, or procedure” under §2. An expansive construction of §5 was well established in 1980, yet a plurality of the

HOLDER v. HALL

Court in *Bolden*, after focusing on the terms of the Act, did not adopt a similarly expansive construction of §2. Rather, the *Bolden* plurality concluded that §2 should be strictly limited to have the same reach as the Fifteenth Amendment, which the plurality interpreted as addressing only matters relating to access to the ballot. See *Bolden*, 446 U. S., at 61, 65. I would reach a similar result here. Where a careful reading of the language of §2 dictates a narrow interpretation of the section, there is no reason for transplanting our interpretation of the terms of §5—an interpretation that I believe is in tension with the text of §5 itself—to another section of the Act.²⁷

²⁷I need not decide in this case whether I would overrule our decisions construing the terms “standard, practice, or procedure” in §5; the challenge here involves only §2. Although in my view our construction of §5 may well be incorrect as a matter of first impression, *stare decisis* would suggest that such an error in prior decisions may not in itself justify overruling settled precedent. Determining whether to abandon prior decisions requires weighing a multitude of factors, one of the most important of which is the extent to which the decisions in question have proved unworkable. Cf. *infra*, at 48–49. In that regard, while the practical differences in the application of §2 and §5 that JUSTICE KENNEDY points out, see *ante*, at 8–9, would not, in my view, suggest as an original matter that the same terms in the two sections should be read to have different meanings, JUSTICE KENNEDY’s observations might suggest that different considerations would have a bearing on the question whether our past interpretations should be abandoned in the §5 and §2 contexts. Indeed, in the §5 context they might suggest a contrary conclusion to the result I reach under §2. See *infra*, at 49–59. That, however, is a question for another day.

HOLDER v. HALL

From the foregoing, it should clear that, as far as the text of the Voting Rights Act is concerned, “§2 does not speak in terms of ‘vote dilution.’” *Gingles*, 478 U. S., at 87 (O’CONNOR, J., concurring in judgment). One might wonder, then, why we have consistently concluded that “[w]e know that Congress intended to allow vote dilution claims to be brought under §2.” *Id.*, at 84. The juxtaposition of the two statements surely makes the result in our cases appear extraordinary, since it suggests a sort of statutory construction through divination that has allowed us to determine that Congress “really meant” to enact a statute about vote dilution even though Congress did not do so explicitly. In truth, our method of construing §2 has been only little better than that, for the only source we have relied upon for the expansive meaning we have given §2 has been the legislative history of the Act.

We first considered the amended §2 in *Thornburg v. Gingles*. Although the precise scope of the terms “standard, practice, or procedure” was not specifically addressed in that case, *Gingles* nevertheless established our current interpretation of the amended section as a provision that addresses vote dilution, and in particular it fixed our understanding that the results test in §2(b) is intended to measure vote dilution in terms of electoral outcomes. See *id.*, at 93 (O’CONNOR, J., concurring in judgment) (stating that *Gingles* made electoral results the “linchpin” of vote dilution claims). In reaching its interpretation of §2, the *Gingles* Court rejected the argument advanced by the United States as *amicus curiae* that §2(b)'s test based on an equal “opportunity . . . to participate in the political process and to elect representatives” suggested a focus on nothing more than securing equal access to the political process, not a focus on measuring the influence of a minority group's votes in terms of electoral outcomes. See Brief for United

HOLDER v. HALL

States as *amicus curiae* in *Thornburg v. Gingles*, O. T. 1985, No. 83-1968, pp. 7-19. That understanding of §2 is, of course, compatible with the interpretation I have set out above.

In approaching §2, the *Gingles* Court, based on little more than a bald assertion that “the authoritative source for legislative intent lies in the Committee Reports on the bill,” 478 U. S., at 43, n. 7, bypassed a consideration of the text of the Act and proceeded to interpret the section based almost exclusively on its legislative history.²⁸ It was from the legislative history

²⁸In offering two citations to support the sweeping proposition that Committee Reports provide the authoritative source for legislative intent, *Gingles* plainly misread the import of our prior decisions. Far from giving an unqualified endorsement of Committee Reports as a guide to congressional intent, the Court in *Garcia v. United States*, 469 U. S. 70 (1984), merely indicated that, when resort to legislative history is necessary, it is only Committee Reports, not the various other sources of legislative history, that should be considered. See *id.*, at 76. The Court, however, carefully repeated Justice Jackson's admonition that “[r]esort to legislative history is only justified where the face of the [statute] is inescapably ambiguous.” *Id.*, at 76, n. 3 (quoting *Schwegmann Bros. v. Calvert Distillers Corp.*, 341 U. S. 384, 395 (1951) (concurring opinion)). Similarly, in *Zuber v. Allen*, 396 U. S. 168 (1969), we considered the reliability of Committee Reports only as a relative matter in comparing them to statements made by individual Congressmen during floor debates. See *id.*, at 186.

Even if I agreed with Justice Jackson that resort to legislative history is permissible when the text of a statute is “inescapably ambiguous,” I could not agree with the use the Court has made of legislative history in interpreting §2. I think it is clear, first, that in interpreting §2 the Court has never undertaken any inquiry into the meaning of the plain language of the statute to determine

HOLDER v. HALL

that the Court culled its understanding that §2 is a provision encompassing claims that an electoral system has diluted a minority group's vote and its understanding that claims of dilution are to be evaluated based upon how closely electoral outcomes under a given system approximate the outcomes that would obtain under an alternative, undiluted norm. See, e. g., *id.*, at 43-51.

Contrary to the remarkable “legislative history first” method of statutory construction pursued in *Gingles*, however, I had thought it firmly established that the “authoritative source” for legislative intent was the text of the statute passed by both houses of Congress and presented to the President, not a series of partisan statements about purposes and objectives collected by congressional staffers and packaged into a Committee Report. “We have stated time and again that courts must presume that a legislature says in a statute what it means and means in a statute what it says there.” *Germain*, 503 U. S., at ___ (slip op., at 5). See also *United States v. Ron Pair Enterprises, Inc.*, 489 U. S. 235, 241-242 (1989); *Oneale v. Thornton*, 6 Cranch 53, 68 (1810). Nevertheless, our analysis in *Gingles* was marked conspicuously by the absence of any attempt to pursue a close reading of the text of the Act. As outlined above, had the Court addressed the text, it would have concluded that the terms of the Act do not address matters of vote “dilution.”

Moreover, the legislative history of §2 itself, and the Court's use of it in *Gingles*, aptly illustrate that legislative history is often used by this Court as “a forensic rather than an interpretive device,” *Wisconsin Public Intervenor v. Mortier*, 501 U. S. 597, 621 (1991) (SCALIA, J., concurring in judgment), and is read selectively to support the result the Court

whether it is ambiguous, and second, that the text of §2 is not riddled with such hopeless ambiguity.

HOLDER v. HALL

intends to achieve. It is well documented in the history of the 1982 amendments to the Act that §2 was passed only after a compromise was reached through the addition of the provision in §2(b) disclaiming any right to proportional representation. See S. Rep. No. 97-417, pp. 2-4 (1982); *id.*, at 94-97 (additional views of Sen. Hatch). But the views of the author of that compromise, Senator Dole, hardly coincide with the gloss the Court has placed on §2.

According to Senator Dole, amended §2 would “[a]bsolutely not” provide any redress to a group of voters challenging electoral mechanisms in a jurisdiction “if the process is open, if there is equal access, if there are no barriers, direct or indirect, thrown up to keep someone from voting or having their vote counted, or registering, whatever the process may include.” 128 Cong. Rec. 14133 (1982). Contrary to the Court's interpretation of the section in *Gingles*, Senator Dole viewed §2 as a provision more narrowly focused on *access* to the processes surrounding the casting of a ballot, not a provision concerned with ensuring electoral *outcomes* in accordance with some “undiluted” norm. See S. Rep. No. 97-417, *supra*, at 193-194 (additional views of Sen. Dole). The legislative history thus hardly provided unambiguous support for the Court's interpretation; indeed, it seems that the Court used what was helpful to its interpretation in the legislative history and ignored what was not. Cf. *Mortier*, *supra*, at 617 (SCALIA, J., concurring in judgment).

Of course, as mentioned above, *Gingles* did not directly address the meaning of the terms “standard, practice, or procedure” in §2(a). The understanding that those terms extend to a State's laws establishing various electoral mechanisms dates to our decision in *Allen*, in which we construed the identical terms in §5 of the Act. But the Court's method of statutory construction in *Allen* was little different from that pursued in *Gingles*, and as the analysis of the text of

HOLDER v. HALL

§5 above demonstrates, it similarly yielded an interpretation in tension with the terms of the Act.

In *Allen*, after noting that §14(c)(1) defined “voting” to include “all action necessary to make a vote effective,” 42 U. S. C. §1973l(c)(1), the Court abandoned any further attempt to construe the text of the Act and went on, instead, to conclude that the “legislative history on the whole supports the view that Congress intended to reach any state enactment which altered the election law of a covered State in even a minor way.” *Allen*, 393 U. S., at 566. Not surprisingly, the legislative history relied upon in *Allen* also displayed the typical flaws that one might expect—it was hardly unequivocal. See *id.*, at 590–591, and n. 9 (Harlan, J., concurring in part and dissenting in part) (noting inconsistencies in the legislative history). Thus, to the extent that *Allen* implicitly has served as the basis for our subsequent interpretation of the terms of §2, it hardly can be thought to provide any surer rooting in the language of the Act than the method of statutory construction pursued in *Gingles*.

Remarkably, thanks to our reliance on legislative history, we have interpreted §2 in such a way that four Members of this Court at one time candidly admitted that “[t]here is an inherent tension [in §2] between what Congress wished to do and what it wished to avoid.” *Gingles*, 478 U. S., at 84 (O’CONNOR, J., concurring in judgment). But our understanding of what Congress purportedly “wished to do”—that is, to allow claims of vote “dilution”—depends solely on a selective reading of legislative history, whereas Congress’ statement of what it “wished to avoid” appears explicitly in §2(b)’s disclaimer of a right to proportional representation. I can see no logical reason to import the “inherent tension” between these two imperatives into the Act, when on its face the statute incorporates only one of two potentially contradictory commands. I would

HOLDER v. HALL

have thought the key to resolving any such conflict between the text and the legislative history obvious: the text of the statute must control, and the text of §2 does not extend the Act to claims of dilution.

Were it our function to interpret and apply Committee Reports or other pieces of legislative history, rather than Acts of Congress, I might conclude that we had made the best of a bad situation in interpreting §2 of the Voting Rights Act, and that the quagmire that is §2 was Congress' creation, not our own. It is apparent, however, that we have arrived at our current understanding of the Act, with all of its attendant pitfalls, only by abandoning proper methods of statutory construction. Our errors in method in past cases ordinarily might not indicate a need to forsake an established line of precedent. But here they have produced an "inherent tension" between our interpretation of §2 and the text of the Act and have yielded a construction of the statute that, as I discuss below, is so unworkable in practice and destructive in its effects that it must be repudiated.

"*Stare decisis* is not an inexorable command," *Payne v. Tennessee*, 501 U.S. 808, 828 (1991). Indeed, "when governing decisions are unworkable or are badly reasoned, this Court has never felt constrained to follow precedent." *Id.*, at 827 (internal quotation marks omitted). The discussion above should make clear that our decision in *Gingles* interpreting the scope of §2 was badly reasoned; it wholly substituted reliance on legislative history for analysis of statutory text. In doing so, it produced a far more expansive interpretation of §2 than a careful reading of the language of the statute would allow.

Our interpretation of §2 has also proved unworkable. As I outlined above, it has mired the federal courts in an inherently political task—one that

HOLDER v. HALL

requires answers to questions that are ill-suited to principled judicial resolution. Under §2, we have assigned the federal judiciary a project that involves, not the application of legal standards to the facts of various cases or even the elaboration of legal principles on a case-by-case basis, but rather the creation of standards from an abstract evaluation of political philosophy.

Worse, our interpretation of §2 has required us to distort our decisions to obscure the fact that the political choice at the heart of our cases rests on precisely the principle the Act condemns: proportional allocation of political power according to race. Continued adherence to a line of decisions that necessitates such dissembling cannot possibly promote what we have perceived to be one of the central values of the policy of *stare decisis*: the preservation of “the actual and perceived integrity of the judicial process.” *Payne, supra*, at 827.

I have endeavored to explain above that the core of any vote dilution claim is an assertion that the plaintiff group does not hold seats in the proportion that it should.²⁹ There is no logical way to avoid reliance on a simple ratio in evaluating such a claim. And allocation of seats in direct proportion to the minority group's percentage in the population provides the most logical ratio to apply as an “undiluted” norm. But §2 makes it clear that the Act does not create a right to proportional representation,

²⁹I assume for purposes of the analysis here that the measure of effective votes is control of seats. That is precisely the measure the Court has applied, both in the past, see, e. g., *Gingles*, 478 U. S., at 46-51; *id.*, at 93, 99 (O'CONNOR, J., concurring in judgment) (noting that the Court had made electoral results the “linchpin” of dilution claims), and today, see *Johnson v. De Grandy, post*, at 17 (equating “political effectiveness” with control of majority-minority districts).

HOLDER v. HALL

and thus dictates that proportionality should not provide the rule of decision for §2 claims. See *supra*, at 40, and n. 26. Nevertheless, despite the statutory command, in deciding claims of vote dilution we have turned to proportionality as a guide, simply for lack of any better alternative.

No formulation of the test for evaluating vote dilution claims has ever dispensed with the inevitable need to consult a mathematical formula to decide a case. The factors listed in *White v. Regester*, 412 U. S., at 766-767, resurrected in the Senate Report on the 1982 amendments to §2, see S. Rep. No. 97-417, pp. 28-29 (1982), and finally reincorporated into our decision in *Gingles*, see 478 U. S., at 44-45, although praised in our cases as a multi-faceted test ensuring that vote dilution is determined based on the “totality of circumstances,” in reality provide no rule for deciding a vote dilution claim based on anything other than a numerical principle.

In *Gingles*, we condensed the import of these “factors” into a formula stating that the “essence” of a vote dilution claim under §2 is that “a certain electoral law, practice, or structure interacts with social and historical conditions to cause an inequality in the opportunities enjoyed by black and white voters to elect their preferred representatives.” *Id.*, at 47. But it should be apparent that whether an electoral practice does or does not reduce the ability of a numerical minority to control the election of representatives can be determined wholly without reference to “social and historical conditions.” The dilutive effects of various electoral procedures are matters of mathematics. The “social and historical conditions” “interact” with the election mechanism, and thus are relevant in a vote dilution case, only to the extent that they are important for establishing that the minority group does in fact define a distinct political interest group that might assert that its vote has been diluted by the mechanism at issue. Such

HOLDER v. HALL

social and historical considerations, however, cannot supply the answer to the ultimate question whether the group's vote has been *diluted*.

In reality, the list of *White* factors provides nothing more than just that: a list of possible considerations that might be consulted by a court attempting to develop a *gestalt* view of the political and racial climate in a jurisdiction, but a list that cannot provide a rule for deciding a vote dilution claim. Take, for example, a case in which a district court determines that a minority group constituting 34% of the population in a certain jurisdiction has suffered discrimination in the past, that the group currently bears the effects of that discrimination, and that there has been a history of racial campaigning in the jurisdiction. Cf. *White, supra*, at 766-767. How can these facts possibly answer the question whether the group's votes have been diluted if the group controls two rather than three seats in a 10-member governing body? Will the answer to the ultimate question change if the first two factors are found, but the third is not? Obviously, the various "factors," singly or in any combination, cannot provide a principle for determining the result. What one must know to decide the case is whether 20% of the seats in the government is sufficient to reflect "undiluted" voting strength, or if 30% should be required.

Of course, as suggested above, the *White* factors may be relevant to determining as a threshold matter whether the minority group is a distinct political group that should be able to assert a claim of dilution. But after *Gingles*, the inquiry into whether race defines political interest effectively has been boiled down to the weakened test for minority "political cohesiveness" and majority bloc voting embodied in the second and third *Gingles* preconditions. See 478 U. S., at 51. Once a plaintiff group establishes that it is mathematically possible for it to control another seat (that is, that it satisfies

HOLDER v. HALL

the first *Gingles* precondition of size and geographic compactness), see *id.*, at 50, and that it is a distinct political group (that is, that it can show political cohesion and majority bloc voting), the only question remaining in the vote dilution claim is whether the current number of seats is the proper number or not. The other *White* factors have become essentially superfluous. They may be dutifully intoned by courts performing the empty ritual of applying the “totality of circumstances” test, but they can provide no guidance concerning whether the current allocation of seats constitutes “dilution.” Cf. *Gingles, supra*, at 92–93 (O’CONNOR, J., concurring in judgment) (suggesting that the basic contours of a dilution claim require no reference to most of the *White* factors).

In short, it should be clear that the factors listed in *Gingles*—in their various incarnations and by whatever names they are known—are nothing but puffery used to fill out an impressive verbal formulation and to create the impression that the outcome in a vote dilution case rests upon a reasoned evaluation of a variety of relevant circumstances. The “totality of circumstances” test outlined in *Gingles* thus serves to obscure the inherent conflict between the text of the Act and an underlying reliance on proportionality.

The resort to proportionality in our cases should hardly come as a surprise. Before §2 was amended in 1982, and thus before the Act explicitly disavowed a right to proportional representation, some members of the Court recognized the inevitable drift toward proportional representation that would occur if the test outlined in *White* were used to evaluate vote dilution claims. As Justice Stewart, writing for four Members of the Court, observed, the factors listed in *White* amounted to little more than “gauzy sociological considerations,” and it did not appear that “they could, in any principled manner, exclude the claims of any discrete political group that happens, for whatever reason, to elect fewer of its

HOLDER v. HALL

candidates *than arithmetic indicates it might.*" *Bolden*, 446 U. S., at 75, n. 22 (emphasis added). Indeed, Justice Stewart was correct in concluding that "the putative limits [imposed by the *White* factors] are bound to prove illusory if the express purpose informing their application would be," as our vote dilution cases have assumed, "to redress the inequitable distribution of political influence." *Ibid.* (internal quotation marks omitted).

In fact, the framework established by this Court for evaluating vote dilution claims in *Gingles* was at its inception frankly, and in my view correctly, labeled as setting a rule of roughly proportional representation. See *Gingles, supra*, at 91, 93, 97-99 (O'CONNOR, J., concurring in judgment). Nothing has happened in the intervening years to change the basic import of the *Gingles* test. Yet we have continued to apply the same *Gingles* framework, see, e. g., *Grove v. Emison*, 507 U. S. ___ (1993), all the while suggesting that we are pursuing merely a totality of the circumstances test.

In another case decided today, the Court reconfirms the unstated centrality of proportional results in an opinion that demonstrates the obfuscation that must come to characterize our Voting Rights Act rulings if we continue to entertain dilution claims while pretending to renounce reliance on proportionality as a rule of decision. In *Johnson v. De Grandy, post* p. ___, the Court assures us that proportionality does not provide the principle for deciding vote dilution claims. *Post*, at 2, 20-24. Rather, the result in each case must depend on a searching inquiry into the ever-nebulously-defined "totality of circumstances." *Post*, at 2.

But after the *Gingles* preconditions have been established, *post*, at 11, and after *White* factors such as a history of discrimination have been found, see *post*, at 16, where does the Court turn for a deciding principle to give some meaning to these multifarious

HOLDER v. HALL

facts, which taken individually would each appear to count in favor of a finding of vote dilution? Quite simply, the Court turns to proportionality: “Treating equal political opportunity as the focus of the enquiry, we do not see how these district lines, apparently providing political effectiveness [that is, majority-minority districts] in proportion to voting-age numbers, deny equal political opportunity.” *Post*, at 17. See also *post*, at 16 (noting that in assessing “dilutive effect,” the “pertinent features” of the districting system at issue “were majority-minority districts in substantial proportion to the minority’s share of voting-age population”); *post*, at 2 (O’CONNOR, J., concurring) (the Court’s central teaching in *De Grandy* “is that proportionality—defined as the relationship between the number of majority-minority voting districts and the minority group’s share of the relevant population—is *always* relevant evidence in determining vote dilution”). JUSTICE O’CONNOR’s comment about the Court’s holding in *Davis v. Bandemer*, 478 U. S. 109 (1986), is equally applicable to the course pursued in *De Grandy* today: “[The Court’s decision] ultimately rests on a political preference for proportionality—. . . a conviction that the greater the departure from proportionality, the more suspect an apportionment plan becomes.” 478 U. S., at 159 (O’CONNOR, J., concurring in judgment).

To be sure, the *De Grandy* Court repeatedly declares that proportionality is not a defense to a vote dilution claim. See *post*, at 20–24. That, of course, must be the stated rule if we are not to abandon openly the explicit disclaimer enacted by Congress in §2(b). But given the Court’s equivocation—proportionality is still *always relevant*—and the Court’s ultimate analysis, such assurances ring hollow. The Court decides the question of dilution based upon proportionality. And it is apparent from the reasons the Court gives for rejecting maximization as a rule for decision that

HOLDER v. HALL

proportionality will drive results in future dilution cases as well.

Consider, for example, the hypothetical rehearsed by the Court concerning a jurisdiction with a 10-member elected body and a 40% minority voting population. See *post*, at 19. Assume that as currently constituted the districting scheme creates four majority-minority districts. Even if it is established in this hypothetical jurisdiction that all of the *Gingles* factors have been proved (as was found in *De Grandy*), and that there are both a history of discrimination and continuing discrimination (as was found in *De Grandy*), can it be seriously contended that the minority group can succeed, under any combination of facts, in bringing a §2 challenge to require the creation of the mathematically possible seven majority-minority districts? The Court recognizes that it would be “absurd” to think that §2 would allow such a result. That, after all, would give the group “effective political power 75 percent above its *numerical strength*”—that is, above its proportion in the population. *Post*, at 20 (emphasis added). But if it is absurd to give the members of the group seven seats, why is it not equally ridiculous to give them six, or five? Or, indeed, anything beyond the four that would secure them seats in proportion to their numbers in the population?

If it is absurd to give members of the group seven seats, that is because, as the Court tacitly acknowledges, we assume that seats in accord with “numerical strength” will ensure the group “equal” “political effectiveness.” Thus, deliberately drawing districts so as to give, under the assumptions of the hypothetical, 40% of the population control over 50% of the seats, while leaving 60% of the population with control of a similar 50% of the seats, would seem to us unfair. Greater deviations from proportionality may appear more patently “absurd” than lesser, but the dividing line between what seems fair and what

HOLDER v. HALL

does not remain the same. The driving principle is proportionality.³⁰

Few words would be too strong to describe the dissembling that pervades the application of the “totality of circumstances” test under our interpretation of §2. It is an empty incantation—a mere conjurer’s trick that serves to hide the drive for proportionality that animates our decisions. As

³⁰Of course, throughout this discussion concerning the Court’s inevitable resort to proportionality, I have assumed that effective votes will be measured in terms of control of seats. See n. 29, *supra*. As JUSTICE O’CONNOR suggests in her opinion in *De Grandy*, if we were to measure the effectiveness of votes not simply in terms of numbers of seats, but in terms of some more amorphous concept of “access to the political process,” there would be no need to make proportionality “dispositive.” See *De Grandy*, *post*, at 2 (O’CONNOR, J., concurring). Cf. *White*, 412 U. S., at 765–766. But *Gingles* made control of seats the determining factor in dilution claims; that is the measure that has been applied in cases under *Gingles*, and it remains the measure applied in practice in the cases handed down today. In my view, it is unrealistic to think that the Court will now reverse course and establish some broader understanding of “political effectiveness” under the “totality of circumstances” test, after it consistently has pursued a measure of effective voting that makes electoral results the “linchpin” of dilution claims. See 478 U. S., at 93 (O’CONNOR, J., concurring in judgment).

Indeed, any change in course is made more unlikely by one very practical consideration. As the Court’s decision in *De Grandy* perhaps suggests, measuring political effectiveness by any method other than counting numbers of seats can rapidly become a wholly unmanageable task. As I suggested above, see n. 6, *supra*, one of the reasons the Court seized upon control of seats as a measure of effective political participation is

HOLDER v. HALL

actions such as that brought in *Shaw v. Reno*, 509 U. S. ___ (1993), have already started to show, what might euphemistically be termed the benign “creation of majority-minority single-member districts to enhance the opportunity of minority groups to elect representatives of their choice” might also more simply and more truthfully be termed “racial gerrymandering.” Similarly, what we might call a “totality of circumstances” test to determine whether an electoral practice “interacts with social and historical conditions to cause an inequality in the opportunities enjoyed by black and white voters to elect their preferred representatives,” *Gingles*, 478 U. S., at 47, might more accurately be called a test for ensuring proportional electoral results according to race. Cf. *id.*, at 97 (O’CONNOR, J., concurring in judgment).

In my view, our current practice should not continue. Not for another Term, not until the next case, not for another day. The disastrous implications of the policies we have adopted under the Act are too grave; the dissembling in our approach to the Act too damaging to the credibility of the federal judiciary. The “inherent tension”—indeed, I would call it an irreconcilable conflict—between the standards we have adopted for evaluating vote dilution claims and the text of the Voting Rights Act would itself be sufficient in my view to warrant overruling the interpretation of §2 set out in *Gingles*. When that obvious conflict is combined with the destructive effects our expansive reading of the Act has had in involving the federal judiciary in the project of dividing the Nation into racially segregated electoral districts, I can see no reasonable alternative to abandoning our current unfortunate understanding of

simply that control of seats provides the “most easily measured indicia of political power.” *Bandemer*, 478 U. S., at 157 (O’CONNOR, J., concurring in judgment).

the Act.

Stare decisis is a powerful concern, especially in the field of statutory construction. See *Patterson v. McLean Credit Union*, 491 U. S. 164, 172 (1989). See also *Fogerty v. Fantasy, Inc.*, 510 U. S. ___, ___ (1994) (slip op., at 5) (THOMAS, J., concurring in judgment). But “we have never applied *stare decisis* mechanically to prohibit overruling our earlier decisions determining the meaning of statutes.” *Monell v. New York City Dept. of Social Services*, 436 U. S. 658, 695 (1978). *Stare decisis* should not bind the Court to an interpretation of the Voting Rights Act that was based on a flawed method of statutory construction from its inception and that in every day of its continued existence involves the federal judiciary in attempts to obscure the conflict between our cases and the explicit commands of the Act. The Court has noted in the past that *stare decisis* “is a principle of policy,” *Payne*, 501 U. S., at 828 (quoting *Helvering v. Hallock*, 309 U. S. 106, 119 (1940)), and it “is usually the wise policy, because in most matters it is more important that the applicable rule of law be settled than it be settled right.” 501 U. S., at 827 (quoting *Burnet v. Coronado Oil & Gas Co.*, 285 U. S. 393, 406 (1932) (Brandeis, J., dissenting)). I cannot subscribe to the view that in our decisions under the Voting Rights Act it is more important that we have a settled rule than that we have the right rule. When, under our direction, federal courts are engaged in methodically carving the country into racially designated electoral districts, it is imperative that we stop to reconsider whether the course we have charted for the Nation is the one set by the people through their representatives in Congress. I believe it is not.

I cannot adhere to the construction of §2 embodied in our decision in *Thornburg v. Gingles*. I reject the assumption implicit in that case that the terms “standard, practice, or procedure” in §2(a) of the Voting

91-2012—CONCUR

HOLDER v. HALL

Rights Act can be construed to cover potentially dilutive electoral mechanisms. Understood in context, those terms extend the Act's prohibitions only to state enactments that regulate citizens' access to the ballot or the processes for counting a ballot. The terms do not include a State's or political subdivision's choice of one districting scheme over another. The terms certainly do not include, as respondents would argue, the size of a local governing authority.

For the foregoing reasons, I agree with the Court's conclusion that the size of a governing body is not subject to challenge under §2 of the Voting Rights Act. I therefore concur in the Court's judgment reversing the judgment below and remanding for consideration of respondents' constitutional claim of intentional discrimination.
