

## **MR-MANUFACTURER**

Steel framed drywall systems are marketed by United States Gypsum Company, a leader in construction materials and building systems for 90 years.

## **PP-PRODUCT PRESENTATION**

Steel framed drywall systems include studs and runners of 20-, 22- and 25-ga. steel. Because all steel framing and components are marketed by U.S. Gypsum, users get the benefits of unit responsibility, as well as single-source convenience and technical assistance. ST studs and CR runners are available in 1-5/8", 2-1/2", 3-5/8", 4" and 6" depths. The ST member is nestable so that two members fit together in the space of one. ST studs have keyhole-shaped punch out 24" o.c., except for the spacing of the top two holes which may vary. These keyholes aid in electrical/plumbing installation and accommodate cold-rolled channels, when required. ST members are available in 8', 9', 10', 12' and 16' lengths, depending on size and gauge. Custom lengths also available. CR runners available in standard 10' lengths and some non-standard lengths.

## **UA-USSES, APPLICATIONS**

Use for commercial, institutional, industrial and residential new construction and modernization, for load bearing applications. 20-ga. drywall studs and runners may also be used for select curtain wall applications.

## **AI-ASSEMBLY, INSTALLATION**

Install per project specifications.

## **MF-MATERIALS, FINISHES**

ST Style Steel Studs and CR Style Runners: 1-5/8", 2-1/2", 3-5/8", 4", 6": (20-, 22-, 25-ga); ST members available in 8', 9', 10', 12', 16' and custom lengths; CR members available in 10' and some custom lengths.

## **CS-COATINGS, SURFACING**

Follow project specifications.

## **TS-TECHNICAL SUPPORT**

For further information on specifications, design criteria and product performance, order catalog *SA-923 Drywall/Steel Framed Systems* by calling toll-free 1-800-USG-4YOU (874-4968).

## **CC-CODES, CERTIFICATION**

Non load-bearing interior steel framing systems meet or exceed all ASTM and AISI industry standards and all major code authorities.

## **OM-OPERATION, MAINTENANCE**

Contact local U.S. Gypsum Company Sales Office with any questions about maintenance and replacement recommendations.
