

Form Liners & Precast Molds

COBBLECRETE® INTERNATIONAL, INC.

is the innovator in concrete texturing mats, turbomat rollers, elastomeric form liners and custom precast molds. We offer over 120 styles to meet every texturing and stamping need. Our tools offer the user a variety of elegant and beautiful patterns which give the look of stone, brick, tile and wood to concrete.

No longer do you have to pay the exorbitant prices charged by those franchise companies. COBBLECRETE makes it easy for any concrete contractor to put down sophisticated and elegant textured concrete. This means that you can use your regular concrete contractor, the one that you know, trust and doesn't charge a fortune for his work.

Cobblecrete® Texture Mats, Rollers, and Form Liners are manufactured to the highest standards using the highest quality abrasive resistant polyurethane available.

FORM LINERS are unique tools that make it easy to pour attractive detail into a structure (retaining walls, sound barriers, foundation walls, etc.), with very little added expense. Form liners are ideal for texturing tilt-up, cast in place or precast architectural concrete. Cobblecrete Form Liners attach to the form work and the liners are stripped, leaving a beautiful textured surface.

PRECAST MOLDS are available in a large variety of areas from custom fence panels and columns to small balusters, railings, quoins and keystones. We offer many stock items and can build to meet the customer specifications.

This unique process allows the user to construct beautiful rock, stone, brick or virtually any textured fence panel and fence columns. These molds can cast in place or precast beforehand.

Please call for more information on pattern designs, training video & distributor locations. 1-800-798-5791.
