

Cushioned Seamless Flooring Systems

Poured in Place Safety Surfacing

In today's world, situations are created by need, demand and vision. Manufacturers must have the ingenuity and aggressiveness to meet the demands and needs of the consumer now and into the future.

The manufacturer of today must be on the technical cutting edge and provide products which are unique in design, environmentally safe and meet specific needs. **Vitricon** is such a manufacturer and **VITRITURF** is the product.

Vitricon has been manufacturing highly technical specialty coatings for the construction and recreation industries since 1955. **Vitricon** has exhibited a long history of innovation and leadership in the coatings and surfaces arena. From the original Vitreous Wall Systems and its modern day multicolored coating system to **VITRITURF**, cushioned; seamless flooring surface systems... **Vitricon** continues to exhibit its commitment to innovation in providing coatings for today and into the next century.

VITRITURF utilizes shredded recycled rubber tire combined with a highly sophisticated polyurethane resin to provide cushioned flooring systems for playgrounds, waterparks, gymnasiums, weightlifting rooms, running tracks, tennis courts, pro shops, child care facilities, equine facilities or wherever a cushioned seamless surfacing is required. **VITRITURF** is offered in three distinct types of systems to provide for its many versatile applications:

VITRITURF Playground System (VPS) - A composition of recycled rubber, man-made pigmented rubber, and a unique polyurethane binder. Together, this system is troweled to a seamless, decorative, safety surfacing.

VITRITURF Multi-purpose system (VMS) - A unique pigmented, seamless surface available in a porous and non-porous version and offering a "soft feel" with non-slip characteristics.

VITRITURF Track System (VTS) - A highly-technical, advanced running surface utilized at many schools and universities throughout the United States and the world.

Vitricon, a leader in the manufacture of specialty coatings and surfaces since 1955, continues to excel in innovating and developing premier surfaces such as the **VITRITURF** Cushioned Seamless Surfacing Systems.

Primary among **Vitricon's** strengths is its quality control. **Vitricon's** name is synonymous with meticulous quality, ingenuity and careful attention to detail.

Our international network of representatives are anxious to help you with your specific needs.
