

PROFICIENT TRACK & INTERLOCKING CURB SYSTEM

In the days of cost conscious, environmentally sensitive and durable construction, the architects and contractors of today are faced with many decisions. All are trying to produce a structure that is useful and attractive for the best price. Their solution? A Red Dog Athletic Track produced by **RED DOG TRACKS, INC.** (RDT). This state-of-the-art product is environmentally sensitive, cost efficient and virtually maintenance free. RDT track material is used for Athletic RUNNING TRACKS, Baseball WARNING TRACKS, and JOGGING-WALKING TRACKS for schools or community parks. RDT manufactures an INTERLOCKING PRECAST CONCRETE CURB SYSTEM that enables you to save time and money on construction with improved quality. A RDT track system produces a beautiful red finish that will last longer with less maintenance. Ultra-Violet rays and Freeze-Thawing temperatures do not affect the durability of the RDT Cinder Track material. RDT has 50 years experience, a solid reputation as a leader in quality, innovation, and service, and is nationally recognized as “The Environmentally Correct and Cost Efficient RDT Track System.” The Natural Choice.
