

Playbound Turftop & Soccer Turf 2000

Playbound Turftop

Playbound's heavy grade synthetic turf, resilient shock pad and powerful urethane adhesive combine to form the Playbound Turftop system. This layered combination of durable components maintains its original look for many years and can withstand the punishment of inclement weather and active play as well as any system available.

Soccer Turf 2000

An ideal surface for soccer as well as a comfortable all purpose surface for a variety of play. A 1-1/4" thick urethane foam pad is permanently fused to the turf backing.
