MAKING IT YOUR OWN

Kugel, Disc and base stone may be customized with engravings of corporate logos or decorative motifs.

Kugel: The map of the earth is a familiar design naturally suited to a turning sphere. Many other possibilities arise, such as engravings to suggest a golf ball, baseball or basketball – to add distinction to a country club or sports arena.

Disc: Pyramid, cone, rhombus – take your choice – a representation of the human body or favorite animal, your company product or instantly recognized symbol, a family crest or a free-form design that now lives solely in your imagination. Let your ideas flow. We'll put a spin on them.

Base Stone: The style, tone and texture of the base stone may be rough-hewn and rustic, or sleek and sophisticated, or asymmetrical and whimsical. It's a monument to your creative ideas.

Colors: Quarried from mines around the world, the granites range in color from the deepest ebony to various hues of red, blue, green, gray and white. Sculpture and base may be specified in contrasting or complementary colors. The needs of the customer, the style and scale of its environment – and the imagination of its designer – dictate the aesthetic details of each floating granite fountain.

LOOK INTO ITS EYE...

Spend some time with a Kugel or a Floating Granite Disc, and you'll soon find yourself pressing your palms against it, running your hands over the sleek surface, and generally falling under its spell. The mechanics of the fountain and the movement of the hard, cool swirling granite are mesmerizing. Add the texture and sound of flowing water, and you've created quite an experience for yourself. What is true for you is also true for your clients – and your clients' clients.

Photo caption:

Keep it lively. The Disc allows all manner of geometric shapes, lifelike forms or abstract designs – in granite, bronze or polished stainless steel – to play with water in a thousand different ways.
