Ameristar Color Chain Link Fencing

Ameristar Fence Products, an American owned and operated manufacturer in Tulsa, Oklahoma is recognized nationally as the leader in alternative fence systems.

Ameristar Color Chain Link Fence Framework was designed and developed to answer the need for a durable, attractive and affordable color fence system by architects, contractors, developers and specifying engineers. Ameristar uses state-of-the-art technology to produce a quality, high tensile strength, welded round tubing. The high strength fence tubing, when coated with the new "Permacoat" color powder coating system, results in a chain link framework product of unsurpassed quality.

Permacoat™ when compared to other systems, is highlighted by its double layer electrostatic powder coat finish (**the tubing is actually powder coated twice**). The base coat is a zinc rich epoxy powder (the first application of this process by a fencing manufacturer) which tenaciously clings to the galvanized substrate and is known for its outstanding corrosion resistance. The final or topcoat is a thermosetting "no-mar" polyester powder coat with UV resistance which provides a beautiful color finish for a lifetime of maintenance free enjoyment.

Ameristar Color Chain Link Fence Framework provides exceptional security and protection in commercial, industrial, recreational and residential fencing applications.

Nationwide Distribution

Distribution of Ameristar Color Chain Link Fence Framework is achieved nationwide through a network of authorized distributors. Contact Ameristar (1-800-321-8724) for the distributor nearest to you.

Chain Link Fabric

The following types of chain link fabric are readily available through our distribution network:

- Extruded
- Extruded and Bonded
