

STANLEY GATE OPERATOR ACCESSORIES

SECURITY SYSTEM ACCESSORIES

The design of your security system and the accessories you choose will depend upon several considerations particular to your situation. Stanley Accessories are specifically designed and tested to function with Stanley Gate Operators. Make sure your system incorporates Stanley specification accessories.

Transmitters

Mini, Part No. 24910

Single-Channel, Part No. 24911

Two-Channel, Part No. 24904

Four-Channel, Part No. 24905

Stanley digital radio transmitters offer 1,024 possible codes that can be changed at any time. The transmitters are powered by a 9-volt battery (12-volt for the Mini model) which is included. The two and four channel transmitters feature completely independent code settings which control separate receivers from one transmitter. They're perfect for operating multiple garage door/gate operator transmitter combinations. Separate radio receivers required.

Super Digital Radio Receiver

Part No. 203203

Our original radio receiver includes a coaxial socket antenna for clear reception. Especially suited for remote gate operation, the 300101 kit includes the mounting bracket, antenna and 15-foot coax cable.

Intercoms

Part No. 24760

Offering the convenience and security of point-to-point intercommunication, our complete system includes the outdoor call station on a gooseneck stand and indoor call station. There is also a keyswitch in the face of the outdoor station for local control of your gate.

Loop Detector

Part No. 4101725 (Fail Secure)

Provides the industry's most advanced features. Compact size and self tuning make installation easy. The detector has a loop diagnostics feature and selectable sensitivity levels to improve performance. Fail Safe is also available.

WARNING: Place controls far enough from the gate so that a user cannot touch the gate while operating the controls. However, the controls should be placed where the user has full view of the gate while operating.
