ENTRY ACCESSORIES

Digital Keyless Entry

Digital Keyless Entry Plus

Part No. 24974

High Performance

The Stanley Digital Keyless Entry Plus design includes plenty of code handling ability - up to 2,500 individual codes. It also includes a front lighted panel design. Push-buttons are highly visible, even on the darkest night. Positive-action metal keys are sealed against moisture.

Security

Access code length can be set from 1 to 7 digits. Up to 10 million code combinations possible in the 7-digit mode. The Stanley Digital Keyless Entry Plus permits precise control of the user's access activities. Access codes can be individually voided or validated. Features also include timed anti-passback and time usage restrictions.

Easy To Install

The system requires only minimum wiring for installation, resulting in major cost savings. The unit can operate on a wide range of voltages, which minimizes power problems. An optional pedestal mount is available.

Card Readers

Card Reader Plus

Part No. 24976

High Performance

The Stanley Card Reader Plus design allows for higher throughput at busy entrances because the entire card is read the instant it's fully inserted - even if it's wet or dirty. Traffic snarls and lines are greatly reduced since users are not required to smoothly insert or swipe their cards.

Security

Access cards can be individually voided or validated to control access and can be time restricted by a system disable feature. The anti-passback feature prevents unauthorized sharing of cards. Cards from one facility will not work elsewhere.

Easy To Install

The system requires only minimal wiring for installation, resulting in major cost savings. The unit can operate on a wide range of voltages, which minimizes power problems. A special bypass mode simulates normal operation in the event service is needed. An optional pedestal mount is available.

A. Simple to use hand-held Fiber Optic Programmer makes it easy to void and validate

cards without ever opening the reader.
