FairWeather

For over fifteen years Urban Systems, Inc. has been manufacturing FairWeather site furnishings to meet the needs of our customers worldwide. We provide beauty, craftsmanship, and durability with our site furnishings. Whether you order from our standard product line or you have a custom project, you know it will be done with pride and attention to detail.

Site Furnishing & Accessories

FairWeather provides fine site furnishings for public places.

Our Plaza series benches and related trash receptacles feature welded steel construction finished with an electrostatically applied powder coat.

We use ductile iron for our castings for maximum durability.

Our wood products are available in a number of different species. Western red cedar, Douglas fir, redwood, and (pau lope), are used most frequently. Other woods available on request.

We offer 13 standard powder coating colors with a wide variety of custom colors available.

CUSTOM

While we take great pride in our standard products, we especially enjoy the challenge of creating furnishings to meet special needs. We can manufacture to your specifications, or work with you through the design process as well.

Our construction method of laminating curved benches gives us the ability to create bench forms that will match curved surfaces.

For complete product information, please call 1-800-323-1798 to request the name of your local sales representative.
