Specifications and Technical Data

ADVANTAGES OF SURE-LOC ALUMINUM EDGING

Landscape Architects have realized the excellent product performance and benefits of aluminum edging, and Sure-loc Aluminum Edging makes the decision of which brand of aluminum edging to specify simple. Most landscape projects have a budget to work within and the goal of using the best quality products affordable. With this in mind, Sure-loc created a superior product at an affordable price. Allow us to show you the difference by quoting your next project that requires edging. When specifying or inquiring about our products, please use our toll free number 800-SURE-LOC (787-3562).

PRODUCT APPLICATIONS

1/8" x 4" (3.2 mm x 102 mm) - Used primarily for residential and light commercial applications around planting beds and as a paver restraint for patios or walkways. Works best where flowing curves are needed.

3/16" x 4" (4.8 mm x 102 mm) - Used primarily for commercial, industrial, and institutional facilities for planting beds, paver restraints, walking trails, running tracks, asphalt borders, and maintenance strips. Works well for both curves and long, straight runs.

1/8" x 5.5" (3.2 mm x 140 mm) - Used primarily for residential and light commercial applications where planting beds may require additional depth.

3/16" x 5.5" (4.8 mm x 140 mm) - Used primarily for commercial, industrial, and institutional facilities where the additional depth and strength is needed. Excellent for long, straight runs, yet forms curves with ease.

FINISHES

Sure-loc Aluminum Edging is available in a variety of finishes and can be special ordered in almost any color and finish. When choosing a colored finish, we strongly recommend using an anodized finish for long term durability.

STANDARD FINISHES

Mill Finish (Natural Aluminum)

Black Anodized

Other finishes available by request

ALUMINUM ALLOY

Edging - Extruded 6063, T6 Hardness
